

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

HAWAIIAN INVESTIGATION.

Part 3.

EXHIBITS, MEMORIALS, PETITIONS, AND LETTERS

PRESENTED TO THE

COMMITTEE ON PACIFIC ISLANDS AND PORTO RICO,
UNITED STATES SENATE.

UNDER

SENATE RESOLUTION NO. 36, FIRST SESSION FIFTY-SEVENTH CONGRESS, OF
DATE JUNE 5, 1902, AUTHORIZING AND DIRECTING THE COMMITTEE
ON PACIFIC ISLANDS AND PORTO RICO TO INVESTIGATE
THE GENERAL CONDITIONS OF THE ISLANDS OF
HAWAII, AND THE ADMINISTRATION
OF THE AFFAIRS THEREOF.

WASHINGTON:
GOVERNMENT PRINTING OFFICE.
1903.

HAWAIIAN INVESTIGATION.

EXECUTIVE CHAMBER, TERRITORY OF HAWAII,
Honolulu, September 9, 1902.

The Hon. JOHN H. MITCHELL,
*Chairman subcommittee of the Senate Committee
on Pacific Islands, etc., Honolulu, T. H.*

SIR: It is with great satisfaction that I have received your letter on behalf of the subcommittee of the Senate Committee on Pacific Islands and Porto Rico, commissioned to investigate the general conditions of the islands of Hawaii and the administration of the affairs thereof, inviting me to confer with the committee upon the general question of legislation in the interest of the people and government of the Territory of Hawaii.

I feel that the presence of your committee in these islands for the purpose of investigating matters relating to this subject can not fail, in the acquisition of information to be laid before Congress, of resulting in important benefits to the Territory.

The subject of the administration of our public lands is one of extreme importance to the inhabitants of this Territory, inasmuch as the present system and policy having developed gradually in accordance with local conditions and the topography of the country, and the public having become accustomed to its methods, radical changes should not be introduced without assured benefits corresponding with the probable expense and disturbance of such innovations.

I shall make it my duty to lay before your committee all possible information that may aid it in reaching a full understanding of this subject in all its bearings.

I would further call your attention to the following matters, the investigation of which would probably be of benefit to the Hawaiian community:

Hawaiian coins now in circulation; the Kohala ditch scheme; payment of the claims awarded by the fire commission; insufficiency of the Territorial revenues for carrying on the public business; the necessity of the establishment of a bureau of forestry, to be administered upon scientific principles; the need of a Federal building in Honolulu for the accommodation of the Federal court, the post-office, and internal-revenue officers, the question of the introduction of Chinese laborers for limited periods and for the performance of agricultural labor only, and protection of sea fisheries.

Pardon this brief statement. Not knowing the methods your committee would adopt in making its investigations, the government of the Territory has refrained from taking the initiative, but holds itself in readiness to respond to the plans of your committee and to aid it in all possible ways.

Very respectfully,

SANFORD B. DOLE.

LAND ACT, 1895.

ACT 26.

AN ACT Relating to public lands, and amending sections 36, 39, and 40 of the civil code, relating to the care of government lands; section 42 of the civil code under 44 of the laws of 1876, chapter 5 of the laws of 1878, and act 48 of the laws of the provisional government of the Hawaiian Islands, relating to the disposal of government lands; sections 43 and 44 of the civil code, relating to the conveyance of government lands; section 45 of the civil code, relating to surveys and metes and bounds of government lands; sections 46 and 47 of the civil code, relating to land and chapter 87 of the laws of 1892, relating to homesteads, and repealing act entitled "An act to create a sinking fund," approved December 31, 1864, and act entitled "An act to relieve the royal domain from encumbrances and to make the same inalienable," approved January 3, 1865.

Be it enacted by the Legislature of the Republic of Hawaii:

SECTION 1. The short title of this act is "Land act, 1895."

PART I.

INTERPRETATION.

SEC. 2. In this act, if not inconsistent with the context, "lands" means all lands heretofore classed as Government lands, all lands heretofore classed as Crown lands, and all lands that may hereafter come into the control of the Government by purchase, expropriation, escheat, or by the exercise of the right of eminent domain or otherwise, except as below set forth.

"Commissioners" means commissioners of public lands.

"Subagent" means the subagent of the public lands of the district where the land under consideration is situated. "District" means the land district as constituted under this act, where the land under consideration is situated.

"Land patent" means a Government grant of real estate in fee simple.

A "general lease" means any lease made by the commissioners except those made under the provisions of parts 6 and 7 of this act and all outstanding leases of Government and Crown lands.

A "land license" means a privilege granted by the Government for the occupation of land for certain special purposes, such as the cutting and removal of timber, the removal of soil, sand, gravel, or stone.

"Homestead lease" means a lease of land made under the provisions of this act for a term of nine hundred and ninety-nine years, which is inalienable and not subject to attachment.

"Certificate of occupation" means an instrument preliminary to a homestead lease, giving the applicant possession of land.

"Occupier" means a person entitled to the possession of land under a certificate of occupation.

"Right of purchase lease" means a lease with a right of purchase provided by this act.

"Cash freehold" means a right of possession to land under an agreement called a freehold agreement under the provisions of this act.

"Freeholder" means a person holding land under a freehold agreement.

"Permanent improvements" means houses, fences, roads, reclamation of swamp land, the planting of trees, coffee and other perennial crops, and the clearing of land from forest growth, brush, or stones preliminary to the cultivation of the same.

Provided, however, that this act shall not apply to the following classes and descriptions of land, the property of the Government, all of which shall remain under the control and management of the minister of the interior:

Town lots, sites of public buildings, lands used for public purposes, roads, streets, landings, nurseries, tracts reserved for forest growth and conservation of water supply, parks, and all lands which may hereafter be used for public purposes. All land hereafter reserved by the commissioners for public purposes shall thereupon at once pass under the control and management of the minister of the interior.

The minister of the interior, with the consent of the executive council, shall have the authority at any time to turn over to the commissioners for the purposes of this act any lands or parts of lands reserved for public uses.

PART II.

GENERAL PROVISIONS.

SEC. 3. Public lands for the purpose of this act are hereby classified as follows:

1. *Agricultural lands*.—First class: Land suitable for the cultivation of fruit, coffee, sugar, or other perennial crops with or without irrigation.

Second class: Land suitable for the cultivation of annual crops only.

Third class: Wet lands, such as kalo and rice lands.

2. *Pastoral land*.—First class: Land not in the description of agricultural land, but capable of carrying live stock the year through.

Second class: Land capable of carrying live stock only part of the year, or otherwise inferior to first-class pastoral land.

3. *Pastoral agricultural land*.—Land adapted in part for pasturage and in part for cultivation.

4. *Forest land*.—Land producing forest trees, but unsuitable for cultivation.

5. *Waste land*.—Land not included in the other classes.

SEC. 4. All future leases of public lands in the classes of agricultural, pastoral, and pastoral-agricultural lands, except leases executed under the provisions of parts 6 and 7 of this act, may contain a proviso that the Government may at any time, with reasonable notice and without compensation, except for improvements taken, take possession of any part of the premises covered by such leases which may be required for laying out and constructing new roads or improving or changing the line or grade of old roads, and take from such premises soil, rock, and gravel as may be necessary for the construction or improvement of such roads; provided, that such privilege of taking without compensation shall not extend to such parts of such premises as are under cultivation with annual crops or sugar until such crops shall be harvested, nor to such parts of such premises as are planted and cultivated with coffee, fruit trees, or other perennial crops, or occupied or improved with permanent improvements, except fences.

SEC. 5. The commissioners of public lands may from time to time by public notice proclaim as a road or street any portion of the public lands not occupied under the provisions of parts 6 and 7 of this act.

PART III.

GENERAL ADMINISTRATION.

SEC. 6. There shall be a board of three commissioners, composed of the minister of the interior and two persons appointed and removable by the president, with the approval of the cabinet, one of whom shall be designated the agent of public lands. Such board shall designate the commissioners of public lands, and shall have the control and management thereof under the provisions of this act. The appointed members of the commission may be removed by the president with the approval of the cabinet.

SEC. 7. For the purposes of this act the republic is divided into the following land districts:

First district: That portion of the island of Hawaii known as Maui and Puna.

Second district: That portion of the island of Hawaii known as Hamakua and Kohala.

Third district: That portion of the island of Hawaii known as Lanai and Kau.

Fourth district: The islands of Maui, Molokai, Lanai, and Kahoolawe.

Fifth district: The island of Oahu.

Sixth district: The islands of Kauai and Niihau.

SEC. 8. The commissioners shall be represented in each district by an officer who shall be designated the subagent of public lands. He shall be appointed by the commissioners and be removable at their discretion.

SEC. 9. The commissioners shall have power from time to time to establish forms of all instruments necessary for carrying out the provisions of this act and not herein expressly provided for, and to make, alter, and amend rules and regulations for surveying public lands, for the protection of forests and reservations for forest growth, for the granting of licenses, for the management of all public reserves and unoccupied public lands, and for more fully carrying out the objects and purposes of this act and guarding against evasions and violations of this act.

SEC. 10. The commissioners with the approval of the cabinet shall have power to purchase lands for homestead purposes with any money that may be appropriated therefor.

SEC. 11. The commissioners may from time to time appoint and remove more persons in each district to be rangers of public lands. Their duties shall be to observe and see that the provisions of this act are complied with in their respective districts in relation to the obligations of tenants and grantees of public lands, and report to the subagent and otherwise to discharge such duties in relation to the public lands of the district as the subagent shall require.

SEC. 12. The commissioners shall have authority to employ the necessary clerks and surveyors for carrying on the work of the commission, and to fix their pay. They shall also fix the pay of subagents and rangers. The pay of the commissioners shall be fixed by the legislature.

SEC. 13. The agent of public lands shall be the active business

representative of the commissioners, and shall, under their direction and through the subagents or otherwise, administer the affairs of the public lands under the provisions of this act, and shall have authority to administer oaths in all matters relating to the administration of the public lands.

SEC. 14. The powers and duties of subagents within their respective districts shall, subject to the control of the commissioners and, in addition to those otherwise provided in this act, be as follows:

1. To prevent unlawful occupation of or trespassing on public lands.

2. To cause all trespassers and persons unlawfully occupying public lands, and their effects, and all animals trespassing on such lands to be removed therefrom and such animals to impound according to law.

3. In the name of the government to enter on any public lands in order to take possession thereof, and to resume possession of public lands in case of surrender, forfeiture, or escheat.

4. To enforce contracts respecting sales, leases, licenses, or other disposition of public lands.

5. To recover rents, purchase moneys, and other moneys due the government in respect of any sales, leases, licenses, or other disposition of public lands, or for use and occupation thereof.

6. To recover money due the government for injury or damage done to any public lands by wrongful entry and occupation or by wrongful removal therefrom or destruction of any property of the government.

7. To bring such actions and proceedings as may be necessary to carry out the foregoing powers and duties in the name of the government, and to defend such actions brought against the government as may be authorized, in the courts of the district in relation to the public lands thereof.

8. To keep a record of all his official transactions, including all contracts made by him with individuals and between individuals in relation to public lands within his jurisdiction, and all surrenders, forfeitures, and escheats of such lands, and facts of the decease of any occupier, lessee, or freeholder and names of the successors to their rights as such.

9. To administer oaths in all matters appertaining to the administration of the public lands.

SEC. 15. All disputes, disagreements, or misunderstandings between the parties to any certificate of occupation, homestead lease, right of purchase lease, or freeholder agreement, touching the construction of such instruments or in any wise relating thereto, which can not be amicably settled, shall be referred to the circuit judge in whose jurisdiction the premises in question are situated; and such circuit judge shall have full and exclusive authority in chambers without the intervention of a jury for adjudicating such matters, subject only to appeal to the supreme court.

PART IV.

LAND PATENTS.

SEC. 16. Land patents shall be signed by the president and countersigned by the minister of the interior, and shall be stamped according to law, which stamp shall be paid by the purchaser.

SEC. 17. The commissioners may with the consent of the executive council sell public lands not under lease, in parcels of not over six thousand acres, at public auction for cash. Upon any such sale the payment of the full consideration therefor, a land patent shall be issued to the purchaser.

And they may, with such consent, sell public lands not under lease in parcels of not over six hundred acres, at public auction upon payment of credit and part cash and deliver possession under an agreement of sale containing conditions of residence on or improvement of the premises sold, or of payment by installments or otherwise of the purchase price or all or any of such conditions.

Which agreement shall entitle the purchaser to a land patent of the premises upon the due performance of its conditions.

The commissioners shall have authority to fix any upset price for all such sales for cash or part credit and part cash.

All such sales shall be held in Honolulu, or in the district where the land to be sold is situated. Any person designated by the commissioners may act as auctioneer at such sales without taking out an auctioneer's license.

Provided, however, that land patents may be issued in exchange for deeds of private lands or by way of compromise, upon the recommendation of the commissioners and with the approval of the executive council without an auction sale; and further provided, that the president may in his discretion, upon such recommendation and approval, execute quitclaim deeds for perfecting the titles of private lands where the titles are purely equitable, or where such lands are suffering under defective titles, or in cases of claims to use of lands upon legally equitable grounds.

SEC. 18. All proceeds of sales of public lands shall be set apart as a special fund for the payment of the bonded indebtedness of the government or for the purchase of other lands, as provided by section 10 of this act.

PART V.

GENERAL LEASES.

SEC. 19. The commissioners may, at their discretion, make general leases of public lands for any number of years, not to exceed twenty years, at public auction, but no such lease shall contain a privilege of renewal nor be made for any land already under a lease which runs for more than two years to run. In no case shall it be lawful to collect rents on any such lease for more than one year in advance nor receive anything in the nature of a bonus for executing the lease. Any such payment and receipt of rents for more than one year in advance or of such bonus shall render void the lease on account of which such advance rent or bonus is paid, upon proof thereof being made by any court having jurisdiction in such a case.

SEC. 20. Previous to the last two years of the term of any general lease the commissioners shall, with the approval of the cabinet, decide in regard to the premises covered by such lease whether the same shall be demised under a new lease or be reserved by the government for any other disposition thereof under this act, or for forest improvement or for the development of water supply, or other public uses, or for

SEC. 27. The violation of any of the conditions of a general lease to be performed by the lessee shall be sufficient cause for the commissioners, with the approval of the cabinet, to take possession of the demised premises without notice, demand, or previous entry and without legal process, and thereby determine the estate created by such lease.

PART VI.

HOMESTEAD LEASES.

SEC. 28. The commissioners of public lands are hereby authorized and instructed to cause to be surveyed and set apart from time to time suitable portions of public lands for the occupation of such persons as may desire to obtain homesteads under this part of this act. Lands shall be selected only from agricultural and pastoral lands. Lots shall be laid out in lots of not over eight acres in first-class agricultural land, not over sixteen acres in second-class agricultural land, not over one acre in wet land, not over thirty acres in first-class pastoral land, and not over sixty acres in second-class pastoral land, and not over forty-five acres in pastoral-agricultural land. Convenient roads of grade and direction shall be surveyed, connecting such lots with a public road.

SEC. 29. Upon the completion of any such survey the surveyors shall furnish the commissioners with a copy of the chart thereof, and a copy to the subagent. The agent of public lands shall thereupon publish public notice through newspapers or posters, or both, in the English and Hawaiian language, and, if he deem it advisable, in any other language in which newspapers in the republic are published, declaring the said land to be open for settlement according to the provisions thereof set forth in this act.

SEC. 30. Such charts of survey shall be opened to public inspection during business hours without charge. All applications for a lease of said lots shall be made in person by the applicant at the office of the subagent, and shall include a sworn declaration substantially according to the form of Schedule A. The applicant shall pay to the subagent a fee of two dollars at the time of making the application. Upon receiving any such application and the said fee, the subagent shall enter upon the application the day and hour of receiving the same and give a receipt of the said fee. In case two or more persons apply for the same lot, the one whose application is first received shall have preference. The fee deposited by the unsuccessful applicant shall be returned to him. No application not including a declaration of qualifications as above required or not accompanied with the said fee shall be received or considered.

QUALIFICATION OF APPLICANTS.

SEC. 31. Any citizen by birth or naturalization, and any person who has received letters of denization, and any person who has received special rights of citizenship, over eighteen years of age, who is not under any civil disability for any offense, who is not delinquent in the payment of taxes, who has not made a false declaration in applying for land under this act, who is not the owner in his own right of any land in the Hawaiian Islands not classed as wet land, and who is not

applicant for any other interest in land under this act, may make application for one of the said lots for his own use and benefit under the provisions of this part of this act.

Provided, however, that any qualified person may apply for one lot of wet land in addition to land of any other description already applied for or acquired by him under this part of this act, where such lot of wet land is reasonably near such other lot; and

Further provided, that no application of a married person whose wife or husband owns land other than one acre of wet land in her or his own right in the Hawaiian Islands, or who is an applicant for land under this act, shall be received or considered unless the marriage status of such person has been affected by a decree or annulment, separation, or divorce.

SEC. 32. If the qualifications of the applicant are satisfactory according to the foregoing statement thereof, the subagent shall execute a certificate of occupation in three parts for the lot applied for in favor of the applicant, and deliver one part to the applicant, another shall be filed with the agent of public lands, and the subagent shall keep the third on file in his office. The applicant upon receiving the said certificate shall have the right to take possession of and occupy the land described therein and shall then be known as an occupier, which shall also be the designation of any successors to his rights under the said certificate of occupation. The occupier shall be entitled to a lease of said premises at the end of six years from the date of such certificate of occupation, if all of the conditions of such certificate to be performed by the occupier shall have been substantially performed by him. The receipt of such certificate by the occupier shall be an acceptance and affirmation of the stipulations and conditions therein set forth.

CONDITIONS OF OCCUPATION.

SEC. 33. The right of possession of the occupier shall, in addition to the conditions set forth in section 41, be subject to the following special conditions:

1. He shall, before the end of two years from the date of the certificate of occupation, build a dwelling house on the said premises unless a suitable dwelling house is already a part of the same.

2. He shall, before the end of two years from the date of the certificate of occupation, begin to reside on the said premises.

3. He shall continuously maintain his home on the said premises from and after the end of two years from the date of the certificate of occupation.

4. He shall, before the end of six years from the date of the certificate of occupation, reduce to cultivation and have in cultivation at one time not less than ten per cent of the said land, or reduce to cultivation and have in cultivation at one time not less than five per cent of the said land, and plant and keep in good growing condition on the said premises an average of not less than ten timber, shade, or fruit trees per acre thereof, if the same is classed as agricultural land; or if the same is classed as pastoral land, he shall, before the end of six years from the date of the certificate of occupation, fence in the same.

SEC. 34. If at the end of two years from the date of the certificate of occupation it shall appear that the occupier has failed in performing either the first or second condition set forth in the last preceding

8. If there are no brothers and sisters, then in the widows or owners of the brothers and sisters.

9. If there are no such widows or widowers, then in the nephews and nieces.

10. If there are no nephews or nieces, then in the widows or widowers of the nephews and nieces.

11. If there are no such widows or widowers, then in the grandchildren of the brothers and sisters.

12. If there are no grandchildren of any brother or sister, then in the republic of Hawaii.

And all such successors, except the republic of Hawaii, shall be subject to the performance of the unperformed conditions of such certificate of occupation or lease, in like manner as the decedent would have been subject to such performance if he had continued alive.

Provided, however, that if a widow or widower in whom such interest shall have vested as aforesaid shall thereafter marry again before decease, leaving a widower or widow and a child or children of first marriage surviving, the interest of the deceased shall vest in such child or children. And further provided, that in case two or more persons succeed together to the interests of any occupier or lessee according to the foregoing provisions, they shall hold the same in joint tenancy so long as two or more shall survive, but upon the death of the last survivor the estate shall descend according to the provisions of the first part of this section. And in case of such joint tenancy the continuous residence of any such tenants upon the premises shall constitute sufficient performance of the conditions of residence set forth in sections 33 and 39.

SEC. 44. In case of the death of an occupier or lessee the interests of the successors shall not be liable to forfeiture during a period of six months from such death. If no successors to the deceased shall take possession of the premises within a year from the death of the tenant, the premises shall thereupon vest in the government.

SEC. 45. In case two or more persons succeed together to the interests of an occupier or lessee, any one or more of such persons less than the whole number may file in the office of the subagent an offer to sell to them their own interest therein at a stated price according to the proportion of the respective interest in question, and may deposit with the subagent the amount of such offered price in money, with a fee of ten dollars. The subagent shall thereupon notify the parties to whom such offer is made of the nature of the offer and order them to file with him their answer within sixty days whether they will sell according to such offer. If the parties to whom such offer is made file with the subagent within sixty days of the time of receiving such notification of their answer stating that they will sell their interest according to the terms of the offer, the subagent shall endorse the fact of such sale, with the amount of the consideration therefor, on the certificate of occupation or the lease, as the case may be, and deliver to such parties the amount of such consideration deposited with the subagent according to their individual interest; and the interest of such parties shall thereupon vest in the parties making the said offer. The transfer of such interest shall be properly recorded in the official records of the subagent and endorsed upon the certificate of occupation or lease by the occupier or lessee. If, however, the parties to whom

offer is made fail to answer within sixty days from the time of their being notified of such offer, or within sixty days from the time the notice of such offer is mailed to their last known place or places of abode, or shall answer within sixty days that they will buy the interest of the parties making such offer on the terms offered, but fail within sixty days after such notification to deposit the amount representing the value of such interest according to the terms offered, their interest shall vest in the parties making the offer and the amount of such consideration shall be paid by the subagent to them individually or their respective representatives upon application. In such case the fact of such transfer shall be recorded and endorsed as above provided.

But if the parties to whom such offer is made shall, within sixty days from the time of such notification, make answer to the subagent that they will buy the interest of the offering parties and shall deposit within sixty days with him the amount required for such purpose according to the terms of the offer, the subagent shall endorse and record the fact of such sale as above provided, and pay to the offering parties the said amount according to their individual interests; and the interest of the offering parties shall thereupon vest in the answering parties. In such case the consideration money deposited by the offering parties shall be returned to them.

SEC. 46. The limit of sixty days above provided in which parties shall answer shall date from the time the last person entitled to notification is notified, in the manner above set forth. No transfer of interests in a certificate of occupation or a lease owned by two or more persons as provided in section 45 shall be valid if any of the said persons are minors under the age of eighteen years unless such minors are represented by statutory guardians.

SEC. 47. Land held by two or more persons under a homestead lease shall not be subject to partition.

SEC. 48. In case the interest in any such certificate of occupation or lease should vest solely in a married woman or a minor under the age of eighteen years under the provisions of section 43, the conditions of residence set forth in sections 33 and 39 shall be satisfied respectively during coverture of such married woman, or during the time such minor is under eighteen years of age, by the residence of an agent.

SEC. 49. In case two occupiers or one occupier and one lessee should intermarry not less than twelve months after the date of the most recent certificate of occupation taken out by either of them, the said conditions of residence shall be satisfied by their residence on either of their holdings.

SEC. 50. Land held either under a certificate of occupation or under a homestead lease shall be liable to taxation as estates held in fee.

SEC. 51. Certificates of occupation and homestead leases shall not require to be stamped.

SEC. 52. In case of a surrender by occupiers or lessees of their interest to the government, as provided in section 38, if all the conditions of the surrendered certificate of occupation or lease to be performed by the occupier or lessee up to the time of such surrender shall have been substantially performed, the persons so surrendering such interest shall be entitled to receive from the government the value of the permanent improvements on the premises surrendered, whenever such value shall be received by the government from a new tenant according to the provisions of section 54, and the minister of finance is

hereby authorized to pay the amount of such valuation upon requisition of the commissioners out of any funds available for purpose.

SEC. 53. In case the interest of a married woman or a minor under the age of eighteen years, being the sole owner of a homestead under the provisions of section 43, shall be forfeited for nonperformance of condition of the certificate of occupation or lease when forfeiture is due to such coverture or infancy, such owner shall be entitled to receive from the government the value of the permanent improvements on the forfeited premises whenever such value shall be received by the government from a new tenant according to the provisions of section 54, and the minister of finance is hereby authorized to pay the amount of such valuation upon the requisition of the commissioners out of any funds available for such purpose.

SEC. 54. In case of the surrender, forfeiture, or escheat to the government of a homestead lease, the land held thereunder may be kept open for settlement, charged with the value of the permanent improvements thereon, as a homestead lease, a right of purchase lease, a cash freehold, or may be reserved for public uses in the discretion of the commissioners. If such premises are held open for settlement as aforesaid, the unimproved value thereof and the value of the permanent improvements thereon shall be appraised separately. The appraisal shall be made by a board consisting of the subagent and another person to be appointed by the commissioners. Such appraiser shall not be a person holding a government office. The appraisal shall be subject to review by the commissioners, and an appraisal adopted by them shall be good for one year, after the expiration of which time the premises may be appraised anew as aforesaid. If the premises shall be disposed of under the provisions relating to homestead leases or right of purchase leases, the new tenant shall pay for such permanent improvements in cash upon receiving his certificate of occupation or lease. But if such premises are held for settlement as a cash freehold, they shall be offered at auction at the aggregate sum of the appraised value of the permanent improvements and the unimproved value thereof as an upset price.

PART VII.

RIGHT OF PURCHASE LEASES AND CASH FREEHOLDS.

SEC. 55. The commissioners of public lands, with the approval of the cabinet, are hereby authorized and instructed to cause to be surveyed and set apart from time to time suitable portions of public lands for the occupation of such persons as may desire to obtain leases under this part of this act. Such lands shall be selected from agricultural and pastoral lands and shall be laid out in lots not over one hundred acres in first-class agricultural land, not over two hundred acres in second-class agricultural land, not over five acres in wet land, not over six hundred acres in first-class pastoral land, not over twelve hundred acres in second-class pastoral land, and not over four hundred acres in mixed agricultural and pastoral land. Convenient roads as to grade and direction shall be surveyed and laid out in such lots with a public road.

APPRAISEMENT.

SEC. 56. Upon the completion of any such survey, a board of appraisers, consisting of the subagent and another person appointed by the commissioners, shall appraise the same at a reasonable market rate, and report such appraisement to the commissioners by a written statement clearly referring to the lots by number as laid out in the chart of the survey. Such appointed appraiser shall not be a person holding any other government office. And the surveyor shall furnish the commissioners with a copy of such chart, upon which is clearly marked in figures, within the lines defining each lot, the amount of the appraisement thereof in dollars and cents, and a similar copy to the subagent, provided that such appraisement may be altered by the commissioners. Such charts of survey shall be open to public inspection during business hours, without charge.

SEC. 57. The agent of public lands shall thereupon give public notice, in the English and Hawaiian languages, through newspapers and posters, and, if he deem it advisable in any other language in which newspapers in the Republic are published, and shall post such notice at the post-office and court-house of the district, declaring such lots to be open for settlement according to the provisions therefor in this part of this act.

QUALIFICATIONS OF APPLICANTS.

SEC. 58. Any person who is over eighteen years of age, who is a citizen by birth or naturalization, or who has letters of denization, or who has received special rights of citizenship, who is under no civil disability for any offense, who is not delinquent in the payment of taxes, who has not made a false declaration in applying for land under this act, who does not own any agricultural land not classed as wet land, nor any pastoral land in the Hawaiian Islands, and who is not an applicant for any other interest in land under the provisions of this act, may apply for one of the said lots for his own sole use and benefit, either as a right-of-purchase lease or as a cash freehold.

Provided, however, that any qualified person may apply for one lot of wet land in addition to land of any other description already applied for or acquired by him under this part of this act, where such wet land is in the neighborhood of such other land; and

Further provided, that any qualified person who owns less than one hundred acres of first-class agricultural land, or less than two hundred acres of second-class agricultural land, or less than six hundred acres of first-class pastoral land, or less than twelve hundred acres of second-class pastoral land, which is not subject to a condition of residence, and who owns in fee no other agricultural or pastoral land, except wet land, shall be competent to acquire under the provisions of this part of this act so much additional land of the class already held by him as together with such land shall not exceed in the aggregate the above-mentioned maximum quantity for such class, or shall be competent to acquire additional land of some other description, except wet land, in the ratio of twelve parts of second-class pastoral land, six parts of first-class pastoral land, or two parts of second-class agricultural land to one part of first-class agricultural land, sufficient to take up such maximum quantity relatively, according to the class of the new land applied for; and further provided, that both husband and wife

may not be applicants for holdings under this part of this act if their marriage status has been affected by a decree of annulment, ratification, or divorce.

RIGHT OF PURCHASE LEASES.

SEC. 59. All applications for right of purchase leases shall be in person by the applicant at the office of the subagent during business hours, and shall include a sworn declaration substantially according to the form of Schedule A. The applicant shall pay to the subagent a fee corresponding in amount to six months' rent of the premises applied for, which fee shall be credited to him on account of rent if his application is successful, and if unsuccessful shall be returned to him. Upon receiving such application and such fee, the subagent shall endorse upon the application the day and hour of receiving same and the receipt of said fee. In case two or more persons apply for the same lot, the one whose application is first received shall have the preference. No application not including a declaration of qualifications as above required and not accompanied with the said fee shall be received or considered.

SEC. 60. If the qualifications of the applicant are satisfactory according to the foregoing requirements, the subagent, with the approval of the agent of public lands, shall execute a lease in three parts in favor of the applicant, for the lot applied for, and shall deliver to the applicant one part of such lease, another part shall be filed with the agent of public lands, and the subagent shall keep the third on file in his office. The applicant on receiving such lease shall be designated as lessee, which shall also be the designation of any successors or heirs under the same. The receipt of such lease by the lessee shall be an acceptance and affirmation of the stipulations and conditions therein set forth.

CONDITIONS OF RIGHT OF PURCHASE LEASES.

SEC. 61. Such lease shall be made for a term of twenty-one years, to be reckoned from the next first day of April or October following the date thereof and shall also include and require rent for the term between the date of the lease and such day, and shall be subject to the following conditions:

1. A yearly rental of eight per centum on the appraised value of the land, payable in equal parts half-yearly in advance on the first day of April and the first day of October of each year to the subagent.

2. The lessee shall from the end of the first year of the said term to the end of the fifth year thereof continuously maintain his holdings on such premises.

3. He shall before the end of the third year of the said term have under cultivation and have under cultivation not less than five per centum of such premises, and at the end of the fifth year of the said term shall reduce to cultivation and have under cultivation at one time not less than ten per centum of such premises, and plant and keep in good growing condition on the said premises an average of not less than one timber, shade, or fruit tree per acre of the whole area if the same is classed as agricultural land; or if the same is classed as pastoral land he shall fence in the same. If the premises are classed as pasture

agricultural land, the foregoing alternative conditions shall apply, respectively, to the two kinds of lands.

4. He shall not assign his said interest under the said lease or any part thereof without the written consent of the commissioners; provided, that a lessee or lessees holding the whole interest in a right-of-purchase lease may, at any time when all the conditions of the lease to be performed by the lessee up to such time shall have been substantially performed, surrender such interest to the government by delivery of such lease to the subagent, with the intention of the holders to surrender the same clearly endorsed thereon and signed by them in the presence of the subagent. Any such surrender shall release the lessee from all further duty of performance of the conditions of the document surrendered, but no surrender shall be valid if one of the lessees is a minor under eighteen years of age, unless such minor is represented by a statutory guardian; and further provided, that any such lessee over the age of eighteen years of age may assign his interest to his cotenant.

SEC. 62. The violation of any of the foregoing conditions shall be sufficient cause for the commissioners, with the approval of the cabinet, to take possession of the demised premises without notice, demand, or previous entry, and with or without legal process, and thereby determine the estate created by such lease.

SEC. 63. In case two or more persons become cotenants under any such lease by inheritance or otherwise, any of them may compel the remainder to buy or sell according to the provisions of section 45.

SEC. 64. At any time after the third year of the said term the lessee shall be entitled to a land patent from the government conveying him in fee simple the land described in his lease, upon his paying to the government the appraised value of the premises as set forth in such lease, if he has reduced to cultivation twenty-five per cent of said premises and has resided thereon not less than two years, and has substantially performed all other conditions of his lease.

CASH FREEHOLDS.

SEC. 65. All applications for cash freeholds shall be made in writing, or partly in writing and partly in print, at the office of the subagent, and shall include a sworn declaration substantially according to the form of Schedule A, and shall be accompanied with a fee amounting to ten per centum of the appraised value of the lot applied for, which fee shall be forfeited in case the applicant should fail to take the premises at the upset price in case there should be no higher bid therefor, and if the applicant should be successful such fee shall be credited to him on account of his first installment; but if there is a higher bid than the upset price and the applicant fails to obtain the premises the said fee shall be returned to him.

No such application not including such declaration or not accompanied by such fee shall be considered. Upon receiving any such application and the said fee the subagent shall endorse upon the application the day and hour of receiving the same and the receipt of the said fee.

SEC. 66. Upon applications for cash freeholds the commissioners shall give notice through newspapers or posters, or both, in the English and Hawaiian languages, and, if they deem it advisable, in any other language in which newspapers in the republic are published, of auction

sales thereof at such times and places in the district as they shall determine or at the executive building in Honolulu. Such notice shall specify the lot to be offered for sale and the appraised value thereof as an upset price.

SEC. 67. If there are two or more applications and there is no bid above the upset price, the one whose application is first received shall have the preference. The subagent or any other person authorized by the commissioners may act as auctioneer at such sales without taking out an auction license.

SEC. 68. A purchaser at any such sale shall immediately pay one-fourth of the purchase price and shall thereupon be entitled to receive a certificate which shall be termed a freehold agreement, and shall be executed in three parts, one of which parts shall be filed with the agent, one part shall be delivered to the applicant, and the third part shall be delivered to the agent of public lands. In case of a failure of such purchaser to immediately pay such one-fourth of such purchase price, the purchaser acting as auctioneer shall declare the sale off and shall either lay down the premises to the next highest bidder, or shall put the premises again forthwith, or shall withdraw them from the auction for the time being. The purchaser upon receiving such freehold agreement shall be designated the freeholder, which shall also be the designation of any successors to his rights under the same. Such receipt of freehold agreement shall be an acceptance and affirmation of the stipulations and conditions therein contained. Such freehold agreement shall authorize the freeholder to occupy and use the premises so described and shall entitle him to a land patent for such premises at the end of three years from the date of the payment of such first installment, which shall be the date of the freehold agreement, following conditions shall then have been substantially performed:

1. Payment of the balance of the purchase price in equal installments in one, two, and three years, respectively, from the date of the freehold agreement, with interest annually at the rate of six per centum; provided, that the freeholder may pay such installment when it is due and thereby stop the corresponding interest.

2. Cultivation of not less than twenty-five per centum of the area of the said premises, and the planting and care of not less than an average of ten timber, shade, or fruit trees per acre, if agricultural land, at any one time before the end of the third year of freehold; the same if pastoral land within such time; provided, that if the premises are classed as pastoral-agricultural land, the foregoing alternative conditions shall apply, respectively, to the two kinds of land.

3. Maintenance by the freeholder of his home on such premises at the end of the first to the end of the third year.

4. He shall not assign or sublet, conditionally or otherwise, any interest or any part thereof, under the freehold agreement, without the written consent of the agent of public lands endorsed on the freehold agreement; and

Further provided, that freeholders having the whole interest under such freehold agreement may at any time when all the conditions to be performed by the freeholder up to such time shall have been substantially performed, surrender to the government such interest by the delivery of the freehold agreement to the subagent, with the interest in the same to surrender the same clearly endorsed thereon, and signed by

and duly attested. Such surrender shall release the freeholders from all further duty or performance of the conditions of the instrument surrendered. But no such surrender shall be permitted if any such freeholders are under the age of eighteen years, unless such minors are represented by statutory guardians; and

Further provided, that any freeholder over the age of eighteen may assign his interest to his cotenants.

5. Conditions for the prevention of waste, the planting of trees, or the protection of trees growing or to be planted on such premises, or for the destruction of vegetable pests that may be on such premises, or the prevention of the future introduction of such pests thereon.

6. He shall allow the agents of the government at all times to enter and examine the premises.

7. Payment of all taxes that may be due on account of the said premises.

SEC. 69. In case of default in the payment of any of the said installments for thirty days after the same are due, respectively, or failure of performance of any other of the said conditions, the commissioners, with the approval of the cabinet, may take possession of such premises without notice, demand, or previous entry, and with or without legal process, and thereby determine the estate created by such freehold agreement.

LAPSES, FORFEITURES, AND SURRENDERS.

SEC. 70. Upon the determination of a right of purchase lease by lapse of time, or upon the forfeiture or surrender of such lease or a freehold agreement, the commissioners may in their discretion and within the limit of their authority, open the premises or any part thereof for settlement, or reserve or dispose of the same in any manner or for any of the objects provided in this act. And if the same are disposed of under the provisions of part 7, they shall be reappraised, provided that in case of premises surrendered under a right of purchase lease or a cash freehold, if disposed of either under the provisions of part 6 or 7, the value of the permanent improvements and the unimproved value of the premises shall be appraised separately, as provided in section 54, and the incoming tenant shall pay for such improvements as therein provided; and the value of such permanent improvements shall, when received by the government as aforesaid, be paid to the surrendering lessees or freeholders, and the minister of finance is hereby authorized to pay the amount of such valuation upon the requisition of the commissioners out of any funds available for such purpose.

PART VIII.

SETTLEMENT ASSOCIATIONS.

SEC. 71. In case six or more persons who are qualified to apply for cash freeholds under this act shall form themselves into a settlement association and apply for holdings in one block of land, the commissioners may, with the approval of the cabinet, cause to be surveyed lots in one block corresponding in number to the number of persons

fied, and the balance in equal installments in two, four, and six years respectively, from the date of such application, with interest annually at the rate of seven per centum: Provided, that the applicant may pay any such installment before it is due and thereby stop the corresponding interest. The premises thus sought to be patented shall, from the date of such application accompanied by one-fourth of the purchase price, be free from the stipulations of such crown lease, which, however, remain in full force as to the remainder of the premises described therein: Provided, however, that the remainder of the premises held under such lease may, with the approval of the commissioners, be surrendered: And provided further, that the provisions of this act shall apply only to those of such corporations as are or may hereafter be incorporated under the laws of the Republic of Hawaii.

SEC. 79. The land covered by the crown leases above referred to is hereby appraised as follows:

The first line of fifty-acre lots nearest the Volcano road, according to the Olaa survey, six dollars per acre; the second line of fifty-acre lots, four dollars per acre; all other lots, three dollars per acre.

SEC. 80. The land exempted from sale along the Volcano road in sections 76 and 77 is hereby reserved as a permanent park devoted to forest growth and other features of park improvement; no part of the same shall be sold or leased by the commissioners without the consent of the executive council nor without first offering the same to the owner of the land immediately in the rear upon the specified in sections 78 and 79.

PART X.

PUUKAPU, KAIMU, AND WAIAKOLEA RESERVATIONS AND NATURAL RESERVATIONS OF OLAA.

SEC. 81. Any person holding land situate in said Ahupuaa or under a lease from the commissioners of crown lands not required to pay rent for the first five years of such lease or situate in the Ahupuaa, Kaimu and Waiakolea in said district of Puna, or in the Ahupuaa, Puukapu in the district of South Kohala, on said island of Oahu, under a lease from the crown commissioners for a term of thirty years or more, may, at any time after the first payment of rent, when all the conditions of such lease to be performed by the lessee previous to such payment shall have been substantially performed, receive from the commissioners, upon applying therefor and paying to him the requisite deposit, a certificate of occupation, a right-of-purchase lease, or a freehold agreement, at the option of the applicant, for the premises described in such crown lease. Upon receipt of such certificate of occupation, right-of-purchase lease, or freehold agreement by such person, the crown lease shall be void.

SEC. 82. Under the provisions of section 81, the deposit required upon application for a certificate of occupation shall equal two months' rent for each acre of the premises under consideration; upon application for a right-of-purchase lease, the deposit money shall equal six months' rent of the premises under consideration, which shall be credited to the applicant on account of rent if the application is successful; upon application for a freehold agreement, the deposit

correspond to one-fourth of the purchase price of the premises under consideration, and shall be credited on account of the purchase if the application is successful. If any of such applications are unsuccessful the deposit money shall be returned to the applicant.

SEC. 83. The land covered by the said crown leases in said Oloo, Kaimu, Waiakolea, and Puukapu is hereby appraised at two dollars and a half an acre for the purpose of the foregoing provisions for furnishing the lessees thereof right-of-purchase leases and freehold agreements. Such appraisement shall fix the value of land taken under freehold agreements without an auction sale.

SEC. 84. Except as above provided, the general provisions relating to homestead leases, right-of-purchase leases, and cash freeholds shall apply to the status of the said parties, securing such holdings, respectively: provided, that any continuous residence performed by such parties under the said crown leases shall be credited to them in the manner as if the same had been performed under the certificate of occupation, right-of-purchase leases, or freehold agreement so obtained by them, respectively, as performance or part performance of the residence condition of such instruments.

PART XI.

SEC. 85. From and after the publication of this act no land shall be opened for settlement under the provisions of chapter 87 of session laws of 1892, entitled "An act to consolidate and amend the law entitled 'An act to facilitate the acquiring and settlement of homesteads,' otherwise known as the homestead act," which act shall, however, remain in force in relation to such lands as have been already taken up by settlers.

SEC. 86. An act entitled "An act to create a sinking fund," approved December 31, 1864, and an act entitled "An act to relieve the royal domain from encumbrances and to render the same inalienable," approved January 3, 1865, are hereby repealed. Sections 36, 39, 40, 42, 43, 44, 45, 46, and 47 of the civil code, chapter 44 of the laws of 1876, chapter 5 of the laws of 1878, chapter 87 of the laws of 1892, and act No. 48 of the laws of the provisional government of the Hawaiian Islands are amended to conform to the provisions of this act.

SEC. 87. This act shall take effect from and after the date of its publication.

SCHEDULE A.—*Form of declaration of application for homestead leases, right-of-purchase leases, or cash freeholds.*

HAWAIIAN ISLANDS, }
Island of ———. } ss.

I, ———, being sworn, say that I am over eighteen years of age; that I am a citizen by birth (or naturalization) of the republic of Hawaii (or that I have received letters of denization under the republic of Hawaii); (or that I have received a certificate of special right of citizenship from the republic of Hawaii); that I am under no civil disability for any offense; that I am not delinquent in the payment of taxes; that I have made no false declaration in applying for land under said act 1895; that I am married (or unmarried); that I do not own

land in the Hawaiian Islands not classed as wet land (if married wife or husband does not own such land); (or if an owner of land and an applicant for enough more land as a right-of-purchase leasehold or a cash freehold to make up with the land already by him the maximum quantity as allowed and provided by section 1895, that he owns such and such areas of such and such classes); that besides the land now applied for I am not an applicant for any interest in land under land act 1895 (if married, that my wife or husband is not such an applicant), and that I am applying for said land solely for my own use and benefit.

Approved this 14th day of August, A. D. 1895.

SANFORD B. DOLE,
President of the Republic of Hawaii.

LIGHT-HOUSES—TESTIMONY OF HENRY E. COOPER.

HONOLULU, HAWAII, August 23, 1895.

Hon. JAMES H. BOYD,
Superintendent of Public Works, Honolulu.

SIR: I have the honor to submit the following report on light-houses of the Territory of Hawaii:

All light-houses on the various islands of the group, with the exception of Diamond Head, are wooden towers, with oil lamps. The lights of Hilo are electric lights with red and green globes. These lights answer a twofold purpose—that of range lights for entering the harbor and for wharf and street lights, the expense of maintaining same being charged against appropriation, Hilo lights.

The Honolulu Harbor lights consist of red light on light-house and green light over custom-house, giving range for vessels entering harbor. The island light is a wooden tower erected on a pile, and is in a dilapidated condition and needs reconstruction. The Myrtle Boathouse has been placed in a local position, shutting off the light, and vessels can not pick it up until just before harbor entrance. The island light is a carbide-gas light, and is satisfactory. The green light on the custom-house is an 8-inch B. & S. oil lamp. The repairs and reconstruction of the lights will cost \$4,000.

The following statement shows the money expended during the fiscal year for salaries of light-house keepers, light-house supplies, and repairs to same:

BUILDERS AND TRADERS' MEMORIAL—TESTIMONY OF PINKNEY.

HONOLULU, HAWAII, *September 8, 1891.*

Hons. JOHN H. MITCHELL, J. R. BURTON, and A. G. FOSTER,

Subcommittee of United States Senate

Committee on Pacific Islands and Porto Rico

SIRS: The undersigned, being a committee duly authorized by the Builders and Traders' Exchange of Honolulu, Hawaii, to present a memorial to your honorable committee on behalf of the exchange, have the honor to herewith transmit such a memorial: respectfully request full consideration of the matters and things therein set forth.

A. GARTLEY.
L. E. PINKNEY.
W. W. HARRIS.

HONOLULU, *August 18, 1891.*

To the honorable committee of the United States Senate, Hon. John Mitchell, chairman.

GENTLEMEN: The present deplorable condition of the affairs of the Territory of Hawaii, in its relation to the General Government of the United States, renders it incumbent upon representative local business organizations to call your attention to matters of public welfare.

ISOLATION.

The Hawaiian Islands are so distant from the mainland, in fact the most distant large insular body in the world, that there is necessarily a multiplication of governmental, social, and business institutions and attendant expense out of all proportion to the character and number of inhabitants as compared with continental United States.

EXPOSURE.

Situated directly in the highway of the Pacific, with frequent almost daily, steamship communication with oriental and Aus-

ports, en route to and from the Pacific coast, Honolulu and Hawaii are extremely exposed to the violent epidemic diseases such as create public apprehension and terror. This occasions public expenditure beyond comparison with the numbers and wealth of this community. This expenditure is ceaseless, as, by such vigilance only, is the safety of health secured.

Hawaii, at its present sole expense, stands as a guard and quarantine between the Orient and United States ports.

LABOR SITUATION.

It is not in the province of this committee to attempt recommendations as to the labor problem confronting our main and almost exclusive industry, the raising of sugar. We do request your keen attention to the fact that skilled labor is being driven from employment, from the islands, or to a lower, meaner, and almost intolerable scale of living through the competition of alien labor. Private selfishness can not be controlled. We, however, most emphatically protest against any action of the United States Government, through its local and official representatives, in employing, directly or indirectly, through contracts, contractors, or otherwise, alien labor.

So far as Hawaii is concerned, such action by United States officials or contractors undermines the body politic, and must react on the general welfare, social and political.

We believe all United States contracts or enterprises requiring nominal skilled labor should, by law, if possible, or Executive instruction, be confined to labor other than alien, and on a scale of compensation permitting American civilized standards of living.

EXPENSE OF LEPER MAINTENANCE.

While the number of these unfortunate beings, the lepers, is gradually decreasing, yet at the present they and their children and attendants, public charges segregated on the island of Molokai, number 1,009, costing the Territorial government to maintain \$138,260 annually.

To comprehend what a charge this special misfortune imposes on this small community, let your committee realize this charge is equal to the people of the continental United States maintaining 507,000 persons in complete idleness, at an annual cost of \$70,095,800. Such a burden would seem to the people of the United States as too onerous to be borne.

In addition, Hawaii is obliged to maintain all other enlightened institutions—prison, reform, charity, hospital, and educational establishments.

This unusual condition and phenomenal burden should make a profound and lasting impression on your minds and recommendations.

RACE AND SOCIAL CONDITIONS.

In Hawaii occidental and oriental civilization meet in a contest paralleled in no other country on the globe.

When the time comes that the oriental aliens, as a body, insist on a corresponding standard of living and family status to that of the white man, the danger of the overthrow of Caucasian civilization will cease.

To attempt to regulate by law these differences is well-nigh impossible. It is in the power of the National Legislature, and particularly in the power of the national executive departments, the Army and Navy, to throw their Government patronage in support of the civilization they embrace and expect to have preserved for them and successors.

POLITICS AS RELATED TO BUSINESS.

The peculiar political and specially legalized economic conditions existing for many years in the Hawaiian Islands produced a bias and expectation of continued special privileges that many, even of the most intelligent and interested citizens, could not overcome during earlier periods of annexation. On their support and patriotism the Territory must rely for sound economic and political conditions. A better judgment will ultimately prevail and a campaign of education and more elevated politics be inaugurated. It is doubtful if a peaceful community can be secured by discrimination in suffrage.

Business has been unfavorably affected by many apprehensions of the course of general and local government, and the misgiving exists. However, there are enough good, intelligent citizens, with sound, unselfish measures, and public education and moral force to control local affairs. The coming election this fall will disclose the situation. We submit if the issue of good government is forced upon events, the United States should so amend its organic act as to place a most stringent and enlarged veto power in proper hands for the control of local affairs, Territorial and municipal.

LOSSES FROM BUBONIC PLAGUE.

The facts have been fully laid before Congress in Senate Report No. 1333, Fifty-seventh Congress, first session, and relief petitioned. The justice and necessity of such relief should be apparent.

PUBLIC FEDERAL IMPROVEMENTS.

To date they have been of minor importance, and devoted almost exclusively to facilities for operations between the continental United States and the Philippines and the Orient.

Light-houses are inadequate and still a local charge.

Harbors are still maintained and improved at local expense.

PROJECTED FEDERAL IMPROVEMENTS.

The projected improvements at Pearl Harbor, and camps and fortifications, while of great local importance, are a vital part of the scheme of public defense of the entire nation, and should not be undervalued in our financial relations to the Government.

EXTRAORDINARY REIMBURSEMENT OF FEDERAL TREASURY.

From the extracts from official statistics, given below, we ask your committee to consider the remarkable reimbursement made to the United States Treasury of not only the entire Federal Government

expenditure in Hawaii, but the great per cent already paid toward extinguishment of the payment on account of the public debt of Hawaii upon annexation.

FEDERAL REVENUES FROM HAWAII.

From June 14, 1900, to March 31, 1902.

Receipts:	
Customs revenue.....	\$2, 293, 224. 33
Internal revenue.....	168, 543. 86
Gross revenue.....	2, 461, 768. 49
Less: expense of collection—customs and internal revenue.....	192, 135. 72
Net revenue (21½ months).....	2, 269, 632. 77

How applied and expended.

Annexing Hawaiian Islands to the United States.....	\$9, 848. 34	
Salaries, district courts, Territory of Hawaii.....	7, 230. 97	
Salaries of governor, etc., Territory of Hawaii.....	71, 839. 61	
Contingent expenses.....	4, 353. 03	
Improving Pearl Harbor.....	20, 300. 00	
Quarantine service.....	55, 809. 29	
Repayment to importers.....	27, 273. 90	
Adventures, drawbacks, etc.....	11, 971. 79	
		208, 628. 93
Net revenue above all ordinary expenditures, or at the rate of \$95,860.72 per month.....		2, 061, 005. 84

Hawaiian debt paid by the United States Treasury.

Payment of debt of Territory of Hawaii.....	\$3, 193, 129. 79	
Liquidation of deposits in Hawaiian postal savings bank.....	761, 457. 52	
Total.....		3, 954, 587. 31
Balance.....		1, 893, 581. 47
Balance against Hawaiian debt March 31, 1902, \$1,893,581.47.		

Should the above-named average continue, by the beginning of the next fiscal year of the United States, July 1, 1903, the Hawaiian Islands will have practically reimbursed the United States Government for every dollar paid out in behalf of annexation, furnished the Government with lands and sites for its various purposes, leaving the title of all public lands and property in the United States Government without cost to itself.

This is an unparalleled public financial showing, and it is doubtful if ever one country was absorbed by another at no cost in so short a period.

The withdrawal of such proportionally enormous sums of money would hopelessly bankrupt any like population in numbers in Continental United States, and can not be indefinitely continued here without dire results.

RECIPROCITY ADVANTAGES.

These were not all on the side of Hawaii. A very large per cent of the accumulations from the financial benefits of reciprocity have been reinvested in new and enlarged plantations; much of it has been thus lost or become absolutely nonincome producing.

The sugar situation throughout the world is a disturbing problem to us, a vital one. The Federal Government should not look backward, but adjust our relations to the conditions.

RELATIONS TO CONTINENTAL UNITED STATES.

This organization does not pretend to indicate the constitutional remedies to be applied to or limitations that affect our status point out how our welfare must be brought about by enactment of Congress, but we do submit that, from distance and circumstance do not enjoy the direct and immediate benefits that cover the continental United States and Territories in the financial operations of the Federal Government.

We submit our situation resembles more that of a colony, and the revenues should not be unduly transferred from our Territory to the United States Treasury and expended elsewhere.

RECOMMENDATIONS.

We ask of your committee that by its recommendations it urge that all Government contracts and work, so far as skilled labor concerned, both directly and indirectly, be let only to other than Hawaiian labor, and so stipulated.

That should political unrest and incompetency continue, the territorial law be so amended that business interests may have the protection at least of an enlarged veto power placed in unbiased impartial hands.

That a means be promptly and earnestly sought, by suitable appropriations or a proportional return of revenue to the Territorial Treasury, to cease the Federal drain upon the resources of the Hawaiian Islands.

That there be a positive reimbursement by some legal means of the Hawaiian Federal revenues of an amount equal to the cost of their maintenance, and provide for a reasonable increase, that full benefits may accrue to these unfortunates.

In presenting these claims we seek no advantage over other Territories, but, believing that we are somewhat situated as new acquisitions of the United States, we ask such consideration toward the maintenance of good government, American civilization and sound financial condition, and a proportional cessation of the drain on our resources.

Respectfully submitted.

THE BUILDERS AND TRADERS' EXCHANGE,

Of Honolulu, Hawaii.

A. GARTLEY,

H. SUWEG,

L. E. PINKHAM,

W. W. HARRIS,

Comm.

NOTE.—In support of statistics given we refer to the official report of the United States Treasury Department as contained in Report No. 1933, Fifty-sixth Congress, first session, pp. 90, 101, 121.

LABOR.—HUMPHREY'S TESTIMONY.

DEPARTMENT OF INTERIOR, BUREAU OF IMMIGRATION,
Honolulu, Hawaii, April 27, 1897.

Capt. J. A. KING.

President Board of Immigration.

SIR: In accordance with your instructions, I left Honolulu on the steamer *Mikahala* Wednesday, April 21, and proceeded to Lihue, Kauai, for the purpose of investigating the causes that led up to the recent riot on Lihue plantation, and which resulted in the death of a Chinese contract laborer and the arrest of 15 others on the charge of rioting. Ng Chan, a Chinese interpreter, accompanied me.

Arriving at Lihue on the 22d at 4 p. m., I at once made myself known to Mr. Carl Wolters, the manager, and stated to him the object of my visit, and then had a long conversation with him. At the time of my arrival all was quiet on the plantation.

Early next morning I was out in the fields among a large gang of Japanese and Chinese laborers. I picked out the following men: Lau Poo, Leong Chin, Chung Hop, Shun Bun, Chin Yow, Fook Lung, Dung Mee, and Wong Duck, took them one by one and examined them through the interpreter in regard to the recent trouble, as well as to how they had been treated on the plantation since their arrival. The testimony was very much the same in each case.

Their chief complaint was directed against the head luna, William Zohar, who, they say, was at all times very hard in his treatment of them. When they would line up for work in a morning, waiting to receive their tools, if they did not move quite fast enough to suit him he would knock them about or else kick them. Sometimes he would poke them in the back with the handle of a hoe. When in the field they were at work doing their best he would yell at them to work quicker. In fact, he was at them pretty much all the time they were out in the fields. He rarely spoke to them through an interpreter, and as a consequence they could not understand what he said, as they are not acquainted with the English language. On the morning of the row they testified that after lining up, and while waiting for their tools, the luna, instead of giving out the tools, shouted out something which they afterwards understood was an order to go and pick up rocks. At the time they did not understand the order, and this, they claim, is what started the whole row and led to the fight, as they were pretty well warmed up and very much angered toward the luna. If he had told them through the interpreter what he wanted, instead of abusing one or two of their number, it would have been different. It was no use making any complaint to the manager, for he took no notice of them. They understood that they were to work on the plantation for three years under contract, and were willing to do so to the best of their ability if properly treated. They did not appear to have any serious grievance against the other lunas. Since the rioting they claim that they have been treated a little better, yet there is room for much improvement. They claim that to be arrested for not working quick enough is a hardship, and at the same time they lose their money. The men receive \$12.50 a month, but out of this \$1.50 is remitted to the board of immigration toward paying the laborer's return passage

when he desires to return to China. That leaves him \$11, but there are very few that receive over \$6 or \$7, and some of them even less than that, on account of the persistent docking; for what they lose is a loss to understand. It would be of no use to say anything to the manager; he is always deaf to any of their complaints. Their next complaint was with regard to the number of hours they have to work. The contracts call for ten hours in the field. In this matter I find the men are turned out earlier than they ought to be, and sometimes are a little late in being sent home. I do not know what part of the time is kept on the plantation, but I am very much under the impression from what I gathered that the mill clock is one of a kind that moves quickly or slowly, as required. The men told me that since the last time the clock had changed. Another piece of information they gave me was that the sheriff, through his own interpreter, told them that they could leave the plantation any time by paying \$50 and go where they liked. This is only partly true. The sheriff has in his possession a letter from Manager Wolters stating that as the men were a vicious and bad lot he would like to release them. But Mr. Wolters forgets that he has not the authority to do so; it can only be obtained from the board of immigration, and then on certain conditions.

In regard to the docking of their wages, the men could not explain for what reason this was done, and certainly I got very little satisfaction from those in charge when I went into the matter. Sometimes a man feels sick when he gets up and, like other people, wants to see a doctor. He visits the doctor, who has probably quite a number of patients to attend to. Say he gets through with the doctor about 10 o'clock, takes some medicine, and feels better. If he goes in the field at noon to work until afternoon, the bookkeeper told me they do not pay the man for the afternoon. Some explanation was afterwards made to me by the manager, but it was not entirely satisfactory. The same may be true when I asked the question, "Do you dock the men's wages for working slowly?" The manager pays the men their wages, and I had asked him in future to be very careful in his system of docking and to do it fairly. If the men have a grievance as to their wages, let it be stated through the interpreter. The idea of pushing a laborer on one side for asking the reason his wages have been docked, without explanation, is not right.

Another complaint was that of a sick laborer, who was recently returned to China, who had seventeen days' pay coming to him which had not been paid. As the bookkeeper was laid up sick at his home he could not explain without looking at his books. I have requested the matter to be looked into when he is well and reported to me.

I next interviewed the luna, William Zoller. This man has been at the Lihue plantation for several years. He complains that the Chinese laborers are a tough and a bad lot and hard to get along with. On the morning of the riot he says that the Chinese started the riot coming out armed with sticks under their clothes. He did not know what caused them to come out armed. On pressing him he admitted that he had laid hands on laborers at different times. The manager also confirmed this latter statement. I was also informed that Zoller has been seen to go behind Japanese laborers in the field and lift them up by their heads and drop them. Lunas Wolters, Schmiel, and a German were questioned, but had very little to say. They said they had had very little trouble with the men and did not think Zol-

had. I called on Dr. Watt; but as he had only been three weeks on the plantation, he could not say very much. He was unable to say anything from personal experience. He was very careful in his examination of the laborers and would not send men out in the fields to work without he was fully satisfied as to their condition.

Kong Wa Chang, a Chinese storekeeper, stated that the Chinese laborers on the plantation were treated very badly and were always complaining to him.

Meeting Mr. A. S. Wilcox on the last day of my visit and asking what I was doing in Lihue, he said to me, without being asked, that he was very glad some one had come down to investigate; it was very necessary to inquire into the brutal treatment that had been going on on that plantation.

Mr. George H. Fairchild, manager of the Makee Sugar Company, has a number of Chinese laborers who came at the same time and from the same place as those on Lihue. He says he has had no trouble with them. He does not allow his lunas to touch the men and is very strict in this matter.

A lady well known in Lihue volunteered the statement that she was ready at any time to testify to the ill treatment the laborers received at the hands of the lunas.

In my several conversations with the manager, Mr. Carl Wolters, he denied the truth of many of the statements made to me by the Chinese. He said that while away a short time ago there was trouble on the plantation and the head luna was really the cause of it. About fifteen months ago the same luna had quite a row with the Japanese laborers. I said: "Why don't you get rid of that head luna, seeing that he is the cause of so much trouble?" and Mr. Wolters did not see how to answer me. He does not like to have trouble with his men, and his orders are that the lunas must not abuse the men.

I desire to state that after examining the laborers in the field I told them who I was, how I had been sent by the government to inquire into the trouble, and that Mr. Goo Kim Fui, their representative, knew I had come. I then in brief told them of the law under which they had come into the country, that at all times they were under the protection of the laws of Hawaii. They must at all times obey the laws. If they had any serious grievance, they must at once report it to Mr. Goo Kim. They should never take the law in their own hands. No good would come from that. I told them it was certainly not the wish of the Hawaiian government to hear of them being ill treated. If at any time their wages were not correct, they should go to the manager with their interpreter. They thanked me for coming and listening to their troubles and hoped they would be treated better in the future.

I visited the laborers while in their quarters and also while they were away. They did not make complaints, but really there is much room for improvement. I told the manager they were living in too crowded a condition. In one room 15 by 20 feet 14 men were sleeping; in another, 16 by 20, 20 men were living.

If I may be allowed to review the above evidence and statement, I do not think there is any difficulty in coming to the conclusion that the trouble which ended in serious rioting and the loss of life was brought on by the harsh, and what I consider cruel, treatment the laborers have received at the hands of the head luna, William Zoller.

There is not a man on the plantation that likes him or has any word for him. I am of the opinion that this man and the manager do not get along together and that the latter is afraid of Zoller the manager's instructions to the lunas have been to keep their hands off the laborers, they have not been followed out, and the manager open to the severest criticism.

There is no way in which I can speak good of the Lihue plantation. I have listened to no outside or street talk, I accepted no hospitality from anyone in Lihue, had my eyes and ears open all the time there, and am fully convinced, after careful consideration, that in order to prevent a repetition of the past William Zoller, the head manager should at once be discharged from the plantation and that Ma Wolters should be reprimanded and held to strict account for the treatment of the laborers in the future. The docking of laborers' wages should be done fairly, and their grievances should be given a hearing. There are soon some Chinese to arrive for Lihue and I think that something should be done before they are sent to the plantation.

Respectfully submitted.

WRAY TAYLOR,
Secretary Bureau of Immigration

DEPARTMENT OF INTERIOR, BUREAU OF IMMIGRATION,
Honolulu, Hawaii, June 19, 1897

Capt. JAS. A. KING,
President Board of Immigration.

SIR: I have the honor to present the following report of a visit by me to the Olowalu Sugar Company's plantation, island of Maui, on the 9th day of June, for the purpose of investigating certain complaints made by the Chinese contract laborers on that plantation. I received a letter to Mr. Goo Kim, Chinese commercial agent, which letter was forwarded to me. Ng Chan, Chinese interpreter, accompanied me to Olowalu.

When I arrived there, the manager, Mr. Aug. Hanneberg, was several miles away in the fields, and I had been there fully two days before he returned. However, in the meantime I went on with my investigation among the laborers. Their letter to Mr. Goo Kim complained of persistent docking of their wages and harsh treatment.

With regard to the former complaint, I had before I went to Olowalu and still have in my possession, one of the plantation time sheets showing the Chinese laborers' time for each month from March to April, 1897. The book speaks for itself, and proves on every page that the men's complaint is not without foundation. The manager admitted he docked the men for working slow; it was the law, he would do it. He is too severe, and if this docking habit of his continued unchecked there will always be trouble with laborers at Olowalu.

As to the second complaint—harsh treatment—I examined six of the laborers on the plantation, ten of whom signed the letter to Mr. Goo Kim. I asked two of them, before the manager, if he had ever kicked them, and they replied through the interpreter that no, he had not kicked them, but others, too. Mr. Hanneberg denied the statements, but admitted to me he had pulled the men out of their quarters for various reasons and pushed them around.

Ah Mun, a free laborer, who has been at Olowalu some time, said that the free laborers were treated better than those under contract.

The manager has a bad habit of going into the laborers' quarters and pulling them out.

Lam Hing Wing, cook for a gang, said he never got full pay, though he worked all the time. Two Hawaiians told me they had worked on the plantation, but had left, as the manager was a very hard man to work for.

The laborers' quarters are the filthiest I have ever been in; in fact, the whole plantation is in need of a cleaning up. The inside of the rooms are black with cobwebs, and it looks as if whitewash was unknown on the place. Mr. Hanneberg said he intended to whitewash the houses at once. I sincerely hope he has done so.

The treatment of sick laborers on the plantation is such that it practically amounts to cruelty. Near the beach, a good distance from the men's quarters, is a room about 12 by 12 used as a hospital. The laborers call it the jail. I found in it at the time of my visit 5 Chinese and 4 Japanese laborers, all sick. The room was in a filthy condition. These sick men have to leave their quarters early in the morning, when the whistle blows, and go to the hospital, remaining there all day until the evening whistle blows, when they are allowed to return to their quarters. Is this humane treatment? I hardly think so. I questioned Mr. Hanneberg on this matter, and he said that if the men were allowed to stay in their quarters their friends visited them, and there were other reasons given by him.

This is not the first time that complaints have been made against Olowalu. The place is isolated, and I think there is a good deal going on on the plantation that is not heard of. Some time ago I talked to Mr. W. G. Irwin and Manager Hanneberg about the complaints made by the laborers. The manager should be made to understand that he must keep his hands off the laborers; must be less severe in his system of docking; must keep the laborers' quarters in better condition, and, above all, must put an end to the confinement in hospital. If he is not willing to do so then no more contract laborers should be allowed to go to Olowalu.

I have the honor to be, your obedient servant,

WRAY TAYLOR,
Secretary Bureau of Immigration.

PETITION OF LILIUOKALANI, EX-QUEEN.

*To the honorable subcommittee of the United States Senate
Committee on Pacific Islands and Porto Rico:*

HONORABLE SIRS: On the 17th day of January, A. D. 1893, the undersigned was the Queen and constitutional and lawful Sovereign of the Kingdom of Hawaii. At that time the Kingdom of Hawaii was an independent and sovereign nation, respected as such and accorded its appropriate place in the family of nations, and was capable of executing its treaty obligations with the civilized powers of the world, and more particularly with the United States of America, between which and the Kingdom of Hawaii there had existed for nearly three-quarters of a century an unreserved friendship marked by close, cor-

dial, and candid intercourse. On the date aforementioned subject the Hawaiian Kingdom, of numerical insignificance, conspiring and succored and assisted by aliens, renounced their allegiance to Sovereign and revolted against the ordained, established, and constitutional Government of Hawaii, and, advised, counseled, comforted, abetted, aided, and assisted by the minister plenipotentiary of the United States, duly accredited to the Kingdom of Hawaii, who, in furtherance of the schemes and plans of those in rebellion against the organic and lawful authority of the Hawaiian Kingdom, and for the purpose of inspiring such authority with fear and terror, caused to be landed from the U. S. S. *Boston*, then in the harbor of Honolulu, a large force of armed marines and sailors, did subvert and overthrow the then existing and recognized constitutional government of the Hawaiian kingdom, and did depose me from the sovereignty as queen thereof, and did establish a provisional government "to exist until terms of union with the United States have been negotiated and agreed upon." Upon receiving incontestable and conclusive proof that the minister plenipotentiary of the United States had aided and abetted my rebellious subjects and the aliens in concert with them, and that he had directed the armed forces of the United States to be landed and quartered in Honolulu to them to effectuate their conspiracy, I submitted to the superior authority of the United States. This action on my part was prompted by knowledge of the futility of a conflict with the United States, my desire to avoid violence, bloodshed, and the destruction of life and property, and the certainty which I felt that the United States, actuated by generous and chivalrous motives, Christian impulses, a broad and enlightened sense of justice, would promptly redress the wrongs inflicted upon me in the premises. The provisional government, inaugurated through the unlawful intervention of the forces of the United States in the manner stated, having failed to negotiate "terms of union with the United States of America," meantime, on the 4th day of July, A. D. 1894, the republic of Hawaii was ordained and established and its constitution promulgated.

At the time of the overthrow of the government of the kingdom of Hawaii, as above set forth, I was the owner in fee and was entitled to the rents, issues, and profits of certain real estate situated in the Hawaiian kingdom, known as the "crown lands," covering a total area of about 971,463 acres, and of the value of \$20,000,000. That I was dispossessed of all and of every of said lands and deprived of the income arising thereout by the said provisional government and by the said republic of Hawaii, and that by and under the terms of the joint resolution of the Congress of the United States, "To provide for annexing the Hawaiian Islands to the United States," said crown lands now constitute a part of the public domain of the United States of America. My deprivation of said lands and the rents, issues, and profits thereof by the said provisional government and the said republic of Hawaii, and the assumption of title and control of the same by the United States of America, and my deposition as queen of the Hawaiian kingdom, and my deprivation of titles, honors, privileges, dignities, rights, emoluments, and perquisites of my said royal station, was caused proximately, directly, and exclusively by the action of the minister plenipotentiary of the United States, as above set forth, and could not have been accomplished without the action on the part of said minister plenipotentiary.

In common with the native Hawaiian population of the Territory of Hawaii, I have accepted in good faith the conditions of government which have existed in these islands since the annexation thereof by the United States, and I am now a loyal citizen of that great country, yielding implicit obedience to its Constitution and laws. Confidently believing that the United States will not disregard the rules of reason, morality, humanity, and justice upon which my claim is founded, and that I will be considered and dealt with in a spirit of luminous equity, I humbly pray that the Congress of the United States may by appropriate and apt legislation declare me to be the owner in fee of all that portion of its public domain situated in the Territory of Hawaii and commonly called and known as the "crown lands;" or, if it be deemed inimical to the best interests of the United States to convey said lands to me in kind, that I be, by appropriate and apt legislation, paid the value of said lands in money, and that I be, by like apt and appropriate legislation, compensated for the loss sustained by me by reason of my deprivation of the rents, issues, and profits of said lands since my overthrow, as aforesaid, and that I be suitably and reasonably compensated for the loss of my sovereignty, fees, emoluments, and perquisites as queen of the Hawaiian kingdom.

And I respectfully request this honorable committee to make such inquiry and to receive and hear such testimony in the premises as will enable it to report upon the subject-matter hereof.

I have the honor to remain your obedient servant,

LILIUOKALANI.

Dated at Honolulu, Territory of Hawaii, the 10th day of September, A. D. 1902.

CLARENCE W. DE KNIGHT, *Counsel.*
HUMPHREYS, THOMPSON & WATSON,
Associate Counsel within the Territory of Hawaii.

HONOLULU, *September 10, 1902.*

SIR: Referring to the petition filed with the subcommittee of the United States Senate Committee on Pacific Islands and Porto Rico on this day by Liliuokalani, we have the honor to herewith make request for certain information in the possession and under the control of the secretary of the Territory of Hawaii and the commissioner of public lands of the Territory of Hawaii, respectively, and in furtherance of our said request we have the honor to submit for your consideration and approval written requests, upon the authorities mentioned, for the information which we desire, and which we deem necessary, material, and revelant to the better understanding of the subject-matter of said petition.

We have the honor to remain, sir, your obedient servants,

CLARENCE W. DE KNIGHT,
Counsel for Liliuokalani.

HUMPHREYS, THOMPSON & WATSON,
Associate Counsel within the Territory of Hawaii.

Hon. JOHN H. MITCHELL,
*Chairman Subcommittee United States Senate
Committee on Pacific Islands and Porto Rico.*

UNITED STATES SENATE COMMITTEE ON
PACIFIC ISLANDS AND PORTO RICO,
Honolulu, September 10, 1902

Hon. HENRY E. COOPER,
Secretary of the Territory of Hawaii.

SIR: You are hereby requested to furnish, in duplicate, for immediate use of the subcommittee of the United States Senate committee on Pacific Islands and Porto Rico the following:

All correspondence, of what nature or kind soever, between provisional government of Hawaii and its ministers, agents, and missionaries at the city of Washington, between the 17th day of January, A. D. 1893, and the 4th day of July, A. D. 1894, including all and every correspondence between the said provisional government of Hawaii and any person or persons representing or acting for it in any manner in the city of Washington, or who were paid out of the treasury of the provisional government, or otherwise, between the dates mentioned.

All correspondence, of what nature or kind soever, between the Republic of Hawaii and its ministers, agents, commissioners, and every, and all other persons representing it in any manner, capacity, or form whatsoever, at the city of Washington, between the 4th day of July, A. D. 1894, and the 30th day of April, A. D. 1900.

All correspondence, of what kind or nature soever, between King Kalani and the provisional government of Hawaii and the Republic of Hawaii, between the 17th day of January, A. D. 1893, and the 7th day of July, A. D. 1898.

Very respectfully,

JOHN H. MITCHELL,
Chairman.

UNITED STATES SENATE COMMITTEE ON
PACIFIC ISLANDS AND PORTO RICO,
Honolulu, September 10, 1902

Hon. E. S. BOYD,
Commissioner of Public Lands, Territory of Hawaii.

SIR: You are hereby requested to furnish, in duplicate, for immediate use of the subcommittee of the United States Senate committee on Pacific Islands and Porto Rico, the following:

A detailed statement of all and every of the rents, issues, and arising from and out of what is known as the "Crown lands" of Hawaii between the 17th day of January, A. D. 1893, and the 1st day of September, A. D. 1902, including copies of all deeds, lease tracts, agreements, or grants made between the provisional government of Hawaii, the Republic of Hawaii, and the Territory of Hawaii, and any third person or persons, corporation or corporations; also copies of every contract, lease, agreement, or sale of the water rights out of said Crown lands, or any part thereof or appurtenant thereto, between the dates mentioned and between the government authorities of Hawaii mentioned and any person or persons, corporation or corporations; also any and every map of said Crown lands, or any part thereof, together with copies of any and every sale, lease, contract, agreement entered into by and between any official of Hawaii in authority, or claiming to have authority enabling him thereto, and

person or persons, corporation or corporations, at any time heretofore made and now in force and virtue, or claiming so to be; also a complete and detailed statement of the condition and quality of all and every part of said Crown lands, with the area thereof, and where located, and the estimated value of each part and parcel thereof, together with the aggregate value thereof.

Very respectfully,

JOHN H. MITCHELL,
Chairman.

STATEMENT PRESENTED TO THE MEMBERS OF THE COMMISSION OF THE UNITED STATES SENATE BY THE CHAMBER OF COMMERCE OF HONOLULU, HAWAII, SEPTEMBER 23, 1902.

GENTLEMEN: It is with pleasure that the Chamber of Commerce of Honolulu cordially indorses the statements presented to your commission by the Hawaiian Sugar Planters' Association, the Merchants' Association, the bankers of this city, and by the Builders' and Traders' Exchange, so far as they refer to the commercial interests of this Territory.

LABOR.

In connection with the suggestions made to your commission as to the employment of Chinese labor on the plantations of Hawaii, under certain restrictions, we respectfully draw your attention to the fact that Governor Taft recognizes the importance of Chinese labor to the Philippines, and the proposition has been set forth to "clothe the Philippine Commission with power to regulate the entrance of Chinese labor." The Philippines have a large native population, in which respect they hold an advantage over Hawaii; so, if it is an assured fact that to the Philippines the Chinese immigrant is a necessity, he is certainly doubly necessary to this Territory, entirely dependent, as its plantations are, on foreign labor.

The remedy proposed for the relief of the labor situation in the Philippines is the admission of Chinese, as plantation laborers only, under sufficient bonds and a proper system of identification, which will guarantee the return of such labor to China after a certain specified time. This, gentlemen, is what has been suggested to you by the Planters' Association of Hawaii, and we recommend its adoption in this Territory, feeling assured that all the business interests in this Territory will thereby, directly and indirectly, be benefited.

HONOLULU HARBOR.

The proposition for light-houses presented by Secretary Cooper can not be too highly commended, more especially the one on Makapu Point and one on Molokai, as these will mark this channel, which is the great avenue of ocean travel. Regarding the improvement of the harbors in this Territory, we beg to remind your Commission that the opening of the isthmian canal, connecting the Atlantic and Pacific oceans, will render the port of Honolulu of vastly more importance to the Federal Government than it is to-day, and that it is now none too early to begin preparations for enlarging and deepening this harbor, in order that the vast amount of shipping which will make Honolulu

a port of call may be accommodated just as soon as the canal is opened. We anticipate that with the opening of the canal the shipping at this port will be largely increased and that vessels of all nationalities will touch here on their way to and from the Orient.

HAWAIIAN SILVER.

In the judgment of this chamber the recommendation of the bar as to the redemption of Hawaiian silver can not be put into effect too early a date. We urge the prompt passage of Senate bill 22.

FIRE CLAIMS.

We unqualifiedly indorse the statements made by the Mercantile Association of Honolulu regarding the fire claims. This indebtedness on the part of the Territory was incurred in an attempt to suppress the bubonic plague in the quickest and most effective manner, and the greatest care has been exercised in adjudicating the above claims, which could not be paid by this Territory except by largely increasing Territorial taxes. The earning power of the people has been seriously affected by the present conditions of trade consequent on the difficulties of the sugar industry, and considering also that the outbreak has since prohibited the issuing of bonds of the Territory for any purpose, that to now pay the fire claims would be an unsupported burden.

COFFEE.

As your Commission has expressed a desire to be supplied with further information regarding the coffee trade and its possibilities, we beg to furnish the following facts:

The exports of coffee from Hawaii to the United States in the two fiscal years have been as follows:

Year ending June 30—	Pounds.
1901	2, 119, 543
1902	1, 082, 994

These figures show a decrease in exports of one-half within the year, owing to the low price of coffee on the mainland and the difficulty of securing reasonable labor for our coffee plantations.

Brazil supplies the bulk of the coffee (900,000,000 pounds) exported to the United States, and, in proportion to the benefit derived by this country from this trade, the return made by that country is very small. The total purchases in the States last year amounting to only \$10,000,000. The character of Hawaiian coffee is dissimilar to Brazilian. It is of a milder, but to the connoisseur more acceptable, character, and although on this account it can not be expected altogether to take the place of the stronger coffees, its fine character and the fact that it is grown on American soil should entitle its cultivation to that recognition which a duty or a bounty would afford.

The extent to which the coffee industry on these islands can be sustained under such fostering care is difficult to arrive at, as no proper

mate can be made of the amount of capital obtainable for the establishment of coffee estates, nor the amount of labor which will be forthcoming, even under a partial suspension of the Chinese exclusion act, for their cultivation; but it is certainly safe to say that the area under coffee would be largely increased and as rapidly as the conditions admitted of, and as this industry is one in which the small farmer can engage, with its revival an increase of this most desirable class of agriculturists may be expected.

We submit these facts to show that some aid is necessary in order to stimulate the production of coffee in Hawaii, either in the form of protection or of a bounty, as well as by a provision for a sufficient labor supply.

HAWAIIAN TRADE.

It has already been stated by the Hawaiian Sugar Planters' Association that the trade between the United States mainland and this Territory is the largest done with any country of the size and population of Hawaii, a fact which is statistically proved beyond question, and as the prosperity of this Territory increases so must of necessity its trade with the mainland manufacturers and merchants. It follows, therefore, that, apart from the benefits to be gained by our local population from the prosperity of our staple industries, the advantages derived by the mainland from such prosperity are considerable and not to be overlooked.

No record exists of the imports from the mainland since June, 1900, but for the five months and fourteen days to June 14, 1900, the importations from the mainland were valued at \$8,609,820, being at the rate of about \$18,785,000 per annum, and these figures convey some idea of what our trade with the mainland can be brought to under favorable conditions.

The value of the exports from Hawaii for twelve months to June 30, 1902, was \$24,754,922, all of which went to the mainland, excepting \$54,365 which was exported to foreign countries.

The exports have been, of course, mainly made up of sugar, but some rice, coffee, fresh fruit, honey, hides, wool, etc., have also been exported.

It is proper to mention here that fresh and canned fruits could be made articles of export to a much larger extent than at present were our labor conditions more favorable. For example, the canning of pineapples, which has been carried on here to a limited extent, is sure to become a large industry if we can have the necessary labor, for the Hawaiian pineapple is most highly esteemed for its size and flavor, which have commanded for it a higher price in the mainland markets than other canned pineapples.

Sisal is another infant industry which is commanding attention. The plant grows well and readily here, and without a doubt large quantities of this valuable fiber could be raised here with the necessary labor to do the decorticating and preparing thereof.

SHIPPING.

A fact worth mentioning is that all of the exports from Hawaii to the United States are now carried by American vessels, and this can be said of no other country that trades with the mainland.

For the fiscal year ending June 30, 1902, the tonnage and number of vessels entering Hawaiian ports in the "coastwise" trade—that is, trade with the mainland—was 917,089 tons, represented by 593 American vessels.

Foreign vessels entering the ports were 210, of a tonnage of 399,000 tons. It will thus be seen that the total shipping entered at all the ports of the islands for the year was 803 vessels, of 1,316,138 tons, which compares as well as anything else can the extent and value of the trade of this little mid-Pacific group.

NEW BUILDINGS.

We ask your consideration of the great need of this Territory for Federal buildings. There should be new post-offices in Honolulu and Hilo. In both places business has far outgrown the accommodations. The quarters now used by Federal courts in their various departments are totally inadequate. Persons held for offenses against United States laws, or as witnesses, have to be placed in the already overcrowded Territorial prisons. No such place as a general house of detention exists. The business of the United States courts is already large and must inevitably increase in the immediate future.

HEALTH MATTERS.

The necessity for establishing and maintaining at the port of Honolulu a most modern and effective disinfecting plant for use on land and sailing vessels, and also of a thoroughly equipped quarantine station, is no doubt manifest to you.

As diseases when epidemic gradually extend to other countries, and established lines of travel, this port should be prepared to care for an infected vessel which might arrive, taking therefrom and carrying any sick persons without endangering this community, and to clean the vessel before allowing it to proceed on its course to mainland ports.

As the greater part of the vessels from the Orient now stop at this port on their way to San Francisco and other coast ports, this makes it a "buffer," as it were, between the East and the West. The efficient quarantine work here becomes a matter of great importance to the Pacific coast as well as to this community.

Officers of the Marine-Hospital Service, we presume, have made no matter plain to you and indicated what the especial needs of this service are.

It is a pleasure to state that the Marine-Hospital Service and the Territorial board of health have worked together, thus far, in perfect harmony in health matters.

LAND LAWS.

In the opinion of this chamber it is deemed that any radical change of the land laws as now existing in this Territory would be subversive of its best interests.

FUNDS FOR NEEDED IMPROVEMENTS.

We respectfully call your attention to the fact of the increasing the revenue of the United States through our customs receipts.

respectfully request that liberal appropriations be made by Congress for the various improvements that have been suggested as commensurate with the amounts collected.

Respectfully submitted.

THE HONOLULU CHAMBER OF COMMERCE.
By CHAS. M. COOKE, *Vice-President*.
JAS. GORDON SPENCER, *Secretary*.

The foregoing statement was approved at a special meeting of the Honolulu Chamber of Commerce held on September 22, 1902.

JAS. GORDON SPENCER, *Secretary*.

STATEMENT CONCERNING THE HAWAIIAN LABOR SUPPLY

presented to the honorable members of the Commission of the United States Senate, on behalf of the Hawaiian Sugar Planters' Association, September 12, 1902).

The Hawaiian Sugar Planters' Association is made up of the sugar planting corporations and sugar plantation owners of the Territory, and its object is to make improvements in the manufacture of sugar and to attend to all matters relating to the interest of the sugar indus-

try in these islands. A board of nine trustees attends to the business of the association, and it is by this board that the following representations are made:

The number of plantations on the islands is 52, of which number are fitted out with their own independent factories.

The total amount of capital invested in these plantations is \$56,000,000, and the amount of taxes paid annually by these plantations to the Territorial government is about \$690,000.

The number of persons at present employed in cane cultivation and manufacture is about 38,500.

Last season's sugar crop was 360,038 tons, and the number of tons which have been shipped this season so far is about 300,000.

Our sugar is shipped either by direct steamer or sailing vessel to New York, by steamer or sailing vessel to San Francisco and then by the Southern Pacific Railroad Company to New York, or it is shipped to San Francisco for use in the California refineries.

The carrying of the sugar to New York by long sea is largely conducted by the American-Hawaiian Steamship Company. This company, which is the pioneer company of American-built cargo steamships, owes its origin to the sugar industry of these islands. The company's fleet consists of seven steamers of an aggregate tonnage of 65,000 tons.

There is engaged in the carriage of our sugar to California a fleet of American steamers and sailing vessels.

These few statistics serve to show the magnitude of the sugar industry, the success or failure of which depends to so large an extent on the sufficient supply of labor. For field labor in Hawaii a large portion of Japanese and Chinese are an absolute necessity, in so far as any other class of labor is procurable to any great extent.

Other cane-sugar growing countries either possess an indigenous laboring population for cultivation or have within easy reach of them who are readily obtainable for tropical field work, and whose physical and constitutional enable them to undertake such field work without injury to their health.

The native population of the Hawaiian Islands is very limited, and the tendency of the laboring class is not toward field work. The few mechanics, and a large portion is engaged in a variety of trades, but agricultural labor appears to be distasteful to them, and the number employed on sugar estates is so small as to be hardly worth mentioning. This being so, it has in past years been necessary to procure immigration of field laborers to the islands, and many countries have been drawn from. There has in the past been emigration from many, Norway and Sweden, Azores, Madeira, Portugal, Galicia, and Japan, besides which British, Americans, Italians, and others (from the United States) have come in small numbers.

So far as the Europeans and the Americans are concerned, the majority, with one exception, been found unfitted for tropical field work, and could not perform it, and never for long labored in the field. The exception noted is that of the Portuguese from Madeira and the Azores, who for a few years after their arrival showed themselves well capable to perform good field work. The improved conditions in their own countries no longer necessitating emigration, these people show no disposition to come to these islands. Of the Portuguese who originally came to Hawaii as assisted emigrants those who died on the mainland have so prospered that now they do not engage

large extent in field labor, and their children, by the aid of the excellent Hawaiian free-school system, have fitted themselves for more congenial occupation than agricultural labor affords.

The impossibility of securing a sufficient supply of Hawaiian or other laborers able to endure the work in cane fields forced the planters of these islands into a reliance on China and Japan for the necessary supply. The Chinese have always proved themselves to be a law-abiding, docile, and industrious people, but the United States exclusion laws shut out this nationality from Hawaii as soon as annexation became an accomplished fact, and our sole dependence is now placed on Japan for such intermittent supply of labor as is attracted hither by the certainty of improved conditions.

Since annexation the difficulty of securing an adequate supply of field labor for sugar plantations has been enormous. Chinese are absolutely prohibited, and but few Japanese come, while at the same time numbers of Chinese and Japanese leave the islands monthly.

To show just what the conditions are in this respect it may be stated that from August 1, 1901, to June 3, 1902, 5,352 Japanese men arrived in the country and 2,880 left the country, making the total increase in that period only 2,472, and that of Chinese 188 men arrived and 1,418 left, making a total decrease of 1,230, so there was a net increase in the Japanese and Chinese population of only 1,242, not including women, which number are not necessarily field laborers alone.

When the labor conditions which had to be faced after annexation were realized, the Planters' Association set about finding laborers on the continent of the United States. Some Portuguese were brought from the neighborhood of New Bedford, and some Italians were secured in the Eastern States and started for Hawaii, but the bulk of them dropped out on the way across the continent and but comparatively few reached these islands. An unsuccessful attempt to get negroes of a better class was made, and finally about 2,930 Porto Rican men with their families were brought here at very great expense. Agents from this association were for long established on the mainland and traveled over its length and breadth to find there such labor as our plantations demanded. It was by no means a question with us of Asiatic labor alone, but one of any kind of labor, and yet wherever we turned we found that the great continent had readily absorbed all the labor there was and there was no surplus for us.

The efforts to find some way of cultivating our cane fields were not confined to those above mentioned. There existed in the minds of some the impression that the proper way to conduct a plantation was to divide the land into small lots and place them in the hands of white men to cultivate, instead of doing the work of cultivation by day laborers working for a wage under one controlling management. Accordingly, the Ewa plantation, on this island of Oahu, decided to experiment with American farmers. Fifteen families of highly respectable people were carefully selected in the Western States, and their expenses paid to the plantation, where houses had been erected for them, each with a garden patch surrounding it, and where a large patch of common land had been set apart for their use as pasture for such stock as they desired to keep. Here they were given parcels of land to cultivate in cane on a profit-sharing basis, and every help was rendered in the way of plowing and preparing their fields, but notwithstanding this and all the Ewa Plantation Company expended on

this most creditable effort to raise cane by white farmers, these people were not able to perform the necessary labor, and they drifted by degrees, so that in about a year none of the fifteen families left. Other experiments of a similar nature have been made with similar results. The planters generally are prepared to encourage the cultivation of cane by small farmers if there is any assurance that the undertakings will be carried out.

In connection with the questions of homesteading and of development on strictly American lines, it is proper to point out that lands cultivated by plantation companies who find it necessary to irrigate, because of the uncertainty of the rainfall, were either arid or bare pasture lands before they were acquired by those companies. Those who sunk artesian wells, established expensive pumping plants, constructed water ditches and pipe lines, and at enormous cost brought water onto the lands, and thereby made agriculture a possibility, development by homesteaders only had been possible, the lands are now cane fields would be in their primitive condition, and their irrigation was only rendered possible by the investment of a large amount of capital.

Apart from this fact, there remains the all-important consideration that even if white men could labor in the cane fields, and were to undertake such work, there is no possibility of obtaining for them a quarter, and least of all from the United States mainland, a sufficient number to fill our needs.

At present, as has been said, Japan is the only source of our labor supply, and while no dissatisfaction with the work people of that country is either expressed or implied, our experience has taught us that it, like all other countries from which we have in the past imported labor, is not to be relied upon for that labor and sufficient supply which is essential to our success as a cane country; and we believe that a properly regulated and restricted immigration of Chinese field laborers would solve our difficulty with the slightest degree interfering with the welfare of the native American population of the group. On the contrary, as the dependence of the staple industry of these islands increases, so will the entire population irrespective of nationality or occupation. Sugar is the pivot on which we revolve, and on the success of the sugar industry depends the well-being of every resident in the islands.

Surprise has at times been expressed by those of imperfect knowledge of our conditions that other industries besides sugar do not attract more attention in Hawaii, but a more intimate acquaintance has speedily discovered the fact that while the possibilities of other industry in this country outside of the sugar industry are not inconsiderable, the difficulty of securing an adequate supply of labor stands always in the way of enterprise, alongside of other difficulties which need not here be referred to.

A few years back great hopes were entertained that the cultivation of coffee could be profitably undertaken on a large scale. It had been grown in a somewhat unscientific manner for years, and was widely esteemed by reason of its excellent quality, and there was every reason to believe that with the adoption of modern methods the coffee industry could be made a flourishing and profitable one. Large tracts of land were divided into homesteads by the Government, and private lands were acquired by enterprising farmers, costly

houses and cleaning plants were erected, and all the plans were laid for the conduct of the business on a sound basis. Much of the work of a coffee plantation can be accomplished by white men with a comparatively moderate amount of help, but during the critical time of harvesting the crop, when a large amount of work had to be accomplished in a very short time, the necessary number of pickers was not forthcoming, and as the fall in the value of coffee occurred about this time, it was impossible for planters to pay the high wages demanded by laborers, and the coffee industry of Hawaii declined, while that of other countries more favored in their labor conditions apparently continues to flourish despite the fact that there is so serious a difference between the coffee market to-day and that of a few years ago. It is not unreasonable to suppose that if the labor supply of these islands was abundant and if coffee was subject to a protective tariff in the United States the industry would survive and give profitable and agreeable occupation to many.

The rice industry of the islands has always been a large one, but the exclusion of Chinese from the islands will have the effect of gradually reducing the area of rice under cultivation, until before long little or none will be raised. A valuable industry will be lost, and the land rentals, which amount to so considerable a total, will no longer accrue to the owners, very many of whom are Hawaiians.

The revenue derived by the Government from rice lands will of course be lost should rice cultivation be discontinued in these islands, and to give some idea of the value of the Chinese to the Territory as taxpayers it might be proper to mention that they pay taxes to the amount of \$135,000 annually.

The arguments commonly used against Chinese immigration are so well known that it is unnecessary to repeat them, or even to refer to them further than to say that while they may be good when applied to the mainland, they can not with justice be applied to Hawaii. Laws and regulations which cover all the conditions existing on the mainland do not of necessity fit our conditions, and we urgently and with all deference would ask that the excellent laws and regulations of the United States be so modified for Hawaii not only in respect to labor matters, but in many other respects, that this country may not suffer by their application.

We fully appreciate the immense amount of work with which Congress has had to deal since these islands became an integral part of the great Republic of the United States, and we know how difficult it has been for members of the Senate and House of Representatives to find time to study the conditions prevailing here in Hawaii, but now that our gentlemen have favored us with this most welcome visit, we feel that the conditions and needs of this outlying Territory will be more perfectly understood, and that we may reasonably expect to have accorded to us permission to avail ourselves of an assured labor supply.

We would respectfully ask that, in considering this question and in laying it before others, you bear the following few facts in mind:

1. The industries on which these islands depend for their commercial existence are sugar and rice, but mainly sugar.
2. The shipping, the extent and value of our purchases on our mainland, the well-being of our merchants, professional men, and mechanics depends either directly or indirectly on these industries.

3. The success of these industries depends on an adequate and reliable supply of laborers.

4. There is practically no indigenous population to draw field labor from.

5. Apart from the impossibility of procuring American laborers in sufficient numbers, they can not and will not work in tropical fields.

6. If by reason of these islands not having a sufficient labor supply or if the full protection of the tariff is curtailed, our industries naturally suffer, as will the trade of the mainland with us—a trade the way, which is the largest enjoyed by mainland manufacturers and traders with any country of the size of the Territory of Hawaii.

So far as the labor situation is concerned, we respectfully submit that these six points, or facts, cover the ground, and believe that you have studied the conditions prevailing here you will thoroughly agree in their accuracy.

Respectfully submitted.

HONOLULU, *September 12, 1902.*

HONOLULU BANKERS' MEMORIAL.

HONOLULU, HAWAII, *September 11, 1902.*

The honorable Committee of the United States Senate.

GENTLEMEN: Under act of the Hawaiian Government in the year 1883, \$1,000,000 in silver coin—\$500,000 in dollars, \$350,000 in half dollars, \$125,000 in quarters, and \$25,000 in dimes of the same weight and fineness as United States coin—were minted in San Francisco and put into circulation in these islands from 1884 to 1886, replacing a coinage consisting of Mexicans, 5-franc pieces, pesos, sols, etc.

This Hawaiian silver had a legal-tender value of \$10, United States gold being required under the Hawaiian laws for far larger amounts. At no time has there been any difference in the value of Hawaiian silver compared with United States silver, although when the Hawaiian silver was put in circulation all silver was at a small discount, say 1 per cent, for the purchase of foreign exchange. For years past silver has circulated freely on these islands at par with United States gold, and has been accepted for large amounts in payments in excess of its legal-tender value without discount. Upon annexation of these islands a special act was passed by Congress to legalize the Hawaiian silver, and nor was any provision made for its redemption or recoinage into United States money, but the full face value of Hawaiian silver coin at par with United States gold has been maintained by the banks and business houses by reason of their so accepting it on deposit for exchange and all business purposes. Thus the banks have been enabled to do by finding an outlet for the silver in the large demand of plantations and the outlying districts. The only exception to this is that of a local bank which had a temporary excess of silver and offered a one-eighth of 1 per cent premium for gold.

MERCHANTS' ASSOCIATION OF HONOLULU,
Honolulu, Hawaii T., September 12, 1902

Hons. J. H. MITCHELL, J. R. BURTON, and A. G. FOSTER,
*Subcommittee of United States Senate
 Committee on Pacific Islands and Porto Rico.*

GENTLEMEN: At a special meeting of the Merchants' Association of Honolulu, held September 10, 1902, the following-named gentlemen were appointed a committee to present a memorial from this association to your honorable body: Messrs. George W. Smith, W. Dimond, J. F. Humburg, J. Wakefield, and Robert Catton.

I beg further to inform you that at a special meeting of the association, held September 11, 1902, the said memorial was read and indorsed by unanimous vote of this association.

Very respectfully, yours,

W. W. HARRIS,
Secretary Merchants' Association of Honolulu

HONOLULU, HAWAII, *September 12, 1902*

Hons. J. H. MITCHELL, J. R. BURTON, and A. G. FOSTER,
*Subcommittee of United States Senate
 Committee on Pacific Islands and Porto Rico.*

SIRS: The undersigned, a committee duly appointed by the Merchants' Association of Honolulu, beg to submit for your consideration the following memorial on the economic and other conditions of the Territory.

We will assume that you are conversant with the fact that action to the United States has resulted in a serious pecuniary loss to the government of Hawaii through the transfer of the custom-house internal-revenue receipts to the Federal Government, and proceed to state how, in our opinion, this loss may be neutralized to the advantage of both the Federal and Territorial governments.

SUGAR.

To the growth of the cane and its manufacture into sugar is due the commercial, if not the political, position of these islands to-day. The sugar industry, fostered by the reciprocity treaty before annexation, has been seriously injured since then by the application of the United States labor laws and Chinese-exclusion act. While yielding to the sentiment in our desire to see this become "a white man's country" to the extent possible, it has been demonstrated on several occasions that it is impossible for the white man to labor in the cane fields, even at a high rate of wages. *We would therefore suggest a relaxation of the laws just referred to, such as would enable our planters to draw labor from Asia and get enough of it under such restrictions as it might be right to Congress to indicate.* This class of labor, if brought under proper conditions, would not come into competition with the local can labor. As merchants we leave the further discussion of this matter to the Planters' Association, but the sugar industry is so much the most important of all Hawaiian enterprises that it ought to be, in our opinion, to occupy the first place in such a memorial as this.

FIRE CLAIMS.

provision for payment of losses incurred in the stamping out of the bubonic plague in Honolulu, 1899-1900.)

We respectfully submit the following facts:

(1) That the property destroyed and for which compensation is claimed was only condemned to destruction after a careful examination by the board of health, and that said board of health was satisfied that the premises to be destroyed were plague infected. A careful record was kept of each building or block of buildings destroyed.

(2) That the disaster of January 20, 1900, where property covering approximately 35 acres of land was swept away by fire, was caused by the sanitary fire (started by order of the board of health) getting, with the aid of a strong trade wind, entirely beyond the control of the fire department.

(3) That the sole object and purpose of those sanitary fires was to confine the epidemic to the closest limits possible, in order to prevent the dread disease reaching the shipping in port and the western coast of the mainland, and to hold it within the contaminated sections of the city.

(4) That the losses incurred by the destruction of buildings, household property, and merchandise was largely in excess of the amount (\$1,473,173) which has been awarded by the fire claims commission to the various claimants, and that the said claimants will cheerfully bear a considerable portion of their direct losses as well as the whole of their indirect losses, for which no claim whatever has been made or allowed.

(5) That it is an undoubted fact that the business of the community has suffered severely and is still suffering from the nonpayment of these claims, and if same are not paid within a reasonable time many of these claimants, who practically lost all their subsistence in these sanitary fires, will be forced into bankruptcy.

(6) We respectfully suggest that your honorable body examine with care the records of the board of health, which controlled the welfare of the port and city during the epidemic of the bubonic plague, as also the records of the proceedings of the fire claims commissioners, and we believe these records will fully satisfy your honorable body that no wanton or unnecessary waste of property was permitted and that the whole purpose of the sanitary fires was the eradication of the bubonic plague.

(7) The inability of the Territorial government to meet the payment of these claims has been rendered evident by statements now and heretofore made to your committee.

We would, therefore, urge the appropriation by Congress of a sufficient amount to cover the awards made by the fire claims commission.

PUBLIC HEALTH.

We wish to bear testimony to the efficient work done during the past two years by the United States Marine-Hospital Service, and we would respectfully urge your recommendation of such appropriations as will provide for the extension and further equipment of the quarantine station in Honolulu.

HARBOR ACCOMMODATION.

We respectfully suggest that the cost of maintaining and improving the condition of our harbors be borne by the Federal Treasury, the burden of maintenance and improvements necessary to meet changing conditions resulting from the ever-increasing tonnage of vessels built is too heavy for this community to bear when deprived of the revenue from the customs receipts.

We beg respectfully to emphasize the fact that the benefits from execution of public work of this character are more of a national than a local value. More American shipping tonnage puts in at island ports than at any other ports of the world, outside of those of the mainland. It is highly desirable for the fostering of United States shipping that our harbors be deepened and continually kept clear of mountainous reefs so that ships of large tonnage can be brought into harbor and discharged at wharf in safety. Shipping interests between the Orient, Australia, and Western American ports will be greatly furthered by having safe, deep harbors and good wharf accommodations at Honolulu.

To provide for the larger class of vessels, both of the merchant marine and Navy, which are now coming into use on the Pacific, is a matter of great importance that channels should be deepened, harbors enlarged to admit of safe entrance and speedy handling of cargo and fuel.

FEDERAL BUILDINGS.

The necessity is apparent for better provision for offices of the various departments of the Federal Government. The post-office and custom-house are not adequately provided for prompt handling of business which comes to them. Other departments are using buildings which are needed for the use of the Territorial Government, and it would seem to be for the best interests of all that a general building should be erected without loss of time, where the offices and courts could be established and the rooms in the buildings which were formerly used by the Territory given up again to their original use.

CURRENCY.

The existence of two sets of silver coins is an anomaly which causes much trouble if, for any reason or without any good reason, the repudiation of the "Kalakaua" dollar comes about. It is intrinsically of the same value as the United States dollar, so that the cost of coining it would but slightly exceed that of recoinage, a cost so small in comparison to the advantages to be derived that we trust Congress will take the necessary steps to insure the passage of the bill recently introduced for that purpose.

LIGHT-HOUSES.

We heartily indorse the statements made before your honorable Commission, by the secretary of the Territory, as to the necessity of having the island coasts properly lighted.

TRANSPORT SERVICE.

The Merchants' Association would urge that the port of Honolulu (an American port) be the mid-ocean stopping place of the transport service between Manila and San Francisco.

CONTRACT FOR SUPPLIES.

The Merchants' Association would urge upon the Federal Government the advisability of offering tenders to the local merchants for supplies for the departments of the Army and Navy stationed at Honolulu, and, other things being equal, to award the contracts to local bidders.

COFFEE.

This, one of the minor industries of Hawaii, has suffered of late years chiefly from the increased supply of the South American product. In any future readjustment of the tariff we would bespeak your consideration for Hawaiian coffee.

CUSTOM-HOUSE.

In conclusion, we would respectfully submit that the withdrawal of the customs receipts from the Territory is responsible, to a very great extent, for the existing financial stringency. Figures have been presented to you in the memorial from the Builders and Traders' Exchange, and it is unnecessary for us to repeat them. In view of this large contribution to the Federal revenue, it would seem to us that the cost of such improvements and appropriations as have been suggested is well provided for.

For the Merchants' Association of Honolulu:

W. W. DIMOND,
GEO. W. SMITH,
JAMES WAKEFIELD,
T. F. HUMBER, jr.,
ROBT. CATTON,
Committee.

CIVIL LAWS OF 1897.

DEPARTMENT OF ATTORNEY-GENERAL.

CHAPTER 71.—*The attorney-general.*

SEC. 1013. The attorney-general shall appear for the government, personally or by deputy, in all the courts of record of this republic (Territory), in all cases criminal or civil in which the government may be party, or be interested; and he shall in like manner appear in the district courts when requested so to do by the marshal of the republic (high sheriff of the Territory) or the sheriff of any one of the islands.

SEC. 1014. He shall also be vigilant and active in detecting offenders against the laws of the republic (Territory), and shall prosecute the

same with diligence. It shall also be his duty to enforce all bonds and other obligations in favor of government that may be placed in hands for that purpose by any person having the lawful custody of such papers; and he shall likewise be diligent in prosecuting all persons who may obstruct any street, channel, harbor, wharf, or highway, or any stream or public water course, or commit any trespass or waste on any portion of the public domain or other public property.

SEC. 1015. The said attorney-general shall, without charge, at all times when called upon, give advice and counsel to the ministers (heads of departments), the marshal (high sheriff), sheriffs, collectors, justices, and other public officers, in all matters connected with their public duties, and otherwise aid and assist them in every way required to enable them to perform their duties faithfully.

SEC. 1016. It shall also be the duty of the said attorney-general to give counsel and aid to poor and oppressed citizens of the republic (Territory), and to assist them in obtaining their just rights without charge; provided, however, that he shall not be obliged to render aid, counsel, and assistance unless requested so to do by the president (governor), or by some one of the ministers (heads of departments).

SEC. 1017. Said attorney-general shall not receive any fee or remuneration from or in behalf of any person or prosecutor for services rendered in any prosecution or business to which it shall be his official duty to attend; nor be concerned as counsel or attorney for either party in any civil action depending upon the same state of facts.

SEC. 1018. He shall account with the minister of finance (treasurer of the Territory) every three months for all fees, bills of costs, penalties, and other moneys received by him by virtue of his office.

SEC. 1019. Said attorney-general shall, when required, give opinions upon questions of law submitted to him by the president (governor), the legislative assembly, or the head of any department.

SEC. 1020. The said attorney-general shall receive such salary as may be voted from time to time by the legislature, which shall be paid him out of the public treasury in equal monthly payments in full for all services rendered by him.

SEC. 1021. The attorney-general may from time to time appoint a deputy for any judicial district, whensoever the exigencies of the public service may require it, and shall be responsible for all the acts of such deputy or deputies.

SEC. 1022. All the duties imposed by existing laws on district attorneys formerly are hereby required to be performed by the attorney-general.

CHAPTER 72.—*Police.*

SEC. 1023. The attorney-general shall have the care, superintendence, and control of the entire internal police of the republic (Territory) subject to the provisions of this act.

SEC. 1024. There shall be a marshal of the republic (high sheriff of the Territory), hereinafter named the marshal (high sheriff). He shall be the chief of police for the republic (Territory), and shall be responsible to the attorney-general. He shall have the supervision and control of the sheriffs and subordinate officers of the internal police. He shall hold office subject to removal by the attorney-general, with the approval of the cabinet (governor); and he may be removed for

the supreme court, or by a majority of the justices thereof. Any vacancy which shall hereafter occur in the office of marshal (high sheriff) shall be filled by commission from the president (governor), and with the advice and consent of the cabinet (Senate), upon the nomination of the attorney-general.

SEC. 1025. Any person who shall be hereafter so nominated and commissioned to the office of marshal (high sheriff) shall, before entering upon the duties of such office, execute and deliver to the attorney-general a bond in a penal sum of not less than five thousand dollars (\$5,000), with sufficient surety or sureties, to be approved by any justice of the supreme court, and such approval to be by such justice endorsed on said bond, conditioned for his faithful execution of all process directed to him by any of the courts of the republic (Territory) for the faithful accounting for and due return of all fines, penalties, and moneys collected by him; for the safe-keeping of all prisoners lawfully committed to his custody; and for the faithful performance of all other duties of his office; and that he will take only the lawful fees of his office.

The attorney-general, with the approval of any justice of the supreme court, or a majority of the justices of the supreme court, may as the occasion may require exact additional bonds or increased security from the marshal (high sheriff), conditioned as above, provided not more than twenty thousand dollars (\$20,000) in all shall be thus exacted. The bond or bonds given as herein provided shall be filed and preserved in the office of the clerk of the supreme court.

SEC. 1026. There shall be a sheriff for the island of Hawaii, a sheriff for the islands of Maui, Molokai, Lanai, and Kahoolawe, and a sheriff for the islands of Kauai and Niihau, who shall have the exercise, care, supervision, and control of the police within their respective jurisdictions; subject, however, to the superior control of the marshal (high sheriff) and the attorney-general.

SEC. 1027. The respective sheriffs shall be appointed by the marshal (high sheriff), by and with the approval of the attorney-general, to be endorsed on the commission of the sheriff so appointed.

They shall hold their offices subject to removal by the marshal (high sheriff), with the approval of the attorney-general.

SEC. 1028. The respective sheriffs shall give bonds, with sufficient sureties, to the attorney-general in a penal sum of not less than three thousand dollars (\$3,000). Such bonds shall be conditioned, and may be increased or new bonds or other sureties exacted, as provided in the case of the marshal (high sheriff) in section 1025, provided that not more than ten thousand dollars (\$10,000) in the aggregate shall be exacted in bonds from any sheriff. Such bonds shall be filed and preserved in the office of the clerk of the supreme court.

SEC. 1029. In case of any breach of the condition of any bond so furnished by the marshal (high sheriff), or by any sheriff, any person thereby injured may institute a suit upon such bond in his own name and for his sole use, or for the use of any person or persons whom he therein represents, and thereupon recover such damages as shall be legally assessed, with costs of suit, for which execution may issue in favor of such person. Such bond shall, after any judgment rendered thereon, remain as security for the benefit of any person injured by the breach of any condition thereof until the whole penalty shall have been recovered. No suit upon any such bond shall be commenced later

than two years after the right of action shall have accrued, pro-
that infants, femmes coverts, and persons non compos may sue
or in respect thereof within one year after their disabilities shall

SEC. 1030. The marshal (high sheriff) shall, with the approval of the attorney-general, appoint and commission not more than two deputy marshals (deputy high sheriffs), for whose acts and default the marshal (high sheriff) shall be responsible upon his official bond. Each deputy marshal (deputy high sheriff) so appointed shall be authorized to do or perform any act or thing required by law to be done or performed by the marshal (high sheriff). The marshal (high sheriff) shall exact from his deputies bonds of indemnity with sufficient securities for the due and faithful discharge of their duties, which may be in any amount not to exceed ten thousand dollars (\$10,000) that shall be approved by the attorney-general.

SEC. 1031. It shall be the duty of the marshal (high sheriff), and of the several sheriffs within their respective jurisdictions, to preserve the public peace, to have charge of all jails and prisons, to safely keep persons committed to their charge, to execute all lawful precepts and mandates directed to them by any judge, court, minister (head of department), or other person thereunto authorized; to arrest persons from justice, as well as all criminals and violators of the laws; and generally to perform all such other duties as may be imposed upon them by law, for any of which purposes they may command all necessary assistance, civil or military.

SEC. 1032. The marshal (high sheriff) for and within the island of Oahu, subject to the approval of the attorney-general, and the several sheriffs for and within their respective jurisdictions, subject to the approval of the marshal (high sheriff), may appoint such deputy sheriffs and other police officers as occasion may require, and dismiss them in their discretion; and may in like manner appoint and adjust the compensation of such officers, except as otherwise provided by law: Provided, however, that the number of police officers or constables shall not exceed, for the island of Oahu, one hundred; for the islands of Maui, Molokai, Lanai, and Kaupae, eighty; for the island of Hawaii, one hundred; for the islands of Niihau and Niihau, forty; and further provided, that nothing in this section contained shall be construed to prevent the appointment of a number of special constables to serve without pay, except that for during any emergency such special officers may be paid, in the discretion of the officer by whom they were appointed to serve during such emergency, if such payment be approved by the attorney-general.

SEC. 1033. The marshal (high sheriff) and the several sheriffs shall exact from the deputies sheriff appointed by them, respectively, bonds of indemnity, and shall be severally responsible for the official acts of such deputies.

SEC. 1034. The marshal (high sheriff), sheriffs, and deputy sheriffs shall receive in full payment of their services such annual salaries and compensation as shall from time to time be prescribed by the legislature; provided, however, that the legally prescribed fees received for the sale and conveyance of property under execution or other order issued from any court, to an amount not exceeding fifty cents for any one such sale and conveyance, shall belong to the marshal (high sheriff) or to the sheriff or to the deputy sheriff making such sale and conveyance, the excess of such fees over said sum of fifty cents, to be returned to the treasury as a government realization.

SEC. 1035. Any police officer or constable appointed to or holding office under this act may be removed at any time by any judge of a court of record, or by the district magistrate of Honolulu (if the officer sought to be removed shall be a member of the police force for the Island of Oahu) for incompetency, corruption, or misbehavior in office.

SEC. 1036. In all cases in which the marshal (high sheriff) or any deputy sheriff, or constable shall be a party, plaintiff, or defendant, to any suit or cause pending in any court of the Republic (territory), the officer so interested shall not be competent to execute any process in such suit, and the court when necessary may appoint an disinterested person to act as a substitute for such officer, to execute such process, who shall, in all respects, be accountable to the court for his conduct.

SEC. 1037. In case of the death, resignation, or removal from office of the marshal (high sheriff) or any sheriff without having executed, or having executed only in part, any process in his hands, the execution of such process may be effected or completed by the deputy of such marshal (high sheriff) or sheriff, or by such other police officer as shall be thereunto appointed by the attorney-general; provided, that the successor to such marshal (high sheriff) or sheriff shall be appointed, and such successor shall be responsible for the completion of the execution of such process from the point to which the same had progressed at the time of his assumption of such office. The power hereby conferred shall extend to the execution, acknowledgment, and delivery by such deputy or other designated police officer as aforesaid, or by the successor of such marshal (high sheriff) or sheriff as aforesaid, of all deeds and other instruments of conveyance.

SEC. 1038. The marshal (high sheriff) and the respective sheriffs shall file all warrants, mittimus, processes, and other official papers, and the attested copies of them, by which any prisoner shall have been committed or liberated, and they shall be safely kept in a suitable box or safe, and upon the death, resignation, or removal from office of such marshal (high sheriff) or sheriff shall be delivered, together with all other official records, papers, and journals, to his successor, or to any other officer or person duly appointed to receive them; and in default of such delivery such marshal (high sheriff) or sheriff, if living, may be held liable for embezzlement, as provided by section 158 of chapter 15 of the penal code, and shall also be civilly liable in damages to any person or persons who shall be injured by such nondelivery. If such marshal (high sheriff) or sheriff shall be dead, such civil liability shall attach to his personal representatives and the sureties upon his official bonds, jointly and severally. In addition to such civil liability as aforesaid such marshal (high sheriff) or sheriff, or their personal representatives and sureties on their official bonds, shall forfeit and pay for each such default in delivery the sum of two hundred dollars, to be recovered for the use of the public treasury.

SEC. 1039. All process of any court of record shall be addressed to the marshal (high sheriff) or to any sheriff or their deputies, except as may be otherwise provided by law, and it shall be the duty of the marshal (high sheriff) or sheriff and their deputies to execute the same at their peril, according to the tenor thereof; and they shall not be liable for any damages resulting from the execution of such process.

SEC. 1040. The marshal (high sheriff), any sheriff, deputy sheriff, or other police officer may decline to levy upon or sell the alleged property of any person against whose goods and effects an execution or

SEC. 1058. When such prisoners can not be well employed in performance of any public work, the marshal (high sheriff), with approval of the minister of the interior (superintendent of public works), may let them out to labor for private individuals, upon terms as he may deem proper; provided, always, that such prisoners shall be locked up within the prison every night.

SEC. 1059. Female prisoners shall be kept entirely separate from the male prisoners, and shall be employed in making mats, in sewing, in washing the clothes of the prisoners, and in such other suitable occupations as the marshal (high sheriff) shall direct.

SEC. 1060. The pay of prison officers shall be determined and fixed by the attorney-general.

SEC. 1061. Every person sentenced to imprisonment for life shall be considered as civilly dead, and the same disposition shall be made of his estate as if he had died on the day sentence was pronounced, and any last will and testament or codicil he may have made prior to that time shall take effect in the same manner as if he had died on that day.

SEC. 1062. But no disposition of any estate, either by will or otherwise, after the arrest for crime of which the prisoner was convicted, whether sentence is for life or otherwise, shall have any advantage or preference over the claim of any person entitled to damages for private injury committed by the criminal, unless such disposition be made a valuable and equivalent consideration, to a person ignorant of the arrest.

SEC. 1063. Whenever a convict is condemned to imprisonment for life, any judge having probate powers may, upon due application, appoint a guardian to have the care and management of the convict's estate, real and personal, during the term of his imprisonment. The letters of guardianship shall be revoked by the judge upon the discharge of the convict, but such revocation shall not invalidate any acts done by the guardian.

SEC. 1064. Every guardian so appointed for any convict shall be bound to pay all the just debts due from the convict out of his personal estate, if sufficient, and if not, out of his real estate, upon obtaining leave of the judge to the sale thereof from the judge; he shall also settle all accounts with the said convict, and demand, sue for, and receive all debts due to him, and may, with the approbation of the judge, compound for debts and give a discharge to the debtor; and he shall appear for and defend his ward in all legal suits and proceedings, unless when another person is appointed for that purpose.

SEC. 1065. Such guardian shall have all the rights and duties, as well as all the responsibilities, respecting the management and control of the convict's estate, as appertain to the guardian of an insane person. He shall manage the estate frugally and without waste, and apply the profits thereof, so far as may be necessary, to the comfortable and suitable maintenance of the convict; if there be any, and if the profits shall be insufficient for that purpose, he may sell the real estate and apply the proceeds thereto, upon the license of the judge.

SEC. 1066. Such guardian may be removed and another appointed in his place whenever the judge shall think there is just cause for removal.

SEC. 1067. Every such guardian shall have such compensation for services as the judge before whom his accounts are settled shall consider just and proper, and he shall also be allowed the amount of reasonable expenses.

SEC. 1068. All property given or in any manner whatsoever accruing to a convict shall vest in his guardian, if he be sentenced for a term of years, to be disposed of in like manner with his other property; or if he be sentenced for life shall vest in his heirs.

SEC. 1069. Until a lunatic asylum is created by law, any lunatic or insane person, whose lunacy or insanity is established by the court of proper jurisdiction, may be committed to any prison, jail, or house of correction, there to be provided for and safely kept until lawfully discharged. The estate of such person shall in all cases be liable for the payment of his necessary expenses, and it shall be the duty of his guardian or other legal representative to make such payments, from time to time, as may be ordered by said court.

CHAPTER 74.—*Care and custody of prisoners.*

SEC. 1070. From and after the passage of this act, the care and custody of all prisoners detained in any prison of the republic (Territory) shall be transferred from the department of the interior (department of public works) to the department of the attorney-general, and shall be included in and appertain exclusively to the department of the attorney-general, except as hereinafter otherwise provided.

SEC. 1071. The attorney-general shall hereafter exercise all such authority, supervision, and control over the marshal (high sheriff) and his subordinates in relation to the care and custody of prisoners as has heretofore been vested by law in the minister of the interior (superintendent of public works), and the marshal (high sheriff) shall hereafter be responsible to the attorney-general in all matters appertaining to the care and custody of prisoners in like manner as he has heretofore been responsible to the minister of the interior (superintendent of public works) in respect thereof.

SEC. 1072. In all respects wherein the minister of the interior (superintendent of public works) has heretofore by law been invested with the power of approval of the appointment of prison officers, or any discretion to regulate the discipline or the pay of such officers, or the discipline of prisoners, such rights of approval and discretion are hereby vested in the attorney-general.

SEC. 1073. The marshal (high sheriff) shall at all times, notwithstanding anything hereinbefore contained, hold all such prisoners as shall be confined under sentence of imprisonment at hard labor at the disposal of the minister of the interior (superintendent of public works), to be employed by said minister (superintendent) on the public works or otherwise, as said minister (superintendent) under the law shall direct.

CHAPTER 75.—*Prison inspectors.*

SEC. 1074. The minister of the interior (superintendent of public works), with the approval of the cabinet (governor), shall, within sixty days after the passage of this act, appoint three persons on the island of Oahu to be inspectors of prisons, who shall constitute a board of

prison inspectors. Such inspectors shall hold office until July, and thereafter in the month of July of each alternate year the minister (superintendent) shall in like manner appoint three inspectors who shall hold office for two years. Any inspector shall be eligible for reappointment.

SEC. 1075. In case any inspector shall die, resign, depart from the republic (Territory) to reside abroad, or become incapacitated to perform his duties, the minister of the interior (superintendent of public works) shall declare the office of such inspector vacant, and shall, with the approval of the cabinet (governor), appoint some other person to fill such vacancy, and to serve for the remainder of the term of the inspector whose office has so become vacant.

SEC. 1076. All inspectors appointed under the provisions of this act shall serve without pay, but they may incur such reasonable expenses for clerk hire, traveling expenses, or other incidentals as the minister of the interior (superintendent of public works) shall approve. Such expenses shall be paid from the appropriations for the support of prisoners.

SEC. 1077. As soon as convenient after the appointment of a board of inspectors, they shall organize and appoint one of their number to be chairman of the board, and another secretary. They shall hold a regular meeting once each month, and special meetings whenever called by any member of the board. They may adopt rules and regulations for their own guidance, and shall keep a record of their proceedings and doings in a proper book or books. A majority of the board shall constitute a quorum.

SEC. 1078. The books of record of each board of inspectors shall, at the expiration of the term of office of such board, be delivered to the minister of the interior (superintendent of public works), who shall preserve the same in the archives of the department of the interior (secretary of the Territory).

SEC. 1079. Such inspectors, or a majority of them, shall visit the prison once each month, and oftener if they deem it expedient. Any of them may visit said prison at any time. They, or any of them, with the approval of a majority of the board, may visit and inspect any prison or jail of the republic (Territory) at any time, and shall have access to every part of such prisons or jails, and to the papers, records, and accounts of the same.

SEC. 1080. It shall be the duty of the board of inspectors to supervise the discipline and government of the Oahu prison, and, in their discretion, from time to time provide rules and regulations, not contrary to law, for any or all of the prisons and jails of the republic (Territory). In performing these duties they shall consult with the marshal (high sheriff) of the republic (Territory) and the minister of the interior (superintendent of public works) upon all important matters, but the decision of a majority of the board shall control.

SEC. 1081. It shall be the duty of the board of inspectors to consult with the jailor, to prescribe the punishment to be inflicted upon prisoners for the breach of prison rules or other misconduct. They shall in like manner decide who are entitled to the commutation provided by law for good behavior, and who shall be deprived of commutation in whole or in part. They shall in like manner exercise the power to restore, in whole or in part, to any prisoner the commutation which such prisoner shall have lost.

SEC. 1082. The board of inspectors shall seek to improve the discipline of the prisons and the condition of the prisoners, and extend all reasonable inducements not contrary to law for good behavior. They may, in their discretion, classify the prisoners, designating the grade to which each shall belong, the privileges not inconsistent with the law which may be granted them, and the garb which they shall wear.

SEC. 1083. The board of inspectors shall, in the months of January and July of each year, present to the minister of the interior (superintendent of public works) a report of the condition of Oahu prison and the prisoners there confined, and of the doings of the board during the previous six months, and the condition of all other prisons and jails and prisoners of the republic (Territory), so far as they have information relating to them. They shall submit with such report a copy of all rules and regulations which they have made, amended, or rescinded during such period. They may also add any information or suggestions they deem advisable. Such reports shall be signed by at least two of the members of the board of inspectors, and be published in the English and Hawaiian languages in suitable weekly newspapers in Honolulu. They shall also present a report to the legislature at each regular session of the same, making such suggestions and recommending such legislation relating to the prisons and prisoners as they deem expedient.

CHAPTER 76.—*Commutation of punishment.*

SEC. 1084. Every prisoner confined in any prison or jail of the republic (Territory), under sentence of hard labor imposed by any court of the republic (Territory), may, for continued good behavior or meritorious conduct while serving out his sentence, be allowed the following deductions for each three months of his term, that is to say, first three months, seven days; second three months, eight days; third three months, nine days; fourth three months, ten days, and so on at the same increasing rate of one day additional for each succeeding three months.

SEC. 1085. Any prisoner sentenced to pay a fine and who is confined at hard labor because of his failure to pay his fine, according to law, may be allowed a commutation at the rate provided for prisoners sentenced to hard labor, such commutation to be allowed for the time actually served in prison.

SEC. 1086. Any prisoner may, for misconduct or other sufficient cause before his discharge, forfeit the whole or a part of the commutation which he has been allowed, and, for subsequent good conduct, meritorious behavior, or other sufficient reasons, the whole or a part of the commutation so forfeited may be again allowed to such prisoner.

SEC. 1087. The granting, withholding, forfeiting, and restoring of the commutation provided by this act shall be discretionary with the board of prison inspectors. As to prisoners confined in the prisons of the republic (Territory) other than Oahu prison, the board of prison inspectors may delegate to such prison, officers or other persons as they deem best the power to grant, withhold, forfeit, and restore commutation of prisoners confined in such prisons, and such power to revoke at their discretion.

SEC. 1088. At some suitable time during the months of January, April, July, and October of each year the board of prison inspectors

shall cause each prisoner to be informed of the commutation granted, withheld, forfeited, or restored to, from, or by him during the previous three months, giving the reasons for such granting, withholding, forfeiting, or restoring of the commutation. And the said inspectors may, in their discretion, cause the standing of each prisoner to be made known to any or all of the other prisoners in the prison.

SEC. 1089. A record shall be kept and preserved in a suitable book or books at each prison, to be styled the commutation book, in which shall be entered the name of every prisoner under sentence who is confined in such prison. In such book shall be entered upon a separate page the name of each prisoner, under which shall be entered a careful record of his conduct and of the commutation which has been granted, withheld, forfeited, or restored to, from, or by him, with reasons therefor. Such records or true copies of them shall be shown to the council of state (to the governor) when considering petitions for executive clemency.

SEC. 1090. The commutation provided by this act may be allowed to prisoners sentenced before this act shall become law, but shall be allowed only from the date of its approval. The days commuted for any prisoner before the date of the approval of this act, under the commutation heretofore allowed by law, shall be noted upon the record of such prisoner and added to the commutation allowed him under the provisions of this act.

PENAL LAWS OF 1897.

CHAPTER 59. *Public health.*

SEC. 868. There shall be a board of health for the Hawaiian Islands, consisting of seven members, three of whom shall be laymen, two physicians, and the attorney-general ex officio.

ORGANIC ACT.

SEC. 71. There shall be an attorney-general, who shall have the powers and duties of the attorney-general and those of the powers and duties of the minister of the interior which relate to prisoners, and prison inspectors, notaries public, and escheat of lands under the laws of Hawaii, except as changed by this act and subject to modification by the legislature.

CONSTITUTION OF 1852.

ARTICLE I. God hath created all men free and equal, and endoweth them with certain inalienable rights, among which are life and liberty, the right of acquiring, possessing, and protecting property, and pursuing and obtaining safety and happiness.

ART. XII. Slavery shall under no circumstances whatever be tolerated in the Hawaiian Islands. Whenever a slave shall enter Hawaiian territory he shall be free. No person who imports a slave or slaves into the King's dominions shall ever enjoy any civil or political rights in this realm, but involuntary servitude for the punishment of crime is allowable according to law.

either in the government of the Territory of Hawaii, upon a session, or upon any body, and that this body may have the right to use said Government lands.

d. That the Congress of the United States enact said laws as to any natural person who has for two years or more held vacant land, under lease or otherwise, the right and power upon application, to purchase the same, proving that such person has not used the same.

e. That such laws shall provide for the appointment of a commission composed of competent persons, who shall appraise public lands and thereby place valuations on said lands, which shall be within the power of every person holding public lands to secure their own.

f. The undersigned make the foregoing suggestions, well knowing that the system of American institutions it is an elementary principle that every American should own his own home, and that he is not only of the undersigned, but of every Portuguese settler on the slopes of Punchbowl, that your honor will be successful in presenting before the Congress of the United States, and that upon this memorial, which means the continuation of a policy which may otherwise be taken from the people, and may be in circumstances that may not permit them to make suggestions.

The undersigned beg leave to attach hereto copies of the lease which from time to time been executed by the late Queen, the late King, and of later years by the Kapahulu Estate, Limited, to the Portuguese leaseholders now in possession. These leases from time to time, and more particularly the last formal ones, impose some covenants upon the Portuguese lessees, and the same when this corporation, the Kapahulu Estate, Limited, is formed it is safe to say that the covenants in the leases which they execute would be so burdensome that the Portuguese settlers on the slopes of Punchbowl would of necessity have to seek protection, unless protected by law.

Respectfully submitted,

FRANK ANTONIO.

JOS. F. LUKIO.

A. H. R. VIEIRA.

Witness Our Hands by Portuguese Settlers of Punchbowl, S. P. H.

At Honolulu, Hawaii, this 29th day of September, A. D. 1902.

LEASE.

Witness made this — day of —, A. D. 189—, between —, of — island of —, of the first part, and — of the second part.

That the party of the first part does hereby lease to the second party of land situated in the — of —, in the district of —, of —.

For the premises to the second party for the term of — years, at a rental of — dollars per annum.

It is follows: Payment of — of the annual rental to be

That at the present time there is no legal method whereby the settlers of the slopes of Punchbowl may acquire the fee of said lands and the purpose of this memorial is to bring to the attention of the honorable body the fact that it is necessary that the Congress of the United States enact such laws whereby the fee of this land may be vested in somebody with whom the settlers of Punchbowl may at any time before the expiration of their respective leases enter into tracts whereby they may purchase their small holdings and thereafter the expiration of their leases be vested with the fee simple of the lands upon which they have labored, built their homes, paid taxes to the government of the Territory of Hawaii, paid rent to the lessees of the crown lands commission, paid water rates, and upon which they have lived for so many years and have reared their families.

That there is danger that the government of the Territory of Hawaii will exchange portions of this land with parties other than those who have improved said lands and those who by natural justice should be the first to say about the disposition of these lands. The government of the Territory of Hawaii has already exchanged a part of said lands with the Kapiolani Estate, Limited (a corporation), and if this method of exchange is pursued, there is danger that the people who by their improvements should have the opportunity to purchase the fee of said lands will have nothing to say about that over which they have spent the better part of their life's earnings.

An examination of the following figures will show the enormous amount of money spent only by Portuguese in improving the slopes of Punchbowl, to say nothing of what other nationalities have also done there. The following figures are prepared on the most conservative basis.

Buildings.....	\$540
Improvements (plumbing, etc.).....	170
Taxes to January, 1903.....	30
Taxes paid to the Kapiolani Estate.....	1
Rent paid to Kapiolani Estate.....	12
Water rates.....	7
Total.....	94

These figures do not show the value of the work done by the Portuguese individually in cultivating these lands and planting trees there.

While all the Portuguese settlers on the slopes of Punchbowl are not American citizens, this is not because it is their wish to remain subject to the King of Portugal, but due to the fact that they cannot become citizens of the great Republic because disqualified by the organic act. However, there is no instance of a Portuguese living on the slopes of Punchbowl who have not children who are American citizens or who will not soon be American citizens.

That it is the desire of the undersigned, as well as the members of the Portuguese colony who reside on the slopes of Punchbowl, to secure to each Portuguese who is a leaseholder under the Kapiolani Estate, Limited, of lands owned by the Government the fee simple of each of their respective holdings, and do hereby make the following suggestions as to the solution of the problem presented in this memorial.

First. That the Congress of the United States enact laws whereby the fee of Government lands within the Territory of Hawaii

rested either in the government of the Territory of Hawaii, upon a commission, or upon any body, and that this body may have the right to convey said Government lands.

Second. That the Congress of the United States enact such laws as will give to any natural person who has for two years or more held Government land, under lease or otherwise, the right and option, upon proper application, to purchase the same, proving that such holding shall not exceed 5 acres.

Third. That such laws shall provide for the appointment of a commission composed of competent persons, who shall appraise public lands, and thereby place valuations on said land, which shall be within the means of every person holding public lands to secure their own homes.

The undersigned make the foregoing suggestions, well knowing that under the system of American institutions it is an elementary principle that every American should own his own home, and therefore it is the prayer not only of the undersigned, but of every Portuguese family who reside on the slopes of Punchbowl, that your honorable body may bring this matter before the Congress of the United States, and that you may be successful in presenting before the proper authorities in Washington this memorial, which means the continuation of many happy homes which may otherwise be taken from these people when they may be in circumstances that may not permit them to secure other homes.

The undersigned beg leave to attach hereto copies of the leases which have from time to time been executed by the late Queen Dowager, Kapiolani, and of later years by the Kapiolani Estate, Limited, to the various Portuguese leaseholders now in possession. These leases executed from time to time, and more particularly the last form, shows the burdensome covenants imposed upon the Portuguese lessees, and if the time came when this corporation, the Kapiolani Estate, Limited, has the power it is safe to say that the covenants in the leases which they would execute would be so burdensome that the Portuguese residents of the slopes of Punchbowl would of necessity have to seek other quarters, unless protected by law.

Respectfully submitted.

FRANK ANDRADE,
JOS. F. DURAÑO,
A. H. R. VIEIRA,

Committee Chosen by Portuguese Settlers of Punchbowl Slopes.

Dated at Honolulu, Hawaii, this 29th day of September, A. D. 1902.

LEASE.

This lease, made this — day of —, A. D. 189—, between —, of — island of —, of the first part, and —, of the second part.

Witnesseth, the party of the first part does hereby lease to the second party that piece of land situated in the — of —, in the district of —, island of —.

Demising the premises to the second party for the term of — at the annual rental of — dollars per annum.

Payable as follows: Payment of — of the annual rental to be

made on the date of the expiration of this instrument, and payments in like manner are to be made until the expiration of the aforesaid term. That the party of the second part is prohibited from subleasing without the consent of the first party in writing.

At the expiration of the term aforesaid, the second party is to return the land in good condition and without waste.

In the event of a breach or nonperformance by the second party of the above conditions, then the land is to revert to the first party. And the rights and all improvements pertaining thereto or growing on the land made by the second party, all of these things are to revert to the first party, and likewise at the expiration of this lease.

And all taxes and charges to be imposed on the said land the party of the second part is to discharge.

The party of the second part agrees to perform all the conditions imposed on him.

In witness whereof we do subscribe our names and affix our seals the day and year above mentioned.

LEASE.

This lease, made this ____ day of ____, A. D. 18—, between _____, of _____, of the first part, and _____, of the second part.

Witnesseth, the party of the first part has leased, and by this instrument allows to the party of the second part, that premises _____ situated at _____, whose boundaries are described in royal patent _____ land commission award number _____, in the district of _____, island of _____ (being the _____ conveyed to _____ by the party of the first part above mentioned).

Demising the said premises to the second party, and to his heirs, for the term of _____ years, for a rental of _____ dollars per annum.

Payable as follows: Payment of _____ of the annual rental to be made on the date of the execution of this instrument and the remaining _____ on the ____ day of ____; payments to be made in like manner _____ until the expiration of the term aforesaid. The party of the second part is prohibited from subleasing.

At the expiration of the term aforesaid, the second party is to return the land in good condition and without waste.

In case of a breach or nonperformance by the second party of the conditions mentioned above, then the land is to revert to the first party. And all rights, improvements pertaining thereto or growing thereon made by the second party shall all revert to the first party.

And all taxes and charges to be imposed on the said land, the said party is to pay by _____.

I, _____, of the _____ party aforesaid, agree to perform all of the conditions to be performed by me.

As we are aware that this instrument is proper and correct, therefore we do subscribe our names and affix our seals the day and year above mentioned.

LEASE.

This lease, made this — day of —, A. D. 190—, between —, of —, island of —, of the first part, and —, of the second part,

Witnesseth: The party of the first part hereby leases to the party of the second part that piece of land situated in — of — in the district of —.

Demising said premises to the second party for the term of — years at the rental of — dollars per annum; the — of the annual rental to be paid on the date of the execution of this instrument, and the remaining half on the day —, payments to be made in like manner until the expiration of the term aforesaid.

The party of the second part agrees and covenants for himself and for his executors with the party of the first part and their representatives and assigns to faithfully pay the rent in the manner above mentioned, to pay all land taxes and other charges which may be imposed on the said land. The second party is prohibited to sell or dispose of this lease nor sublease the land or any portion thereof for any term without first obtaining the consent of the first party in writing.

At the expiration of the term aforesaid the party of the second part is to return the land in good condition and without waste; and all rights and improvements thereto or may be growing upon the land made by the second party shall all revert to the party of the first part.

In the event of a breach or nonperformance by the second party of the above conditions, then the land with all improvements thereon shall revert to the first party.

And the party of the second part agrees to perform all of the aforesaid conditions on his part.

In witness whereof we do subscribe our names and affix our seals the day and year mentioned above.

In presence of —
_____.

This indenture, made this — day of —, A. D. 190—, by and between the Kapiolani Estate, Ltd., a Hawaiian corporation, duly created and existing under and by virtue of the laws of the Territory of Hawaii, hereinafter called the lessor, and —, of —, island of —, Territory of Hawaii aforesaid, hereinafter called the lessee.

Witnesseth: That the said lessor doth hereby demise and lease unto the said lessee— all that certain piece or parcel of land situate in —, island of —, Territory of Hawaii aforesaid, bounded and described as follows:

To have and to hold the same unto the said lessee— and — executors, administrators, and permitted assigns, for and during the full term of —, beginning with the — day of —, A. D. —.

Yielding and paying therefor rent at the rate of — dollars

(§ —) per annum, payable — in advance, at the office of said lessor, without demand, on the — day of —.

And the lessee, for — and —, executors, administrators, and permitted assigns, hereby covenant— with the said lessor and its successors and assigns that — and —, executors, administrators, and permitted assigns, will pay said rent in manner aforesaid; and also all taxes and water rates and other assessments which may become liable on account of said premises without deduction from said rent; that — will not, without the consent in writing of the said lessor, its representatives, successors, or assigns, assign this lease nor underlet the said premises as a whole; that — will not make or suffer any strip or waste or any unlawful, improper or offensive use of said premises; that — will forthwith insure said buildings on said premises against loss by fire in a sum not less than — dollars (§ —) in an insurance company approved of by the said lessor, and in the event of loss as aforesaid said insurance to be paid by said lessor, its representatives, successors, or assigns, to be applied by said lessor toward rebuilding on said premises; that — will on its own cost and expense, during said term, keep and maintain said premises, and all buildings, fences, and additions thereto in good and substantial repair and condition; that — will at all seasons during such term allow the said lessor, its representatives, successors, and assigns, to enter upon the demised premises and examine the condition thereof; and at the end of said term or any sooner determination of this lease will peaceably deliver up said premises to the said lessor, or its representatives, successors, or assigns, together with all buildings, fences, and other additions thereto, in such good and substantial repair and condition as aforesaid, reasonable use and wear thereof only excepted.

And the lessor, for itself, its successors, and assigns, hereby covenants with the lessee —, — executors, administrators, and permitted assigns, that the lessee— and — executors, administrators, and permitted assigns, paying the rent in manner aforesaid, and performing the covenants and agreements herein contained, shall, and lawfully may, peaceably use, occupy, and enjoy the said premises during the term without any hinderance, molestation, or interruption whatsoever by or by the said lessor, its representatives, successors, or assigns, or by any other person or persons lawfully claiming under them, or either of them.

Provided always, and these presents are upon this condition, that in case of a breach of any of the covenants to be observed on the part of the lessee—, or in case said rent shall be in arrear —, the said lessor, its representatives, successors, or assigns may, while such default or breach continues, without any notice, or demand, or process of law, enter upon the premises hereby demised and thereby determine the estate hereby created, and may thereupon expel and remove the lessee and those claiming under —, and their effects, forcibly if necessary, without process of law, as aforesaid; and such reentry shall in no wise be held to prejudice any right of action or remedy which may be otherwise used in respect of any breach of any of the covenants contained in this lease.

In witness whereof the said lessor has caused its corporate seal hereto affixed and these presents to be executed by its —

—, and the said lessee— hereunto set — hand— and seal —, in the day and year first above written.

KAPIOLANI ESTATE, LIMITED,
By its ———.

Executed in duplicate in presence of—

Acknowledgment.]

This indenture, made this 31st day of December, A. D. 1898, by and between Ernest H. Wodehouse, trustee, party of the first part, and A. Viera, party of the second part, both of Honolulu, island of Oahu, witnesseth:

That the said party of the first part (by virtue of the authority vested in him by trust deed dated July 12, 1898, and recorded in the register office in liber 181, pages 294 to 297, the parties of the first part in said trust deed hereto consenting), doth hereby demise and lease unto the said party of the second part, his executors, administrators, and assigns, all that piece of land situate on proposed extension of Quarry street, Honolulu, aforesaid, having a frontage of 114 feet along said Quarry street, and a depth of 80 feet along gulch to Helen Kamalu's lot, and 145 feet in the back along Helen Kamalu's lot.

To have and to hold the same, together with the appurtenances, unto the said party of the second part, his executors, administrators, and assigns, for and during the term of twelve (12) years, commencing from the 5th day of December, 1898.

Yielding and paying therefor unto the said party of the first part, or his successors in trust, the rent of thirty-five dollars (\$35) per annum, payable annually in advance.

And the said party of the second part, for himself, his executors, administrators, and assigns, doth hereby covenant and agree that he will well and truly pay, or cause to be paid, unto the said party of the first part, or his successors in trust, in the manner aforesaid, the rent above reserved; that he will pay all taxes and assessments that may be imposed upon the said demised premises; that he will not assign this lease or sublet the said demised premises, or any portion thereof, without the consent in writing of the said party of the first part; and at the end of said term shall and will deliver up the said premises, together with the improvements thereon, unto the said party of the first part.

In witness whereof the said parties have hereunto, and to another instrument of like tenor and date, set their hands and seals the day and year first above written.

[Acknowledgment.]

STATEMENT OF EMIL NEY TO THE UNITED STATES CONGRESSIONAL COMMITTEE SITTING IN HONOLULU TO INQUIRE INTO THE PUBLIC AFFAIRS OF THE TERRITORY OF HAWAII.

I, Emil Ney, jailer at Hilo jail during the months of June and July last past, do make the following statement voluntarily and without duress, deeming it in the best interests of the civilized people of this territory so to do.

The administration of those having charge of the Hilo jail during my incumbency was the very worst that can be imagined, in that tyranny, injustice, and brutality were the chief factors and stock-in-trade of those having in custody, under the law, their fellow-men.

During most of the time I was on duty at the jail there were from forty to sixty prisoners incarcerated. They were confined at night in nine small cells, with nothing under them but the floor and a blanket for covering. The ventilation of the cells is very poor, and the stench arising from the sweltering bodies of the inmates was almost unbearable.

It is the custom for the prisoners to work in chain gangs on the roads and to preclude any possibility of their escaping while at their work they have heavy balls and chains of steel riveted about their ankles. At night, as it is impossible to remove the shackles, the prisoners are compelled to sleep with them on.

On requisition from the heads of departments of the city government these prisoners are farmed out, and have been known to do the private work of the sheriff of Hawaii on his private grounds.

Within the jail inclosure vegetables and bananas are raised every other day during my incumbency 32 pounds of fresh beef were supplied for the prisoners. Not one time while I was there did any of this food used in the prison, but I verily believe and declare to be a fact that this was sold for the benefit of the head jailer. I can declare that while I was at the jail three sons of the said jailer, being in the government employ, received their daily meals at the jail at government expense.

The above facts are a few of the glaring irregularities which I bring before the notice of your honorable body, and I verily believe and state that the reason these matters have not been aired before the grand jury of Hilo or the papers of that city is because of the influence of the members of the inquisitorial body and of the present Sheriff Andrews, who is commonly known as the "Czar of Hawaii."

EMIL

HAWAII, OAHU, HAWAII
September 17.

To the honorable UNITED STATES SENATE COMMISSION,
Honolulu, Hawaii

GENTLEMEN: I inclose herewith letter taken from the Evening Bulletin of the 16th instant and signed by "Mechanic." As to "Mechanic" I have no idea, but his remarks so closely correspond with my view of the labor situation that I feel justified in calling them to your attention. I realize that it is not the province of your commission or Congress, under present treaty regulations, to prevent Japanese from coming to these islands, but I do believe that it is necessary to force the plantations into an action favorable to the citizen. To grant restricted immigration to the plantations without protecting American labor would mean that the plantations would be divided with another class to use against the Japanese and still reduce wages and run the American laborer entirely from the islands. What the plantations want the Chinese for is to be able to command a class they can handle in suppressing the

mands, and to-day the only reason we have any American labor on the plantations, outside of professional, is that the plantations dare not trust themselves entirely in the hands of the Japanese.

If the plantations find they can not secure Chinese labor without first granting concession to American labor, they will, in my opinion, make the concession. The Japanese laborer is "a thorn in the flesh" of the plantations, inasmuch as they can not keep them from making constant demands for advancement. The Chinese laborers would place the plantations in a position where they could dictate to the Japanese, and, if necessary, exclude Japanese in favor of Chinese. To-day there is no lack of numbers on these islands to perform all labor, merely that the class of labor can not be compelled to work where needed.

So confident am I that I appreciate the situation and can see the way out of it that I believe the matter at this time rests entirely in your hands. I am convinced that the present leaders in Hawaii are in turn convinced that the time is at hand when the power of government must pass into the hands of the people. This they so far have thwarted by keeping the voting population as low as they could, in numbers. Feeling they can no longer hold the power of government at their backs, they must of necessity protect their interests against unfavorable legislation by making a concession. A very short time since one could not even suggest restricted Chinese immigration without meeting opposition from the Planters' Association; now they are asking for restricted immigration. I believe that the matter rests with your commission in this way. If the planters find that they can not secure the assistance of the commission in securing Chinese labor, unless they first protect American labor, I believe they will not be slow in placing their demands in that form. If the citizen labor of these islands is protected against the Asiatic in the matter of skilled labor, I believe the entire difficulty would be settled at once. I, however, do not believe in granting any concession to the plantations unless it is made in such a manner as to render it out of the question for them to fail to comply with their part of the agreement. Much of our local trouble results from the too general use of the word "may" by Congress, instead of the word "must." Had Congress made it compulsory that we have county and municipal government, I believe that to-day everything in Hawaii would have been working harmoniously; we would have money in our treasury, the feeling between the whites and Hawaiians would not have passed away, and we would not to-day be flooded with oriental laborers in every walk in life.

Also, it is not a question if the American can work in our cane fields, but rather, is it possible to open the way so that our skilled labor can have the right to work on our plantations without first having to reduce itself to the level of the Asiatic. The question as to whether the white man can stand the work of the fields is a matter as yet only of opinion, and will in time adjust itself. The future will demonstrate his ability and capability. The right to work where there is now no question as to ability is the point we have to settle.

Please accept my thanks for the very kind consideration shown me by the commission. I have at my command a considerable quantity of notes and statistics bearing on these islands and present conditions which are at your command. I am also familiar with many of the plantations, especially of this island, and should your commission decide to make a tour of inspection, I shall esteem it a very great privilege to

go with and point out to you some of the conditions which other might be kept from your observation. The commission will be pleased at no expense for any service I may be able to render. Personal believe that a satisfactory solution of this question is the only one that will justify my making a home on these islands, as if the present conditions continue, even the professions will not be able to exist.

Yours, very respectfully,

E. TAPPAN TANNATT.
Civil and Electrical Engineer

MECHANIC LABOR VIEW.

EDITOR EVENING BULLETIN: In regard to the labor conditions at the plantations, it is a known fact that the plantations must have cheap labor or they can not keep on a paying basis. The editor of the P. C. A. says the whites and Hawaiians do not protest with me. I beg to differ. They do.

But they are willing to sign a proposition to allow the plantations to have all the Chinese, but not Japanese, they want for plantation work, on the condition that the plantations will discharge all unskilled labor, such as blacksmiths, carpenters, engineers of all kinds, sugar boilers, painters, and all other skilled labor, and employ only Hawaiians or whites for such work. By so doing they can get from 5,000 to 10,000 to sign such a proposition. Otherwise there are just so many sign against it.

As to the labor unions on the Coast, when they see that the labor is protected I do not think they will make any protest. They will know that the mechanics on these islands know best what is wanted.

If a law is passed at Washington allowing Chinese to come to the islands there be a clause put in it so that if a plantation does employ unskilled labor they will be liable to a fine of not less than \$500 more than \$500 for each offense.

As to the Chinese going to the Coast, that can be stopped right off by imposing a fine upon any captain who attempts to take them. Chinese should not be allowed to remain on these islands unless they work on a rice or sugar plantation.

Sir, I am,

MECHANIC

HONOLULU, *September 16, 1902.*

HONOLULU, HAWAII, *September 25,*

Hons. JOHN H. MITCHELL, J. R. BURTON, and A. G. FOSTER
*Subcommittee of Senate Committee
on Pacific Islands and Porto Rico.*

SIRS: Complaining of Governor Dole's attitude toward the Hawaiian people, and in support of the charge that he is not in harmony with intelligent self-government by the people of the Territory, it is fully submitted that at the last session of the legislature, in suggesting to said legislature matters that might be considered

ancement of the material interests of the Territory and proper legislation that should be enacted, he constantly opposed and thwarted such efforts and held defiantly aloof from the legislature and its committees. Instead of assisting the legislature by recommendation and mutual conference, as is customary elsewhere, he arrogantly declined the overtures made to him, leaving the Hawaiians, in the novel position of legislation for the first time, to their own devices with an implied and even an actual threat that the errors and delinquencies on their part, in measures that might not meet his approval, would not only be condemned and visited with arbitrary veto, but be taken advantage of for the purpose of creating the belief in the minds of members of Congress, the Chief Executive of the United States, and their American fellow-citizens generally that the Hawaiians were incapable of self-government and unworthy even of the franchise which had been given them.

In support of this, and for the sake of brevity, curtailing the general attitude of the governor, generally understood, though difficult specifically to point out, one instance is hereby offered which, it is respectfully suggested, is indicative of the general course maintained by the executive toward a legislature making its first effort in the line of public service, as to which I will make an oral statement.

Respectfully,

GEORGE MARKHAM.

WAILUKU, MAUI, HAWAII, *September 18, 1902.*

Hon. JOHN H. MITCHELL,

Chairman Subcommittee of the

Senate Committee on Pacific Islands, etc.

SIR: In support of certain oral testimony given before your honorable commission in that behalf, we, the undersigned attorneys of the supreme court of this Territory and residents of the island of Maui, Territory of Hawaii, complain of John W. Kalua, circuit judge of the second judicial circuit of the said Territory, which said circuit includes the islands of Maui, Molokai, Lanai, and Kahoolawe, and for cause of complaint against said judge charge and allege as follows:

I. That the said John W. Kalua was, on or about the 1st day of June, 1900, appointed judge of the second circuit court of the Territory of Hawaii by the President, and ever since said date has been and now is the duly appointed, qualified, and acting judge thereof.

II. That the said John W. Kalua, while occupying the office of judge, and in his capacity as such, has been guilty of gross malfeasance in office and has committed divers unscrupulous, dishonest, and improper acts, among which may be cited the following:

(a) That one B. N. Kaula was committed by the district magistrate of the district of Wailuku, Maui, to appear before the circuit court, second circuit, at the December, 1900, term thereof, upon a charge of assault with a weapon eminently and obviously dangerous to life, to wit, an ax, upon the person of his wife, Mrs. Kaula; and that while occupying the office of judge and knowing that the said Kaula would be brought before his court for trial, the said John W. Kalua visited the said B. N. Kaula while confined in the public prison at Wailuku, awaiting trial at the convening of the said circuit court, and there held

a private interview and conversation with the said Kaula in the yard, and your complainants are informed and believe and there allege that the said John W. Kalua did at that time wantonly and ruptly promise and agree to and with the said Kaula that if he said Kaula, would plead guilty of said charge before said circuit court that he, the said John W. Kalua, as judge aforesaid, would mitigate and lessen the sentence which might otherwise be imposed against that thereafter and to wit, on the 11th day of December, 1900, said Kaula was arraigned for trial on said charge before the said John W. Kalua as judge aforesaid; that the said Kaula did then plead guilty of said charge and was by said judge fined the nominal sum of \$25 and that for the services thus rendered him by the said John W. Kalua the said Kaula did three days later, to wit, on the 14th day of December, 1900, make, execute, and deliver unto Polly Kalua, wife of the said John W. Kalua, a deed to certain real property owned by the said Kaula in Wailuku of the probable value of \$200, a translated copy of said deed being attached hereto, marked "Exhibit A," and made hereof.

(b) That one Manuel Coelho was committed by the district judge of Makawao, Maui, to appear before said circuit court on a charge of larceny in the second degree, and your petitioners complainants are informed and believe, and therefore allege, that the said Manuel Coelho, while awaiting the convening of the said circuit court before which his trial was to be had, to wit, the June, 1901, term of said court, did approach the said John W. Kalua and did there enter into a private agreement with him concerning the disposition of said charge, and that the said John W. Kalua did then and while acting as judge as aforesaid, corruptly and in wanton disregard of his oath of office, promise and agree to and with the said Manuel Coelho that should the said Coelho be convicted before said circuit court he, the said judge, would, in passing sentence, reduce the same to a nominal punishment; that in pursuance of this preconcerted arrangement the said Manuel Coelho did, on the 17th day of June, 1901, come before the said John W. Kalua as judge aforesaid, pleaded guilty of said charge, and was then by said judge fined the nominal sum of \$25.

(c) That in order to dispel any possible conclusion that the imposition of ridiculously small fines might have been actuated by the leniency of the said judge, we further allege that at the said June, 1901, term of said circuit court (and being the same term at which the said Coelho was fined) one Fred Wood, a negro from the State of Florida, was arraigned thereon and pleaded guilty to a charge of larceny, wherein the said Wood had entered a store in the night and stolen therefrom about \$900, but without any apparent intention or desire to do bodily harm to anyone, and this crime being the said Wood's first breach of the law of this country, the said Wood was, on the said plea, by the said John W. Kalua, as judge aforesaid, sentenced to imprisonment at hard labor for the term of his natural life.

(d) That the said John W. Kalua, while occupying said office as judge, has frequently come upon the bench under the influence of liquor and so intoxicated as to be utterly unfit to perform the duties of his said office. That during the June, 1901, term of said circuit court, and also at the June, 1902, term thereof, the said John W. Kalua, while presiding over said court, was often so stupefied

refuse of intoxicants as to be entirely ignorant of much of the proceedings had before him. That on the 24th day of October, 1901, the said John W. Kalua, as judge aforesaid, held court for the purpose of passing upon certain matters coming before his court, and at that time he was drunk and an utter disgrace to the honorable office he occupies. The foregoing allegation is supported by the affidavit of W. F. Logue, which is attached hereto, marked "Exhibit B," and made a part hereof.

(c) That the said John W. Kalua is neither qualified nor competent to hold the office of judge of a court of record; that his decisions are usually prepared by some third person, and his instructions are, in nearly all cases, drawn up and prepared in toto by some inferior court official. And even in cases where the said judge has no reason to be otherwise than fair, his knowledge of law is so deficient as to woefully jeopardize the rights of litigants.

(d) That, as a reflex of the general opinion of Judge Kalua held by the intelligent people of this island, we beg to submit herewith a copy of the Maui News, dated December 21, 1901, and containing an article dealing with Judge Kalua, which said paper is marked "Exhibit C," attached hereto, and made a part hereof.

(e) And as a further evidence of the culpability of said John W. Kalua we beg to submit herewith a copy of a sworn complaint now of record in the office of the clerk of this circuit court, filed against said John W. Kalua while he was occupying the position of circuit judge of this second circuit under the laws of the republic of Hawaii, and which said complaint remains to this day on record wholly undenied. Said complaint is marked "Exhibit D," attached hereto, and made a part hereof.

Without the least malice toward Judge Kalua and regretting beyond measure that it has become necessary for us to prefer these charges against one with whom we are necessarily so closely associated, yet we feel that the limit of forbearance has been reached, and that it has become our duty to the people of this judicial circuit to ask your honorable commission, upon your return to Washington, to place these charges before the President and recommend the immediate removal of Judge Kalua from the office which he has too long disgraced.

Very respectfully,

JAMES L. COKE.
A. N. S. KEPOIKAI.
G. B. ROBERTSON.

TERRITORY OF HAWAII,

Island of Maui, ss:

I, James L. Coke, being first duly sworn, depose and say that I am one of the parties who signed the foregoing complaint and petition; that I know the contents of said complaint and petition, and that the same are true of my own knowledge, except as to those matters and things which are alleged upon information and belief, and as to those matters I believe them to be true.

JAMES L. COKE.

Subscribed and sworn to before me this 19th day of September, 1902.

WITNESSES

JAS. N. K. KEOLA,

Notary Public, Second Judicial Circuit, Territory of Hawaii.

EXHIBIT A.

Know all men by these presents that I, B. N. Kaula (k), of Wailuku, Territory of Hawaii, in consideration of the sum of \$100, to be paid by Polly Kalua, wife of Hon. J. W. Kalua, of said Wailuku, receipt whereof is hereby acknowledged, have bargained, sold, released unto the said Polly Kalua, her heirs and assigns, all my right and title in law and equity in all that parcel of land situate at Kailuku, Maui, aforesaid, and described in L. C. A. 2420, and containing 0.65 acres, being the same land conveyed by Lae (w), my wife, who died intestate, by deed recorded in the office of registrar of conveyances at Honolulu, island of Oahu, Territory of Hawaii, as shown in liber 109, pages 95-96.

To have and to hold the said premises with all and singular appurtenances thereunto belonging and everything on said land unto the said Polly Kalua and her heirs and assigns forever.

And I, for myself, my heirs, executors, and administrators hereby covenant unto the said Polly Kalua that I am lawfully seised in the premises hereby conveyed; that the said premises are free and clear from all incumbrances; that I have good right to convey the same; and that I, my executors and administrators, will warrant and defend the title to the said premises against the lawful claims and demands of all persons whomsoever.

And I, Haliaka Moaikeahi (w), wife of said B. N. Kaula (k), in consideration aforesaid, do hereby grant, convey, and release unto the said Polly Kalua and her heirs and assigns forever, all my right, title and interest as said wife in the above granted premises, unto the said Polly Kalua and her heirs and assigns forever.

In witness whereof the said B. N. Kaula and Haliaka Moaikeahi, his wife, have hereunto set their hands and seals this 14th day of December, A. D. 1900, at said Wailuku.

EXHIBIT C.

KALUA MUST GO.

[From the Maui News.]

It has been the fixed policy of the News to avoid attacking private individuals, and there is no disposition to overstep that policy now.

But individuals who occupy public positions are subject to public criticism for their official acts, and the News would be remiss in its duties to the public if it should fail to voice public sentiment in those cases where a public official is derelict in his duties or so conducts himself as to unfit himself for the proper performance of his official duties.

Judge John W. Kalua must go. The News, in taking up this fight, does so deliberately and after mature consideration of the responsibility which it is assuming as well as the probable results. "Thrice armed is he who hath his quarrel just," and this paper will continue the fight until either Judge Kalua voluntarily steps down from the bench which he has disgraced, or until the toe of the Presidential boot is effectually applied.

To those who are intimately acquainted with the public career of Judge Kalua for the past few years no specification of charges is needed, because his derelictions are well known and are threadbare subjects of discussion.

But definite charges will be published by this paper if Judge Kalua refuses to listen to its advice and to an almost universal sentiment of condemnation among the people of Maui and refuses to resign the judgeship of the second circuit.

To those who are not familiar with the facts in the case it may be suggested that drunkenness in public, on the streets, in the church, on the bench, and at other places almost too sacred to mention will be among the charges officially preferred. Intimate and confidential conversations between himself and prisoners who were afterwards to be tried before him, and promises made by him to them which they afterwards inadvertently revealed to others—and which promises were afterwards scrupulously performed by him on the bench—will be inquired into, and the hidden motive for such promises, if any, will be dug up and brought to light.

His ignorance of law and his inefficient, not to say corrupt, administration of it, the fact that his charges to grand juries and his instructions to petit juries have to be prepared by his subordinate officials, is a charge which he will, if he persists in refusing to resign, be called upon to answer officially.

Other grave charges will also be preferred against him if he is not an investigation of them, but the present object of the News is not to give him a mild intimation in a friendly way that his resignation from the judgeship of the second judicial circuit would be considered an inestimable boon to the justice-loving people of Maui.

It will avail Judge Kalua nothing to claim that the present attack inspired against him simply because he is a poor Kanaka—a claim which he recently made—and Hawaiians themselves are warned against the pleas made by him. It is not because he is Hawaiian, but rather because he is a disgrace to the position he fills, that his resignation is demanded, and none will appreciate this fact so keenly as the Hawaiians of Maui, who are thoroughly conversant with Judge Kalua and his methods.

EXHIBIT D.

In the circuit court of the second circuit, Hawaiian Islands,
term, 1900.

S. KAHALE, PLAINTIFF, *v.* J. W. KALUA, DEFENDANT.

Action at law to recover money.—Plaintiff's complaint.

To the honorable J. W. Kalua, judge of the circuit court of the second circuit, Hawaiian Islands:

The undersigned, S. Kahale, the plaintiff above named, complains of J. W. Kalua, the above-named defendant, and, for cause of complaint, alleges—

That both plaintiff and defendant are Hawaiians by birth and are residents of Wailuku, Maui.

That on or about the 1st day of January, 1889, the said defendant, while acting as the agent and attorney of plaintiff, did represent plaintiff that he, defendant, could secure for plaintiff the loan of \$10,000 from one W. R. Castle, then of Honolulu, Hawaii, upon plaintiff delivering to said Castle an indenture of mortgage upon certain lands in Wailuku aforesaid, then owned by plaintiff, to secure the payment of said loan.

That thereafter, and on or about the 17th day of January, 1889, plaintiff did make and execute the mortgage aforesaid, a certain N. Lowrey being the mortgagee therein named, and plaintiff did at that time deliver the said mortgage to defendant as plaintiff's agent, to be delivered by defendant to said W. R. Castle, then of Honolulu, Hawaii, to secure the payment of said mortgage.

That thereafter, and on or about the 25th day of January, 1889, defendant did deliver to said Castle the mortgage aforesaid, and defendant did then and there receive from said Castle the sum of \$10,000, the same being the consideration money for said mortgage.

That in receiving the money aforesaid defendant was acting as the agent, employee, bailee, and trustee of an express trust of the said plaintiff.

That plaintiff after said date often requested said money of defendant, but defendant always represented to plaintiff that he, defendant, had not yet received said money from said Castle; but plaintiff alleges and says that said representations were and are false and fraudulent, and were made for the purpose of cheating, swindling, and defrauding his plaintiff out of his property.

That plaintiff has never received said \$150 or any part thereof, though said mortgage was enforced against plaintiff, and that his property has been sold to pay the same.

And plaintiff further says and alleges that defendant, after having received said money from said Castle, the exact date being unknown to plaintiff, did purloin, embezzle, and corruptly take and convert to his, defendant's, own use the said \$150, the property of this plaintiff.

That the said \$150 with interest is still due, owing, and payable from defendant to plaintiff.

Wherefore plaintiff prays the process of this court to cite the said defendant to appear and answer this complaint before a jury of the country at the June, 1900, term of this court, unless sooner disposed of by judicial authority, and that plaintiff may have judgment against defendant for the sum of \$150, together with interest thereon and for his costs in this proceeding.

S. KAHALE, *Plaintiff*.

HONS & COKE and RICHARDSON,
Attorneys for Plaintiff.

HAWAIIAN ISLANDS, *Island of Maui*, ss:

I, S. Kahale, being first duly sworn, depose and say that I am the plaintiff above named, that I know the contents of the foregoing complaint and that the same are true.

GEO. HONS, *Notary Public*.

CITIZENS' MEMORIAL.

Memorial of the citizens of Hilo, Hawaii, praying for the enactment of legislation by Congress for the improvement of Hilo and the development of the island of Hawaii.

HILO, HAWAII, September 17, 1902.

To the honorable subcommittee of the Senate Committee on Pacific Islands and Porto Rico:

Your memorialists, the undersigned committee, appointed at a meeting of citizens held at Hilo, island and Territory of Hawaii, September 15, 1902, beg to respectfully represent:

The island of Hawaii, popularly called the "Big island," is the largest island of the Hawaiian group. It has an area of 4,210 square miles and contains about 2,000,000 acres. The largest city and prin-

cial port of Hawaii is the port of Hilo, situated on Hilo Bay, on the windward side of the island. With the exception of Pearl Harbor and the Lochs, the Bay of Hilo affords the largest natural harbor in the Hawaiian Islands, having an area of 1,500 acres and an available wharf frontage of 7,000 feet, or nearly a mile and a half in extent.

BREAKWATER.

The peculiar formation of the bay, with a submerged reef of coral extending from the shore a mile toward the entrance of the harbor, furnishes a natural haven for storm-bound vessels. Unfortunately, however, the high winds sweeping over the reef break the sea into heavy swells, and an otherwise calm harbor is transformed into a heavy and tempestuous basin. A breakwater extending out over this reef for three-quarters of a mile or more would stop the heavy flow of the sea and protect from damage the shipping and wharfage property within the harbor.

Several Government surveys, and especially that made in 1901 by the United States Coast and Geodetic Survey (Chart No. 4103), demonstrated the feasibility of the construction of such a breakwater at minimum cost to the National Government and with incalculable benefit to Hilo and the island of Hawaii. Until the bay can be properly protected by a substantial breakwater, it is almost useless to attempt to construct permanent piers or docks for deep-draft vessels. At present the port of Hilo has only one small wharf for the use of inter-island steamers, and an old abandoned government wharf. Heavy-draft vessels therefore are required to anchor in deep water in the bay and to handle every ton of freight loaded or discharged by means of scows and lighters between the ship and shore. In very rough weather the work of lading or discharging vessels must be abandoned. The construction of extensive docks and wharfs along the water front is now awaiting the building by the National Government of a protecting breakwater without which the shipping and wharfage property are at the mercy of the elements.

SHIPPING INTERESTS.

The number of vessels discharging and loading import and export freight at this port is about 90 to 100 per annum, aggregating some 120,000 tons, upon which there is a lighterage of 50 cents per ton each way between ship and shore, under existing conditions. Last season's crop of sugar for the entire Territory aggregated 360,038 tons, while the yield for the island of Hawaii alone amounted to 134,618 tons, or 38 per cent of the whole output. Owing to the establishment of twenty gigantic sugar plantations in the vicinity of Hilo, which have just come into bearing within the last year, the prospect for a large output from this island, is very much increased. Almost the entire sugar production from this island finds an outlet through the harbor of Hilo, and this amount will be greatly increased by the construction of the proposed lines of railroad and the further development of the sugar plantations and the contiguous territory, which is now practically inaccessible.

government and available for Federal purposes, as shown on a plat of the business portion of Hilo, herewith presented. The leases under which these lands are held by private parties will shortly expire, the dates of expiration being fully set forth on the plat referred to.

CITY AND DISTRICT OF HILO.

The population of the city and district of Hilo is approximately 14,000, and promises in time to become the city of largest commercial importance within the group. Hilo is the terminal for two railroads running into the interior, one of which, 42 miles in length, is in active operation, and the other, of 120 miles, is a projected enterprise having a very promising outlook for its early completion. The lines of road will tap nearly every sugar plantation of the "Big Island," whose inward and outward freight must necessarily be handled at Hilo. The assessed value of real estate and personal property in the district of Hilo in 1897 amounted to \$5,460,631, and for the year 1901 amounted to \$10,281,480, showing an increase in five years of \$4,420,849. For the entire island of Hawaii the assessed value of real estate and personal property for 1897 amounted to \$13,500,000 and for 1901 to \$25,377,151.

QUARANTINE STATION.

In view of the exposure of the Hawaiian Islands to infectious and contagious diseases from Asiatic ports, the necessity for a strict quarantine, when the occasion demands it, is apparent. Owing to the generally healthy condition and climate of Hilo and the island of Hawaii we are particularly free from epidemics. But occasions arise, as in the case of the bubonic plague in Honolulu, when it is imperative that the port of Hilo should be the seat of the enforcement of strict quarantine measures. Should such an exigency occur, Hilo is wholly adapted for a quarantine station or equipment to adequately deal with the same, and the establishment of a United States quarantine station is an essential precautionary measure.

REVISION OF THE LAND LAWS.

There should be a thorough investigation and revision of the laws of Hawaii suitable to our needs and conditions which will result in the greatest benefit to the small farmer and home owner. In remodeling the land laws of Hawaii along American lines, the law should be so framed as to encourage the settlement and cultivation of the lands by small holders in a diversity of pursuits. (See United States Consular Report, 1889.)

PROTECTION TO COFFEE INDUSTRY.

As has previously been called to the attention of your commission, the ruin or prosperity of Hawaii is dependent upon the rise or fall of the price of sugar, and under present conditions the commercial existence of these islands depends mainly upon sugar. There are other industries, notably the growing of coffee, bananas, and rice, which have not attracted considerable attention. Owing to the low price of coffee, I

years we purchased of Brazil \$1,500,000,000 worth of her products and sold to her only about \$250,000,000 worth of American products, leaving a balance of trade in her favor of the enormous sum of \$1,250,000,000 gold. Yet Brazil discriminates against us to-day. She charges a higher duty on flour when it comes from the United States than when it comes from the Argentine Republic. She does this in return for a reduction of duties by the Argentine Republic on Brazilian coffee, whereas we admit that coffee free of duty. And the United States imported from Brazil \$66,643,347 value in products more than the Brazilian imports by the Argentine Republic. This only illustrates to what unjust discriminations the United States submits in permitting Brazilian coffee free of duty into the United States.

The same condition of affairs exists with reference to our trade relations between the United States and all the South and Central American coffee-producing countries. The cultivation of coffee in these islands is in its infancy, and so long as our product has to compete with the cheap coffees admitted free into the United States from countries where contract-labor laws, trades unions, and laws against slavery and the use of convicts are not enforced, this industry will be retarded in its growth and commercial success.

I forgot to mention that it is a fact that South and Central American coffee-producing countries charge on all coffee exports an export duty of \$2.25 (in gold) per cental (110 pounds), which duty, naturally, the United States pays.

My views regarding the future welfare of this industry, naturally meaning the future welfare of our Territory, are shared by all American citizens, and I trust that these claims for recognition will bear fruit.

Yours, respectfully,

ABRAHAM L. LOUISSON.

HILO, HAWAII, *September 18, 1902.*

MEMORIAL ON REVISION OF THE HAWAIIAN LAND LAWS.

To the Subcommittee of the Senate Committee on the Pacific Islands and Porto Rico:

The views hereinafter expressed have already, in part, been presented at different times, and to other officials and branches of the Federal Government, also to the Hon. H. M. Sewall, late United States minister and commissioner during the interregnum antedating the actual operation of the organic act. The conditions that then existed exist to-day only more emphasized.

I have, then, the honor to suggest that a closer investigation of the methods used in the administration of Hawaii Territorial land matters will disclose the existence of a state of affairs which it is difficult to conceive from an American standpoint, and one which, if not speedily checked either by local legislation or an entire radical change through Congressional legislation, transferring their control and disposition to the Federal branch, may leave but the empty husk to be legislated for.

Not least among the many causes for the uneasiness and dissatisfaction existing in the public mind of this Territory at the present day is the general disregard or nullification by the Territorial land officials of

the provisions and requirements of the so-called public-land act of 1895, a creation of the present governor. As a matter of fact, it has been most difficult to obtain any information. The self-styled "Executive Council" occasionally permits a few grains of information of its doings to sift through between the chinks of its closed doors; otherwise no publicity is given to its proceedings, which adds another malodorous element to an un-American phase of public administration. In regard to land matters a certain secrecy has been observed, both by the department and the Territorial executive, with the result that thousands of acres of the most valuable agricultural public lands of the Territory have been allotted or alienated since the adjournment of the late legislature in July, 1901—in some instances to irresponsible persons, while in others a proper exercise of judgment looking toward protection of the public rights and the public welfare should have resulted in throwing the applications into the waste basket. An inevitable result of these high-handed proceedings has been one in the creation of a sentiment of deep indignation against an executive either too weak to resist or too willing to acquiesce in the betrayal of a public trust. In no instance has a knowledge of the locality, individuals seeking lands in the same, been of the slightest avail in deferring or averting these results, for, as stated, the public has invariably been denied information until too late for remedial action or protest, and then only the bare facts. Furthermore, requests for access to public records for information on passed land transactions have been denied in the face of remonstrances that such refusal would be appealed from to the Federal authorities.

Referring to the Dole land act of 1895, the provisions applying to the acquisition of public lands under the form of settlement associations appear to have found the most favor with the dispensing officer, and the records of the land office will show that large blocks of land have been gerrymandered under this anomalous feature. These associations or associations may or may not have been effected for the purpose of evading the requirements—in the former event a matter of all difficult when the mutuality of interests or the force of public influence, or even the cool insolence of disregard to the law, have induced such violations to be carried on with impunity.

In this connection a reference to the records will indicate that the executive council has ratified the setting apart of valuable agricultural tracts in large amounts, under the provisions for settlement associations; (2) that in many instances the allotments were made to parties who should have been considered ineligible; (3) that in many instances where the applications were bona fide they were denied; (4) that in two instances at least allotments were ratified in violation of the law. In the first case, the principal applicant was a close personal friend of the land commissioner; in the second case, the brother-in-law to or subagent, employing as the surveyor the successful applicant for the first-mentioned tract. In no single instance was the public cognizant of these projected moves until full consummation had been effected. In the majority of cases these settlement associations have gobbled up the rich agricultural Olaa tract, of which the Olaa tract forms a part. In not a single instance has the residence clause been observed, nor do the land officials appear to have insisted on a compliance with the same.

Among the numerous reasons assigned by the Territorial administration as making it expedient to maintain the existing land laws in preference to the American statutes is the specious one that under the operation of the latter the supply would rapidly become exhausted—a statement inconsistent with the facts when viewed in the light of the wholesale alienation of the public lands effected since the passage of the organic act, whether in response to the greedy calls of the sugar interests on the one hand or of scheming speculators or irresponsible applicants, of whatever race or nationality, on the other.

The statement has been made before your honorable body by the present commissioner of public lands that no transfers or leases of government tracts have been effected except in such localities where the conditions for small holdings were unfavorable by reason of inaccessibility or otherwise. A mere superficial investigation, however, will prove this statement to be false and misleading. As a matter of fact, the records will show that bona fide applications have been pigeonholed or sidetracked, the impression conveyed to the public being one of collusion on the part of the Territorial officials with certain moneyed interests. The frequency, also, with which large blocks of the public lands have of late been set apart by the Territorial administration at the suggestion of the planting interests, as so-called water conservation or forest preservation tracts, and in some instances, when the leases have but a short period to run before expiration, lands now leased to the plantations at ridiculously low rates, remaining uncultivated and unproductive, though capable of the highest agricultural development, which in every respect are desirable for the purposes of settlement, places the Territorial administration in the odious light of insincerity in its professions and of seeking to further the growth of plutocratic interests and influence, while shutting out the intelligent and industrious American white farmer, whose brain and brawn have helped to make our country the most powerful and the most prosperous country on the face of the earth, but who, in Hawaii, finds confronting him the adverse conditions of a hostile, un-American administration, friendly only to the perpetuation of an Asiatic civilization.

The ax of the pioneer may not resound through the depths of the tropical jungle for fear that the felling of the forest may disturb the normal ratio of rainfall; on the other hand, the interests adjacent, separated from the former only by natural water courses, fringed and clothed from top to bottom with dense foliage that arrests evaporation, may denude the properties held by them, either in fee or under lease from the Territory, with impunity, inasmuch as some mysterious natural phenomenon gravitating only to themselves maintains the water status. The result is that the intending settler, whether newcomer or resident, finds himself without the pale, unable to locate on the really desirable tracts, these tid bits being reserved from occupation. Seeking employment elsewhere, he finds himself assailed at every turn by the universality of Asiaticism covering every branch and avenue of labor and usefulness, and slowly, but nevertheless insidiously, and surely undermining Caucasian forms, American principles, the genius of liberty and equality, with the foulness of its own institutions.

Then is the local administration directly responsible for this cancerous sore in the midst of the body politic. Viewed even in the light of

the statutes which it desires to perpetuate, it has been derelict in administering those statutes. Instead of applying those laws in a broad and liberal spirit which, by providing cheap homes for many, conduces so much toward the uplifting of a nation's welfare, has prostituted its powers in the direction of favoritism, in fostered a plutocratic element beyond the just recognition that any land industry might reasonably be expected to receive, in itself violating the spirit of the statutes as already indicated, whatever shallow reasons of justification it may advance in defense of its methods to the contrary, and until it can fully and satisfactorily explain its many acts of illegality: (1) of ratifying the wholesale assignment of public land to so-called settlement associations with members of dubious financial credit, or of (2) not compelling them to conform to the requirements called for; (3) in denying the same opportunities to others far more deserving and able to carry out the conditions; (4) in declining to open up desirable tracts of lands applied for by responsible citizens insisting upon reserving as forest reservations or water conservation tracts localities eminently suitable for homesteads and small holdings on the mere representations of interested parties already holding large blocks of public lands at ludicrously low rentals in which the theory of water conservation takes no part; (5) in permitting unrestricted transfers and assignments of interests in holdings when the purpose of such transfer was clearly one of profit or barter; (6) in permitting subagents or other officials to openly speculate in such propositions in virtue of their official prominence; (7) in permitting those officials to hold back land patents long after the final payments had been made; (8) in putting upon the market large blocks of land in one unbroken tract, concealing the true nature thereof, under the conditions of a right of purchase lease; (9) in foolish and profligate waste of the public moneys, by sending forward to Washington its commissioner of public lands to instruct the President of the United States, as well as its Senate and House of Representatives, in their respective public duties, with especial reference to the proper administration of Territorial public lands, and many other evidences of official incompetency and hostility toward American methods.

The senseless, fatuous resistance of the Territorial executive, the commissioner being merely the figurehead, to the incorporation and adoption of our own liberal Federal statutes can be viewed by a disinterested outsider only as the final effort to prolong an oligarchic condition that must eventually be eliminated. The same forces that sought the extinction of national sovereignty in Hawaii, and its replacement by American institutions, exerted the most stupendous efforts to force upon the Congress of the United States the adoption of a colonial system which might maintain intact their power and privileges; not that those efforts were animated by veneration for our glorious old flag and its associations, but that the dominating motive was one of commercialism. The anomalous condition of a small coterie grasping and retaining the reins of government while disfranchising the son of the soil was here presented, an oligarchy rendered possible by a commercial reign of terror, against whose influences and ramifications the liberty-loving citizen was powerless. Gradually, however, as this octopus clutch became loosened, as the spirit of American institutions came marching on, and now the Hawaiian American clings with his white brother that in this, almost the last citadel of oligarchy

over, a land law framed for the perpetuation of oligarchic principles, shall be let down and American ideas prevail.

The Territorial administration claims this to be inexpedient. It is, in the first place, that it is impracticable to adopt the rectangular method of public land subdivision under the geographical or topographical conditions here prevailing. For the information of the Territorial executive, reference is here made to sections 2408-2410 of the Revised Statutes, which empower the Secretary of the Interior to depart from the rectangular mode of survey should he deem the same desirable or to promote the public interest. These sections were framed for the better subdivision of the public lands of Oregon, California, and Nevada. Section 2410, with a slight amendment incorporating the words "Territory of Hawaii," could be made applicable to Hawaii. Furthermore, this same section fixes a maximum of 160 acres and a minimum of 40 acres as a limit of subdivision, which, from the standpoint of a Hawaiian administration of land affairs—so liberal in its apportionment of 200-acre prizes and 2,000-acre settlement associations to straw settlers—will be a just hardship to the prospective landowner in Hawaii; if adopted, a misfortune not to be deplored except by the champions of the Hawaiian land system.

The other complaints put forward in opposing the final transfer of the Territorial lands to Federal control have their origin merely in that natural disinclination to let go a good thing—one of the indices of the oligarchic spirit.

The only call upon the sympathy of the at one time kindly minded people has been the one of distance and interval. At the present time, however, this tearful appeal has long since lost its effectiveness, inasmuch as grim experience has taught the weary ones who were blessed because they waited that for deeply dyed, double-distilled essence of waiting for land patents from six months to two years after the full payments had been made was no unusual occurrence. It is an open question whether Washington could beat that record.

Having, therefore, called attention to existing conditions and enumerated such facts as the limitation of this paper will permit, does it not appear necessary that Congress should take early action toward devising a system of land laws for this Territory? Also to consider the condition of the present laws and their application at the present time? Also, is it not a question of vital importance what system shall be adopted?

"Congress shall enact special laws for the public lands of Hawaii," says the Newlands resolution. Compared with the States and other Territories, Hawaii can not boast of an enormous area, public or otherwise. At the same time, Hawaii is essentially an agricultural country, responsive to the slightest efforts at enlarging the scope of its effectiveness, affording opportunities under a proper régime of laws and their administration for diversified industries to the highest degree, so that the system under which its public lands are to be disposed of will be of vast importance in shaping its future.

And as the illumined pages in the book of our own glorious national Congress are unfolded before us, we can clearly perceive as the dominating keynote in that wonderful expansion the wise and beneficent policy of opening up our immense areas to the ax and the plowshare of the husbandman—a policy that has stood the test of a century of trial and that stands as the concentrated wisdom of legislation for a

settlement of the public land; laws copied from no other nation's system, but which were and remain originally and distinctively American. Shall, then, the mainspring of our just national expansion be confined merely as by divine right between the Atlantic and the Pacific, while those who have participated in its benefits, who filled the States with their homes, their communities, who by virtue of their proprietorship in the soil have lessened the chances of social and civil disorder and who have protected their Government against the assaults of enemies, come here to Hawaii and be denied those same privileges merely at the instance of the partisans of a centralized and arbitrary rule?

No good reason has as yet been assigned to show why the honest laws of the United States should not be applied here, in Hawaii, without radical change. Such a policy would encourage, perhaps, more than anything else the development of a small landholding population, without interfering, on the other hand, with the sugar-planting industry upon a large scale, which, because no other industry was permitted to exist, has remained the backbone of the country. Whatever lands suitable for the growing of cane were thus disposed of would necessarily nor probably be diverted from their natural purposes by the landowners, if they choose, could make satisfactory contracts with the mill or plantation owners contiguous to their holdings for harvesting and disposition of their crops.

And as the present system of plantation operations has converted into a more or less feudal relation, as between the employer and employee, one which, in the progressive march of events, can no longer be maintained, so would the inauguration of the American system eventually in the solution of the labor problem and insure a better element in the population than now exists as the heritage of two or five years of semislavery—this word not being used in its invective sense, but merely as a contrast to our own enlightened acceptance of the relations that should obtain between labor and capital.

In fact, one is inclined to suggest that the Federal statutes, by applying not alone advantageously to the lands still unoccupied, should be made to cover all the public lands, including the large areas now under lease to the plantations, as soon as these leases expire, or before; in the latter case by affecting an equitable exchange with the lessees, conveying over to them the fee of a portion in exchange for the surrender of the immense tracts now held under lease at ridiculously low rental figures, for ten, twenty years, or more, the portions of which are permitted to remain untouched and unproductive. Witness the case of the Waiakea Mill Company, of Hilo, whose lease of the land of Waiakea, consisting of nearly 100,000 acres, has a period of seventeen years still to run, at an annual rental of \$2,000 per annum. The larger portion of the city of Hilo is included in this title, besides valuable harbor frontage. Under the discriminatory laws now extant no proposition looking toward a reversion of these valuable assets has been possible, although the lessees were ready and willing to effect the same, with the result that Hilo, with its natural advantages, its unsurpassed geographical location, lying on the direct pathway of the ocean's commerce, with a harbor deep and capacious enough to float all the navies of the Pacific, flanked by natural fortresses that would render it impregnable to assault, the contributing and receiving port of the whole island of Hawaii,

possessing wonderful resources and possibilities of expansion into a metropolis of the mid-Pacific, lies inert and congested through artificial restraints—an Andromeda awaiting the coming of her deliverer.

The restriction of the homestead laws would further secure a greater permanence to the small holdings as such, preventing their absorption into larger holdings and insuring the permanence of a Caucasian population and a Caucasian civilization of a high order. It would help prevent the rapid turning over by collusion or otherwise of large areas of the finest lands on these islands to plantation promoters or to corporations which have in the past succeeded and are still looking for the very thing, it being by no means difficult to evade the 1,000-acre limit of ownership in the organic act—since section 2290 of the Revised Statutes requires that any person applying for such lands shall make affidavit that he does so in good faith, for purposes of residence and cultivation, and not that the title may revert, in whole or in part, to any person other than himself or family.

Then, if Congress and the people of the United States desire to make of Hawaii an American outpost, held by Americans and not by aliens, it can only do so by encouraging white immigration to these islands. Again would the operation of the Federal land statutes aid in reaching about this desired result, inasmuch as, for all public lands, the minimum purchase price is fixed, the greater amount being realized when two or more parties apply for the same tract. No such rule is found in the Hawaiian statute. On the other hand, the lands are appraised arbitrarily, under no fixed rule, and on being thrown open to entry it not infrequently happens that anyone but the legitimate applicant is found to be the successful one, his good or ill success depending on his ability to remain in line for a week or more pending the time advertised, with Chinese, Japanese, and aliens, ineligible as applicants, but holding down the place for some intending bidder or speculator after the same lot, all willing to sell out for a consideration.

That the lands on Hawaii, being inconsiderable, should for that reason be differently administered, is no forceful contention. Admitting that the area is not inexhaustible, then the more speedily it is settled and made productive the more readily shall we find exemplified to the highest degree the results of labor and skill and perseverance, the more readily shall we have cheap food, the more speedily will the wages of labor be regulated at a higher level, the more efficient will be the advance in industry and commerce, and the final extinction of class distinctions, one man being as good as another, and all possessing equal rights. The United States looks for no revenue from the sale of its lands, but rather from the improvements. On Hawaii the converse is true.

The present lease system so generally applied to the public lands in the towns should be abolished. The local government has already been in the landlord business too long. The system is unjust to the tenant and delays the municipal growth.

One is inclined to suggest at least the wish that something in the way of special legislation could be enacted for the native Hawaiians, so far as the acquiring and holding of public lands is concerned. As the Hawaiian has happily been admitted to the rights and privileges of American citizenship coequal and coextensive with those enjoyed by ourselves, in spite of the insidious efforts on the part of those who sought to prevent or restrict his political emancipation, constitution-

ally such a procedure would of course be inadmissible, but it is to be regretted that the Hawaiian can not acquire land upon terms which would make it practically inalienable, for it is questionable whether he could retain it for any length of time otherwise. This is his misfortune, not his fault. The Hawaiian of to-day is but the product of a lotus-eating existence that has come down with the centuries. The day of settlement is ever relegated to a distant "mahape" or by-and-by, which, when it arrives, finds him unprepared to accept its conditions or responsibilities. Happily for him has risen the dawn of a new era under the aegis of our own glorious institutions of liberty, equality, and progress, which he will be quick to perceive and prize. If, then, we can not adopt for his benefit special legislation, can at least put into operation our own liberal land laws, with their protective features, that have built up our country, have made it powerful and prosperous, the asylum and the refuge of the weary and oppressed of all nations. Why not then on Hawaii, our baby Territory?

A. B. LOEBENSTEIN,
Hilo, Hawaii

HONOLULU, *September 22, 1902*

**REPORT OF THE CHAIRMAN OF THE FIRE CLAIMS COMMISSION
TO THE GOVERNOR OF THE TERRITORY OF HAWAII.**

HONOLULU, *July 29, 1902*

SIR: In response to your letter of July 2, 1902, I have the honor to submit the following report of the work of the fire claims commission as authorized by act 15 of the session laws of 1901:

Acting under the authority of act 15 of the session laws of 1901, being "An act to provide for the ascertainment and payment of fire claims which may be made by persons whose property was destroyed by fire in the years A. D. 1899 and 1900, under orders of the board of health," the following-named persons, viz, F. W. Macfarlane, chairman; A. N. Kepoikai, J. G. Pratt, A. C. Lovekin, and J. B. Testa, duly nominated by the governor and confirmed by the legislature of the Territory of Hawaii as commissioners, met on the 13th day of May, 1901, for the organization of said fire claims commission. Action at this and subsequent meetings held during the organization of the commission resulted in the appointment of officers to the commission and adoption of rules to govern the proceedings of same, as follows:

OFFICERS.

Clerk, J. Morton Riggs; stenographer, C. F. Reynolds; William Tell; Japanese interpreter, James H. Hakuolo (later resigned and succeeded by Chester A. Doyle); Hawaiian interpreter, J. B. Baker (later resigned and succeeded by W. H. Crawford as Hawaiian and Chinese interpreter); messenger and janitor, Moses Palau.

RULES FOR THE GOVERNANCE OF THE FIRE CLAIMS COMMISSION
APPOINTED UNDER ACT 15 OF THE SESSION LAWS OF 1901.

- I. The title of this commission shall be "Fire Claims Commission."
- II. All claims filed in this court shall be verified according to law.
- III. This court shall be open for the transaction of business daily between the hours of 9 o'clock a. m. and 4 o'clock p. m., except when otherwise ordered by a majority of the commission, which order shall be spread upon the minutes of the commission.
- IV. The chairman of this court with a concurrence of a majority of the commission present may enter all orders that are necessary, such orders to be placed in full upon the minutes of this commission.
- V. All claims and other papers required to be filed in this court shall be plainly engrossed or typewritten without erasures or interlinations materially defacing them.
- VI. Persons entitled to participate in the recovery of claims filed before this court may, upon petition properly verified, be admitted to prosecute such claim as coclaimant.
- VII. All stipulations between claimants or their representatives and the representatives of the government shall be in typewriting, dated, properly indorsed, and filed with the clerk of this court, who shall keep an entry of the date of filing said stipulation in a book provided for that purpose.
- VIII. No claim can be made without proof of a subsisting interest of the claimant in the subject-matter of the claim; this proof may, in the first instance, be the oath of the claimant to his claim, or as otherwise provided for in Rule II, but subject to denial and disproof on the part of the government or any other party to the claim.
- IX. It shall be the duty of the clerk to attend in person all sessions of this commission; to keep a record of all proceedings had before this commission; file all papers; keep in his possession all books and papers belonging to, or in any wise, as evidence or otherwise, coming to the possession of this commission; to keep a list of all claimants; to swear witnesses appearing before said commission; to keep a list of the names of all witnesses sworn.
- It shall also be the duty of the clerk to be present at the place set apart for the holding of the sessions of this commission daily between the hours of 9 o'clock a. m. and 4 o'clock p. m.
- The clerk shall prepare and keep a book in which shall be kept a full and particular account of each claim, which book shall be open to the inspection of any person interested in each of said claims during business hours.
- X. It shall be the duty of the interpreters to attend and be present when required by the commission, and under the direction of the commission perform such duties as may be required of them.
- XI. It shall be the duty of the bailiff of this commission to attend and be present at all meetings and sessions of this commission and perform such other and necessary duties as the commission may direct.
- XII. It shall be the duty of the stenographer to be present at all meetings and sessions of this commission, and take down in shorthand and extend the notes of such proceedings as may be required of him and to keep a full, true, and correct report of the testimony and proceedings of this commission for its use.

XIII. The names of all claimants shall be written in full upon claims filed before this court.

XIV. In order to facilitate business claimants are directed to present claims for losses of merchandise, goods, wares, and stocks in trade in an itemized form, describing the kind and value thereof, upon a schedule to be marked "Exhibit A," and all claims for losses of personal belongings, jewelry, house furnishings and other chattels upon schedule to be marked "Exhibit B," and for all losses appertaining to buildings or of building fixtures upon a schedule to be marked "Exhibit C."

XV. It shall be the duty of the clerk to prepare a daily calendar to be called at 9.30 a. m., to place on same claims for hearing in the order of their filing, unless otherwise ordered by the commission.

In accordance with section 3 of act 15, due public notice of organization of the commission, and that claims for damages might be presented and filed for its consideration, was given by publication in the English and Hawaiian newspapers in Honolulu, island of Oahu, and the other islands of the Territory.

The four months stipulated for the presentation of claims, in accordance with section 7 of said act 15, began May 27, 1901, and ended September 27, 1901, and during that time a total of 6,748 claims were filed with the commission, amounting to \$3,175,132.90, and segregated under the following as to nationality:

	Number of claims.	Amount claimed.
Japanese.....	2,574	\$638
Chinese.....	3,728	1,76
Hawaiians.....	278	34
Portuguese.....	19	8
Other nationalities.....	128	27
Fire insurance companies.....	21	7
Total.....	6,748	3, 17

On the 31st day of May, 1901, the commission held its first session for the hearing of evidence in the proving of claims, and from that date until the 2d day of June, 1902 (with the exception of a recess lasting from the 19th day of December, 1901, to the 19th day of November, 1902, taken on account of allowing the clerk to catch up with the backlog of entering up the claims adjudicated by the commission), the commission was in session hearing evidence and awarding and signing judgments on the 6,748 claims presented for its consideration.

The first sessions of the commission were held in the room of the Honolulu Chamber of Commerce, but upon the adjournment of the Territorial legislature the former throne room in the executive building became available and was used for the remaining sessions of the commission.

Section 9 of act 15 provided that "each claim should contain an itemized statement in the English or Hawaiian language of the claim sustained." In a large number of instances it was found that clerical errors had been made in the compiling of the claims by the clerk or their attorneys, and, although sworn to as correct, it was soon discovered that every claim had to be gone over separately and all itemized extensions checked. This procedure involved an immense amount of labor and required the employment of additional clerical help to

vided for by the legislature appropriation. Claimants were required to produce all available evidence in the proving of their claims, and all books and papers, such as books of account, including inventories of stock taken when not destroyed, copies of certified warehouse invoices, showing importations of merchandise, etc., were regarded as exhibits in evidence.

The commission found that the board of health records of property removed from condemned buildings to warehouses under its charge and returned from said warehouses to owners after the suppression of the plague to be very incomplete and of little real use in the adjudicating of claims. Receipts given and taken for such salvage of property were in almost every instance by the case or package, and there was usually nothing to indicate what these cases or packages contained. On the other hand, however, the appraisements made by the committee of builders appointed by the board of health to estimate values of condemned buildings destroyed were found of much value and usefulness.

Much assistance was rendered the commission by the action of the Japanese and Chinese consulates and committees of merchants of each of these nationalities in collecting and revising the claims of their countrymen before they were filed with the commission. The interest of the government was represented during the sessions of the commission in the personnel of Attorney-General E. P. Dole, Assistant Attorney-General J. J. Dunne, A. E. Douthett, Messrs. Andrews, Peters & Andrade, and Wade Warren Thayer.

For the convenience of claimants living on the island of Maui who had sustained losses by the sanitary fires on that island, two of the commissioners—viz, Commissioner A. N. Kepoikai and Commissioner F. J. Testa—held sessions of the commission at the court-house in Wailuku from October 2 to October 9, 1901, inclusive, to hear evidence presented in support of said claims, and during these sessions they heard evidence on 202 claims of different nationalities.

Commissioner J. G. Pratt, having been chosen to represent the Honolulu Chamber of Commerce and Merchants' Association in the matter of securing the aid of the Federal Government in the payment of fire claims, departed for Washington, D. C., on April 9, 1902, and was absent from the remaining sessions of the commission.

The total amount awarded by the commission on the 6,748 claims filed was the sum of \$1,473,173, and was divided among the various claimants as to nationality as follows:

	Claims.	Amount claimed.	Amount awarded.
Japanese.....	2,574	\$639,742.99	\$333,730.10
Chinese.....	3,728	1,761,112.04	845,480.80
Italians.....	278	342,526.84	144,242.50
Portuguese.....	19	81,658.47	24,117.45
Other nationalities.....	128	272,829.76	125,602.15
Fire insurance companies.....	21	77,262.80
Total.....	6,748	3,175,132.90	1,473,173.00

Fire insurance companies that had paid for losses on property insured by them and destroyed presented claims aggregating the amount of \$7,262.80. The commissioners, after listening to extended argument by Attorney-General E. P. Dole and counsel for the various insurance

XIII. The names of all claimants shall be written in full upon claims filed before this court.

XIV. In order to facilitate business claimants are directed to present claims for losses of merchandise, goods, wares, and stocks in trade in an itemized form, describing the kind and value thereof, upon a schedule to be marked "Exhibit A," and all claims for losses of personal belongings, jewelry, house furnishings and other chattels upon schedule to be marked "Exhibit B," and for all losses appertaining to buildings or of building fixtures upon a schedule to be marked "Exhibit C."

XV. It shall be the duty of the clerk to prepare a daily calendar to be called at 9.30 a. m., to place on same claims for hearing in the order of their filing, unless otherwise ordered by the commission.

In accordance with section 3 of act 15, due public notice of organization of the commission, and that claims for damages might be presented and filed for its consideration, was given by publication in the English and Hawaiian newspapers in Honolulu, island of Oahu, and the other islands of the Territory.

The four months stipulated for the presentation of claims, in accordance with section 7 of said act 15, began May 27, 1901, and ended September 27, 1901, and during that time a total of 6,748 claims were filed with the commission, amounting to \$3,175,132.90, and segregated under the following as to nationality:

	Number of claims.	Amount of claims.
Japanese.....	2,574	\$83,728
Chinese.....	3,728	1,768
Hawaiians.....	278	34
Portuguese.....	19	8
Other nationalities.....	128	27
Fire insurance companies.....	21	7
Total.....	6,748	3,175,132.90

On the 31st day of May, 1901, the commission held its first session for the hearing of evidence in the proving of claims, and from that date until the 2d day of June, 1902 (with the exception of a day lasting from the 19th day of December, 1901, to the 19th day of May, 1902, taken on account of allowing the clerk to catch up with the work of entering up the claims adjudicated by the commission), the commission was in session hearing evidence and awarding and signing judgments on the 6,748 claims presented for its consideration.

The first sessions of the commission were held in the room of the Honolulu Chamber of Commerce, but upon the adjournment of the Territorial legislature the former throne room in the executive building became available and was used for the remaining sessions of the commission.

Section 9 of act 15 provided that "each claim should contain an itemized statement in the English or Hawaiian language of the loss sustained." This procedure involved an immense amount of labor and required the employment of additional clerical help.

vided for by the legislature appropriation. Claimants were required to produce all available evidence in the proving of their claims, and all books and papers, such as books of account, including inventories of stock taken when not destroyed, copies of certified custom-house invoices, showing importations of merchandise, etc., were demanded as exhibits in evidence.

The commission found that the board of health records of property removed from condemned buildings to warehouses under its charge and returned from said warehouses to owners after the suppression of the plague to be very incomplete and of little real use in the adjudicating of claims. Receipts given and taken for such salvage of property were in almost every instance by the case or package, and there was usually nothing to indicate what these cases or packages contained. On the other hand, however, the appraisements made by the committee of builders appointed by the board of health to estimate values of condemned buildings destroyed were found of much value and usefulness.

Much assistance was rendered the commission by the action of the Japanese and Chinese consulates and committees of merchants of each of these nationalities in collecting and revising the claims of their countrymen before they were filed with the commission. The interest of the government was represented during the sessions of the commission in the personnel of Attorney-General E. P. Dole, Assistant Attorney-General J. J. Dunne, A. E. Douthett, Messrs. Andrews, Peters & Andrade, and Wade Warren Thayer.

For the convenience of claimants living on the island of Maui who had sustained losses by the sanitary fires on that island, two of the commissioners—viz, Commissioner A. N. Kepoikai and Commissioner F. J. Testa—held sessions of the commission at the court-house in Wailuku from October 2 to October 9, 1901, inclusive, to hear evidence presented in support of said claims, and during these sessions they heard evidence on 202 claims of different nationalities.

Commissioner J. G. Pratt, having been chosen to represent the Honolulu Chamber of Commerce and Merchants' Association in the matter of securing the aid of the Federal Government in the payment of fire claims, departed for Washington, D. C., on April 9, 1902, and was absent from the remaining sessions of the commission.

The total amount awarded by the commission on the 6,748 claims filed was the sum of \$1,473,173, and was divided among the various claimants as to nationality as follows:

	Claims.	Amount claimed.	Amount awarded.
Japanese.....	2,574	\$639,742.99	\$333,730.10
Chinese.....	3,728	1,761,112.04	845,430.80
Chinese.....	278	342,526.84	144,242.50
Chinese.....	19	81,658.47	24,117.45
Other nationalities.....	128	272,829.76	125,602.15
Fire insurance companies.....	21	77,262.80
Total.....	6,748	3,175,132.90	1,473,173.00

Fire insurance companies that had paid for losses on property insured by them and destroyed presented claims aggregating the amount of \$77,262.80. The commissioners, after listening to extended argument by Attorney-General E. P. Dole and counsel for the various insurance

companies in interest as to the standing of such claims before they ruled that the act under which they worked and had jurisdiction did not comprehend the payment of indemnity to insurance companies they having assumed liability under their policy contracts, and we could not in any event be classed as "persons whose property had been destroyed," and also, their interest being of a "speculative nature," was a condition specifically disallowed under section 7 of the act. Where subrogation had been given by claimants to insurance companies for amounts paid by them under their policies, such subrogation was recognized by the commissioners as a lien upon awards made to such claimants subrogating and judgments rendered in accordance therewith.

Under section 16 of the act the legislature appropriated the sum \$17,400 to pay the expenses of the commission, dividing it into specific items, such as for the pay of commissioners, counsel for Territory clerk, stenographer, interpreters, bailiff, incidentals, and Government witnesses. This appropriation allowed the life of the commission to extend for a period of six months under the pro rata made of the money appropriated. The commissioners early found that to give a proper hearing and consideration to the multitude of claims filed and to properly check the items enumerated and properly weigh the evidence produced before them would require much more time than that contemplated by the legislature at the time of passing the act.

After a six months' session of the commission, or thereabouts, appropriations under several of the headings became exhausted. A sum of some \$2,418 had been effected under two of the items, viz, Government witnesses and interpreters, but under a ruling of the attorney general this amount was not available to the commission to defray expenses other than those specified under their immediate headings.

The commission, then having largely completed its work, was out of funds to finish it. If the work was to stop, all that had been done would be largely a loss, and another appropriation could not be secured until the next session of the legislature. With funds in hand the work could be completed in a comparatively short time and at small expense. Under these conditions, after consulting with the governor of the Territory, the commissioners felt justified in placing the matter before the merchants of Honolulu for financial assistance in the present emergency.

This resulted in the advance by 16 of the principal business firms of Honolulu to the commission of the sum of \$4,000, which amount the commission then deemed sufficient to complete its work, the payment of which, together with interest at the rate of 6 per cent per annum, the governor promised to ask an appropriation for from the legislature.

Subsequently it was found that this sum of \$4,000 advanced by the merchants was not sufficient to complete the work. When this became evident the commission decided to charge a fee to each claimant for certificates of award issued to them, and the fees so charged were estimated so as to amount in the aggregate to the sum of \$5,000, sufficient to repay to the merchants the \$4,000 advanced by them. It having been decided by the commissioners, upon further consideration of the matter, to return to them their loan in this way rather than to the legislature for a further appropriation) and to defray the running expenses of the commission.

The following is the schedule of fees charged:

	Each.
Certificates of award:	
\$50 and under.....	\$0. 25
\$100 and under.....	. 50
\$500 and under.....	1. 00
Over \$500.....	4. 00

No fees other than the above were required from claimants by the commission in the consideration of their claims.

The financial report, covering the amount appropriated by the legislature, is as follows:

Amount appropriated by the legislature of the Territory of Hawaii, session of 1901, to defray the following expenses of the fire claims commission.

Commissioners, at \$10 per diem while in session.....	\$9,000. 00
Counsel for Territory, at \$250 per month.....	1,500. 00
Clerk of commission, at \$150 per month.....	900. 00
Stenographer, at \$125 per month.....	750. 00
Interpreters, at \$10 per diem.....	1,800. 00
Bailiff, at \$75 per month.....	450. 00
Rentals.....	1,000. 00
Government witnesses.....	2,000. 00
	<hr/>
	17,400. 00

Amount of appropriation expended:

Pay of commissioners.....	9,000. 00
Counsel for Territory.....	1,500. 00
Clerk of commission.....	900. 00
Stenographer.....	750. 00
Bailiff.....	450. 00
Interpreters.....	1,280. 00
Rentals as below, viz:	
Rent chamber of commerce.....	\$125. 00
Office supplies.....	\$51. 13
Janitor.....	231. 00
	<hr/>
	282. 13
Advertising.....	229. 00
Commissioner to Wailuku.....	30. 00
	<hr/>
	259. 00
Blanks and stationery.....	245. 25
Books.....	62. 90
Typewriting.....	25. 72
	<hr/>
	88. 62
	<hr/>
	1,000. 00
Pay of Government witnesses.....	102. 00
Balance unexpended.....	2,418. 00
	<hr/>
	17,400. 00

Not available in appropriation:

For pay of interpreters.....	520. 00
For pay of Government witnesses.....	1,898. 00
	<hr/>
Total not available.....	2,418. 00

The following financial report, covering the amount advanced by the business firms referred to in this report and the amount collected for fees for certificates of awards, as well as the disbursements, can not be closed at this time, owing to the following communication having been

received from the law firm of Magoon & Peters, to institute an action to test the legality of charges made by the commission for the issuing of certificates of awards:

[Copy of letter from Magoon & Peters.]

HONOLULU, HAWAII, July 21, 1901

FRED W. MACFARLANE, Esq.,
Treasurer Fire Claims Commission, Territory of Hawaii.

DEAR SIR: We beg hereby to inform you that we shall this day on behalf of Reuben Panee, a minor, institute an action to test the legality of charges made by the commission upon the issuing of awards. We regret very much to be forced to test this matter, but the interests of our client demand the same.

Respectfully, yours,

MAGOON & PETERS

Financial report.

Amount advanced by 16 merchants of Honolulu toward defraying the expenses of fire claims commission in completing their work	\$4,000	
Amount due fire claims commission from claimants on account of fees for certificates of awards	\$5,116.00	
Less fees on certificates not called for	38.75	
		5,077.25
		9,077.25

Above amount expended as follows:

Pay of—	
Commissioners	\$9,000
Stenographer	400
Bailiff	100
Janitor	
Clerk	1,500
Extra clerk	1,500
Books	\$221.60
Printing blanks	50.00
Stationery and office supplies	
Advertising	
Balance	4,000
	9,077.25

The balance, \$4,386.35, is deposited in the Bank of Hawaii, Limited, of this city, pending the result of the test suit referred to above. Of this balance it is proposed to reimburse the merchants for advances, say \$4,000 and interest, and to pay the remainder into the Territorial treasury.

Respectfully submitted.

F. W. MACFARLANE,
Chairman Fire Claims Commission

FIRE CLAIMS—HATCH & SILLIMAN.

HONOLULU, September 12, 1901

To the honorable subcommittee of a committee of the United States Congress on the Pacific Islands and Porto Rico.

GENTLEMEN: In order to put the matter in definite form for consideration, we beg to call your attention to the following facts regarding certain deductions made by the commission appointed by the governor to make fire claim awards.

The act establishing the commission provides that it shall—

and investigate all claims for damages which may be presented by persons who sustain a loss of property by its destruction under orders of the board of health, or in consequence of orders by said board, in connection with the suppression of the plague in the Territory of Hawaii, or by the spreading of the contagion on January 20, 1900.

The act furthermore provides that the record of judgment shall be—

1. Name of claimant, or, where an assignment of the claim has been made, the name of the assignee.

And section 8—

Claims shall be filed in duplicate by the claimants or their assignees and shall be sworn to by their oath, respectively. * * *

The Fireman's Fund Insurance Company and the Liverpool, London and Globe Insurance Company, and perhaps other companies doing business in the Territory of Hawaii, adjusted their losses caused by the board of health fires immediately thereafter, and, with one exception, concerning which there were special circumstances, paid the same. Noting from the assured an assignment of any claim that he might have against the government or that might be given by virtue of any action which the legislature might take looking toward the payment of the claims, to the extent of the amount paid. This assignment was presented by the companies in connection with a petition to be admitted as coclaimants with the several claimants at the time that the several claimants filed their respective claims. Upon the hearing of these claims the commissioners requested that the insurance companies present separate claims under their assignments, which was accordingly done. Thereafter awards were made by the commission and the amount of the insurance paid was deducted from the claimant's claim. Notwithstanding such deduction a notation in substantially the following words was made on the award:

This claimant having subrogated to [then follows the name of the insurance company] and the policy number, together with the amount of insurance, this award is subject to the above subrogation.

No award was made to the insurance companies. The following judgment was entered upon each of their respective claims:

No award made under act 15 of session laws of 1901. Award made to claim. No. [then follows the number of the claim of the original claimant from which the amount of insurance was deducted] subject to subrogation.

In other words, the commission arbitrarily deducted from the claimant the amount of insurance and disallowed the separate claims of the insurance companies, stating, however, upon the awards of the original claimants that the awards made to them were subject to subrogation of the insurance companies.

There is nothing in the act authorizing a deduction of insurance, but the act seems to have expressly contemplated that insurance should be included in the award, for the act contains the following in section 9:

In case of insurance, the amount for which the property was insured, the name of the insurer, and how much insurance was paid thereon shall be stated.

The act provides that no appeal may be taken from the judgment of the board, and in behalf of claimants represented by us we respectfully request that a provision be added to the bill appropriating money

for the payment of fire-claim awards, making the same condition upon no discrimination being shown against any particular class of claimants.

Yours, very truly,

HOTCH & SILLIMAN,
Counsel for Various Claimants

EXECUTIVE CHAMBER, TERRITORY OF HAWAII,

Honolulu, September 10, 1900

The Hon. JOHN H. MITCHELL,

*Chairman Subcommittee of the Senate Committee
on Pacific Islands, etc., Honolulu, Hawaii.*

SIR: I inclose a copy of a part of the annual report of the superintendent of public works relating to light-houses, dredging, buoys, other harbor improvements.

Very respectfully,

SANFORD B. DOL

EXTRACT FROM THE REPORT OF THE SUPERINTENDENT OF PUBLIC WORKS.

I respectfully desire, in concluding my report, to direct attention to subjects, allied in nature, which are of great importance to the welfare of the Territory, viz, the consideration of the expense in maintenance of the necessary light-houses and buoys throughout the Territory, and the dredging of the channel and harbor of Honolulu.

The coasts of the Territory are, considering their extent, at present fairly well lighted, but there are many places where lights are required. Additions to these lights have been made from time to time as funds were available. Besides the coastal lights there are harbor lights at various ports for the guidance of vessels thereto. The expense of erection and construction is an item of the past, present, and future of the Hawaiian government, and the present maintenance of such lights and the keepers therefor, is still borne by the Territory, as also are the expenses connected with the building and placing of buoys at various points. This is a very heavy item connected with the dredging of the channel and harbor, and is necessarily kept clear to a depth of 30 feet below low-water mark.

It is a fact that these items of expense are a very heavy drain upon the revenues of the Territory and, when it is considered that the commercial vessels of the United States, either naval, troop ship, or scientific, enjoy to the fullest extent the advantages of lights, buoys, and harbor facilities, it is respectfully presented that, as this is the only Territory of the United States burdened with such particular expenses, attention may be properly presented to the United States Government for aid and assistance in maintaining the light-houses now constructed, the buoys now placed, and the cost of construction and keeping of any new ones of either and, last but not least, the heavy dredging expenses.

One of the great existing needs to the advancement of the interior of the Territory, although which may be regarded as of special importance to the city of Hilo, yet, however, would be most thoroughly advantageous toward the further development of the commercial opportunities of the Territory, is the building of a breakwater at the entrance to

harbor. This is a long-felt want, but the absorption of revenues by the United States Government which were formerly at the disposal of the government of Hawaii precludes all possibility of the desired improvement being made by this government without the much-desired aid of the United States.

I therefore respectfully present that the following items and amounts offered by the government of the Territory of Hawaii for the consideration of the proper department of the United States Government, and with an official request that the aid and assistance desired be granted and for the purposes stated. Following is a statement of the items and the estimated amounts:

Expense of widening channel and dredging channel entrance and harbor to a depth of 30 feet, low water.....	\$250,000
(This item is in accord with United States War Department estimate.)	
Maintenance of buoys	6,000
New buoys	4,000
Maintenance of light-houses	14,000
Construction and repairs to light-houses	32,000
(This last item contemplates the erection of new light-houses at Honolulu, Makapuu Point, Barbers Point, island of Oahu, Keahole, North Kona, Leleiwi, Hilo, Hawaii.)	
Construction of breakwater at Hilo	750,000
Maintenance, per year	20,000
Total	1,076,000

LEPROSY.

[From governor's annual report to the Secretary of the Interior for year ending June 30, 1902.]

The policy of segregation of lepers was adopted by the enactment of special statutes, with this object in view, in 1865. The leper settlement on the island of Molokai was established in the year 1866, during which year 141 patients were sent there.

The policy of segregation was loosely carried out for a number of years after the establishment of the settlement. During the first seven years the patients admitted averaged 114 per annum, and the largest number admitted in any one year was 183. In 1875 a stricter enforcement of the law was carried out, and 487 patients were sent to the settlement. Thereafter, until 1887, the law of segregation was only partially enforced, and the number of admissions during those years averaged 141 per annum, and the largest number admitted in any one year was 301.

Since 1887 the law has been vigilantly carried out. The number of admissions in 1888 was 579; in 1889, 308, and in 1890, 202, and from that year to the present time the admissions have decreased in number, though not regularly, from year to year; but taking the twelve years beginning with 1890 and ending with 1901, in sections of three years each, we find the number of admissions to be as follows:

1890 to 1892, inclusive	454
1893 to 1895, inclusive	445
1896 to 1898, inclusive	350
1899 to 1901, inclusive	254

From these figures it would appear that with strict segregation the disease has steadily diminished, while, without strict segregation, it shows a tendency to spread.

The following table gives the average number of patients at the settlement for three periods of ten years each, with the average death for the same periods:

	Average number of patients.	Average number of deaths.
1871 to 1880, inclusive.....	648	135.4
1881 to 1890, inclusive.....	823.5	144
1891 to 1900, inclusive.....	1,096	134.5

These figures show a marked decrease of the death rate for the decade, which is undoubtedly largely due to a general improvement in conditions at the settlement pertaining to the comforts of life and of the sick.

The number of patients at the settlement at the end of 1901 was and on the 30th day of June, 1902, 915.

During the year ending June 30, 1902, 132 persons have been examined, of which number 83 were found to have the disease were suspicious cases, and 17 were discharged.

The following tables give their nationality, sex, and age.

Nationalities:

Hawaiians	
Part Hawaiians

SANFORD B. I

TERRITORY OF HAWAII,
OFFICE OF THE GOVERNMENT SURVEY
Honolulu, T. H., September 22,

SIRS: With a view of furnishing information to all persons interested in land matters and surveying in Hawaii, and to the people of the Territory who would understand the country and its

As there were added to the annual report of the surveyer of the Territory for the year ending June 30, 1902, "A brief history of the Hawaiian Government Survey," and some articles on "Land matters Hawaii." These articles are by Prof. Curtis J. Lyons, assistant, who writes with a knowledge derived from practically lifelong and intimate acquaintance with all Hawaiian land matters, upon which he is a recognized authority. Brief extracts from these papers and other information to give your honorable committee an idea of the work of the department follow:

The Hawaii Territory survey, formerly known as the Hawaiian Government survey, was primarily and is still mainly a cadastral survey. Its initial object was to locate on general maps all titles that had previously to its inception been issued by the Government, and thereby account for all the land in the then Kingdom, and enable the Government to act intelligently in any disposal it might make of the remainder; also to survey in detail all Government boundaries and lands subdivided for sale or lease by the Government, and to assist settling traditional but unsurveyed boundaries of lands, both Government and private. The especial need of such a survey was very much increased by the fact that all the magnetic surveys by which title was given were simply detached, independent surveys unconnected with any general system or common reference points.

The authority for it was derived from the law which directed the Minister of interior to make all necessary surveys of government lands, and from the appropriations which have from time to time been made by the legislature.

As a matter of wise public policy there has been added to the work of the survey that of making all maps needed for public purposes; also that of making exact measurements and records needed for public use. The experience of the country has abundantly justified this policy. Of such exact measurement work may be mentioned tide observations, time observations for local standard and Greenwich mean time, meteorological, magnetic, topographic, and hydrographic work.

As is necessary in all reliable general surveys, the work is based on a general triangulation, which serves as a foundation for all kinds of surveys which are or may yet be needed, including hydrographic, topographical, and geological. This triangulation was made in thorough accordance with the methods and principles of the United States Coast and Geodetic Survey.

The system of land division in the islands is complicated, and from the nature of the country irregular, but it has been scientifically dealt with, and any attempt to revolutionize the survey system would be disastrous. The triangulation points serve the same purpose to the location of lands that the meridians and parallels do on the United States land system.

As the land was originally minutely subdivided by the Hawaiians themselves, and as the ownership was continued when government titles were given, a great many maps have been needed, considering the size of the country.

Civilization came to these islands to find an already existing land system, such as it was. What might be called "no man's land" did not exist here, and the peculiarly American term "taking up" land has practically no place here. The land was "taken up" probably a thousand years or more ago.

The "ahupuaa" may be regarded as the primary division of Hawaiian land. Its typical form was a strip at right angles to the shore, with its fishery and sea beach, its cultivable land, and higher up its forest all with definite boundaries and each with its specific name. A chief held it, not owned it, for he owed allegiance to a higher chief or sovereign. He himself in turn had tenants beneath him, occupying with more or less permanence, owing him military service in time of war and agricultural service in time of peace.

The sovereign therefore "owned" all; he dared not dispossess powerful tenants for fear of rebellion; but no one could give such fee-simple title as civilization demanded.

A general division took place in 1846-1849 under Kamehameha III. The methods will not be given here, but the results were as follows:

1. The King owned certain reserved lands, treated at first as private property—afterwards, in 1864, by act of legislature—signed, of course, by the then reigning King, heir of Kamehameha III, made inalienable public property known as "Crown lands," whose revenue should thereafter go to the reigning sovereign's emolument.

2. The chiefs owned in fee simple the better portion of the lands formerly held by them in fief, excepting, however, the kuleanas mentioned below.

3. Lands that were set aside to be "government lands," not such as were given up by the chiefs in order to acquire the crown title to those specified in No. 2.

"KULEANAS."

4. Kuleana is a Hawaiian word originally signifying an interest in either property or business enterprise schemes. It came in the course of the land commission to be applied universally to the fee-simple holdings awarded to the common people; that is, in all the classes of lands above mentioned the subtenants were allowed to hold simple such separate small tracts within the limits of the ahupuaa they had previously improved or lived upon. There were about 3,000 of these titles, many of them covering two or more separate lots.

5. After the lands mentioned in No. 3 above were set aside, portions of them were sold to individuals at what was really a nominal price, generally to native inhabitants of the lands or to foreigners who had already made their home in the country. These were covered by royal patents which are now called grants. At the inception of the government survey there were about 3,000 of these.

A rough estimate would give about 2,000 ahupuaas in the Kingdom. Many of these have subdivisions termed "ilis." The "ili" often had a different owner from that of the ahupuaa in which it was situated.

We have therefore crown lands, chiefs' lands, government lands, kuleanas, and grants. The initials L. C. A., land commission, apply to all lands, kuleanas or ahupuaas, or ilis, which were awarded by the land commission between 1848 and 1855. These are the features of the land system, many details of which are omitted for lack of space.

Now as to boundaries: The kuleanas were awarded and the boundaries were all made by surveyed descriptions incorporated in the grants given. These surveys were all magnetic surveys, and were made on its own basis, giving generally the names of adjacent owners.

herent ahupuaas and ilis. Practically there were absolutely no general surveys, although there were a few sections where the kuleanas were platted together in their relations to each other.

For the sake of getting a speedy issue of titles, it was necessary to make the surveys as cheaply as possible. Men of intelligence and capacity, able to measure around a lot with compass and chain, were employed to survey the kuleanas at two or three dollars a claim; also two or three professional surveyors. There were no workmen competent to make general surveys nor means to pay such workmen. The boundaries of the ahupuaas were often very crooked and irregular, in many cases gulches.

Some of the chiefs had their lands surveyed and received awards by survey, but the majority of the ahupuaas were awarded simply by name, with the understanding that ancient boundaries should be preserved. Some were surveyed after award.

The consequence of all this was that about 1868-1870, when there was a demand for additional grants of public land, the government was paralyzed by an almost absolute ignorance of the location and amount of what was left available. The lack of maps was also apparent in other directions.

The survey was begun in 1871, under Prof. W. D. Alexander as surveyor-general, Ferdinand W. Hutchison being minister of the interior, under Kamehameha V. The number of skilled employees has varied from three to a dozen. It has been necessary for a portion of them to understand the Hawaiian language, partly for the sake of understanding the land commission records, most of the surveys and awards being in Hawaiian, and partly for communicating with Hawaiians who consult the office. The survey has been a general information office for the public on all matters connected with lands; also for scientists, naval officers, and others from abroad. In the development of the country it has fulfilled an important part.

The courts of law and the legal fraternity make constant use of the maps and records of the survey. The poorest citizen can come and find, free of cost, the probable location or the existence or the nonexistence of such titles as he may be concerned in. The peculiar conditions of the country have made such matters peculiarly dependent upon maps, largely from absence, in a large proportion of cases, of boundary fences.

All the surveying connected with the development of a city like Honolulu, including leveling and grading, has been done by this office. Preliminary surveys of most of the harbors have been made. Many of these were published by the United States Hydrographic Office.

The unit of measurement adopted is the foot, as being adapted to public needs, and the standard of direction the true meridian. As the old surveys were in chains, and the bearings simply local magnetic in a country where local attraction was prevailing everywhere, the work of reduction has been great, though cheerfully undertaken.

As there are over 2,000 maps on file in the office, and all the documentary matter connected with them, it will be seen that the office is one of great importance to the Territory. Where an office has been carried on in the manner indicated, it becomes almost impossible to divide its records among new organizations, and a policy of copying would seem better than that of absolute removal of any records.

In the matter of ownership of lands the bureau has confined itself

mainly to original titles—i. e., to the location and identification of land commission awards and government grants. No attempt has been made to keep track of transfers and divisions of private lands, except to procure and place on file copies of city tracts placed on the market by real-estate dealers.

The triangulation of the group is practically completed and theoretically handed over to the United States Coast and Geodetic Survey. But it should be far more perfect in many respects, especially as to records and monuments. The Territorial survey needs all these for its own purposes.

The general maps need more complete compiling and very much need renewal, owing to so much consultation.

The boundaries of government lands need detailed delimiting surveys and descriptions. There are many of these which, while laid down on the maps from such data as are at hand, still are not definitely marked on the ground, and are not accurately described by bearings and distances of the lines.

The plan of the Government survey has been to cover the country with a network of carefully selected triangles, measured with precision, and to mark same in such a substantial manner as to be a framework and reference points for all surveys of importance that have been made to ascertain and determine the landed property in the Territory. The true bearings and distances of these points from each other are recorded and on file and may be had on application.

It furnishes accurate data for determining the magnetic declination and the rate of its change from year to year. This has been very important to all surveyors who have had the difficult task of running out or reestablishing the bounds of old magnetic surveys.

It has also furnished longitudes and latitudes of many points along the seacoast for harbor work, etc.

Respectfully submitted.

WALTER E. WALL,
Surveyor

Hon. JOHN H. MITCHELL,
*Chairman Subcommittee of the Senate Committee on
Pacific Islands and Porto Rico*

STATEMENT OF JOHN A. CUMMINS.

To the honorable the Subcommittee of the Committee on Pacific Islands and Porto Rico, of the United States Senate, Honolulu, Hawaii

GENTLEMEN: I, the undersigned, John A. Cummins, of Honolulu, Hawaii, respectfully represent unto your honorable committee as follows:

I am a native Hawaiian, and was born in the city of Honolulu the year 1834, and am now 68 years of age. My father was an Englishman by birth, but resident in Massachusetts for many years who came to these islands in the year 1828, and continued to live until his death, in the year 1887. I have always lived in Hawaii with a home in Honolulu, and another, until recently, at Waimanalo on this island of Oahu. I was, until within a few years past, owner of the controlling interest in the plantation at that point known as Waimanalo plantation.

Through my mother (a full blooded Hawaiian woman, and herself chiefess of rank), I am of the blood of the ancient Aliis or chiefs of the Kingdom; and it has been my privilege to sustain relations of cordial and intimate acquaintance and friendship with all the Hawaiian sovereigns, from Kamehameha III to Liliuokalani, inclusive. I was a elective member of the legislature by which two sovereigns, viz, Kunalilo and Kalakaua, were successively elected to the throne. Later, or many years prior to the adoption of the constitution of 1887, I was member of the house of nobles, and also of the King's privy council of the State, each by appointment of His Majesty Kalakaua.

Under the constitution of 1887, viz, in the year 1890, I was elected to the legislature as a noble for the island of Oahu, which office I held, discharging its duties, until June 17, 1890, on which date I resigned in order to accept the position of premier and minister of foreign affairs in the last cabinet appointed by His Majesty Kalakaua.

As such member of his cabinet I continued in office during the balance of Kalakaua's life. Upon the death of that sovereign, in January, 1891, his successor chose a new cabinet, of which I was not a member. Later, at the general elections held in February, 1892, I was again elected a noble from the island of Oahu, and as such noble I sat in the last legislature under the monarchy, which closed its sitting immediately before the deposition of the Queen.

In view of the facts above set forth and of many details of acquaintance with public men and affairs not necessary to be here set down, I believe I may justly claim to have been and to be familiar with the history, both political and otherwise, of the Hawaiian Islands during several decades last past. And it is in the light of this acquaintance and familiarity with events that I make such statements as I shall make to your honorable body.

FIRST—OF THE DEPOSITION OF QUEEN LILIUOKALANI.

This story has been so often and so variously recited by the partisans of the different theories involved that the lack of unanimity of opinion among the people of the United States as to the causes and effective agency of that deposition is not to be wondered at. This difference of opinion or belief upon a subject so clearly susceptible of positive demonstration is one of the results of direct and positive misrepresentation by a small but influential and otherwise respectable element of the foreign population of these islands. In alleged proof of the assertions so made by this element concerning the cause and manner of the extinction of the monarchy, reams and reams were written to and published by the religious and semi religious press of the United States, and thereby was created a public sentiment and belief among the people of the Union concerning the events now under discussion which were entirely at variance with the facts.

Your committee are not unaware of the exhaustive investigation into those events which was conducted by the Hon. James H. Blount, under commission from the President of the United States, nor of the conclusions which he reached and reported in the premises. I desire to go upon record at this time as fully and highly commending the intelligent and painstaking character of Mr. Blount's said inquiry and the truthful accuracy of his conclusions. Those conclusions have been assailed with abuse, but never argument, and they will stand as a true

exposition of the conditions and causes which attended or led to overthrow of the Hawaiian constitutional government in 1893. I here upon the ground at the time, with all possible opportunity knowing whereof I speak, and I desire to emphatically denounce entirely false and unfounded the claim that the monarchy fell of its own weight, and the denial that it was extinguished by the exercise of military force on the part of the United States naval contingent then in Honolulu Harbor, acting under the inspiration and command of the United States minister and the commander of the United States cruiser *Boston*.

THE PROVISIONAL GOVERNMENT AND REPUBLIC.

The incapacity of the provisional government to "hold down the situation," after it had been assisted into place by the United States forces, is too notorious to require description. It is perhaps best illustrated and declared in the famous note of the provisional president Mr. Dole, to the United States minister, written on the afternoon of the transfer of authority, wherein the minister is begged to "assist" and protect his political child, "as night is coming on," etc.

For some weeks thereafter the provisional government was kept in office by the bayonets of the American marine and blue-jacket contingent, which was quartered on shore for that purpose. Not only so, but the provisional government never have passed the stage of dependence, but remained unaided by American bayonets and machine guns, but, after its creation, it could never have maintained itself for a day but for that influence and power which surrounded and protected it. This continued until the new government had effectually disarmed the population by domiciliary visits and otherwise, and had recruited an army of its own, chiefly composed of deserting sailors and other social refuse, no sense representative of the people of the islands, of either native or foreign race.

Later, and upon the failure of their immediate efforts to secure annexation, the provisional government prepared for the adoption of a constitution. This was done by providing for a constitutional convention, only a minority of whose members were to be elected by the people, and those electors were confined to such as had sworn to renounce the monarchy and never again to support a monarchical government in Hawaii, thus making a very small minority of the electors of the islands as the electorate had stood under the monarchy. The majority of the members of the convention were appointed and consisted of the members of the executive and legislative councils (none of whom were such by virtue of any election by the people), by whom the constitution act was passed into a law.

The result was the alleged "Republic" of Hawaii, whose only distinguishing feature was its name, as a study of its constitution and history will persuade you.

THE REVOLUTION OF 1895.

When the Queen surrendered the Government to those who assisted into place by the American forces, as above recited, so for the purpose of avoiding bloodshed during the period of transition to elapse before she could learn the attitude of the United States.

ment, in response to her action invoking its judgment upon the acts of its diplomatic and naval representatives, in having acted as above described, in displacing her Government and setting up another in its stead. This position and purpose on her part is clearly set forth in the letter wherein she resigned for such temporary purpose the reins of authority.

When Mr. Blount had made his celebrated report, and no practical results had followed, looking to the restoration of the former status, the patience of the Hawaiian people, which had been admirably exhibited during the years of doubt, and expectation from the source to which the Queen had appealed, began to show signs of exhaustion, and for many months prior to the outbreak of January 6, 1895, there were rumors and signs of such action within the knowledge and view of all people in the islands, and quite within the cognizance of the Government, who were in constant expectation of some such event. For the purpose of fortifying itself and of weakening its opponents the Government had passed a series of laws as unrepublican as possible in character. Among these may be mentioned the restrictions upon the right of bail upon criminal charges, with especially onerous conditions in cases of charges of political offenses; the restrictions upon the liberty of speech and of the press, exceeding in severity the much-abused "sedition laws" of the Adams Administration in the United States; statutes creating new crimes and prescribing new and harsh penalties for expressing opinions, either verbally or in print or writing, in opposition to the Government, etc.

Among this latter class was the act providing for the punishment of the newly created offense of "misprision of treason," under which, as a result of said resolution of 1895, so many persons were imprisoned and otherwise maltreated. This statute defined the offense named, in brief, as the withholding from the officers of the Government any knowledge possessed by a person within the islands of the fact of treason committed by another.

A project formed in the interest of the monarchy, viz, to restore the constitution of 1887, came to a head in January, 1895, in the shape of the little riot of January 6 and following days. Of this movement, as above indicated, the Government had full notice, in general terms, though they were probably surprised at the last as to some of its details. They had been for months on the alert to suppress this anticipated rising, the coming of which was in everybody's mouth and in the press for weeks before it occurred. Some weeks previously there had been arrests of prominent Hawaiians for the unlawful keeping of arms in their homes—supposedly in preparation for this event—and some of those arrested were then in custody and denied bail by virtue of the "sedition laws" of the alleged "Republic." Everyone knew that trouble was brewing, and no one who could read or hear or talk was ignorant of the general fact that some kind of revolutionary movement was imminent.

In this posture of affairs some arms were landed at Waikiki, on this island, and upon the police attempting to capture them and those in charge of them on the night of Sunday, January 6, 1895, some shots were fired, and a government partisan, who had no legitimate business upon the scene, was unfortunately shot, and died soon after. Then followed a running fight of a few days between the disciplined forces of the government and the few dozen patriotic but undisciplined men

who had resorted to arms for the restoration of their institutions, the result being speedily favorable to the government.

That riot was made a pretext by the government for the arrest of those whose sentiments were unfavorable to the government and for outrages of various kinds and degrees upon the domiciles and families of those unfortunate prisoners. Although the government was in complete ascendancy and control within forty-eight hours of the outbreak, yet martial law, which had been promptly declared, was continued in force for several months, during which time some hundreds of prisoners were brought to trial before a military commission or court-martial, whose sittings were held in the palace, while the ordinary courts of the country were pursuing their wonted course of procedure in the judiciary building, across the street from the palace.

I was among those arraigned before that commission, and by it tried and convicted upon a charge of misprision of treason, and was fined in the sum of \$5,000, which fine I paid. Other citizens were more unfortunate in being sentenced by that commission to long terms of imprisonment, some of them being also fined, in pursuance of which they were confined in prison for varying terms and were in the chain gang until finally pardoned by the government. In this manner our present Delegate in Congress was treated; likewise the present nominee of the Republican party in these islands for the office of such Delegate; also many other citizens of high respectability and substance, both native Hawaiians and foreigners. In addition to this, thus treated, many were exiled during terms of varying length as an alternative of imprisonment for an indefinite time without trial or of trial before a commission whose creation and course of procedure they believed to be illegal, stripped of the safeguards which the law throws around those accused of crime, and with the almost certain prospect of conviction irrespective of the law or the facts involved.

On behalf of not only myself but of all other victims of that arbitrary commission and its policy of wholesale and indiscriminate victimization and punishment of those arraigned before it, I respectfully submit that the United States, the successor in interest of the Hawaiian government of that period, should make as ample reparation to those victims as possible, by either repaying or providing for repayment by this Territory of the fines so unjustly and illegally extorted from us by the means here mentioned, and to this respectfully invoke the consideration of your honorable committee.

ANNEXATION.

The action of the Congress of the United States in annexing these islands is not and never will be approved by the Hawaiian people in general. Our people have submitted, and will continue to submit to the authority of the United States, but only upon the ground of necessity, knowing that they are unable to change the course of events or to break or cut the bond which has been fastened upon them without their consent. They deny the right or authority of the late Hawaiian government to speak or act for them in the matter of annexation or otherwise. The republic was in no sense a government of the people by the people. It was a despotism, pure and simple, in character, founded in force and resting upon bayonets. But, making a pretext of the assumption that government as a basis for its action in passing the cele-

"Newlands resolution," the Congress of the United States brought us within its authority; and, as we can not, if we would, escape, we hope and trust that we may be at least liberally dealt with; that the United States will not insist upon continuing to take our revenues from us in the form of customs duties, postal receipts, internal revenue, etc., without at least returning to our Territory corresponding sums in the form of public improvements or otherwise. You have made us American citizens against our will; we now propose to make the best of the situation, and pray for fair treatment by Congress.

Respectfully submitted.

J. A. CUMMINS.

HONOLULU, *September 22, 1902.*

EXHIBIT A.

J. F. COLBURN, Esq.

SIR: According to your instruction I have made test holes on the line between Honolulu Harbor and Kalihi at intervals of about 500 feet.

The total number of holes put down is 16, the depth varying from 21 to 33 feet 6 inches, the average depth being 27 feet.

To an average depth of 15 feet the material is chiefly a soft gray coral with mud and sand. Below this in one hole white coral was found 3 feet thick, uniform in texture, but not as hard as the hard coral found in the test borings for Richard street slip. In the other holes the material below the soft gray coral, while somewhat hard, is nowhere a compact coral rock such as was found in Richard street slip.

As far as I can judge there is very little of this material which can not be taken out by the Government suction dredger.

Respectfully, yours,

A. A. ROSEHILL.

The following table will show the material found in each hole as far as I was able to classify it:

Hole No.—	Soft gray coral mud and sand.	Black sand.	Soil.	White coral.	Broken coral mixed with sand.	Clay and sand mixed.	Fine white sand.	Coarse coral sand.	Total depth.

MEMORIAL OF THE EXECUTIVE COMMITTEE OF THE BAR ASSOCIATION OF THE HAWAIIAN ISLANDS IN THE MATTER OF JUDGES OF THE FIRST CIRCUIT COURT OF THE TERRITORY OF HAWAII.

To the honorable subcommittee of Senate Committee on Porto Rico and Pacific Islands:

At a meeting of the executive committee of the bar association held on the 18th day of September, A. D. 1902, the undersigned was instructed to submit the following statement with regard to the matter of circuit judges for the first circuit court of this Territory:

At a meeting of the bar association held on the 19th day of January, 1901, a resolution was adopted in words as follows: "It is the sense of this association that there is needed an additional judge to the first judicial circuit."

Subsequently the legislature, by act 19 of the laws of 1901, approved on the 30th day of April, 1901, provided for the appointment of three judges of the circuit court of the first circuit, to be styled, respectively, first, second, and third judge; and

On May 11, 1901, at a meeting of the bar association, the following resolution was offered and adopted:

Resolved, That the attention of the President of the United States be called by the Bar Association of the Hawaiian Islands to act 19 of the session laws of 1901, providing for the appointing of three judges of the circuit court of the first circuit in place of two, as heretofore.

Resolved, That the increase in the number of judges for the first circuit thus provided for by the legislature has been rendered necessary by the great increase in legal work in the circuit court, and that said increase was provided for in response to the unanimous request of the Bar Association of the Hawaiian Islands.

Resolved, That the President of the United States be, and he is hereby, respectfully requested to nominate and appoint a third judge of the circuit court of the first circuit of the Hawaiian Islands, in accordance with said act of the legislature.

That, in the opinion of the executive committee of the Bar Association of the Hawaiian Islands, the same need exists now for a third judge of the first circuit as existed at the time when the foregoing action was taken.

DANIEL H. CASE,

Secretary of the Bar Association of the Hawaiian Islands.

HONOLULU, HAWAII, September 18, 1902.

MEMORIAL OF RICE PLANTERS.

The honorable Senatorial Commission:

GENTLEMEN: As you have so kindly called upon all within the Territory of Hawaii who have grievances to present them to your honorable Commission, we, Chinese residents, engaged in the culture of rice, avail ourselves of your invitation.

The Chinese were amongst the earliest immigrants to these islands in history showing that in 1802 a Chinese sugar planter brought to Hongkong a sugar mill and engaged in planting cane, which we

unfortunately proved a failure. It, however, initiated that industry and by it Americans have grown wealthy. Since that time their numbers on the islands have steadily increased.

Naturally they sought to introduce the cultivation of rice, which is the staff of life of so large a proportion of the Asiatics, the knowledge of which has been known to them for thousands of years.

They found the climate and soil eminently adapted to that industry. Having been accustomed and inured to plowing, planting, or transplanting in lands covered with water, as taro is planted, they saw that much of the land was well suited to rice growing. They perceived also that much land, which from ancient times had not been used by the natives for any purpose, being partly tide lands and covered with tules, could be utilized, and a large area of this class has been reclaimed by them and made to produce. As the natives became numerically less and the demand for taro proportionately decreased, the abandoned lands were converted into rice patches and produced rentals for the owners where otherwise no income could have been obtained. Most of this waste land is or was the property of the common people, who thus received the benefits of the industry.

Thirty years ago lands were to be had at from \$2.30 to \$5 per acre per annum, while to-day the landlords obtain from \$25 to \$50. The Chinese own very little in fee simple, there being probably more than 50 per cent of that under cultivation merely leaseholds. It is estimated that 70 per cent of the lands are owned by natives, 20 per cent by foreigners, and 10 per cent the property of the Chinese. To show somewhat of the increase of the industry we might here state that in 1893, when an attempt was made to reduce the duty from 2½ to 1½ cents per pound, it was closely estimated that the acreage under cultivation to rice was 7,321, while to-day a similar close estimation, taking valley by valley, shows that the acreage is 11,286. Besides this area, a large amount in addition is leased for pasturage, vegetable gardens, etc., probably about 9,000 acres, making, in round numbers, about 20,000 acres dependent upon this industry.

In most places in the Territory two crops are produced per annum, the yield being averaged at 1½ tons per crop per acre, or 3½ tons per annum of paddy. The yield, therefore, is about 39,501 tons of paddy for the 11,286 acres, or 79,002,000 pounds. This loses in weight by cleaning and polishing about one-third, making the net quantity produced about 53,701,334 pounds of rice, which brings in the market, at the rate of 4½ cents per pound, the sum of \$2,282,306.70.

This shows the rice industry to be second to sugar on the islands.

From the crude process of cleaning rice by hand power, which obtained in China and which was followed here, to the adoption of steam and electrical power and American machinery for polishing was a step not slow to be adopted. Gradually the industry increased until we were not only able to supply home consumption, but had an excess for export.

The reputation acquired by Hawaiian rice for its cleanness and nutritive qualities soon caused the demand to exceed the supply. Under the beneficial effects of the treaty of reciprocity with the United States an impetus was given to this industry as well as to sugar. It was then asserted that those engaged in the industry were importing oriental rice (upon which a low duty was imposed) for

home consumption and exporting the main portion of the rice. While this was not true, and was an argument of enemies of Hawaii, the Hawaiian legislature imposed a duty of $2\frac{1}{2}$ cents per pound on oriental rice, which was prohibitive. Under the fostering of this impost the rice industry rapidly increased and the extent of demand for suitable lands caused rents to advance to a high price. In 1898, when annexation was effected, the area under cultivation of rice had reached its maximum, all available land having been brought under the plow. Some close calculators estimate that it requires the attention of one man to 2 acres, as an average, the year round rate at this rate there would be 5,648 men directly engaged in the industry to say nothing of their families, the teamsters, the sailors who work on the product to market, etc. Some of the mills are run by water power, others by steam and gasoline, and all of the machinery for threshing, etc., is of American manufacture. It is difficult to estimate the amount of capital invested in the business.

You ask wherein we have a grievance?

Our complaint is two-fold.

First. The union with the United States brought with it the United States tariff, which is but 2 cents per pound on polished rice and $1\frac{1}{2}$ cents on brown rice or that from which the husk merely has been removed, whereas the Hawaiian duty was $2\frac{1}{2}$ cents per pound. As the Japanese on the islands are numerically the greatest among the various nationalities, they consume most of the rice used and the product of their own country. The importation of Japanese rice therefore, fixes the price of Hawaiian rice and, in fact, the advantage exists of an inferior article bringing a higher price than the superior product of this country. This is said to be due to Japanese imperialism (?), which induces them voluntarily to pay a higher price for Japanese rice. The price of the commodity being fixed and the labor being exceedingly high, there is no longer a profit in the business.

Second. Under the exclusion laws of the United States the importation of further Chinese laborers is prohibited. As we have already said, these people are accustomed and inured to working in swamps and overflowed lands, and are the only people who can do the work done in this country. Owing to the topography of the country, the land being partitioned into small patches inclosed by embankments, it is not possible to use steam plows or horsepower to any extent. We see no method other than that now in use for the cultivation of rice if such tracts of land are to be made of value to their owners.

The coming of further laborers being prohibited, naturally the ranks now employed are shrewd enough to demand higher wages. The ranks are continually being diminished by the numbers returning to China and by those worn out in the service, until to-day rice-planting laborers are being paid more than double what they received in the past. It is therefore quite apparent that the ebb tide of this industry is running in, and it can be but a few years until, under the present conditions, it must cease to hold its position as the "second industry of the islands." Already there is a serious decrease in the amount of land cultivated.

As the policy of the United States is to multiply the number of factories in Hawaii it should be then its policy to foster such as have been successfully carried on, especially as all agricultural industries

aked together in the general welfare of the country. It requires no reasoning to show that if laws are enacted delimiting the number of those employed in any special industry to those actually so employed, that it would be only a matter of time until such industry should cease, and as we have conclusively shown that Chinese only can do this work it is apparent that under present conditions the industry is threatened with extinction.

We believe it is possible for special legislation to be enacted permitting the coming of more Chinese laborers to this Territory, and we believe that Congress had this in view when the joint resolution annexing the islands was adopted and when the organic act was passed. Section 9 of the former reads:

There shall be no further immigration of Chinese into the Hawaiian Islands, except upon such conditions as are now or may hereafter be allowed by the laws of the United States; and no Chinese, by reason of anything herein contained, shall be allowed to enter the United States from the Hawaiian Islands.

Section 101 of the organic act reads:

No Chinese laborer shall be allowed to enter any State, Territory, or District of the United States from the Hawaiian Islands.

It is possible then for Congress to enact such legislation that Chinese laborers may be allowed to come to this Territory without such immigration conflicting with the exclusion act, in that having arrived here they are, by special legislation already enacted, prohibited from going to the States and Territories on the mainland. Should it be deemed advisable, it is possible that Chinese laborers could be permitted to come to this Territory conditioned that while here residing they shall confine themselves to agricultural labor.

If it were thought valuable, or adding additional features to the argument in favor of permitting the coming of further Chinese laborers, we might give statistics showing the localities where rice is raised, the acreage in each valley, the rentals and ownership of lands, the cost of fertilizing, plowing, seeding, harvesting, polishing, and marketing the product, together with the past and present price of labor and the numbers employed in the industry.

As the peculiar exigencies of the rice industry require for its continued existence the introduction of more laborers to replace those who depart or are worn out at the business, it is apparent that if such are not allowed to come the industry must slowly perish.

We contend therefore that for the protection of the rice industry in this Territory the present tariff on the imported article is not sufficient to protect the home product, and that it should be not less than 2 cents per pound on uncleaned rice and 2½ cents on the polished rice.

Also, that to prevent the extirpation of the industry it is essential that further immigration of Chinese agricultural laborers should be permitted to come to Hawaii, under such restrictions as Congress in its wisdom shall enact.

And for this we will ever pray.

HONOLULU, *September 25*

Hon. JOHN H. MITCHELL,
Chairman Subcommittee on Pacific Islands and Porto Rico
 Honolulu,

SIR: The undersigned, an American citizen, born at Stamford, Conn., begs leave to present to your honorable Commission the following statement:

In the year 1895 myself and a number of American citizens were illegally arrested and thrown into prison at Honolulu. After being confined for many days, varying from twenty to sixty, and when we were forced under duress to leave the country we had for many years called our home. All of us have damage claims filed at Washington, D. C., where they have laid ever since.

Besides myself, the following claimants have requested me to bring this matter before your honorable Commission for the purpose of having this matter taken up and settled, viz, Capt. John R. Mitchell, P. M. Rooney, Arthur White, Harry Von Werder, Peterson, James Durell, and Charles Molteno.

While I understand that matters of this nature are not so easily settled, it is hard for any of us to realize that seven years have passed without any sign of a settlement having been made.

The claims were filed at Washington, D. C., at that time against the Republic of Hawaii, but since then the islands of Hawaii have been annexed to the United States of America, and I believe that the just claims against the Republic of Hawaii will be paid by that Government and that assumed these liabilities.

The imprisonment and subsequent exile from this land worked a terrible hardship upon us, and most of us by reason of the same were entirely broken up in home, health, and business.

As the statement of each claimant on file in the foreign office at Washington speaks for itself, I will not here attempt to describe the abuse and ill treatment we were all subjected to while in durance vile.

Since imprisonment and exile many of the claimants have become mangled, some have become despondent, some have lost hope; nevertheless we hope and pray that the American Government will take up this matter and give it a speedy settlement.

The writer therefore prays that your honorable commission will bring this matter to the attention of the proper authorities and use its influence to secure for us a settlement.

I beg to remain, sir, your obedient servant,

H. A. JUVEN.

HONOLULU, HAWAII, *September 25, 1902.*

Hon. JOHN H. MITCHELL,

*Chairman of the Subcommittee of the
Committee of the Senate on Hawaii.*

SIR: Will you kindly permit me to file the following as supplementary to my oral statement made yesterday before the subcommittee:

1. At the hearing yesterday I was asked as to the policy of having decisions of the Territorial supreme court final in cases in which the parties were of diverse citizenship, but in which no Federal question was involved, and I replied that I thought it might be well to allow appeals in such cases. On further reflection I think a better course would be to allow such cases to be brought either in the Federal court or in the Territorial court, and, if brought in the latter, to be removed to the Federal court. They could then be taken up on appeal from that court just as other cases may be. This, I believe, was the intention of the commission which drafted the organic act. See section 86 of that act, wherein it is provided that—

The laws of the United States relating to appeals, writs of error, removal of causes, and other matters and proceedings as between the courts of the United States and the courts of the several States, shall govern in such matters and proceedings as between the courts of the United States and the courts of the Territory of Hawaii.

But it has been held that this provision did not go far enough to permit removals of such cases from the Territorial courts to the Federal court.

A strong reason why this would be the better course is that it would be in harmony with the general plan of Congress to organize the courts of Hawaii on the same basis as in the several States—that is, with distinct Federal and Territorial courts—and it would make applicable to Hawaii all the decisions and law upon the subject of removal of causes. The decisions of the Territorial supreme court would then be final in local cases only.

As to the policy of allowing the decisions of the Territorial supreme court to be final in such cases, see *Aztec Mining Co. v. Ripley* (53 Fed. Rep., 7).

For decisions construing the organic act of Hawaii as to the finality of decisions of the Territorial supreme court, see *Ex parte Wilder's*

Steamship Co. (183 U. S., 545); Wilder's Steamship Co. v. Hin (108 Fed. Rep., 113); Hind et al. v. Wilder's Steamship Co. (18174).

2. In my opinion the salaries of the circuit judges of the first should be increased from \$3,000 to \$4,000 a year. The latter amount paid before the organic act took effect. It was reduced by Congress so as to make the salaries in the first circuit uniform with those in the other circuits.

The judges in the first circuit have a great deal more to do than those in the other circuits, and the cost of living is higher in the first circuit—that is, in Honolulu.

Four thousand dollars is low enough. The cost of living in Honolulu is about one-third higher than in most parts of the United States. It is difficult to get desirable men to serve at \$3,000.

Very respectfully,

W. F. F.

To the honorable Subcommittee of the United States Senate Commission on Pacific Islands and Porto Rico.

GENTLEMEN: Among the existing needs and more urgent needs of this Territory, which I deem it important that your honorable committee should investigate, and, with your recommendation thereon, report to Congress, are the following:

1. Some speedy provision by Congress for payment of the awards to the sufferers by the great fires in Honolulu, during the bubonic plague in January, 1900.

2. The erection of a suitable Federal building in the city of Honolulu for the purposes of a Federal court, post-office, custom-house, and the other usual and incidental Federal offices.

Each building should, in my judgment, cost \$1,000,000, and for purposes of both convenience and economy, be erected on the northwest corner of grounds of the present executive building. I invite the attention of your committee to the desirability of this location as a site for such building, for the reasons I have named.

3. That the land laws of the United States be extended to this Territory, with a modification that 40 acres shall constitute a homestead.

For the purpose of such a provision, and of suitably adapting the conditions of this Territory, I would recommend that the Commissioner of Public Lands, at Washington, D. C., be empowered to send experts to this Territory to make all necessary investigation of the subject, and report the result of such investigation to Congress.

4. That the leper colony, at Kalaupapa, on the island of Niihau, be taken under the care, control, and maintenance of the Federal Government as a reservation for leprosy persons, under the direction of the Secretary of the Treasury; but that no leprosy persons from the mainland of the United States and of this Territory be allowed on such reservation.

5. That the light-house system of this Territory be taken under the direction of the Secretary of the Treasury and be made uniform with the mainland system.

6. That the War Department be directed to send its com-

they the harbors of this Territory, and to furnish that Department of Congress with estimates for dredging the same and constructing necessary breakwaters.

7. That a revenue cutter be provided for this Territory, at a cost of \$50,000.

Very respectfully, yours,
HONOLULU, *September 24, 1902.*

ROBERT W. WILCOX.

The approximate division of lands from 1848 to 1855 was as follows:

	Acres.
Government lands	1,495,000
Queen's lands	984,000
Private lands	1,619,000
Unclassed	28,600
Total	4,126,600

The approximate amount of lands left to each of the above divisions, etc., at present, 1893:

	Acres.
Government lands	828,000
Queen's lands	915,000
Private estate lands	420,000
Corporations, etc	1,963,600

The approximate area of the whole group is 6,450 square miles, or 4126,600 acres.

WAHIAWA, OAHU, HAWAII, *September 26, 1902.*

Hon. JOHN H. MITCHELL,

Chairman Subcommittee on Pacific Islands, etc.

SIR: Complying with your request, I submit the following in regard to the Wahiawa colony, island of Oahu, and such other matters as they occur to me in relation to the American farmers and the development of a class of small landholders for the group.

I came to Hawaii September, 1897, to secure a home, coming from Los Angeles County, southern California, where I resided for twenty-seven years previously, and in the State from early childhood, having crossed the plains with my parents in 1860. I have been intimately associated with the agricultural and horticultural development of southern California, and believe my practical experience there and for the past five years here qualifies me to speak with some degree of knowledge based on practical experience.

On my arrival in the islands I found it would not be advisable to settle on the island of Hawaii, where the most considerable area of government land was to be had, owing to high transportation charges between there and Honolulu, there being no communication with the mainland at that time except via Honolulu.

On making inquiry, found all the best land held in large private estates descended from the monarchy, or under long leases made by the same government, the only available tract being 1,343 acres held by the republic as school land, known as Wahiawa, and which was considered of little value, being classed as second-class grazing land, the

invariable reply from those familiar with it being that it was ' and that a portion had been under cultivation and abandoned usually I became somewhat discouraged as to the prospect for a home on Oahu.

The commissioner of public lands, Hon. J. F. Brown, requested I should make an examination of the land, as he was glad to have a disinterested opinion of it. In face of so much encouragement as to the value of the land by parties who had been on the islands for years, I must say it was more to please him than any idea of finding a location for a home that I first visited on January 1, 1898. I was agreeably surprised. First, the climate entirely different from Honolulu—as bracing and invigorating as southern California in her finest moods, but free from sand storms; neither hot nor cold, as near perfect as one could find, the altitude 800 to 1,300 feet above the sea, giving the freedom from the humidity of the low lands. The outlook and surroundings were as inviting as one could expect—beautiful gulches running water, and fine mountain views. The surroundings certainly go far as to a desirable place for founding a home. The soil, it appeared far more inviting than many a desert elsewhere. Seen converted into beautiful homes in southern California such a climate, could not one improve the soil so it would be fertile? I had been informed there was once a forest where the wild sour grass grows. If once a forest, why would not it grow again? Land that produced only sour grass, after the forests destroyed by cattle and fires, must have relapsed into such a state and certainly could be restored again by proper treatment. These ideas I returned to the land office, making my report in the above lines, expressing my willingness to undertake making a home on the land in preference to going to another island. I informed Mr. Brown I wanted enough of the land for a home, but wanted to know if I could secure others from southern California and a colony for settlement of the entire tract, and organization and settlement association" under the land laws if I could have sufficient to get people here from California and perfect the organization; accordingly, I was granted the request.

Up to June, 1898, I had not secured the desired number of people to come, but had assurance of their coming later. Having verbal understanding and fearing annexation (which was at any time) would change conditions for taking land, I addressed the land department in writing on June 14, 1898, requesting that the land should be set aside for the purposes of a settlement association organized under sections 71, 72, and 73 of land act of 1895, and by section 4 of act 42, laws of 1898, and that I be given not more than one year to perfect the organization. My application was approved by the land commissioners and referred to the executive department which gave approval under date of June 17, 1898.

I would here say President Dole at all times evinced a deep interest in the promotion of the colony, and to make the conditions more favorable for the colonists caused the amendments referred to as "section 4 of act 42, laws of 1898" to be passed by the legislature (they being in session at the time). I mention much has been said against the policy of the government department, accusing them of discriminating against the

which I know from personal experience and observation to be entirely without foundation. One of the original members of our association surrendered his holding because he did not wish to make the necessary sacrifice of maintaining a residence and improving the land according to the conditions imposed under the law: He would have sold the land by living at ease in Honolulu and sleeping on it once in six months, according to United States land laws, and not perform any substantial improvement, while under the Hawaiian law he was compelled to make certain stipulated improvements, as well as "maintain his home" on the land, or give one who would a chance. These conditions are conducive to bona fide homes being established. More than half of the applicants to join the colony were persons living in Honolulu who wanted to obtain land (presumably for speculation), but when informed they must live on the land continuously and make certain improvements, said: "That let them out," as "they did not want to go into the wilderness to live," or similar reasons. I am positive, from my observation and knowledge of "homesteading" in California, that were the United States land laws put into effect here nine-tenths of the holdings would be taken for speculation, if the same rulings as to "residence" hold that did five years ago.

I consider the settlement association and right-of-purchase lease plan of allotting land (in 40-acre tracts) far better suited to the conditions of these islands for American settlers than any law now extant in the United States, and the homestead lease especially suited for the native race, as all aboriginal races soon alienate their land when given title in fee, mainly by mortgaging. Such is my observation with the Mexicans in southern California, and I believe is the case to a large degree here. The only safety for keeping them from becoming a burden to the country or driving them to crime through poverty is to provide them with sufficient land for homes and to earn a livelihood from, which is theirs for use but not for means of raising money for a short period of extravagant living and show. I know I am met by those who differ in opinion by the saying, "What belongs to a man is his right to dispose of as he wishes." I say no, very decidedly, when by doing he pauperizes his family and makes them a burden to the community, and it is time for us to profit by the experience of not only Hawaii, but other countries, in dealing with the aborigines.

I am not in sympathy with the auction-sale plan of disposing of land suitable for agricultural use on these islands. It is well suited for city property and in some other conditions, yet the man who wants a home and whose only capital is his muscle has no show with the capitalist and speculator; the longest purse invariably wins.

I have digressed from colony affairs, as there has been so much said by certain classes here against the land laws of the Territory. Most of these parties are of the class who would have been glad to join this colony at its inception, but had no desire to "put their shoulders to the wheel" and who pose as the "only true Americans," but have never done anything toward reclaiming any of Uncle Sam's realm from the desert wilderness.

I can not recite conditions in the colony better than in my report to the commissioner of public lands, a copy of which I will forward when the report comes from the press.

I wish to call your attention to the land situation on this island in particular. There is only one considerable area of government land

located on this island desirable for settlement upon which the made by the monarchy will expire anyway soon or which can be made available for settlement through purchase of lease or by subleasing a greater portion of the arable land being owned in large tracts doled out to members of the royal family or their assigns and under loan to plantations or as stock ranges. The exception is what is known as the Leikehna ranch of 14,700 acres, a large portion of which is under lease and joins the Wahiawa colony. The lease of this land is now held by the Dowset Company, Limited, and expires January 14, 1912. This company have sublet some small portions for cultivation and are willing to sublet in tracts suitable for small farms and ranches on the balance of their term, at the expiration of which the land would revert to the government, except that it has been set aside by the Hawaiian States Government as a military reservation. In taking this land out of use for the army the area of land that has any possibility of being utilized for the production of such crops as would be of value to a military post with farm products in the event of a siege or when the military times is reduced to a minimum. Would it not be wiser than to reserve a portion of this large area (over 14,000 acres) be restored to agricultural use, either from a military standpoint or from that of developing the islands for American citizenship for the islands? But for this reservation the lands could be made available for settlement at any time by agreement with the lessees. Under present conditions this colony can be extended beyond the limits of the original area of 1,343 acres. We have shown the way and fully demonstrated this to be an ideal section for developing homes for Americans. Having a pride in our success thus far and desiring to see more Americans tilling the soil, be they natives of Hawaii or from the mainland, we would respectfully ask that this matter be referred before the proper authorities for investigation and action with a view to the opening of at least a portion of the tract for settlement.

Another great need of these islands next to and closely connected with the opening of land for settlement is properly located experiment stations and substations. The work thus far done is handicapped by improper selection of the location for the station. The agent sent here by the Secretary of Agriculture did not make a proper investigation of conditions, or the present site used for an experiment station would not have been chosen. He did not go outside of the limits of the station except to visit sugar plantations or private estates. He did not visit any of the public lands or other sites than what was prepared by the interested parties. Although asked three separate times to visit the extensive uplands, where the only land is situated that can be used for farming to any extent on this island, he failed to investigate the conditions personally. His report is largely made up from hearsay evidence and printed matter that has been freely circulated for many years past. I repeat, had a proper investigation been made the station would be more useful and satisfactory site could have been obtained and climatic conditions of the present station grounds are not representative of any extended area of the islands, consequently diversified soils and climate can not be as useful as if located advantageously. If these islands are to be developed along the lines we must have land made available for settlement, and under the most favorable possible conditions for the Government experts working at the experiment station to work. I would commend the work done taken by Dr. J. A. G. Smith and his able assistants, and I would give them every possible facility for their work.

Much has been said regarding labor conditions on the islands, and special stress is put upon the statement of the inability of white men to labor here. The settlers at Wahiawa do not find it harder to perform the labor on their farms than doing similar work in California.

I believe there is not any labor on the sugar plantations here which a white man can not perform, but do not consider it practicable to apply the present labor under present conditions. It can only be brought about gradually and under different cultural methods, and must necessarily be by a gradual transition and largely by use of labor-saving machinery operated by intelligent laborers, as have the English hand labor of growing and harvesting wheat in the "Great West." The American farmer can and will grow cane and perform the greater part of the labor in due time, and it will come when sufficient numbers of white men live in their homes in the neighborhood of mills where their cane can be disposed of, but they will not seek employment as field hands when a more agreeable occupation can be found, or they have only a laborer's portion; they must have the incentive of personal ownership at least in their homes.

The greatest menace to the American tradesman, laborer, or farmer here are the Japanese. It was a grave mistake of Congress that permitted the canceling of the labor contracts without deporting the Japs, as provided in the contracts under which they were brought here, and permitting their places to be filled by Chinese, who are a much less aggressive race and better suited to our needs as laborers. They are a superior race to the Japanese, contrary to opinions held by most people on the mainland; very few persons coming here but change their estimate of the two races before remaining here three years.

It will be necessary for many years to rely on the Orient for laborers to work in the cane fields, and it is becoming quite the general belief that Japanese should be prohibited from coming and Chinese be permitted to come. Very little desirable white labor finds its way here, most of whom are seafaring men and other transients of the most unreliable kind, which has created a prejudice in favor of the faithful Chinaman, who can generally be relied upon. We need Chinese labor under proper restrictions, and they are far better citizens than many others that have been imported.

Respectfully,

BYRON O. CLARK.

WAHIAWA, OAHU, HAWAII.

REJOINDER TO CERTAIN STATEMENTS MADE BEFORE THE COMMITTEE OF THE UNITED STATES SENATE.

JAPANESE IMMIGRATION.

It has been stated that from August 12, 1898, to June 14, 1900, in round numbers 40,000 Japanese were brought into this country, and only 24 returned. By the annexed Table A it will be seen that within the dates mentioned the immigration of Japanese was 28,953 males, 6,956 females, and 928 children, while the emigration for the same period was 3,571 males, 739 females, and 549 children.

The statement made by Mr. Humphreys that during the same period only 24 Japanese returned to Japan is incorrect, for, as a matter of fact, 4,859 Japanese, including women and children, or 3,571 adult males, left Hawaii. These figures may be relied upon.

The statement made that 40,000 Japanese came into the country intended to convey the idea that that number of male laborers is considerably astray, as is also his statement concerning the number who in that time left the country. Mr. Humphreys avoided reference to the departures of Chinese during the same period, which may be seen from the annexed table, show an excess over arrivals of 359 adult males.

A statement showing the arrivals and departures of Japanese and Chinese from June 14, 1900, to June 30, 1902, was submitted to the commission on the 13th instant, along with the report of the Plunkett Association, but it might be as well to repeat the statements contained therein that for this period of a little more than two years the immigration of male Japanese was 6,606 and the emigration 6,284, an increase of 322 only, whereas the immigration of male Chinese for the like period was 1,903 and the emigration 3,470, making a net increase in the Chinese population of 1,567 for that period. Taking the nationalities of Japanese and Chinese, this period shows an excess of emigration over immigration of 1,245 adult males. (See Table.)

ALIEN PROPRIETORSHIP.

A statement has been made that the sugar industry of the islands is under the control of two British and two German firms. That is not true. It is that of the \$74,694,000 capital represented by sugar plantations \$56,020,500 is owned by Americans and \$18,673,500 by a few other nationalities, aliens thus owning one-fourth. And of the total investments in sugar, railroads, mercantile, ranch, and general enterprises amounting to \$120,558,070, Americans own \$88,438,213 and the others \$32,119,857.

These statistics were obtained from the local statistician, Mr. W. H. Thrum, of Honolulu, who prepared them as of January 1, 1903, and sent them to the Bureau of Statistics at Washington. A copy of Mr. Thrum's detailed table upon the subject is attached hereto and marked "T." For many years prior to annexation men of various nationalities came here under the monarchy and afterwards the Hawaiian Kingdom, devoting their intelligence, energy, and capital to the development of the local resources, of which the production of sugar was and is the most important. These men attached themselves to the soil and made their homes in these islands. They paid a large proportion of the taxes they started and carried to success great and hazardous enterprises. Their property was and is as much entitled to protection as the property of any one resident within these islands; and, so far as the business interests of this Territory are concerned, they are equally qualified to speak, and should have the foremost right to do so.

It might be proper herein to state that the Honolulu firms which are principally to do with the sugar industry here have been est-

Castle & Cooke, limited.....
Brewer & Co.....
Irwin & Co., limited.....
Hackfeld & Co., limited.....
Davies & Co., limited.....
Schaefer & Co.....
Grinbaum & Co.....
Alexander & Baldwin.....
B. F. Dillingham.....

These firms are what is known in this country as "sugar agents;" e., they act as bankers and business agents for certain plantations. By no means follows, however, nor is it a fact that the firms named necessarily control the plantations for which they are agents.

PORTO RICANS.

In regard to Judge Humphreys's statement concerning the inhuman treatment of Porto Ricans, it may be desirable to state for the purpose of saving any further trouble in connection with the matter on the part of the commission that the whole question of the treatment of Porto Ricans was long since taken up by the Administration at Washington, and the collector of customs at this port as well as the United States immigration inspector were requested to investigate and report thereon. The matter of the mutiny was investigated by the collector of customs, and the result reported to the Secretary of the Treasury, Bureau of Navigation, under date of March 1, 1901. The investigation as to the condition of the Porto Ricans and their treatment upon arrival here, was made and reported by Mr. J. K. Brown, United States immigration inspector, to the Hon. T. V. Powderly, Commissioner-General of Immigration, under date of June 1, 1901. This latter report was sent in reply to the Bureau's letter, No. 26637, dated March 29, 1901. Both the reports above mentioned proved conclusively that the rumors and newspaper reports had been grossly exaggerated; that there was no blame attached to the planters or their representatives, the condition of the laborers being the result of the conditions existing in Porto Rico prior to their departure from that country, and not a result of bad treatment en route or upon arrival. These reports refute the statement of Judge Humphreys.

PLANTATION MEDICAL ATTENDANCE.

The doctors resident in these islands, like doctors in every other part of the world, depend for their practice on the residents in their vicinity. No statement has been made by the Planters' Association to the effect that the plantation retained the exclusive services of medical men; all that has been said was that they furnished free medical attendance to their laborers. The doctors in the country, wherever they can get the appointment, act as government physicians, plantation doctors, and private practitioners.

The attempt to prove that the benefits derived by the plantations, from the fact that their doctors are sometimes government physicians, amount to the taxpayer paying half the cost of the medical attendance of the laborer, does not need further comment.

PORTUGUESE.

Mr. Vivas stated before the commission that nearly all the public lands were taken up by plantations and that there was no show for a poor man. In reply to this it may be said that efforts have been frequently made to get Portuguese to take up land and to secure planting contracts, but, with very few exceptions, these efforts have been unsuccessful, the majority of Portuguese preferring to work for day wages to the taking of any risk connected with the raising of a crop for market. Should the Portuguese desire to take up contracts for

the planting of cane, it may with confidence be stated that plenty of opportunities will be given to them to do so; as they are to be thought of and are considered a desirable element of our laboring population. Furthermore, if it could be arranged to promote the migration of Portuguese from the Azores or Madeira into these islands, the planters would receive them gladly and pay them wages considerably in excess of what they could earn in their own country, or at least with them for sugar-cane raising on a profitable basis to them.

TABLE B.—*Exhibit of amount of investments, Territory of Hawaii, as of January 1, 1900.*

Local sugar corporations	\$51,884,500
San Francisco incorporated plantations	21,000,000
Sugar plantations unincorporated	1,809,500
	\$73,694,000
Coffee, fruit, and fiber corporations	465,700
Coffee and fruit growers not incorporated	250,000
	715,700
Stock and sheep ranch corporations	625,000
Stock and sheep ranches not incorporated	1,805,000
	2,430,000
Mercantile corporations	15,318,200
General corporations (estates, etc.)	12,170,870
Business firms and enterprises not incorporated	7,567,000
	35,056,070
Railroad corporations	
Foreign corporations other than sugar	
Total estimated value business investments	108,750,070

The following table shows the estimated amount of American capital invested in the above-classified enterprises through the island of Hawaii.

	Total capitalization	Amount American investments.
Sugar plantation interests	\$74,694,000	\$56,020,500
Railroad interests	5,000,000	5,000,000
Foreign corporations	2,662,500	1,950,000
Mercantile, general, ranch, and other enterprises	88,201,570	25,467,713
Total	120,558,070	88,438,213

ACQUISITION OF LAND BY CORPORATIONS.

To the honorable Senate Committee.

GENTLEMEN: In addition to statements already made by the Hawaiian Sugar Planters' Association, we desire to call attention to the clause in section 55 of the organic act which provides—

That no corporation, domestic or foreign, shall acquire and hold real estate in Hawaii in excess of 1,000 acres; and all real estate acquired or held by such corporation or association contrary hereto shall be forfeited and escheat to the United States, but existing vested rights in real estate shall not be impaired.

This provision apparently was intended to prevent the stifling of competition and controlling of prices by corporations, and to encourage the cultivation of small tracts of land by individuals.

Every right-thinking man desires that which will promote the best interests of the community in which he lives, and if the strict enforcement of this provision would promote the development of the resources of these islands and tend to create a class of small farmers, and induce the immigration of those who would acquire holdings and establish homes, there would be no question as to the wisdom of the law.

But, under the conditions existing here, we submit that the provision will not only fail in its object, but is a serious obstacle in the way of the development of these islands.

The paper upon the labor problem heretofore presented sets forth the facts as to the sugar industry being the great and chief industry of the islands, and mentions the large capital required to establish a sugar plantation. With the low prices of sugar in the world's markets, resulting from the greatly increased production of both cane and beet sugar in the sugar-producing countries, the margin of profits is becoming very small, and under the conditions existing here it can be produced at a profit only when cultivated and manufactured on a large scale.

More than two-thirds of the cane grown in these islands is produced by artificial irrigation. Water for irrigation, in quantities sufficient to justify engaging in cane culture, can only be obtained from surface streams or by pumping from subterranean sources.

These islands are of volcanic formation, rising abruptly from the sea to high elevations; and the rains fall mainly upon the northerly and easterly side of each island from clouds brought in by the prevailing northeast trade winds.

Owing to the nature of the formation and to the rains, the exposed portions have been worn into deep gorges, with high ridges between them. In many instances these gorges are from hundreds to thousands of feet in depth, with precipitous sides, and follow each other in close succession, with but small areas of land between suitable for cultivation.

For the most part the arable land is far removed from the source of the water supply, and to convey the water from the gorges in the rainy belt to the arid sections ditches of many miles in length are required, as also pipe lines to cross the intervening valleys. Dams, reservoirs, and flumes are also needed in many instances.

In obtaining water by pumping from below the surface powerful machinery and pipe lines of large capacity are required.

To procure an adequate supply of water the expense involved in the first instance, ranges from \$100,000 to \$500,000, and in maintaining these irrigation ditches and pipe lines and pumping plants the expense is incurred.

The machinery, buildings, and appliances necessary to manufacture sugar on a scale to justify the undertaking costs also from \$100,000 to \$500,000 and upward.

These conditions prevent the engaging in sugar culture by excepting those with large capital, unless the small capital of persons is associated. This association is generally accomplished by means of incorporated joint-stock companies.

Most of the sugar companies of these islands are incorporated and the shares of stock are held by persons in every walk in life. A corporation will have hundreds of stockholders. If profits are made it does not result to the benefit of merely a few large capitalists; it is shared by a large number of persons, many of whom are of the people.

While the yield of sugar per acre is occasionally large, from eight to twenty-four months elapses from the time the land is brought into planting until the harvesting is concluded. Planting is general in the summer months, and the grinding is begun about November of the following year and finished about the following June; thus the crops overlap. Moreover, fields can not be continuously cropped; they must be allowed to lie fallow from time to time. Thus generally about three times the area of land is needed to maintain continuous yields than is required to produce a single crop.

One thousand acres of land will permit of the continuous planting of about 300 acres, which is not sufficient to justify the venture.

It must be borne in mind that in most instances the land suited for sugar culture does not interfere with the lands suitable for the raising of rice, coffee, and other products. There are sufficient lands available for these minor industries for all demands which are likely to arise for them.

The 1,000-acre restriction does not apply to the mainlands. Under the conditions which exist here, it not only fails to accomplish the object sought, but is a serious obstacle in the development of the country.

If the provision can not be repealed, it should be modified in a reasonable way. To make the restriction apply only to the acquisition of public lands would be less objectionable.

We earnestly recommend the subject to your consideration. A table is hereto appended giving the number of stockholders of each of the sugar corporations.

Respectfully submitted.

HONOLULU, HAWAII, *September —, 1902.*

Haiku Sugar Co	57.00+	Hutchinson Plantation
Paia Plantation	44.00+	Kilauea Sugar Co
Ookala Plantation	38.47	Hawaiian Sugar Co
Onomea Sugar Co	54.98	

The foregoing statements are derived from the operating expenses and the tonnage of the various plantations for 1901. It must, of course, be borne in mind that these figures do not include the moneys expended for permanent improvements. Furthermore, this statement indicates the cost of production at the mill and does not take into consideration the cost of marketing the sugars. The cost of marketing depends very much upon the situation of the plantation. On the island of Oahu this cost averages from \$12.50 to \$15 per ton.

HONOLULU, HAWAII, September 24, 1902.

MEMORIAL FOR RECOMMENDATION TO CONGRESS TO PROHIBIT THE INTRODUCTION OF CHINESE UNSKILLED LABOR FOR THE CULTIVATION OF OUR PRODUCTS, CHIEF AMONG WHICH ARE SUGAR, RICE, COFFEE, BANANAS, ETC.

To the honorable the subcommittee of the Committee on Pacific Affairs and Porto Rico of the United States Senate, at present in Hawaii.

GENTLEMEN: The undersigned, residents of the Territory of Hawaii, beg leave to respectfully represent to your honorable committee

aspect of the labor conditions and requirements in this Territory, as follows:

I. That the undersigned are, without exception, aboriginal Hawaiians, born in this Territory, who have always lived in the land of their birth, who know no other home, and who expect to end their days here.

II. That by the provisions of nature the Hawaiian Islands were and are made subject to the climatic laws which distinguish, in a radical degree, the Tropic from the Temperate Zone, and which assign to the soil of the Tropic Zone a list of products very different from those produced nearer the Poles, and which require cultivation and care differing wider in character from what is required in other latitudes.

III. That the chief staples of our tropic soil production are sugar and rice, with coffee, bananas, and other fruits ranging in lesser importance in the list, but all capable of being produced with advantage and profit when conditions of labor and tariff concur to favor their production.

IV. That for several decades last past our principal and most profitable product has been sugar, and that the conditions of soil and climate in Hawaii combine to render it our chief staple, both in fact and in prospect.

V. That the production of sugar in Hawaii has already enlisted a vast capital—mostly American—and that the prosperity of the Territory is almost, if not quite, absolutely dependent upon the prosperity of the sugar plantations, if those plantations flourish. If they decline, their poverty will mean the poverty and distress of the people of the Territory in general.

VI. That it is essential, in the presence of prevailing conditions in the sugar industry throughout the world—affected as it is by tariffs and bounties imposed and provided by the laws of different nations—that the production of cane sugar should not be impeded or restrained by unfriendly or inimical conditions if it is to survive upon a basis of profit.

VII. That the chief factor in the production of cane sugar in this Territory is the price and supply of unskilled labor for employment in the field.

VIII. That our local conditions show a great dearth of such labor, and that, in the face of unusually low prices for sugar, the cost of unskilled labor upon our plantations is greater than it ever has been before, while the supply thereof, even at the increased prices to which an increased demand has forced it, is still greatly inadequate to the needs of the industry in our midst.

IX. That in former years, and particularly during the period prior to 1890 or 1892, the unskilled labor upon our plantations was chiefly performed by Chinese, who, prior to 1888, were permitted to enter the Hawaiian Kingdom without restraint, and who then, and for some years thereafter, furnished a very satisfactory and adequate source of labor supply for not only the sugar industry, but also for the cultivation of rice and domestic service.

X. That as a result of the Chinese restriction acts of the Hawaiian legislature, the first of which was passed in 1888, the number of Chinese in Hawaii had become very greatly reduced from its former aggregate at the date of the application of United States laws to this Territory in 1900, and that during the period of decline in the Chinese

population the numerous Portuguese element who had formerly introduced into Hawaii and employed upon our plantations had the most part, worked out their labor contracts and deserted the tations for higher grade and more remunerative employments in trades and other lines of service.

XI. That as a result of the facts above stated the sugar plant of this Territory have been during late years, and they are almost entirely dependent upon Japanese labor, which is less factory and effective and much more expensive than Chinese labor.

XII. That the application to Hawaii of the United States forbidding the entry of Chinese workmen into the United States the finishing touches upon a condition that had formerly threatened the stability of our industries and involved them in difficulties which they can not hope to emerge, unless through the mediating legislation that will more tenderly regard their elemental need the supply of unskilled labor.

THE RICE INDUSTRY.

XIII. That all of the foregoing remarks apply, and with force, to the rice than to the sugar industry; that the rice industry these islands in the past has been the most direct and efficient of profit enjoyed by the Hawaiian people proper as distinguished from the community in general; that the greater part of the lands of the Territory consist of comparatively small kuleanas, by individual Hawaiians, whose chief or sole income consists of rentals paid by the Chinese lessees of such lands.

XIV. That the great scarcity of Chinese labor during the late years has militated most seriously against the rice industry of these islands, and has reduced in great degree the income of the Hawaiian "small owners" of rice lands to a point where many of such owners who formerly enjoyed comfortable incomes from their lands, are unable to rent them at rates sufficient to supply the necessities of life.

XV. That as regards rice our experience has shown that no other than Chinese is adapted to or seeks employment in this industry in Hawaii; that, in addition to a dearth of labor for the cultivation of rice in our Territory, that industry is further menaced by the tariff, which permits the importation thither of Japanese rice, this latter, in competition with our local product, has most effectively aided in producing stagnation in the rice industry of Hawaii.

DOMESTIC SERVANTS.

XVI. That the climatic conditions of Hawaii are such as to render the employment of domestic servants in numbers quite out of proportion to those required by people of corresponding grades of civilization in high latitudes; and that, as a result of the conditions above stated, the supply of Chinese domestic servants in Hawaii—proved by experience to be the best and most reliable—has so materially increased as to greatly incommode the people of these islands who and many others who wish to employ, domestic servants.

CHINESE COMPETITION WITH HAWAIIANS AND WITH MECHANICS.

XVII. We believe it to be the experience of all cane-sugar producing countries (as it is certainly the experience of Hawaii)

successful production of sugar therein may be effected only by the employment for field labor of races other than those of northern Europe or America. However much the rice may grow of the Hawaiian producing cane by white labor meaning thereby Americans and northern Europeans, the experience of decades of rice of countries, refutes the assertion. It is true that Hawaiians are the most suitable for plantation laborers, but to their credit be it said they can and do do employment less arduous or more remunerative in local industry. Therefore, be accepted as a truth that the introduction of Chinese labor for our cane and rice fields would produce no competition with laborers of the white or Hawaiian races.

XVIII. That we believe if the plantation owners could obtain an adequate supply of unskilled field labor with whom to plant, cultivate, and harvest their crops, at rates of wages such as would prevail under the conditions herein prayed for, they could afford to and would employ more skilled labor from the Hawaiian and white races at better salaries than now or could otherwise prevail in the higher grades of employment upon their estates.

XIX. That we are opposed to such indiscriminate introduction of laborers of the Chinese or Japanese races as will enable them, in any system, to come into competition with the Hawaiian and white races in the rice husbandry and other higher grades of employment.

Wherefore your memorialists pray that your honorable committee may be pleased to make such recommendations and to procure such action by the Congress of the United States as will—

1. Secure such modification of existing statutes as will permit of the introduction into Hawaii of Chinese laborers in numbers sufficient to meet the requirements of our Hawaiian industries in the supply of unskilled field labor.

2. Permit the entry into Hawaii of such Chinese domestic servants and of Chinese bona fide intending to become domestic servants as may be required for such service within the Territory.

3. Permit any Chinese person so entering Hawaii to exchange his mode of employment at will, provided he shall not be permitted to enter the lines of labor than that of domestic or unskilled agricultural labor.

4. Permit the convenient passage back and forth between the Orient and Hawaii of such persons as aforesaid, but with such best restrictions to provide against their entering into lines of employment other than those above indicated.

5. Afford a reasonable tariff protection to the rice produced in Hawaii and elsewhere in the United States against rice of foreign growth brought hither for consumption.

6. Afford a reasonable tariff protection to coffee produced in Hawaii, or elsewhere in the United States, against coffee of foreign growth brought into the Union for consumption.

HONOLULU, HAWAII, *October 6, 19*

Hon. JOHN H. MITCHELL,

*Chairman Subcommittee on Pacific Islands and Porto Rico,
United States Senate, Washington.*

SIR: Inclosed you will find a certified typewritten copy of a memorial or petition from the lepers at the settlement on Molokai.

You will remember that I presented the original to you when you were here last month, but as the signatures were made by persons affected with leprosy, it was deemed best to have a copy made and forwarded.

The first page is a translation of the memorial, which is written in Hawaiian on the second page.

It is not often that a petition is prepared representing so directly the feelings of the people. The English translation does not adequately express the sentiments stated in the original.

There need be no hesitation about handling this copy; it will not come in contact with the original. The original was twice disinfected with formalin and sulphur.

Respectfully, yours,

WILLIAM O. SMITH

[Translation.]

*To the honorable Subcommittee of the United States Senate
Committee on Pacific Islands and Porto Rico*

GENTLEMEN: We, the unfortunate residents of the leper settlement on Molokai, would respectfully present the following memorial to our position and circumstances, and would ask you to forward the same and present it to your colleagues on your return to Washington:

First. We beg respectfully to represent that we are here not of our own free will, but at the instance and by the power of government authority as a measure of sanitary precaution and protection of the community at large, and that our lot is a hard one by reason of compulsory separation from home and friends. The hardships of our life are, however, softened to a certain degree by the freedom of movement here under the present system of rules and regulations. Therefore we most earnestly deprecate and protest against any legislation which would curtail our liberties and subject us to further and greater hardships than we now have to endure. And in particular we would protest against any law being enacted tending to the separation of the community by a measure which in our humble opinion would lead to serious consequences without any commensurate benefit.

Second. We would respectfully represent that we are not opposed to transferring the care and management of the settlement to the Federal Government, but heartily indorse the position taken by the honorable Secretary Cooper that the Territory is able to take care of us. It is true there are many minor details which might improve our condition, but in the main we are happy and contented under the present régime and earnestly hope that no change will be made as far as governmental control is concerned.

[SEAL.]

WM. J. FORB
Notary Public, First Judicial

of the subcommittee of the Senate Committee on Pacific Islands and Porto Rico.

HONORED SIRS: I have deferred presenting this, thinking that in the course of your investigations some one or other of our prominent citizens conversant with Hawaiian affairs would speak or touch on some phases of the political situation that, to my mind, has an important bearing on existing local conditions. This has remained for me to do, however, and as far as I am able place the matter before you now.

Living and coming in daily contact with the native Hawaiians, speaking their language—in fact, one myself—it is but natural that I should, to a large extent, share their views and sentiments, especially on questions affecting their political rights. The electorate is largely Hawaiian. To properly understand his position and the reason of his present attitude toward the local administration it will be necessary to make a brief reference to a period of Hawaiian history prior to and immediately preceding annexation.

After some years of political inactivity the Hawaiian people, seeing all hopes of restoration had passed, naturally looked to annexation as the turning point in their political career, and expected, as Americans, to enjoy all the rights and privileges of American citizenship. Their expectations were not to be realized, however, for not only was the same monarchical system maintained, under cover of the American flag, in the new Territory, but all the local administrative power was to remain in the same hands. Thus was engendered and raised anew the feeling of resentment on the part of the electorate, resulting, as was seen at the first general election, in the defeat of the Republican party at the polls. Here you have, as well as I can describe it, the true feeling and sentiment of the native Hawaiian at the present time and the position he assumes toward the local administration. Unfortunately for the Republican party in Hawaii, nearly all of the prominent men concerned in the overthrow are among its most influential leaders.

Like all good citizens having the interests of the Territory at heart, no one desires to see the present political tension continue. It must be remedied; if not by ourselves, then by Congressional action. To my mind, county and municipal government affords the only solution. With all due respect to the opinions of those opposed to a change of our administrative system, I state it as my candid opinion that nothing short of the total disintegration of the present monarchical government will fully reconcile the electorate to their new conditions and accomplish what is very much desired in this Territory at the present time—a peaceful community. This may be a radical view to take, but it required radical means to overthrow the monarchy.

In advocating the change, let me present some practical illustrations of the working of our present centralized government as applied to the country districts. As chairman of the Waialua road board I am required by law to furnish bonds. No salary is attached to the office, and yet many of the salaried officials of the central government who have the receiving and paying of large sums of public moneys are not required to file any bond whatsoever. The people in the country districts have no voice whatever in their local administration, all officials being directly under the control of the department heads and subject to their direction. The local taxes of whatever kind or nature

are collected and deposited in the treasury, the taxpayer has no voice, except through the legislature, how the taxes shall be expended. The only exception is the road tax, an insignificant sum. All the law distinctly states that this fund is available to the road boards, the moment it is deposited in the treasury by a contrary ruling it can not become so until so notified by the department. Not only this. A recent order of the department makes it obligatory on road boards to first obtain its approval of contracts for roads of \$100 and over, when the law governing public contracts specifies the amount at \$500. Even in the only instance where it provides for local control of public funds every restriction immediately is imposed by department heads, rendering the object of the law practically useless. An instance of the gross injustice in the distribution of public funds might be illustrated in the case of Waialua, where Waialua's present taxation returns to the general government to \$52,700, in round numbers. Waialua received back, to be expended in the district in the shape of road funds, salaries of officials, etc., less than \$17,000. The sum of \$35,700, or nearly 70 per cent of the taxation, therefore constitutes the people of Waialua's contribution for the improvement of Honolulu's streets and the benefit of the communities. If this is not taxation without representation it is a door to it. These are only a few instances of the one-sided view of our centralized system where the people who control know nothing of the needs and requirements of the outside districts.

As I have already publicly expressed my opinions on city and county government in answer to the opponents of the measure characterizing the native electorate with incompetency and irresponsibility, I will not take up the time of your committee by reiterating them here. I will only say that, whatever the system, surely none can be found or devised that will equal the present one in extravagance; for when it is realized that for administrative purposes alone, exclusive of the expenses, over a million dollars a year is expended, equal to \$7 a head for every man, woman, and child in the Territory, that aside from its oligarchical features, ought to afford ample reasons why a speedy change should be made.

Respectfully submitted.

CURTIS P. I

WAIALUA, September 24, 1902.

COMMISSION OF PUBLIC LANDS,
TERRITORY OF HAWAII
Honolulu, September 10

To the Chairman Subcommittee of the Senate Committee
on Pacific Islands and Porto Rico, Honolulu, Hawaii

SIR: In compliance with your request, I beg to forward you with the inclosed statements showing receipts and expenditures of this department during the year ending June 30, 1902.

Very respectfully, yours,

EDWARD S. BOYD
Commissioner of Public Lands

Memoranda regarding the Hawaiian public lands.

Statements relating to the public lands of the Hawaiian Islands were published in various reports which have been presented to Congress. Among them are the following:

Blount's report, 1893: Hawaiian Lands, by C. J. Lyons, on pages 10 to 429. Morgan's report, 1894: Evolution of Hawaiian Land Tenures, by S. B. Dole, pages 56 to 66. Report Hawaiian Commission, 1898: Report Committee on Public Lands, page 96. Report Committee on Territories, 1900: "The division of Mahele," 1846-1855, page 1; "The Crown lands," page 69; "Statement regarding surveys in Hawaii," by Henry S. Pritchett, page 104; "Hawaiian public lands," by S. B. Dole, pages 105 to 108.

Perhaps the most concise and yet clear statement of the status of the title of the Crown lands is that of J. F. Brown, on pages 69 to 71 of the report of the Committee on Territories of the House, above referred.

Receipts public lands office during the year ending June 30, 1902.

AUGUST 31,

JAMES G. SPENCER, Esq.,
Honolulu.

SIR: I am directed by his excellency the minister of the interior to acknowledge receipt of your application under yesterday's date for the continuance of the privilege granted you as a tenant at Hanaiake for another year.

I am further directed to say that the government does not intend to lease the premises to a regular tenant, as that would to a great extent expose the adjacent water supply to trespass and injury. Yet he really appreciates the fact of your having repaired at a considerable cost and saved from decay the house which you are now occupying, and for the reason that the government has no use at present for the building, and that he considers your occupancy to be to a great extent a protection to the property, he consents to your remaining in charge as tenant for another year at a rental of \$50.

I am further directed to thank you for your offer in regard to removing the Lantana from the portion of the premises occupied by you.

I have the honor to be, your obedient servant,

J. A. HASSENBERG,
Chief Clerk.

INTERIOR OFFICE, September 1,

Received September 4, 1891, from James G. Spencer, the application for the use and occupation of a portion of that tract or land situate in Nuuanu Valley, and known as Hanaiake, the same being bounded as follows: Beginning at the entrance of Nuuanu avenue, thence following the road along the edge of the Kalo patches to a stake marked "X," thence mauka, passing including a certain concrete bathing place, to the Puiwa road, thence along said road to the Nuuanu avenue; thence along said road to the starting point, including the buildings thereon, as tenants in common. It is understood and agreed upon that the said J. G. Spencer shall have the right to use the water from the Government main (paying therefor the cost of the same) and to expend a sum of not less than \$300 in sundry repairs to the dwelling house, the water to be laid on and the repairs to the house made within six months from the date hereof. All improvements shall revert to the Government. From and after the expiration of six months the Government may reenter and take possession of said premises after an additional six months, due notice being given which to be given said J. G. Spencer.

C. N. SPENCER,
Minister of the Interior.

SEPTEMBER 1,

Mr. EDWARD S. BOYD,
Commissioner of Public Lands, Honolulu, Hawaii Territory.

DEAR SIR: As you have asked me for particulars regarding the application of Hanaiake, I gladly furnish you with the same.

The charge that the lease was made to me by the present government because of my connection with the Chamber of Commerce is entirely untrue.

without foundation, and is untrue. The original arrangement was made with the minister of the interior under the monarchy, and long before I was an officer of the chamber.

The property was bought by the government from the estate of Queen Emma because of the water rights belonging to it, which were acquired at that time in connection with the supply of water for Honolulu. At that time, or soon after, plans were made for a filter plant on the premises, lack of funds up to the present date preventing the carrying out of these plans.

The government had at no time felt justified in renting the premises, and for years they were unoccupied and an expense to the government or caretaking, as I was informed, of \$40 per month.

The house was leaking, the woodwork being gradually destroyed by ants and borers, and the outbuildings disappearing through drafts upon them for kindling wood, windows, doors, etc., being carried away, and the old trees being cut down for firewood.

It being necessary to the health of my family that I should obtain a residence at a certain elevation, I made a proposition to the government to take charge of the premises, put them in habitable condition, ignore or make friends with the ghosts supposed to be in occupancy, prevent destruction of trees, etc., on condition that I should have the place, rent free, until such time as the government should require the property, would sell it to me, or would rent it for a term of years.

This proposition was accepted, but in order to protect me in the outlay necessary to make the house habitable, by giving me a year's notice of its requirement by the government, it was agreed that a nominal rental of \$50 per year and water rates be paid by me.

I have at all times been ready to lease the premises for a term of years, or become a bidder for it should it be put upon the market; but considering the purpose for which the property was held by the government, any proposition to this effect has not been considered.

In addition to the saving to the government of the expense of a caretaker, which I have practically been during the term of my occupancy, I have expended between two and three thousand dollars in repairs and improvements. During the past year I have expended in making roadway, walling up gateway, repairs to building, and removing antiana, several hundred dollars.

The place is being kept intact for the purposes of the Honolulu water works, and any insinuations that I am in possession of the property because of action by the Honolulu Chamber of Commerce or because of any improper support I am able to give to the government through that body, is absolutely false.

Very truly, yours,

JAS. GORDON SPENCER.

COMMISSION OF PUBLIC LANDS.

The lease of 12,000 acres of the land Puuanahulu was sold at public auction, on the 31st day of May, 1898, at 12 o'clock noon, at Kailua, N. Kona, Hawaii, for a term of twenty-one years, at an upset rental of \$150 per annum, payable semiannually in advance.

The lease was sold to Messrs. Hind & Low at the upset rental named. Among other provisions of the lease are:

That the lease is upon the express conditions, viz, improvements to the value of not less than \$2,000 to be made within three years of

date of lease; all lantana upon the leased tract to be rooted out during said period of three years, and spread of same to be prevented.

Stone wall to be maintained across mauka (upper) boundary of leased tract to and into flow of 1859, and wild cattle above such on south of lava flow 1859 to be destroyed.

One hundred and fifty acres of leased tract to be planted in lantana (Algeroba) or other valuable forest trees. The sum of \$50 per year to be expended in exterminating prickly pear during term of this lease or until such prickly pear is exterminated.

Holders of surveyed lots on Puuanahulu shall have the privilege of taking dead wood from this leased tract or live trees for building fence purposes.

Map herewith shows the portion leased.

COMPARATIVE.

Total number of cases by years:

1896-99.	1900-1901.
489	647

This indenture, made this — day of —, A. D. 18—, between the commissioners of Crown lands, of the first part, and — the second part, witnesseth, that for and in consideration of the covenants, and agreements hereinafter reserved and contained, the part and behalf of the said part — of the second part, — executors, administrators, and permitted assigns, to be paid, kept, and performed, they the said parties of the first part, by virtue of the authority in them vested, by the act entitled "An act to relieve the royal domain from encumbrances, and to render the same inalienable," approved January 3d, 1865, have demised and leased, and by these presents do demise and lease unto the said part — of the second part, — executors, administrators, and assigns, all — except the timber trees, and all young trees fit and proper to be raised and preserved for timber trees, now growing or being, or which shall hereafter grow, or be in and upon the above-demised premises, or any part thereof; together with free liberty of ingress, egress, and regress, and for the said parties of the first part and their successors in office. To have and to hold, all and singular, the said premises above mentioned and described, with the appurtenances (except as before excepted) unto the said part — of the second part, — executors, administrators, and assigns, for and during the term of — years, to commence from the — day of — A. D. 18—, the said part — of the second part, — executors, administrators, and assigns, yielding and paying therefor during the continuance of the term unto the said parties of the first part and their successors in office the yearly rent of — dollars over and above all taxes, charges, and assessments to be levied or imposed upon the said premises by legislative authority: Such rent to be paid by equal half-yearly instalments in advance on the — days of — and — each year. The first payment of the said rent to be made on the — day of —. And the said part — of the second part for — and — executors, administrators, and assigns, do — covenant, promise, and agree to and with the said parties of the first part and their successors in office that — the said part — of the second part, — executors, administrators, and assigns, shall and will well and truly pay, or cause to be paid, unto the said parties of the first part, or their successors in office, the said — rent above reserved, clear of and over and above all taxes, impositions, charges, and assessments whatsoever. And also that — the said part — of the second part, — executors, administrators, and assigns, shall and will, from time to time, during the term of this present demise, bear, pay, and discharge all taxes, charges, impositions, and assessments, ordinary and extraordinary, which may hereafter, at any time during the continuance of the said term, be laid, imposed, assessed, or charged on the said demised premises or any part thereof, or upon any improvements made or to be made thereon, which may be imposed or charged on the said parties of the first part, or their successors in office, for or in respect of the said premises, or any part thereof, and shall and will indemnify the said parties of the first part, and their successors in office, of, from, and against all damages, costs, and charges which they may at any time sustain or be put to in reason of any neglect in the due and punctual discharge and payment of the taxes, impositions, charges, and assessments. And also that — the said part — of the second part, — executors,

administrators, and assigns shall and will bear, pay, and discharge, at his or their own cost and expense, all costs and charges for fencing the whole or any part or parcel of the above-demised premises, if such fencing should so be required by any law now in force, or that may be hereafter enacted by legislative authority, and shall and will indemnify the said parties of the first part, and their successors in office, of, from, and against all damages, costs, expenses, and charges which they may at any time sustain by reason of any neglect or refusal of the part— of the second part, ——— executors, administrators, and assigns in the performance of the premises and agreements last aforesaid. And also that ——— the said part— of the second part, ——— executors, administrators, and assigns, shall not, nor will at any time during the term hereby granted, do or commit, or permit or suffer to be done, any willful or voluntary waste, spoil, or destruction, in and upon the above-demised premises, or any part thereof or cut down, or permit to be cut down, any timber trees or any tree fit and proper to be raised for timber trees now growing or being, or which shall hereafter grow or be in and upon the above-demised premises, or any part thereof; and will, at the end or other sooner determination of the said term hereby granted, peaceably and quietly leave and yield up unto the said parties of the first part, or their successors in office, all and singular the premises hereby demised, with all erections, buildings, and improvements of whatever name or nature, now on or which may be hereafter put, set up, erected, and placed upon the same, in as good order and condition in all respects (reasonable use, wear, and tear excepted) as the same are at present or may hereafter be put by the said part— of the second part, ——— executors, administrators, or assigns. And also that ——— the said part— of the second part, ——— executors or administrators, or any of the said parties, shall not, nor will, at any time during the continuance of the said term, assign over the said premises, or any part thereof, to any person or persons whomsoever, without the license and consent of the said parties of the first part, or their successors in office, in writing under their hands first had and obtained for such purpose.

And the said parties of the first part, for themselves and their successors in office, do covenant, to and with the said part— of the second part, ——— executors, administrators, and assigns, by these presents, that the said part— of the second part, ——— executors, administrators, and assigns shall or may at all times during the said term hereby granted, by and under the rent, covenants, conditions, agreements herein contained, peaceably and quietly have, hold, occupy, possess, and enjoy, all and singular, the said premises hereby demised and every part and parcel thereof, with the appurtenances (except before excepted), without the let, trouble, hindrance, molestation, interruption, and denial of the said parties of the first part, or their successors in office, or of any person or persons whatsoever, lawfully claiming, or to claim the same, or any part or parcel thereof: provided always, and these presents are upon this condition, that if it shall happen that the yearly rent, hereinbefore reserved, shall be behind and unpaid in part, or in all, by the space of ——— days, the same ought to be paid, according to the reservation aforesaid, whether the same shall have been demanded upon the said demised premises or not; or if the said part— of the second part, ——— executors or administrators, shall assign the said premises, or any part thereof,

any person or persons, without the license or consent of the said parties of the first part, or their successors in office, first had and obtained in writing; or if the said part— of the second part, ——— executors, administrators, and assigns, shall not well and truly observe, keep, and perform, all and singular, the covenants and agreements, on his or their parts, to be observed, kept, and performed, according to the intent and meaning of these presents, that then and from thenceforth, in any of the said cases, it shall and may be lawful to and for the said parties of the first part, and their successors in office, without warrant or other legal process, into and upon the said hereby demised premises, or any part thereof, in the name of the whole, to reenter, and the same to have again, repossess, and enjoy, as in their first and former estate and right, this indenture, or anything hereinbefore contained, to the contrary thereof in anywise notwithstanding.

In witness whereof the parties to these presents have hereunto set their hands and seals the day and year first above written.

Signed, sealed, and delivered in the presence of—

STATEMENT PRESENTED TO THE MEMBERS OF THE COMMISSION OF THE UNITED STATES SENATE BY THOMAS FITCH.

SENATORS: I have been a resident of and a member of the bar of Hawaii Territory for the past seventeen months, and I take advantage of your general invitation to offer some suggestions as to matters which you have under consideration.

AMENDMENT TO THE CODE, ETC.

The civil code of Hawaii, as well as the organic act, needs revision in many particulars, a few of which I will suggest.

Attachments may be issued from district courts, the jurisdiction of which is limited to \$300, while there is no statutory provision for attachments from circuit courts.

There is no statute providing for the arrest of a debtor who is about to leave the Territory with intent to defraud his creditors, and the matter is remitted to the doubtful remedy of invoking writs of ne exeat regno.

The distinctions between law and equity practice, which have been abolished in all the code States and Territories, still exist here.

There is no provision for continuing an action where the plaintiff has made a transfer of his interest during its pendency.

Sales of real estate on execution or under a decree of foreclosure are absolute, and no equity of redemption is allowed the judgment debtor.

The usefulness of the United States district court is abridged by the inability to transfer to it actions between citizens of Hawaii and citizens of other States and Territories.

Costs are excessive in the circuit courts; \$37 are required to be deposited by the plaintiff on commencing suit, while in Arizona and other Territories but \$10 is exacted.

Costs of appeal from the United States district court to the United States circuit court of appeals are excessive. In a recent case the

expense of appealing from an order sustaining a demurrer to the complaint exceeded \$300.

The right of appeal to the Federal courts from a decision of the supreme court of Hawaii is denied—a right that has been enjoyed by the people of every organized Territory since the formation of our Government.

Appeals from circuit courts to the supreme court of the Territory are conducted in a loose and primitive manner. With a notice of appeal not specifying the errors relied upon, and with a bond for \$500 the losing party may (unless for good cause shown an execution is allowed) stay proceedings upon a judgment for \$50,000. The notes of the evidence, when written up, are—with the original files of court sent by the clerk of the circuit court to himself as clerk of the supreme court, and these, without any assignment of errors, and without a printed transcript of the record, constitute the "appeal." If the justices of the supreme court do not find in this "record" sufficient material for a decision, they are empowered to admit "newly discovered evidence material to a just decision." In one case recently decided the judges admitted ex parte evidence of an act done by the respondent subsequent to the judgment, holding that as it was nonexistent evidence at the time of the judgment it was, therefore, "newly discovered evidence," although it consisted of a trust deed, executed and of record five days before the notice of appeal was filed, and which was never brought before the circuit judge who made the decision, by motion for new trial, or rehearing, or otherwise, and indeed was not brought before the supreme court until a few days before the hearing of appeal, when the attorney for appellant "discovered" it in the registrar's office, where it had been recorded for months.

The effect of a continuance of the present system will be to turn the supreme court into a tribunal of both original and ultimate jurisdiction in the same case and to impose upon its members the intolerable burden of trying all cases de novo on questions of both law and fact with no appeal from their decisions. If litigants were to avail themselves in all cases of the opportunities afforded them by the code, it would be physically impossible for the judges of the supreme court to dispose of all the cases brought before them, and their calendar would be choked with an accumulation of business that it would take years to dispose of.

The Territorial legislature will not meet until February. Its physical complexion may be such that it will decline any interference with laws which, though suitable for the Kingdom, are altogether unsuitable for the Territory of Hawaii. Its session is limited to sixty days and there would be no time for it to prepare a suitable code or to obtain a report from a commission empowered for that purpose.

I suggest that Congress might adopt a code for Hawaii similar to that of Alaska or provide for a commission to prepare a code to be submitted either to the Territorial legislature or to Congress for enactment.

CROWN LANDS.

That ex-Queen Liliuokalani is equitably entitled to a liberal pension from Congress, and that the granting of such pension would tend to modify if not to terminate any lingering acerbities of feeling among the native Hawaiians resulting from the loss of the monarchy has

clear to this Commission by the testimony of many witnesses. Yet such relief should, in my opinion, be accorded her solely upon the ground that the United States contributed to her dethronement and is the gainer by her loss, and not upon the assumption of her being entitled to the Crown lands. Under the Hawaiian laws the Crown lands were never her personal possession. She could not while on the throne have sold or mortgaged a single acre. She was entitled only to the income from their lease or sale. If her overthrow had been accomplished by a rival claimant to the throne she would have lost that income and it would have been vested in the usurper. The principle is elementary that the title to public lands passes to the new government de facto whether the change has been effected by peaceful methods or by revolution.

It will be noted that each State admitted to the Union was required, as a condition of its admission, to insert in its constitution a clause disclaiming in favor of the United States all title to public lands.

Nor would it be to the interest of the people of Hawaii to vest in the Queen a title to all the public lands. In what manner those lands should be disposed of I do not venture to suggest, but it is clear to me that the public interest demands that they ought not to be the subject of monopoly.

COFFEE.

It can not, I think, be reasonably expected that the people of the United States who have for years been accustomed to a free breakfast table will consent to the imposition of a tariff duty on coffee. Yet Congress might readily agree to a bounty on Hawaiian grown coffee of say 4 cents a pound for a term of ten years, and it might be proposed that a portion or all of the customs duties received at Honolulu should be placed into a special fund for the payment of coffee bounties. Hawaiian coffee is of such superior excellence that it will command a remunerative price and could be profitably grown without a bounty if enough of it were raised to supply the special market that could readily be created for it. But no market can be created on a production of 25,000 bags or with less than ten times that number per annum. A bounty of 4 cents per pound would stimulate production and cause new areas to be planted and cultivated by white American farmers, and so supply the body politic with a much needed class of citizens.

PENDING PROBLEMS.

It is altogether profitless to discuss at this time the methods by which the monarchy was overthrown and these islands made a part of the United States. Annexation was apparently the only measure by which Hawaii could have been saved from becoming, if not a Japanese colony, at least a Japanese Republic.

The guaranty of her independent nationality given by European powers did not extend to preserving the control of her government in the hands of the Hawaiian people, but in the hands of the Japanese who should avail themselves of the voting power for that purpose. Yet annexation, however necessary to Hawaii politically and however advantageous to the United States in every way, was a decided financial and commercial disadvantage to the people of Hawaii.

Hawaiians obtained the gains of an open American market, which went into the pockets of the sugar companies and their factors,

bankers, and dependents, while the loss of customs revenues was made out of the pockets of the taxpayers. At this time it is doubtful if even the sugar companies have not the worst of the bargain, for they must submit to increased local taxation, while the labor cost of producing sugar has been increased by the operation of the Chinese-exclusion act, and the advantages of an open American market for sugar (which might have been obtained by a continuance of reciprocity) may possibly be neutralized by tariff legislation with respect to Cuba.

A COLONIAL POLICY.

Were it not for the action of Congress in creating for Porto Rico and the Philippines a colonial policy differing from that pursued in the mainland Territories I should despair of the future and should apprehend that these fair islands were on the road not to Americanization but to insolvency. But the Supreme Court of the United States has affirmed the constitutional power of Congress to punish polygamists in Arizona and subsidize them in Sulu; to appropriate the customs revenues in Porto Rico to the maintenance of schools and repairs on highways, while Oklahoma is compelled to build her own schoolhouses and construct her own roads; and to abolish the ancient despotic Spanish laws in New Mexico and perpetuate them in the Philippines.

From the fact that Congress has made special laws for other insular possessions, I have strong hopes that it may extend its beneficent power to the people of these islands and accord to them the only remedy that will save their great industry from ruin and their cities from depopulation and decay.

By whatever changes of laws or treaties the necessary legislation may be effected, Hawaii must have an adequate supply of Chinese labor in the cane fields or many of the sugar plantations will be abandoned. It will not be difficult to so frame the law as to allow entrance of agricultural laborers only, and to provide that when a Chinaman drops the hoe he must go on board of the first ship bound for Asia. To accord to Hawaii such legislation would not deprive a single mechanic of his job, and would create well-paid jobs for thousands of American workers in the various mechanic industries and arts, from the practice of which in this country alien Asiatics should be rigorously excluded. I am but a young old man, yet I have seen cities as large and as populous as Honolulu deserted because of the decay of the one industry that had promoted their growth.

I have the strongest hope, Senators, that the result of your investigations here will cause you to make such representations at Washington as will induce Congress to grant relief to this people, and that they will remember the maxim that "He gives twice who gives quickly."

With some reluctance I offer a word of criticism concerning the action of Secretary Cooper and Governor Dole. Both are lawyers, both have been judges, and both are gentlemen of well-deserved reputations for probity. Both know the sacredness of a trust fund, especially of a fund in which a portion of the scanty earnings of orphans and helpless aliens had been deposited in order to enable them, when their term of service should expire, to be returned to their native land. How it was that Secretary Cooper found it consistent with his duty, knowledge and his business acumen to take a trust fund of \$1,000,000 from the safe custody of a national bank and place it in the hands

official who gave no bonds I can not comprehend, and it is still more comprehensible that Governor Dole should have permitted this trust fund to be used for ordinary public expenditures and allowed available treasury warrants to be substituted for gold coin.

HONOLULU, *September 25, 1902.*

In the honorable subcommittee of the Senate Committee on Pacific Islands and Porto Rico.

SIR: At your invitation I have the honor to submit the following statements in regard to the land laws of this Territory and their administration:

In the first place, it must be remembered that this is not a new country just opened for settlement, but a very old country, which had a dense population and was minutely subdivided long before the arrival of white men. These ancient subdivisions still exist and are the basis of our land titles to-day. The main points of the Hawaiian system of land tenure are explained in an article written by me as a Government report in 1882 and reprinted in Thrum's Annual in 1891, which I will file herewith. Mr. J. F. Brown's report as agent of public lands (which is appended to Mr. Knox's report from the committee of the House on Territories, Report 305, Fifty-sixth Congress, first session), leaves little to be desired.

TOPOGRAPHY.

The ancient system of dividing the land was in great measure influenced by the topography of the country, consisting as it does of volcanic mountains rising abruptly out of the ocean and deeply furrowed, especially on their windward sides, by precipitous ravines. Within these narrow limits the diversity of surface, of quality of soil, rainfall, and vegetation is truly remarkable, and helps to explain the peculiarities of their ancient system, as well as the difficulty of framing suitable land laws to meet the existing conditions.

THE GREAT DIVISION. •

It is not necessary at this time to rehearse the history of the great division which took place in 1848 and which changed the tenure of land from a feudal basis to that of individual freeholds. At the close of this division the King, Kamehameha III, held about 1,000,000 acres, which constituted the crown lands, while the chiefs held about 1,000,000 acres and the government an equal amount.

The 11,000 homesteads awarded to the common people were small in extent, averaging about 2½ acres apiece, but they comprised the richest part of the lands, and with them the common people received rights of fishing, under certain restrictions, rights to wood and water, and exemption from compulsory labor. Many friends of the natives have believed that the transition was too sudden, and that better results would have followed if the "kuleanas," instead of being freeholds, had been "homestead leases," inalienable and conditioned on occupation and improvement.

The chiefs soon felt the effect of these changes in the diminution of their incomes, and too many of them, in consequence of their improvi-

dent habits, were driven to sell or mortgage their lands to foreigners which they could not have done under the former régime. Most of them died childless and in debt, and many of their lands were sold in settling their estates. Lunalilo, by his will, directed his executor to sell his extensive lands and invest the proceeds to establish and endow the home for aged and indigent Hawaiians. In these ways many lands came into the possession of foreigners under fee simple title. Fortunately the crown lands were made inalienable in 1865, and thus reserved as national lands.

EARLY LAND SALES.

Immediately after the great division of 1848 the government appointed land agents in every district to sell land in small parcels to natives at nominal prices, ranging from 12 cents to \$1 an acre. Later on some large tracts were sold to foreigners. Before the year 1850 probably 500,000 acres were disposed of, largely to natives, as shown by the published index of grants. These sales took the "cream" of the government's lands, leaving on its hands the less desirable and unsalable remnants.

From that time on there was a lull in the sales of government land and the policy of leasing them was preferred, partly from the lack of definite information regarding them and partly from dislike of seeing them pass into the hands of foreigners. In 1876 an act was passed requiring all sales or leases of government lands above \$300 in value to be made at public auction.

THE FIRST HOMESTEAD LAW.

The first homestead act, to encourage the acquirement of small holdings by industrious farmers of small means, was introduced in the legislature of 1884 by Hon. S. B. Dole and carried by the efforts of the Reform party. Little, if anything, was done to carry out the purpose of the act till after 1887. Opportunity was given by it to acquire lots, not over 20 acres in area, ten years being allowed for the payment of the purchase price, three years' residence and the building of a house being also required in order to secure a title. Under this act 528 holdings were taken up, comprising 8,504 acres. It was, however, not sufficiently stringent in regard to the requirement of actual cultivation of the land, and the lots offered were too small for any but the poorest settlers.

THE HOMESTEAD ACT OF 1895.

After the revolution of 1893, the crown lands, most of which had been held under long leases, were declared to be government lands. The present land law was drawn up in 1895, mainly by Hon. S. B. Dole, with a view to promote the settlement of the remaining government lands by bona fide farmers, to frustrate, if possible, the schemes of speculators and land grabbers and to meet the widely varying conditions to be found in this Territory. A thorough study had been made of the methods employed in New Zealand, a country where the same conditions are somewhat similar to those existing here and where the best success has been achieved in multiplying small farms and in getting away with speculation and monopoly. The act provides four methods of obtaining small holdings, viz, homestead leases, right-of-purchase leases, cash freeholds, and special agreements of sale.

The first method is intended primarily for the benefit of native Hawaiians. The holdings under it, comprising from 16 to 60 acres, relating to quantity of land, are inalienable and can not be sold, leased, assigned, or sublet. They are conditioned upon residence, payment of a certain percentage, and payment of taxes, but no rent required.

Right-of-purchase leases were for twenty-one years, with the right of purchase at the original appraised value at any time after two years' residence, and cultivation of 25 per cent of the land. The annual payment is 8 per cent of the appraised value, to be paid annually until purchase is made.

Cash freeholds are limited to 100 acres in first-class and 200 acres in second-class agricultural land, and to 600 acres in first-class and 100 acres in second-class pastoral land. These are sold at auction on appraised upset price, the successful bidder paying down one-fourth of the purchase price and the remainder in three annual installments, with interest. Two years' residence and cultivation of 25 per cent of the land are also required before the occupier can obtain a patent.

Special agreements of sale are sales at auction under special conditions as to payments by installments, with requirement of cultivation, with or without residence. This provision applies to lands peculiarly adapted, such as grazing and forest lands, with a maximum limit of 40 acres; but, in fact, the average is about 49 acres. Under these four present methods of land settlement, before July, 1901, 1,512 holdings had been taken up, with a total area of 51,606 acres and an average area of 34.19 acres. All land transactions by the local government were suspended from September 30, 1899, till January 1, 1901, by order of the Federal Government.

Cash sales are sales made unconditionally for cash at public auction. These sales are made to meet cases where exceptionally costly improvements are contemplated, as buildings, reservoirs, pumping works, etc.

Olaa district sales: In the Olaa district, which formed part of the crown lands, a costly road to the volcano had been built by the Government, adjoining which 142 lots, averaging over 100 acres each, had been leased to coffee planters before the passage of the land act. These leases were now permitted to convert their leaseholds into fee simple holdings by paying their appraised value after 15 per cent of the land had been patented and \$200 expended upon it in addition.

COMMENTS ON THE LAND LAW.

The above "land act of 1895" was the outcome of much practical experience and has proved itself, on the whole, well suited to the conditions in these islands. It has served to discourage speculation and land grabbing, and, in spite of many obstacles, a promising beginning has been made in establishing a class of small farmers. Its principal merit is that it strictly requires actual residence on the land and cultivation of it as a *sine qua non*. It also provides for publicity at every step of the procedure. Another merit is that it discriminates between widely different classes of land. When lands in the same district, at the same elevation above the sea, vary in value from 5 cents to \$200 an acre, it would seem to be the height of folly to dispose of them at one

About 450,000 acres have been classified as grazing lands, much of which may hereafter be found to have agricultural possibilities, as yet undeveloped.

Of the remaining 150,000 acres, 26,000 acres are classed as cane lands, and an equal amount as coffee lands. The remainder is in general of inferior quality to what has already been sold, being more broken and difficult of access.

Respectfully submitted.

W. D. ALEXANDER,
Assistant in United States Coast and Geodetic Survey.

To the honorable members of the Commission of Inquiry upon Hawaiian Affairs, appointed by the United States Senate.

GENTLEMEN: We, the undersigned American citizens of the respective terms of residence in Hawaii and occupations set opposite our names, respectfully represent that we view with satisfaction your inquiries into the condition and needs of Hawaii, and sincerely pledge our support to every measure calculated to establish in Hawaii those great principles of justice and right of which the American nation is the chief exponent.

Our condition to-day is critical. Our people have been harassed by the plague and many of them impoverished by the fires necessary and incident to its extinction. Our government has been deprived half of its revenues and our banks and financial institutions laid under heavy contribution by the monthly shipment to the mainland \$100,000 or more of gold collected at our custom-house. Our chief industry is suffering from the low price of sugar and the scarcity of field labor, and the entire community, regardless of vocation or social position, feels the resulting financial stringency. Our mortgage indebtedness has reached an unprecedented figure and is still increasing.

In this unhappy condition we have sought diligently for relief in a better adjustment to our conditions. Our entire industrial and political situation is being subjected to the most searching and anxious scrutiny, that nothing be done to augment our difficulties or nothing omitted that might relieve them.

We ask through you for assistance from Congress. And though our isolated position in the Tropics compels us to ask some modification of American laws to meet our special burdens and requirements, we are convinced that such adaptation of national statutes to the special needs of outlying territories is reasonable and necessary.

We respectfully request your support of the following measures:

I. A measure providing for the payment by the United States Government of the awards of the court of fire claims.

II. Such a provision by Congress for the local expenditure of customs receipts as shall check that constant drain upon our resources.

III. A law to permit the admission of a reasonable number of Chinese field laborers under such proper restrictions as shall limit them to agricultural labor on the plantations, and effectually bar them from the arts and trades.

In support of this last request we submit the following:

So far as Hawaii is concerned the admission of such labor will afford the only foundation upon which a prosperous and adequate industrial system in this tropical country can be based.

Such Chinese labor will not be a competitor of the American cane or beet sugar producer supported by tariff, but will rather replace some of the Dutch and German sugar by Hawaiian sugar, made by American capital, in American mills, with American mill labor, and transported to market in American bottoms.

We submit, therefore, that in thus modifying the application of the Federal law to meet the precise requirements of Hawaii you will be following in a wise and liberal manner the national policy of protection and development of newly acquired domain. The benefits of your liberal treatment will accrue in our case not merely to our entire Hawaiian citizenship, but also to the merchant, manufacturer, and laborer on the mainland, of whom we shall be able in the future to make even larger purchases than in the past.

This petition contains the signatures of 158 persons—clerks, merchants, bankers, attorneys, contractors, druggists, and business men of the city of Honolulu.

To the honorable commission from the United States Senate to inquire into the conditions existing in the Territory of Hawaii, etc.

I Ke Komisina Hanohano mai ka aha Senate mai o Amerika hui-pui no ka hano'i ana i i na kulana e ku nei i keia wa ma ke Teritori o Hawaii nei, etc.

and applying them to the purposes of private corporations.

We respectfully petition the honorable Commission from the Senate of the United States to inquire into the taking of private lands for the purposes or facilitation of the Honolulu Rapid Transit and Land Company, the giving of Government land in exchange therefor, by the Territorial officials, without recompense.

(A makou e mana'io nei nei ia i apono ole ia ma ke Kamehameha a hooliloia aku hoi no ka poma o na Hui i hoo'huia.

Ke nonoi haahaa aku nei ma i ke Komisina Hanohano ma Aha Senate mai o Amerika i puia, e huli aku no ka laweia a na aina kuleana maoli no na hui a no ka hoo'holo ana i na hana o Hui Rapid Transit and Land Company, a ma o ke kuapoia ana Aina Aupuni no ua mau Aina ma Luna Aupuni o ke Teritor ke kumukuai ole.

Your committee was presented with 13 separate and distinct copies of the foregoing petition, signed by 848 persons, all citizens and voters of every electoral district and precinct in the Territory.

To the honorable Subcommittee of the United States Senate Commission on Pacific Islands and Porto Rico.

HONORABLE SIRS: The undersigned beg to protest against the action of the Territorial officials in exchanging certain public lands of the Territory for lands of private individuals for the purposes and facilitations of private enterprise and without any remuneration to the Territory therefor.

And we respectfully show unto your honorable committee that we have been actual and bona fide tenants and occupants of a portion of that certain parcel of land known as Auwaiolimu for and during the past thirty years, and that we have improved said lands and erected our homes thereupon, feeling secure that our tenancy, for which we have paid fair and reasonable rent during said thirty years, should entitle us to preference as purchasers in the event of the sale of said lands according to usual and more equitable methods.

We respectfully urge upon your honorable committee the injustice of permitting these lands to be given gratuitously to or for the facilitation of private enterprise, and of denying us the first right to purchase the same; and we submit that the confirmation of the gratuitous giving of these lands to the Honolulu Rapid Transit and Land Company will operate to deprive us of our humble homes without any recompense therefor; and

We therefore earnestly pray that your honorable committee, upon inquiry and confirmation of the facts as we are prepared to establish them, recommend to the President of the United States that the transaction of said gratuitous giving of these lands may be confirmed or countenanced.

Senator D. KALAUOKALANI
Mrs. KAAHANUI KAWAIHOU
N. W. KAHOLI (x).
Mrs. LULIA KALAUOKA.

Witness:

DAVID KALAUOKALAU, jr.

Whereas section 91 of the organic act of the Territory of Hawaii expressly provides that the public property ceded and transferred to the United States by the Republic of Hawaii, under the joint resolution of annexation, "shall be and remain in the possession, use, and control of the government of the Territory of Hawaii, and shall be maintained, managed, and cared for by it at its own expense until otherwise provided for by Congress or taken for the uses and purposes of the United States by direction of the President or of the governor of Hawaii," thereby investing the Territory of Hawaii with sole jurisdiction to possess, use, and control all public property within this Territory, unless such possession, use, and control shall be modified or changed by an express act of Congress; and

Whereas there is an assured probability that the legislature of the Territory of Hawaii will, at an early day in the coming session, create county and city municipalities in conformity with section 56 of the organic act; and

Whereas an act or acts of the legislature so creating county and city municipalities in this Territory can not be made operative until such municipalities can use, possess, and occupy the public property of the territory now under the sole jurisdiction of the Territorial government; therefore be it

Resolved by the executive committee of the Independent Home Rule party of the Territory of Hawaii in convention assembled. That we ask Congress to enact a law authorizing and empowering all county, town, and city municipalities created within this Territory by the legislature thereof, to possess, use, and control all the public property of the Territory necessary for the establishment, maintenance, and conduct of such municipalities, thereby eliminating any controversy or friction between the Territorial officers and those necessarily to be created under the county and city municipal act or acts as to the right to use and possession of such public property.

And be it further resolved. That the Hon. Robert W. Wilcox, Delegate to Congress from Hawaii, be, and he hereby is, requested on behalf of the Independent Home Rule party, which represents the majority, a large majority, of the voters within the Territory of Hawaii, to introduce and urge the passage by Congress at as early a day in the coming session as possible of an act carrying out the objects hereinbefore set forth:

And be it further resolved. That the Hon. Senators John H. Mitchell, J. H. Burton, and A. G. Foster, of the subcommittee of the Committee of the United States Senate on Pacific Islands and Porto Rico, are hereby requested to give consideration to the great importance of this matter to the people of this Territory, and to give to our Delegate, Hon. R. W. Wilcox, their aid in securing the passage of such an act by Congress at the coming session, and that a copy of these resolutions be forwarded to the honorable subcommittee of the Committee of the United States Senate on Pacific Islands and Porto Rico, now sitting in the city of Honolulu and Territory of Hawaii.

Passed September 21, 1902.

JESSE P. MAKAINAL.

Chairman of the Executive Committee of the Independent Home Rule Party, Territory of Hawaii.

Attest:

DAVID M. KUPUEA.

*Secretary Independent Home Rule Party
and the Executive Committee.*

To the honorable Commission from the United States to inquire into the conditions existing in the Territory of Hawaii, etc.; to the President of the United States, and to the Senate and House of Representatives of the United States:

We, the undersigned, citizens of the United States and of the Territory of Hawaii, residing at a place known as "Kalihi Detention Camp, situated at Waiakamilo, Kalihi, in the city of Honolulu, on the island of Oahu, do hereby respectfully present this petition, as follows to wit:

That the said "Kalihi Detention Camp" is a piece or parcel of land of about 5 acres, more or less, in area, and belongs to the estate of Bernice P. Bishop.

That the same is under lease (as your petitioners believe it to be) to the Territorial government at an annual rental of about \$900.

Your petitioners are residing on said "camp" as tenants of the Territorial government at the rate of \$1.50 rent per month for each room.

And whereas the said estate of Bernice P. Bishop is holding under lease certain lands belonging to the Territory of Hawaii, we therefore respectfully request to exchange such Territorial government land now held by said estate of Bernice P. Bishop for the above "Kalihi Detention Camp" as a government reservation, to be given as homesteads to your petitioners.

STATEMENT PRESENTED TO THE MEMBERS OF THE UNITED STATES SENATE AT HONOLULU, SEPTEMBER 25, 1902, BY F. BECKLEY.

GENTLEMEN: Upon request of some of my fellow Hawaiian-American citizens from Waianae, I ask leave to file with this committee a copy of a statement I would like to make with reference to the policy the Territorial government has followed in the disposition of public lands in the Waianae district on this island of Oahu.

About the latter part of last year the lease of the government Ahupuaa of Waianae to the Waianae plantation expired.

The plantation applied for renewal of the lease for the port-

ready partly cultivated by them and presumably the most fertile in the whole Ahupuaa, known as Upper Waianae, comprising an area of 332 acres.

A company of 10 Hawaiians then made application for right-of-purchase lease, in lots of 100 acres each, of the sandy plain to the seaward end of the tract wanted by the plantation.

The plantation's application was entertained, and the area of 3,332 acres put up as a whole, thus excluding possible competitors, as the plantation under the circumstances could afford to give a higher rental than anyone else, by the compulsion to take this large area in a lump.

The native Hawaiians' application was refused by the executive council (an illegal body) on the ground that the government contemplated at some future time laying out house lots on the beach below the railroad, and thus below the tract applied for by these people.

The tract applied for is known as Maili, and so marked on government survey map accompanying this memorial.

It is also marked "Sandstone Plain," and is a sandy plain now overgrown by algaroba trees, which thrive under such conditions. Land of that kind without irrigation will grow very little of anything else except in the rainy season, when a somewhat uncertain crop of sweet potatoes and pumpkins might be raised in a few favored spots.

Brackish water only could be obtained from wells, not very good for cultivation.

This company or association of Hawaiians stated in their application that the land was to be used as homesteads, with hog and chicken raising as a main industry. Algaroba beans or pods are very fattening for either; also for stock of all kinds.

The price of both hogs and chickens are very high here and practically prohibitive to people of small means.

By drying and saving the kiawe or algaroba beans as the main reliance for their stock, to be supplemented in winter with quick-growing greens, and at other times by purchasing wheat, corn, and rice bran, they expected to be able to make a comfortable living. They were given no chance.

About the same time a large tract of land called Lualualei and adjoining land leased to plantation and the plains of Maili applied for by the Hawaiians were surveyed by order of the government and cut up into six large lots of over 1,000 acres each, which were to have been put up at auction outright.

Taking \$5 per acre as the average that could have been obtained at an open sale, you can see how such action would practically throw all these lands into the hands of the wealthy.

It is understood the sale did not take place because the commissioner of public lands refused to agree to it. But he makes this concession to the promoters of that scheme and advertised in the local papers to the effect that "the government is desirous of disposing of about a half dozen lots of 500 or 600 acres, by special time payment agreements of sale, requiring conditions of residence or improvements or both. In order to be informed of the demand for such lands under the said conditions I (E. S. Boyd) should like to receive communications from those interested, inclosing any question they may wish to ask on the subject."

It is understood applications to suit have been already placed by the favored parties, and the lands are about to be awarded to the lucky

ones, but what of the 10 poor Hawaiians who were seeking to of homes capable of giving them an independent living and not equally be obliged to accept the position of plantation laborers which quite equal to that of the forced Mexican peon?

If Maili was to be preserved from contamination of hog raising the remote possibility of turning the seabeach below the railroad a fashionable watering place, why not offer one or more of the subdivided originally into 1,000-acre holdings, and situated for quarter to a mile away from this future Newport or Bar Harbor?

The policy of the present government has been to make possible the general Hawaiian homesteaders only some out of the way to where it would be an endless struggle to make enough to keep body and soul together.

Wherever there is a favorable opening to make a self-supporting homestead the native Hawaiian need not apply.

This and other similar acts showing a settled policy to discourage and deprive natives of any chance to better themselves are the result of the feeling of intense dislike and opposition toward the present government officials shown by the majority of the native Hawaiians.

F. W. BECKLE

HONOLULU, HAWAII, July 9, 190

FIRST NATIONAL BANK OF HAWAII,

Honolulu, Hawaii:

As official representative in Hawaii Territory of the Chinese Empire and in behalf of the Chinese subjects who have contributed to the Chinese-immigration trust fund deposited with you and who alone are entitled to withdraw and receive same, I hereby protest against any diversion of said fund from its proper and legal purpose or any use of the same for the current expenses of the Territory of Hawaii or otherwise. It will be my duty to inaugurate, and this is to notify you that I shall in due course inaugurate, the proper steps in the courts elsewhere to protect the interests of Chinese subjects interested in said fund, and prevent any diversion of the same from its proper use and pending the same I have the honor to file with you this protest against any payment by you of said fund, or any part thereof, to persons entitled to receive the same.

I am, very respectfully, your obedient servant,

YANG WEI PIN,

His Imperial Chinese Majesty's Consul

HONOLULU, July 8, 190

Mr. WRAY TAYLOR,

Ex-Secretary of the Board of Immigration:

As the official representative in Hawaii Territory of the Chinese Empire, and in behalf of the Chinese subjects who have contributed to the Chinese-immigration trust fund and who alone are entitled to draw and receive the same, I beg leave to respectfully protest against any diversion of the same or use of the same for the current expenses

Territory of Hawaii or otherwise. It will be my duty to inaugurate due course proper steps in the courts and elsewhere to protect interests of Chinese subjects interested in this fund, and pending same I have the honor to file with you this protest against any interference with said fund.

I am, very respectfully, your obedient servant,

YANG WEI PIN.

His Imperial Chinese Majesty's Consul.

HONOLULU, July 9, 1901.

YANG WEI PIN,

His Imperial Chinese Majesty's Consul, Honolulu.

RE: Your letter of the 8th instant, addressed to Mr. Wray Taylor, Secretary of the board of immigration, has been referred to me.

The Chinese who made the deposits with the board of immigration in accordance with the conditional permits issued to them by the Republic of Hawaii are not entitled to the payment of the money so deposited, because the person who made the deposit desires to return to China and the fund is to be applied for the payment of his passage, and the balance, if any, paid to him.

I think you have been misinformed as to the intentions of the Territorial government in regard to the fund you refer to. The Territorial government will promptly provide the funds for the payment of the passage to China of each depositor when he is ready to leave this Territory up to the amount standing to his credit. Until such time, however, the fund will remain in the custody of the Territorial government.

I am, sir, very respectfully,

Acting Governor.

TERRITORY OF HAWAII,
COMMISSIONER OF AGRICULTURE AND FORESTRY.

Honolulu, July 9, 1901.

YANG WEI PIN,

Chinese Consul, Territory of Hawaii.

DEAR SIR: I have the honor to acknowledge the receipt of your letter of the 8th instant in re the Chinese immigration fund, and to say hereby that the same has this day been referred to the Hon. H. E. Taylor, acting governor of the Territory of Hawaii.

Yours, most respectfully,

WRAY TAYLOR.

THE FIRST NATIONAL BANK OF HAWAII, AT HONOLULU,
UNITED STATES GOVERNMENT DEPOSITARY.

Honolulu, July 12, 1901.

YANG WEI PIN,

His Imperial Chinese Majesty's Consul, Honolulu.

WE beg to acknowledge receipt of your communication of the 8th instant in relation to the Chinese immigration trust fund deposited

with this bank and standing in the name of the board of immigration trustee, and in answer thereto say that we have communicated with H. E. Cooper, acting governor of the Territory, and have furnished him with a copy of your protest. I would suggest that any action proposed in this matter should be had as early as possible, as we have been notified by the acting governor that he intends to withdraw the money from this bank and deposit the same in the Territorial treasury.

Very respectfully, yours,

CECIL BROWN, *President*

SEPTEMBER 26, 1902.

Hon. Senator MITCHELL,

Chairman of the Subcommittee, etc.

SIR: At your request during our interview at the Hawaii Hotel, the 25th instant, 5 p. m., that copies of the communication of H. E. Cooper, and those of others referring to the question of the Chinese immigration trust fund, be copied and the same sent to you, I have the honor to herewith inclose five copies for your consideration.

I have the honor to further request that the Congress will instruct the Chinese immigration trust fund be distributed to the Chinese laborers who are interested in it.

Yours, most respectfully,

GOO KIM FUI,

Her Imperial Chinese Majesty's Acting Consul

HONOLULU, HAWAII, September 13, 1902

To the Honorable Commission of the United States Senate.

GENTLEMEN: In following statements taken before your honorable board since here, which I have read very carefully, suggested to place on file with you a copy of a letter which was written by me at the request of one of your associates in the United States Senate, Hon. S. M. Cullom, chairman of the former commission of 1893, which covers most of the evidence being put before you. I do not think the same may be useful to you.

The general gist of the letter from the standpoint when written did not materially differ from the present time, and I trust the same will be acceptable to your honorable commission.

Respectfully, yours.

F. C. WINTER

WAINAKU, HILO, HAWAII,
September 3, 1902

Hon. S. M. CULLOM,

Chairman United States Commissioners, Honolulu, Oahu.

MY DEAR SIR: I would like to present for your kind consideration a few thoughts which I think will be for the welfare of my fellow citizens and the island of Hawaii. Knowing as we do that we are not and have not been, justly treated in the matter of government immigration,

ments, thereby delaying our progress in developing one of the most important cities on the islands, also the development of the largest land, the time has come when I feel it my duty to try and secure from your honorable board of commissioners our true and just dues in the way of recommendations for our welfare from yourself and our honorable associates.

First. That a Territorial form of government be given us. It becomes the duty of every citizen to cry out against colonial or district form of government. We want our voting rights through a Territorial form, that Hawaii may have municipal and county governments without control from Honolulu. We wish to have the governor for the Territory appointed from our own people if possible, believing that a person appointed from here will better understand the needs of the people at large than a stranger, and that such an appointment will give greater satisfaction. By having this form, we may expect when our population becomes in number required to apply for statehood that the same will be granted us.

Second. The practice of the government leasing town lots and agricultural lands, instead of giving fee simple title to actual settlers upon compliance with proper regulations in regard to settlement and improvements, is a dead weight and an actual discouragement to progress and development of the islands. There should be laws passed consistent with the laws governing lands, that will enable the government to take up long leases as fast as possible, and to throw the same open to actual settlers in such quantity that will do the most good in small farming. On the island of Hawaii there is a great quantity of virgin forest and undeveloped lands. Under the laws in force and the present method of administering them the process of preparation for entry is so slow that long months and years are likely to lapse before these lands, or any considerable amount of them, come into possession of actual settlers.

Third. The islands are practically undeveloped except along one line, that of the sugar industry. If American citizens are invited and expected to come to this new American Territory and develop the coffee and other industries of the islands, they ought to be encouraged to do so, and the obstructions to development and progress ought to be speedily removed. The sugar industry is well established, and laws should be passed for its assistance, in re of labor, that will not in any way undermine it; it should be fully protected. The present laborers under contract, I contend, are not slaves, as they have liberty and are given the chance of improviding their condition. In fact, they are allowed, on many plantations to take up lands in the gulches, and other unused lands, for the purpose of cultivating patches of cane on their own account. These lands are owned by the plantation are let out to them, as tenants at will, by most plantations, free from rent, and by lease, paying small rental. The laborers are also assisted by advances on these patches of cane, which vary according to age and condition of the plant. In order that the advance may assist them in carrying the plant to maturity, it is generally the rule to take a bill of sale as security on the cane. The advance is paid from the returns when the cane has been milled. The rates generally paid for cane, per ton, is based on the price of sugar in San Francisco, at the time such cane is milled. For illustration, the price per ton paid is as follows: When the basis of sugar in San Francisco is 24 cents per pound, \$3.25 is paid per ton of cane, at 24 cents, \$3.50; at 3

cents, \$3.80; at $3\frac{1}{2}$ cents, \$4.15; at $3\frac{3}{4}$ cents, \$4.40; at $3\frac{1}{2}$ cents, \$4.75; at 4 cents, \$5.10, at $4\frac{1}{2}$ cents, \$5.50, and in like ratio for an increase over the prices named. Cane properly cared for will produce, per acre, from 30 to 50 tons. You will see that the small planters, who are mostly our laborers, Japanese, Chinese, Portuguese, and Hawaiians, make a nice thing out of their earnings and interests in planting cane. This year the average price per ton for cane has been \$4.75. I know of one plantation which has paid for in the neighborhood of 12,000 tons, which was purchased from the small planters. Therefore I contend that our laborers are well satisfied in their treatment. This will show to your honorable board that the encouragement of small farmers to this country for this industry will not be a mistake, and that the laws for labor should be as liberal as the Constitution of the United States will admit. The coffee industry has shown itself to be a paying crop. This industry needs encouragement, by passing laws which will be liberal in taxation, and of labor, which will insure labor at a moderate rate of wages. That fibers of the best grade can be grown here with same encouragement as that of sugar and coffee has been proven. This industry will promise a big factor in the output of the islands at no distant date.

Fourth. The assessed valuation of the Hawaiian Islands for revenue purposes for the year 1897 was more than \$48,000,000. That is greater assessed valuation than any one of the Territories of the United States; greater than that of at least three of the sovereign States of the Union.

Fifth. I believe that the people of these islands are capable of local self-government, and as a matter of right are entitled to it; that they are entitled to the same form of government that would be given them if they were residing on the mainland of the United States. I believe that the machinery of local self-government—to wit, county and municipal organization—ought to be put into operation on the islands at the earliest possible moment. By having local self-government we are in hopes in time to have such records transferred to the island that will enable us to carry on business as it should be, without having to send transfer of property and probate and other matters to record to Honolulu. The present system makes it very inconvenient for reference in law matters, and at times it takes weeks and a possible trip to Honolulu to get matters straightened out that will only take a very short time if the records are on this island. I believe that the physical formation of the island of Hawaii and the best interests of its citizens require that Hawaii be made one county, with subdivisions that will meet the requirements of her people at large; that the location of Hilo, its commercial and natural advantages, and superiority of its harbor command it as the proper place for the county seat of such county.

Sixth. That the island of Hawaii should have such apportionment of moneys recommended for the improvements of the islands. I want, first, breakwater and wharves for Hilo, as it will be one of the most and is now one of the most important ports of the islands. Looking over the possibilities, take the output of sugar shipped from this district this year and the amount of sugar that may be shipped from here if proper facility is given us. For the year 1897 north Hilo produced 30,000 tons of sugar; south Hilo, 50,000 tons.

figures are in round numbers. The sugars of south Hilo district were shipped out of this port for San Francisco and New York. In the building of wharves we may reasonably expect in a very short time that railways will bring in the sugars from north Hilo and other districts. The same will bring in the coffee and other crops of the island for shipment. The imports which are now brought to this port are very large and will increase as fast as the number of population increases. The foregoing facts, I trust, will give you and your committee a reason of hearty approval for recommending such expenditures. The matter of wharves and breakwater are essential to the development of this island. A liberal expenditure on roads in this district is also needed, that we may have our large area of land opened up and developed. The lands will be taken up as fast as the same is put into the market.

In conclusion, I most respectfully ask that your Commission recommended in your report to President McKinley the following:

1. A Territorial form of government for the Hawaiian Islands.
2. The creation of one county for the island of Hawaii and the location of the county seat thereof at Hilo.
3. That the government land-lease system be abolished and the location of land laws suitable to the conditions of the islands.
4. That the franchise given the people of the island be as broad as could be given the same body of people residing on the main land of the United States.
5. That liberal amount of money be recommended for the improvements, such as breakwater, wharves, roads, schools, administration of government, and of the land system.
6. That labor laws be passed consistent with the laws of the United States that will not be a detriment to our present and future industries.
7. That you ask the appointment of governor for this Territory be made from our own people.

Trusting you will give my suggestions your careful consideration, and that I have not gone into too much detail, I remain, dear sir, very truly,

F. L. WINTER.

SHERIFF'S OFFICE,
Hilo, Hawaii, September 26, 1902.

WALTER J. H. MITCHELL,

Chairman of Subcommittee on Pacific Islands and Porto Rico.

DEAR SIR: I understood you to say when here last week that any witness who had been sworn before your commission could in writing make to you further communications that could be included in the evidence given by that witness under oath, and I inclose herewith such a communication in regard to the "garbage system" of Hilo.

If you think it is proper and of sufficient value, will you please allow it to be inserted with my evidence?

Very truly, yours,

L. A. ANDREWS,
Sheriff of Hawaii.

BUREAU OF POLICE, SHERIFF'S OFFICE,
Hilo, Hawaii, September 24, 1902

To the chairman and members of the Senatorial Commission.

GENTLEMEN: When on the witness stand before you in the session held in Hilo, September 18, one of the questions asked was if horses were kept at the Hilo jail, and I replied that the horses used in the "garbage system" of the town were kept in a stable on the jail premises. It did not then occur to me that you would take any interest in an explanation of our garbage system, but I have since been urged to describe it to you, as some adverse criticism has been made on it. I will, therefore, do so that you may embody it with my other evidence.

Honolulu is provided with a government garbage service, but provision has ever been made by our legislatures for such matter outside of the city of Honolulu.

CAUSE OF STARTING THE PRESENT GARBAGE SYSTEM IN HILO.

During the year 1898, the rapid growth of the town of Hilo filled both sides of Front street with cheap Japanese buildings on the low land between the swamp and the sea. The strip of land between Front street and the swamp was so narrow that the houses built along the inland side of the street had their back doors directly over the edge of the swamp in some cases, and in others were so near to it that there was not room for water-closets, except directly over the water or mud as the case might be.

Between the street and the sea beach the sand is so low that the water is reached from 2 to 4 feet below the surface of the ground. The vaults of the water-closets in this new section all reached the water, and in most cases were formed of boxes built above the ground and the stench arising from them was awful. At night the air at that part of the town was heavy with the odor of human excrement, and the condition of affairs was constantly growing worse. The amount of typhoid fever in that section was alarming. The Hilo hospital was constantly crowded with fever patients, and the town doctors were overrun with cases that they could not get into the hospital and had to be treated in their own houses. The general health of the whole community was threatened by the constant presence of so much fever in the town.

THE FIRST STEPS TAKEN.

As agent of the board of health I felt that some decisive action should be taken, and after consultation with the government physician and other leading medical men, we came to the conclusion that the plan feasible under the circumstances was to introduce a system of dry-earth closets, and there being no public moneys available for the purpose, the system would have to be supported by popular subscription.

I therefore applied to J. R. Wilson, of the Volcano stables, for him to haul away the closet deposits and general garbage. The best terms I could get from him was \$60 per month for each one-horse team required. This included driver, but not helper.

I then personally, with Chinese, Japanese, and Portuguese interpreters, interviewed nearly all the householders of the lower part of the town and the merchants, and got subscriptions for about \$75.

with, mostly from Japanese and Chinese. A few of the white merchants subscribed, the most liberal being the Hilo Mercantile Company, with \$2.50 per month, and the other subscriptions running from that amount down to 25 cents per month, while some of the white merchants refused to subscribe at all.

As the amount raised was not enough to pay for two carts that would be required to remove the garbage, I arranged with Mr. Scott, manager of the Hilo Sugar Company, to do the hauling for the money which I could collect, less 10 per cent for collecting, the fertilizer obtained being supposed to be of some value to make good the shortage.

THE TIME THE SYSTEM WAS FIRST STARTED.

We began collecting in May, 1899. I detailed a police officer to look after the work, and allowed him the 10 per cent for collecting as extra pay. Prison labor was used to remove the accumulations from the privies into containers, which were carried out to the Hilo Sugar Company's cane fields by the plantation carts. A few prosecutions judiciously instituted soon had the effect of closing nearly all the privy vaults in the low part of town and the substitution of dry earth closets.

THE DEVELOPMENTS DURING THE PLAGUE QUARANTINE TIME.

When the bubonic plague developed in Honolulu in December, 1899, the garbage system was running smoothly and made the extra cleaning of the town comparatively easy.

During the month of January, 1900, Mr. Scott, of the Hilo Sugar Company, notified me that the amount of garbage had increased so much that he must receive more money or give up carting the garbage, and upon appeal to the subscribers, February 1, 1900, an increase was obtained of about 25 per cent.

Mr. Scott then notified me that he would have to give up the business because he found there was so much broken glass going into the cane fields that not only the workmen, but the cultivator mules were frequently cut by it, and he severed all connection with the service at the end of that month while the plague was still raging in Honolulu.

THE PRESENT SYSTEM.

On March 1, 1900, the present system was established, because something had to be done. It was in the midst of the plague quarantine. We were cut off from communication with the government in Honolulu, and they had their hands full with their own troubles. The down-town residences were nearly all supplied with dry-earth closets which could not be neglected, even for a few days, without risk of dire results. No public funds were available, and we were unable to raise money enough by subscription to regularly hire teams to do the hauling, and there was no place within reach of town to haul it to, where it would not become a nuisance.

Being to a certain extent responsible for the starting of the garbage removal and dry-earth closet system in the first instance, I felt that a special effort should be made to keep it going, and so borrowed money and bought carts, harness, and mules, and had the work continue with-

out apparent change, except that prisoners were used to do the the money collected from subscribers being used to pay for feed the mules, the rent of land to dump the stuff on, and for the necessary repairs and additions to the plant, the extra distance hauling in more wagons and draft animals.

THE GARBAGE DEPOSIT GROUNDS.

When the Hilo Sugar Company gave up taking the garbage from the plantation we were unable to find a suitable place accessible to the town for a garbage dump. I used a vacant lot at first, burying the garbage in the closet accumulation in trenches and making a great pile of garbage and rubbish, but the pile soon became offensive to those who lived near. I finally leased a lot from the Waiakea Mill Company, east of the town, at a rental of \$200 per year, which I thought but less than it would cost to haul the stuff up hill any distance from town. I built a road to this dumping grounds with prison labor, the road being built past the government quarry, past the board of health pesthouse, and then on a future city street extension as laid out by the government survey department.

TITLE AND OWNERSHIP OF THE PROPERTY.

I have bought everything in my own name and as a private individual. This was because I had no authority to incur any expense without the board of health or to lease land, either as agent for the board of health or as sheriff of the island. There has been but very little change in the section covered by the garbage system; in fact, two years past the Hilo hospital has never once been filled to capacity, and month by month the system has improved, so that the town is now in very creditable shape from a sanitary point of view.

The business has increased gradually from 2 carts and 2 small wagons at the start to the present outfit, which consists of 2 large town wagons, 2 small wagons, 3 carts, and a total of 11 head of draft animals.

These are horses and mules kept in a perfectly sanitary stable in the corner of the jail yard. The cost of this stable was paid from the garbage collection money.

The collections of \$70 to \$80 per month to begin with have increased to an average of \$200 per month now. There has so far been no loss in the business other than that the total plant is now worth about \$2,200 and the indebtedness is reduced to \$1,400, and if no serious accident occur among the draft animals the indebtedness should be cleared up in three or four years, unless the town should grow so as to require an increase in the size of the plant.

I can only add that representatives of the board of health, the department of public works, the attorney-general's department, and the grand juries have investigated this matter, and have approved the same.

Respectfully submitted.

L. A. ANDREW
Sheriff of Hilo

the honorable members of the Committee of Inquiry upon Hawaiian Affairs appointed by the United States Senate.

GENTLEMEN: We, the undersigned American citizens of the respective terms of residence in Hawaii and occupations set opposite our names, respectfully represent that we view with satisfaction your inquiries into the condition and needs of Hawaii and sincerely pledge our support to every measure calculated to establish in Hawaii those great principles of justice and right of which the American nation is the chief exponent.

Our condition to-day is critical. Our people have been harassed by the plague, and many of them impoverished or the first necessary incident to its extinction. Our government has been deprived of all of its revenues, and our banks and financial institutions and under any contribution by the majority segment of the mainland of Hawaii or more of gold collected at our manufacturing. Our chief industry is suffering from the low price of sugar and the scarcity of labor, and the entire community, regardless of race or of social station, feels the resulting financial stringency. Our mortgage indebtedness has reached an unprecedented figure, and is still increasing.

In this unhappy condition we have sought diligently for relief in a proper adjustment to our conditions. Our entire industrial and political situation is being subjected to the most searching and anxious scrutiny, that nothing be done to augment our difficulties or nothing omitted that might relieve them.

We ask through you for assistance from Congress. And though our isolated position in the Tropical group is a real and no mechanical question of American law to meet our special conditions and requirements, we are convinced that such abrogation of national statutes in the special case of outlying territories is reasonable and necessary.

We respectfully request your support of the following measures:

- I. A measure providing for the payment of the United States Government of the awards of the courts of the islands.
- II. Such a provision by Congress for the total expenditure of the islands receipt to equal those that constant shall to our resources.
- III. A law to permit the admission of a reasonable number of Chinese and Japanese laborers under such proper restrictions as shall limit them to agricultural labor on the plantations, and effectually bar them from commerce and trade.

In support of this last request we submit the following:

Since as Hawaii is considered the admission of such labor will afford the foundation upon which a progressive and prosperous industrial and agricultural policy can be based.

And since labor will not be a competitor of the American and Hawaiian sugar producer supported by tariff, you will realize the necessity of the French and German sugar by Hawaiian sugar made an equal as capital in American mills with American raw sugar, and the sugar to market in American locations.

It seems therefore that in thus modifying the application of the laws we meet the present requirements of Hawaii, you will be acting in a wise and liberal manner the national policy of promoting the development of newly acquired domain. The results of your action will accrue in our case not merely to our entire

Hawaiian citizenship, but also to the merchant, manufacturer, laborer on the mainland, of whom we shall be able in the future to make even larger purchases than in the past.

HONOLULU, *September 26, 1902.*

Hon. JOHN H. MITCHELL,

Chairman of subcommittee of United States Senate

Committee on Pacific Islands and Porto Rico, Honolulu.

SIR: By the mail just to hand ex steamship *Mauna Loa*, I have received the inclosed memorial, signed by the principal coffee planters of Kona, island of Hawaii, which, unfortunately, has not reached here in time to be presented during the regular session of your committee.

I hope, however, that the same can be included in the records of the commission, and should you desire to ask any questions I shall be pleased to wait on you at your convenience.

Very respectfully, yours,

F. J. HUMBURG.

HOLUALOA, KONA, HAWAII, *September 22, 1902.*

At a public meeting of coffee planters and others interested in coffee culture, held at the schoolhouse here to-day, Judge Clark, chairman, F. E. Hime, secretary, a committee, of Messrs. Bruner, Wallace, Muller, Cockburn, Maydwell, and Hime, was appointed to draw up a memorial giving for the information of the delegation a brief review of the coffee industry in Hawaii.

The committee submitted the attached memorial, which was then read, unanimously indorsed, and signed by those present.

It was further decided to ask Mr. J. F. Humburg, of Honolulu, to appear before the delegation now sitting in Honolulu and on our behalf to present to them our memorial and to give to that honorable body all the information possible on the subject of coffee culture in Hawaii, the difficulties under which it is suffering at present, and how it may be fostered and encouraged by action of Congress at their next sitting.

GEORGE CLARK, *Chairman.*
F. E. HIME, *Secretary.*

HOLUALOA KONA, HAWAII, *September 22, 18*

Hon. J. H. MITCHELL,

Hon. J. R. BURTON,

Hon. A. C. FOSTER,

Subcommittee of the United States Senate

Committee on Pacific Islands and Porto Rico.

SIRS: The undersigned coffee planters and residents of North South Kona, island of Hawaii, beg to submit for your consideration the following memorial on the condition of the coffee industry. We earnestly invite your attention to our need of assistance in the protection, and ask for a duty or its equivalent of 3 cents a pound.

Hawaiian coffees are sold in the market in competition with the highest grades of mild coffees produced in Mexico and the United States. While all coffees have been affected by the production of low-grade coffees in Brazil, the superior grades of coffee produced in the Central American States, Porto Rico, and the Philippines do not come into direct competition with the low Brazilian grades. They have fallen very materially in price in the last few years as a result of the immense overproduction of Brazilian coffees. As there is a large and increasing surplus of Brazilian grades of coffee in the markets of the world, the stocks of mild coffees have not accumulated, which distinctly shows that these grades are capable of considerable increase of production.

The districts of North and South Kona have been producing coffee for a great many years, and the industry has been the main support of the money crop of the bulk of the population. The plantations are mainly in small holdings. In consequence of the recent low price of coffee, about one-half of the area in coffee has been neglected and abandoned. At the present time a great many of the people are suffering on account of the low price of coffee.

The coffee industry is capable of indefinite extension on these islands and appreciating this fact, the old Hawaiian government gave to the industry all the encouragement it could, by a duty of 6 cents a pound and exempting coffee plantations and machinery from taxation for ten years. As a consequence of this encouragement a great many people entered the industry, and great quantities of machinery were imported and mills erected, until at the present time there is sufficient machinery and mills on the islands to take care of ten times the present production.

The total exports of coffee from Hawaii for the fiscal year ending June 30, 1901, was 25,622 bags of 100 pounds each, of a value of \$304,606, or nearly 12 cents per pound. This was the customs valuation and the values were based on what exporters expected to receive, and it is undoubtedly greatly in excess of what they actually realized. The figures for the last period are not known, but they show a great falling off and emphasize the great effect the low price of coffee has had on the production.

Hawaii and Porto Rico both have produced twice the quantity of coffee now produced, and some protection would revive the industry in these countries, which are at present producing 5 per cent of the consumption of the United States; and as the importations from the Philippines of low grades of coffee are 80 per cent of the entire importations, that Porto Rico and Hawaii are now producing 25 per cent of the importation of mild or superior grades of coffee. Very little Porto Rican coffee comes to the United States by reason of better markets in

and recent dispatches state that the President on September 6 proclaimed an agreement entered into with the Government of France on August 22, last, extending an important trade advantage to Porto Rico by the admission of the coffee produced on that island to the French markets at the minimum tariff rate.

Coffee is about the only industry that is capable of extension on the lands of Hawaii that can be taken up by the small farmer and family of limited means, and the past and present productiveness proves that large crops can be raised here, and with a small amount of protection the industry would be remunerative, and be the means of benefiting all those who have small holdings on the islands.

The United States are now paying out over \$60,000,000 annually in the purchase of coffee, and it is the only great agricultural industry that the newly acquired American territory can produce in very greatly increased quantities that has no protection. Coffee is now produced in countries that have cheap labor and a depreciated currency, and in return for the immense sums annually paid to these countries in the purchase of coffee the United States are receiving in return only a fraction of the trade of these countries. As instance Brazil, for the fiscal year ending June 30, 1901, exports from the United States over 11,000,000 and imports into the United States over \$70,000,000.

We in Hawaii, under American rule and higher standards of living and higher-paid labor, are unable to compete with the great coffee-producing countries without some protection, and we therefore repeat our request for assistance in the way of protection and ask for a duty or its equivalent of 3 cents a pound. The Philippines, Cuba, Porto Rico, and Hawaii can produce all the coffee required for the consumption of the United States, and all that is necessary to achieve this result is the imposition of a high duty on coffee. This would at present and for some time to come raise the price very little to the consumer on account of the great overproduction of coffee in Brazil, and in a very brief period there would be a sufficient home production of coffee of a superior grade.

We are, very respectfully,

Wm. W. Bruner, Robert Wallace, Waldemar Müller, Ab Cockburn, I. E. Himes, Jno. Hind, Alice F. Beard, Thomas C. White, Mrs. Isabella McDougall (G. McD.), South Lona Agricultural Co., Ltd. (per G. W. McDougall, manager), W. J. Yates, H. K. Bryant (per F. R. G.), Frank R. Greenwell, Jas. Cowan, J. A. Maguire, R. O. Woods, H. H. Smyth, T. Gaspar, J. Kaelemakule, L. S. Aungst, George Clark, John Greig, J. K. Nahale, Guy F. Moydivell, J. W. Keliipoa, Thomas Silva, M. L. Gordon, A. McWayne Estate (W. D. McW., manager), John Sarnoa.

HONOLULU, HAWAII, *September 9, 1902.*

Hon. J. H. MITCHELL,

*Chairman of Senatorial Investigating Committee
of Honolulu, Hawaii.*

SIR: I have the honor to submit to your honorable committee the following sentiment of the real American citizen residing in Honolulu for your consideration of the following facts that have destined these

islands to their present terrible condition, as we are to-day in a civil eruption, an active volcano between the three departments, the executive, legislative, and judiciary, a disturbing element against American tradition in a foul atmosphere of Asiatics with bitterness toward Americanism, and they are protected by the courts and the government.

The facts that the Republic of Hawaii was born amid the throes of a tropical revolution and the president of the so-called republic is nothing more nor less than a dictator while enjoying the title of president enabled him in a measure to disguise the real scope of his official acts. The same party is now governor of this Territory and seeks to perpetuate all of the conditions which existed under the so-called republic.

The provision in the organic act that the governor has every executive department of the now existing, it would be difficult to imagine a complete centralization of power in the hands of executive authority.

We are to-day between many fires, namely, the missionary element, the timers, the natives, and the Chinamen. The missionary element is disappointed, as for many years they shouted themselves for American customs and liberty. Anybody could imagine that they were honest and sincere, but it now really appears that a considerable number of the liberty advocates committed perjury or lied to their senses as the very first real test of Americanism in this Territory found them wanting. The claim of the transition period and our flag described in the Constitution is not a struggle to hold the few illegally convicted persons, but deeper in the bottom is the period of land grant leases awarded of lands which belong to the United States government, and also they ridiculously desire to repel the restriction on surrender to them the custom duty, even to suspend the Constitution in their favor.

The old timers are composed of British. Notwithstanding they swore allegiance to the United States, they are jealous and in fact they claim that these islands, in fact, belong to Great Britain and they are generally opposed to American tradition.

The natives are vehemently protesting against Americanization of their land and depriving them of their beloved queen.

The Chinamen, who have here the most protection, as to every litigation against Americans and all the business is in their hands, are the greatest enemies to Americans. Woeful and shameful for an American to have him a lawsuit with a Chinaman.

In regard to the leper settlement it is only a money-making scheme which the committee can easily discover. It became so far that the killing of an American is a crime. Sometimes a young man with an honorable discharge from the army of Manila applied for a position on the electric road. The answer he received that Americans are not employed here. He was thunderstruck that in American territory the killing of an American is a crime which even in Russia is an honor.

In regard to the fire claims, this is a fact that many thousands of dollars of the people's money was either wasted or illegally used in the bubonic plague. It is generally believed by a great majority of people glancing over the columns of a newspaper inclosed—a son of the cost of stamping out the cholera epidemic of 1895 was the cost of the bubonic plague in 1900, the former cost about \$100,000 and the latter cost about \$677,000, eleven times as much. The whole work of the bubonic board of health should receive

ning investigation at the hands of the committee is apparent. were contracted and paid without any semblance of authority; blame for the wasteful use of public funds must be placed where belonged.

The only remedy for Hawaii, the deliverance of this Territory from dead, broken condition, is that Hawaii wants an active, competent man for governor, who has no skeletons in the closet, who is not afraid of his shadow, who can figure out the prospective revenue of the Territory, and who can adjust the public expenditure in accordance therewith, with business principles, farsighted, and push ahead; and not before, this Territory, which is gifted by nature, will become the American paradise of the Pacific Ocean.

As to my own personal grievance, I will state it later if the committee will permit me.

Your obedient servant,

ISAAC NAAR.

BONIC BOARD OF HEALTH MADE THE DOLLARS FLY—EXPENSES OF THE LATE QUARANTINE COMPARED WITH THOSE DURING THE CHOLERA OUTBREAK—THE COST IN ACTUAL MONEY SO FAR MORE THAN TEN TIMES WHAT THE FORMER BOARD PAID—FABULOUS AMOUNT OF FIRE LOSSES REMAIN UNSETTLED.

Within the last decade the city of Honolulu has been visited by two surges of infectious and contagious diseases, which have necessitated summary measures in order to stamp out the trouble and protect other ties from danger of becoming infected, as also the other portions of this group of islands.

Quarantine of the strictest type was placed about the town on both occasions; arbitrary rules emanating from the board of health temporarily overrode both police and military regulations; even the schools and churches were placed under the rules prohibiting the gathering of people.

In the quarantine on the occasion of the visitation of cholera the work was done promptly and well, and by the vigorous means employed the cause of the trouble was sought out, dragged to the surface, and readily killed. For in this beautiful city there are a thousand and one advantageous conditions for fighting an epidemic such as beset the port, although there are many other conditions of quite the opposite character. The splendid public spirit of the people helped official action to an immeasurable degree, and in spite of the fact that this city lies well within the confines of the torrid zone, a short time witnessed the subsidence of the cholera and a return to commercial and social contact with the rest of the world.

Those were trying and exciting times, but the people stood the test, and the scourge was checked, controlled, and finally stamped out by the united efforts of all.

The outbreak of Asiatic cholera in 1895 will long be recalled with horror by the residents of this city, and the more recent presence of the bubonic plague is still very fresh in the minds of all. It took thirty days to destroy the hold of the cholera and effectively rid the city of the dread disease, while the grip of the black death remained on the city's throat for nearly or quite three months.

CHOLERA BREAKS OUT.

In the plague scare of 1895 the first case of cholera was positively diagnosed as such, on August 17, and the last of the 91 cases reported came to light on October 2. The progress of the disease was rapid in a comparatively short space of time, and at the expiration of a few weeks from the discovery of the first case Honolulu was in a sanitary condition than she ever was before, while not a trace of the terrible disease remained, except in the saddened memories of those whose dear ones were claimed as sacrifices.

The measures adopted by the board of health under W. C. King were radical and splendidly effective. Stringent rules were enforced regarding the use of fish and all manner of sea food. The town was districted so that upon the appearance of a suspicious case the facts were at once discovered by the physician in charge of the district, and the case was immediately isolated, while every means for preventing a spread of contagion was applied and the best treatment given the unfortunate patient.

Guards patrolled the coast and allowed neither egress nor ingress to the city. Great stretches of taro patches were destroyed by the board. Many other wholesome rules were also promulgated, some of which were distasteful at the time, but which in the light of subsequent events were proved to have been for the best.

GREAT ECONOMY SHOWN.

The cost of stamping out the terrible cholera, from which it occurred in about six weeks in the heat of a tropical summer, was a sum of \$61,697.55.

This sum, according to the complete report of President King, includes the pay of employees, hospital expenses, transportation, the burial of the dead, food and clothing, damages and effects destroyed, buildings erected for the accommodation of those who were removed from infected localities, the cost of disinfecting plants, and all incidental expenses.

Great care was sought to be exercised and accurate accounts kept of all transactions.

Among the expenses was the pay of patrol guards—on foot and boats in the harbor and in Nuuanu stream. The guard duty performed by large numbers of the citizens in the adjacent districts of the island was supplementary to that of the paid guards and employees.

Sixty-one thousand six hundred and ninety-seven dollars and five cents! And all the bills paid and all trace of the disease.

The correctness of W. O. Smith's report has not been questioned. The actual cost of stamping out virulent cholera in the summer of 1895 was only \$61,697.55. The means for handling a terrible epidemic were not wanting.

So much for the cholera.

BUBONIC PLAGUE.

During the week ending the 16th day of December, 1895, a case of bubonic plague was discovered in this city.

and by 70 other cases of a similar character. The last case was died at the detention hospitals in the latter portion of March, 1900, and in all 61 of the unfortunates died.

There were fewer cases of plague than of cholera, and fewer deaths resulted than in the cholera epidemic. The quarantine regulations were of a similar nature in both epidemics, and the precautions taken in both cases something alike. At any rate the end desired was accomplished, and the disease was checked and stamped out. It took less time to control the cholera than the bubonic plague, but perhaps the large amount of money the late plague board had to spend would explain why it took but six weeks to drive out the one and more than two as long to suppress the other.

Those afflicted with the cholera were mostly natives, 82 out of the cases coming from among the Hawaiians. There were also 7 cases of cholera among whites and only 2 Asiatic cases. The bubonic plague affected only 18 natives and 7 whites, while 46 Mongolians felt its terrific grasp.

CARE VERSUS EXTRAVAGANCE.

Few will say that the epidemics were equally well handled. At the onset of the cholera outbreak quarantine was declared, and the disease was pursued with unremitting watchfulness until the last trace of the disease had been destroyed. The plague visitation was not taken care of with the same grasp and strength, although the means available for chasing the unwelcome visitor were far more ample.

In the first place there was hesitation and uncertainty where there should have been decided action. Then measures were put in force only to be rescinded within the day. And so it continued until the rascalous and stubborn enemy was well entrenched in the purlieus of Chinatown and sparsely sprinkled over the whole city.

Thousands of Japanese were placed under guard at the drill shed, and hundreds of Mongols were held at the detention camps. The cost of keeping these people in quarantine was enormous when compared with the amount they would ordinarily spend for their own keep while in liberty. It has been even said that the cost per capita per diem to hold the Japanese at the drill shed was \$1.28 and the Chinese at the detention camp a proportionate figure.

As it costs the average Jap about 15 cents a day to live joyously and at the fat of the land, the use made of the balance of the money in supplying them with the food they made such a howl about is decidedly in the dark. But, perhaps, the Japs demanded four or five courses at dinner, and may be the liqueur for their cafe noir was expensive and hard to get. And then, again, may be it was not the high prices and over-priced grub that made the bills so boisterous. Who can tell?

But the high cost of keeping the Mongolians in temporary durance was not the main difference apparent in sizing up the suppression of the plague. It was only one of them.

The principal circumstances wherein the cholera board differed in its management of its quarantine from that of the bubonic board was in the total cost of ridding the city of the pests.

SOME COMPARATIVE FIGURES.

In cost \$61,697.55 to get rid of the cholera, but the bubonic board spent \$677,500 to partially pay for stamping out the plague. There

were some fire claims caused by the suppression of the cholera in relation to the amount charged against the board, but the total figure would not approximate \$100,000 for every possible expense. Claims of a similar character for \$2,000,000 and upward are still upon the bubonic board.

Here is a little table that will raise a question in the minds of people:

Cost of cholera quarantine	\$61
Duration of cholera	
Cases of cholera	
Deaths from cholera	
Cost of plague quarantine	\$8
Duration of plague	
Cases of plague	
Deaths from plague	

It will be readily seen that there were more cases of typhoid suspected cholera than plague, more deaths from the cholera than plague, less than half the time required in putting down the cholera than the plague, and the price was less than one-tenth of that which was paid to exterminate the plague.

COMPETENCE AND INCOMPETENCE.

Shortly after the cholera epidemic made its appearance the men in control of the board of health was to spot where the disease was discovered and to apply all manner of disinfectants and preventives.

Cholera is of a much more subtle nature than nearly all the great epidemic diseases. It spread in this city until there were well-defined cases all the way from Waikiki to Chinatown, and all the territory covered by the pest, the cost of stamping out the disease and the further cost of settling all subsequent claims for damages. The entire amount expended was appreciably less than \$100,000.

On the other hand, the bubonic board displayed a vacillation in confronting the commencement of the quarantine at the outbreak of the plague. The board was clothed with autocratic powers, but its predictions were as absolute in their effect as those of the cholera board, yet the grasp of the bubonic board was weak at the outbreak of the plague. Its actions were swayed and influenced by the clamor of the people.

The great mistake made in handling the plague was in not confining the unaffected areas of the city in a state of isolation instead of the restrictions on the particular spot where the disease was discovered. Then within the lines of the quarantine of the Chinatown residents of the quarter were allowed to go and come where they pleased and had immediate access to the pest spots of the localities. The visiting of the sick by the Chinese infected the whole of the people.

When the board of health finally came to a realization of the gravity of the situation it was determined to use fire to destroy the infected localities. As the plague increased the infected building was burned.

Whenever a suspicious case of sickness occurred the infected building was burned. A craze seemed to take possession of the people and times adjoining property was destroyed in the effort to destroy the pest.

The lack of restrictions in regard to free access to the infected localities within the quarantine lines kept the plague alive and

judgment on the part of the board. But the error most keenly felt, that was made by the board in dealing with the plague, was that the residents of these great areas had to be provided for out of public treasury. Food was short as to supply and high in price, little or no system was applied in creating indebtedness or in the bursement of money. After the disease had succumbed several thousands for large amounts were presented and paid, and the board is still wondering who authorized the contracting of them.

WHERE IS THE MONEY?

The fire losses, none of which have been adjusted, have been variously estimated at from \$1,000,000 to \$10,000,000. The conservative people place the figure at somewhere near \$2,000,000; and from recent appearances it would seem that the prospect of final payment as far as ever from the point of liquidation. A suggestion was advanced sometime ago to have the legislature at the coming session take upon the matter, but for some untold reason the memorial was shelved. In the meantime the people who are not interested in getting fire loss adjusted are beginning to wonder why it costs ten times as much to handle the plague as to suppress the cholera.

An effort is going to be made to try to find out.

Why was it?

In the honorable subcommittee of the United States Senate Committee on Pacific Islands and Porto Rico.

GENTLEMEN: Your memorialists, representatives of the Chinese community in Honolulu, deeming it an act of Providence that directed you to come to these faraway islands of the Pacific to investigate the affairs of the youngest Territory of the United States of America, respectfully represent on behalf of the sufferers by the great fire of January 20, 1900:

That during the months of December, 1899, and January, 1900, bubonic plague was said to have obtained in Honolulu, and measures were taken by the local board of health to stamp out the deadly malady. At first buildings where plague patients had died were ordered to be destroyed by fire, but finally other buildings were burned at the discretion of the board of health. A large proportion of the structures within the plague-stricken district, known as Chinatown, were destroyed as a result of the drastic measures instituted by said board of health. The various fires that took place prior to January 20, 1900, did not cause any very great calamity, because they were kept under control, but the fire of January 20, 1900, produced such disastrous results that the effects of it are keenly felt at this present day.

The board of health had decided that certain buildings at the rear of Kaumakapili Church should be burned on that unhappy day, and at an early hour torches were applied to the buildings at the rear of the church. Soon there arose a high wind which rendered the flames more furious so that burning cinders were carried to the top of the steeples of the church. Before long the steeples were in flames, and owing to their height all efforts to quench the fire were baffled. From this high eminence burning cinders were carried by the strong wind which prevailed to the other buildings of the district, and in a very short time the whole of Chinatown was in flames.

The people confined within the narrow limits of the plague-district rushed out into the streets for safety, carrying with them the most valuable articles, but these the guards seized and cast by the burning buildings, whereupon the people had to leave behind their earthly treasures, which they had accumulated by years of unmitting toil. The flames drove them on toward the entrance to the quarantine district. Here they were met by soldiers with bayoneted rifles and by citizens with pick handles obstructing their exit.

At this juncture excitement was high and there was imminent danger of bloodshed. But better counsel prevailed, for the civilities personally allayed the excitement of the multitude and they were told that the Government would surely recompense the losses sustained. Relying upon the representations of the authorities, the people of Chinatown subdued their rising tendency to riot and were driven meekly in hordes to the old stone church and to the various detention camps, where they endured untold hardships.

When the people were released from the detention camps that their homes were made desolate, and many were forced to live on Government highways. Trusting, however, to the representations of the authorities that they would be recompensed for their losses, the refugees of the great fire bore their hardships with Job-like patience. Without employment or occupation, they were forced to live on public and private charity, with the hope that the Government would soon pay their losses, when they would be able to build up their homes and places of business.

But months and years have passed since the great fire, and no satisfaction has been made by the government to pay the losses sustained. Impatient at the delay of the government to reimburse them, many of the sufferers became despondent and took their own lives; others worried over their losses and wondering whether they would ever regain their former status in the community which years of unremitting toil had established, brought on sickness and death, leaving their wives and families in helpless circumstances; and still others were driven to suicide.

Notwithstanding the untold sufferings which the people endured, the court of claims, created to adjust the claims of the sufferers, has increased their sorrow by cutting down their claims to an average of 50 per cent without reason other than that the government was insufficient to pay their claims in full. But the government is unable to pay even according to the award of claims, partly owing to the deficit in the Territorial treasury principally to the fact that the appropriation made by the legislature was ultra vires, in that it exceeded its powers and conditions imposed by the organic act as per section 55 of the constitution. Consequently, the warrants which were to have been issued have been withheld.

In view of the present financial condition of the Territory; in view of the illegality of the appropriations made by the territorial legislature; in view of the fact that one and a half per cent of the customs collections of this port is yearly transferred to the coffers of the Federal Government; and in view of the fact that the people are still suffering from the effects of the great fire,

either directly or indirectly, your memorialists humbly pray that, as you have so providentially come into our midst, you may make enough investigation of the distressing conditions of the sufferers by great fire, and use your influence at the next session of Congress to urge the passage of a bill appropriating an amount large enough to pay the claims of the sufferers in full; and for this your memorialists will ever pray.

We have the honor to be, gentlemen, your most obedient and humble servants,

W. CHAS. AHPOOK.
C. KE. AJ.
L. AHLO.
WONG CHOW.
CHUN WING.

Dated September 13, A. D. 1902.

HONOLULU, TERRITORY OF HAWAII, U. S. A.

From the honorable subcommittee on Pacific Islands and Porto Rico selected by Congress to investigate conditions and government of the Territory of Hawaii.

GENTLEMEN: Having been practical and actual farmers in the State of California from 1846 to 1879, at which time we came to the Hawaiian Islands (where we have continued farming to the present time), we feel that our experience in this line in this Territory during the past twenty years qualifies us to speak intelligently upon the subject of diversified agriculture of Hawaii.

We first located on the island of Maui, where we entered into an agreement with the Hawaiian Commercial and Sugar Company to plant cane, with the further agreement to sow grains of all kinds and plant vegetables on the lands of the company.

Upon our arrival we were told that diversified farming could not be made profitable in Hawaii, but after looking over the island and investigating the soil we concluded, like many who preceded and succeeded us, that those who had tried farming previous to us did not understand their business. Like all newcomers, we based our opinions upon conditions existing on the mainland. To us the most favorable conditions of climate and soil were presented and, against the advice of those who had tried general farming in former years, we plowed and sowed to barley and oats several hundred acres. It came up and looked well until it was about 1 foot high, when it was attacked by worms and the entire crop was destroyed. We were not discouraged, however, and the following year we sowed all the land we had cultivated the first year, and added quite a lot more; the result was the same as in the first—no crop. About this time the idea occurred to us that those who tried farming previous to our arrival had arrived at about the right conclusion, viz, that general farming was not a profitable investment, and we did not try it again on Maui.

In the fall of 1882 we came to the Hamakua district, in the island of Hawaii, and took up cane planting, general farming, and stock raising. The land under our control extended from an elevation of 200 feet at the seashore up to 10,000 feet, which is the limit of the vegetation.

On this tract of land we have tried all kinds of grains during twenty years it has been in our control and at all elevations 1,250 feet up; no results were obtained from wheat, barley, or corn. They all came up well and did well until they were about a foot when they were always attacked by worms, as they had been on the mainland. We never had even pasture for the above grains. We have raised corn and potatoes more or less every year, and we have been able to get a paying crop from these last two for about one year out of five, but the losses have always exceeded the receipts to such an extent that we have practically given up this kind of farming, and are now willing that some one else shall reap the fortune and glory that has been obtained from general farming in the Territory of Hawaii. In my candid opinion, based on experience covering a period of twenty years in the Territory of Hawaii, that general farming will never pay until science comes to the relief or aid of farmers and their enemy for the pest that infest our soils.

We will add that in the forests, using virgin soil, the chance is even that there will be a paying crop the first year, but in the second year all the insect pests that inhabit our soils, with their relatives and friends, will be there waiting for the innocent and unsuspecting farmer's crop to get well started, when they will attack it, and all his efforts his crop is doomed; the result is that farming, where general farming is concerned, are practically abandoned. As for anything else, there are exceptions to the rule, but cases where a paying crop has been obtained are so few, and the small tract favorable to the return so small in comparison to the time and labor required, that it hears but little about them.

In 1889 we began the growing of coffee, which was selling at that time in the market at from 18 to 22 cents per pound. As well in this district and in many other parts of this group, that we had at last found something outside of the sugar industry that would pay. We continued to extend the cultivation of coffee for a few years ago, and now have about 400 acres, but after we had our area the price went down, our last account sales were \$95.10 net for 1,000 pounds of cleaned coffee, while the cost of production and marketing was \$105.25 for 1,000 pounds, a net loss of 1 cent per pound for every pound produced. The cultivation is made up as per memorandum herewith attached. The expenses of owner or manager and family are not included in the estimate, only the actual labor, etc.; the coffee being under the management as the sugar plantation we do not have this expense. A great many homesteaders in this district having lost interest in the coffee they picked last year did not harvest their crop, realizing the fact that they would save money by not doing so. In many cases they have left their homesteads, and have found employment on the adjoining sugar plantations.

In our own cases we have decided not to cultivate coffee any more, and what was once one of the most promising and profitable coffee plantations in the Territory of Hawaii is now nearly a wilderness, and this will be the end of most of the coffee plantations in this Territory unless there is something done by the United States to encourage its cultivation.

High cost of labor is much against it. Again, the time required to pick over at least three times to get the entire crop, as in the South American countries one picking suffices.

Again in most cases it is costly to transport it to the landings, freights are very high to Honolulu as you will notice by glancing at the memoranda attached. We are, perhaps, as favorably located to grow coffee successfully as any other planters in the Territory, for we can generally send men up to assist in picking. Again, when there is not work in the coffee the men are given work on the sugar plantation. Thus one works as an assistant to the other, whereas independent planters or those who have coffee only can not afford to keep the men between the time of the pickings and are obliged to depend on getting extra men when they are required. In many cases the men are not to be had and the coffee is not gathered owing to this shortage.

We therefore say that, without assistance to this industry, there will be left only sugar, rice, and stockraising, but with proper encouragement it can no doubt be made an industry ranking next to sugar. There is approximately 200,000 acres in the Territory suitable for the cultivation of coffee and it would soon be occupied.

There has been an agitation for many years both by the press and individuals to encourage small farmers to settle here. That it may be accomplished is the hope of every Anglo-Saxon in Hawaii, but it is preposterous to encourage people to come here until the coffee is protected in such manner as Congress may devise to put it upon a paying basis and until science has solved the problem of eradicating pests.

It has been demonstrated that of the various branches of agriculture tried in Hawaii, coffee is, up to the present time, the one best suited to the man of limited means. Nothing is more beautiful than a home in the center of a coffee plantation and there the American will find his surroundings most pleasant.

If the 200,000 acres mentioned can be settled on by American families, then this Territory would indeed be, not only the paradise of the Pacific, but the paradise of the world—a condition which can not in reality exist while sugar and rice are the only industries which may be profitably maintained.

JOHN M. HORNER & SONS,
By A. HORNER.

REPUBLICANS IN CONVENTION—PROCEEDINGS AT LENGTHY EVENING SESSION—PERMANENT OFFICERS AND DELEGATES ELECTED AND PLATFORM ADOPTED.

Progress Hall was brilliantly illuminated last evening. * *

A. G. M. Robertson, chairman of the committee on resolutions read the following report:

Be it resolved, We, the Republicans of the Territory of Hawaii in convention assembled, do hereby declare our adherence to the principles of the Republic of the United States, and, in so far as we can, pledge our hearty support to it and its policy.

We indorse the foreign policy of the Administration of President McKi congratulate the Republican party and its leaders on the position taken resulted in the annexation of Hawaii.

We appreciate and are thankful for the liberal terms of the act whereby constituted a Territory of the Union.

We look forward with eager interest to the laying of a cable that will connect the Territory with the mainland and the world, and to the speedy completion of the Nicaragua Canal, whereby Hawaii will become in fact the crossroads of the Pacific.

We favor the speedy enactment of laws for the establishment of such municipal governments as may be necessary to bring the conduct of our government into full accord with the theory of American institutions and the principle of self-rule.

"We declare ourselves in favor of the extension of the homestead principle and the enactment of such laws as will with the least difficulty and expense provide for the many."

We call upon all citizens and voters of the Territory who are in sympathy with the principles of the Republican party and in favor of good government to join with us and associate themselves with the party that has ever stood for liberty.

We believe the interests of Hawaii can best be trusted in the hands of those who have given to the country a Lincoln and a Grant, a Garfield and a McKi. Respectfully submitted.

A. G. M. ROBERTSON
GEO. W. SMITH
C. P. LAUKEA,
A. B. LOEBENS
A. N. KEPOKA,
Committee on Resolutions

The Hawaiian version having been gracefully read by the Hawaiian delegation, the platform was adopted amid prolonged cheering.

Delegates were present from every part of all the islands.

BY MR. A. HERBERT—VETERAN AGRICULTURIST MAKES REPORT—VIEWS ON LAND HOLDINGS—FREIGHT RATES—MONOPOLY OF CARRIERS—LEASED TRACTS—DESTRUCTION OF FOREST

To the Bureau of Agriculture and Forestry:

In accordance with your request to examine into and report on the condition of the government forest land, water courses, and other public lands, I submit the following report:

I have for the past ten years called the attention of the Bureau of Agriculture and of our government to how our once beautiful islands are destroyed by cattle and horses.

Thousands of acres of forest have been destroyed, hundreds of forest trees dead and dying. This is particularly true on government land under long and short leases. So much has been done at once to stop the destruction by fencing in and removing the worthless cattle and horses. Your attention is called to Chapter XXX, section 4, on forestry law.

In tours of inspection I notice with regret how the holders of small tracts, say from 5 to 50 acres, are decreasing and are being absorbed by the sugar promoters and land speculators. The decrease of small tracts is particularly noticeable among the native Kūlianas on Oahu and within the environment of Honolulu, which have passed into other hands. This is a stubborn, undeniable fact. We find the small native homesteads deserted; the young and middle-aged people have come to our seaports, only the aged and some children remaining.

This bureau should be the most important department under our government; even the paramount board of health should be subordinate. In Washington, D. C., when a hospital or a site for a school-house is desired, the Agricultural Department makes the selection for a location.

The three most progressive nations in agriculture in the world—the Germans and the Americans, and following them the English—have their agricultural bureau their leading department.

The Wahiawa, Oahu, and American homestead associations were organized a year ago under our homestead laws, and settled on barren unimproved land 16 miles from Pearl City and 10 from Waiāliā. In one year these sturdy farmers have done much with very, very limited capital, but determined to make for themselves and family a permanent home in our genial climate. Mr. Kellogg, one of the 12 settlers, said a few days ago that he had cleared \$200 from 1 acre of land in watermelons, tomatoes, and small vegetables. Also that he saved \$19 in freight by hauling one load of produce from his place to Honolulu and a return load of lumber in place of having it sent by rail.

A number of complaints come to this bureau from small producers of all the islands, complaining of the extortionate charges of our transportation companies, our two large island steamship companies in particular. We claim that our island steamship and railroad companies are not justified in taking the position that their business is to extract as much as possible out of the producer in order to show a credit balance.

We have on the island of Oahu alone over 20,000 acres of government land on which the lease expires in less than two years. This land fronts on the ocean, has government road, railroad, and telephone line running through it. Hundreds of American and European farmers could settle on this land—such men as we have at Wahiawa. There can be no injustice in having this land divided into small holdings, as the present lessees have had the land for the past fifty years for less than 6 cents per acre per annum. But settlers on such land must cooperate. Cooperation is the German farmers' stronghold. It is of various kinds. There are cooperative credit banks, cooperative steam plows, drainage, and irrigation. Cooperation is the key to success, and has started and saved many poor farmers.

Looking over the whole field of Hawaii's marvelous and varied industries, I feel an unshaken faith in the future prospects of our horticultural industry. In the next report I will call your attention to the silk, rubber, and other important industries.

It is of importance to this island that the truth should be told regarding the actual conditions here and the opportunities for a white immigration. A large number of Japanese are coming to these islands, mostly as contract laborers, for the nominal purpose of entering on the plantations in the sugar industry, but who subsequently find their

way to the towns of our seaports and enter into serious competition with the American and European artisans and small tradesmen. This is clearly undesirable. The Japanese, unlike the Chinese and Portuguese, are not agriculturally inclined.

A. HER

MEAT FOR HAWAII—HEAVY BEEF AND MUTTON HUI FOR THE ISLAND—A RANCH CHANGES HANDS—COL. SAMUEL PARKER HEAD OF THE NEW COMPANY—SUPPLY FOR THE FUTURE

One of the largest land deals ever chronicled in the records of the islands will be consummated on the return of the Hon. Col. Parker from the mainland.

For some time past Colonel Parker has held an option of purchase over the Humuula and Kaoha sheep stations on the island of Oahu comprising an acreage of 237,000 acres and immediately adjacent to his present ranch of about 300,000 acres and was only prevented from completing the purchase before his departure through a delay in obtaining a complete inventory of the stock carried.

The lease of this great property, which expires in 1908, is held by August Hanneberg, manager of Olowalu plantation, his brother-in-law of Honolulu, and Manager Gramberg, who together hold the 1,000 shares of the Humuula Sheep Station, which is valued at \$100,000.

With the real estate there is sold about 30,000 head of sheep, 600 horses, and also two shares in the Metropolitan Company.

The purchase price is said to be \$70,000. It is understood that Waterhouse & Co. were the brokers who brought about the sale, but upon inquiry there, beyond admitting that Colonel Parker had an option, they declined to give any information.

The Humuula Sheep Station is the ranch from which the greater part of the muttons of mutton are made for the local market, and the new ranch company, of which Colonel Parker is the representative, is to place a check on the present heavy drafts from that station and to serve the present stock to supply the rapidly increasing demand for meat on Hawaii.

This action will of course affect the local supply.

Graziers, landowners, and business men generally of Oahu have for a long time been considering or expecting a change in the management that has been taken by Colonel Parker. The population of the island is increasing very rapidly, and with the extension of the cultivation of the fields and the establishment of new plantations the past method of contracting. At the same time the call from this place for meat from Hawaii has become stronger and stronger from month to month. The agitation on Hawaii for "protection" of the meat supply of the big island has resulted in the formation of the proposal for a new company that will be a factor of the caliber of the Metropolitan Company, of this city, upon the same lines, but a more substantial corporation.

No less a personage than United States Senator Clark is to be a member of the new company.

HAWAII WANTS A HOMESTEAD LAW, AND MUST HAVE IT.

The two-column circular herewith is taken from the Hawaiian Gazette of November 3, 1899. (The Gazette has always supported the official acts of the Hawaiian land department and the officers of the Republic of Hawaii.)

The report of A. Herbert to the bureau of agriculture and forestry mainly shows that the very small holdings are failures and the very large leases are frauds.

The second column, headed "Meat for Hawaii," is nothing short of a Hawaiian meat trust, and in the deal it gets control, by assignment of lease, of 237,000 acres of public lands now the property of the United States.

That the deal as above stated was consummated is shown by the following from the Evening Bulletin, May 4, 1900 (published at Honolulu):

FRIDAY, May 4.

Hon. Sam Parker said this afternoon that the deal for the Humuula ranch was consummated and the papers would probably be signed this afternoon or to-morrow. The purchase is of the leasehold, which has about eight years to run, and covers 237,000 acres of fine pasture land, on which are 30,000 sheep and upward of 600 head of horses. The purchase price is \$70,000.

With this purchase and the lands already secured by Mr. Parker he will control nearly 1,000,000 acres of land on the island of Hawaii. The Humuula property will remain separate and distinct from the Mana estate. On being questioned, Mr. Parker said that the new purchase would have more or less bearing on the reorganization of the Metropolitan Meat Company, in which he was quite a heavy stockholder. He denied the often-heard statement that a new meat company was to be organized, but said that the reorganization and extension of the present company would take place at once and the new markets contemplated would be in working order very soon.

"I am now through with Hawaii," said Mr. Parker, "and shall next turn my attention to securing desirable lands on the island of Maui; from there I shall go to Lanai, Oahu, and Kauai in succession to secure whatever good land I can for the company."

"What will you do then?" was asked.

"Well," said Mr. Parker, with a straight Republican smile, "you may state that I will probably branch out toward Niihau."

To the everlasting disgrace of the Fifty-sixth Congress, the following provision relative to the public lands of Hawaii, which passed the House of Representatives April 9, 1900, was allowed to be stricken out by the conference committee:

Sec. 73. That * * * *Provided, however,* That all sales, grants, leases, and other dispositions of the public domain, and agreements concerning the same, shall be reported in writing each month to the Secretary of the Interior, who shall have authority to confirm, reverse, modify, suspend, and annul any of said transactions. That all of said transactions so reported upon which no action shall be taken by the Secretary of the Interior, within sixty days from the filing of such reports in his office shall thereupon and thereby be confirmed and ratified.

The Secretary of the Interior is hereby authorized and required to provide and promulgate the rules and regulations relative to all contests on the disposition of the public domain and appeals to him.

Can any sane member of Congress give any good reason why this provision was stricken out?

The Hawaiian Territorial bill, as passed by the Senate February 27, 1900, contains the following:

That the sum of fifteen thousand dollars, or so much thereof as may be necessary, be hereby appropriated, out of any money in the Treasury not otherwise appropri-

ated, to be immediately available, to enable the Secretary of the Interior to examine the laws of Hawaii relating to public lands, the proceedings thereunder, and all matters relating to public lands, including the selling, granting, leasing, or other disposition of the public domain and agreements or franchises concerning the same granted by the Hawaiian Government prior to the eleventh day of September, eighteen hundred and ninety-nine, and subsequent to the twelfth day of August, eighteen hundred and ninety-eight.

And to enable the Secretary of Agriculture to examine into all matters concerning agriculture and forestry and public roads in said Territory, which duties shall be performed with all convenient speed; and each of said officers shall report to the President of the United States, with recommendations upon the matters concerning which he is herein charged. The appropriation herein provided for shall be divided equally between the Department of Agriculture and the Department of the Interior as the necessities of the investigations of each shall demand.

Can any sane member of Congress explain why this proper and necessary provision was not included in the report of the conference committee and made a part of the organic act?

There is no answer, other than carelessness on the part of some and duplicity on the part of others.

By a provision inserted in the organic act, at the request of a special agent or representative of President Dole at Washington, the President of the United States is requested to approve of the acts of the Hawaiian land department from the 7th day of July to the 28th day of September, 1899; among other things to approve of 22 separate deals whereby the public lands of the United States in the Hawaiian Islands are disposed of to Japanese and Chinese, some of whom were at any time either citizens of Hawaii or of the United States—even the Hawaiian land law provided against such dispositions (see sections 31 and 58, land act of 1895, qualifications of land agent)—and is also asked to approve of as many more dispositions to corporations. It is clearly evident that the land department did not want any investigation of “land laws of Hawaii or the proceedings thereunder,” hence, the untiring efforts of their lobby in Washington to have such provisions stricken out. In place of the wholesale approval is provided for without investigation. The Hawaiian citizens here in search of homes on the public domain would like to know if it is the intention of Congress to have all the public lands of the Hawaiian Islands disposed of to corporations and to Japanese and Chinese, while they are almost wholly prohibited by reason of the high price of the lands so high for poor land covered with almost impenetrable forest high up on the mountain side, and by entering into contracts for the same on terms of payment that would make Shylock blush.

This association will send the land laws of Hawaii to the Hawaiian people applying for the same. (Write to American Settlers' Association, Oloa, Hawaii.) When you get the law you can judge for yourselves.

The land law for the disposal of the public lands in the Hawaiian Islands, the property of the United States, remains much as it existed under the Republic of Hawaii, and so thoroughly approved by the people in the islands that the Republican Convention assembled, at Honolulu, May 30, 1900 (which was a representative body of men that assembled in the Hawaiian Islands during the past five years, if not more, the legislature that was elected and adopted the following plank in its platform:

We declare ourselves in favor of the extension of the homestead law, and the enactment of such laws as will, with the least difficulty and expense, benefit the many.

This alone should be enough to convince any reasonable man that a change must be made. It would have been useless for the Republicans to put a ticket in the field without such a guaranty in their platform. A uniform homestead law for Hawaii is necessary and without delay. We therefore ask Congress, at its second session, to reconsider section 4 of the act approved April 30 and repeal the same, enacting in its stead a homestead law that will give an honest white man a chance to live in Hawaii; a law that will tend toward the development of the country; a law that will not turn back from our shores the practical American farmer, which has constantly been the result in the past.

Respectfully,

AMERICAN SETTLERS' ASSOCIATION.

EXHIBIT No. —.

CENSUS OFFICE,
Washington, D. C., November 20, 1902.

Hon. JOHN H. MITCHELL,
United States Senate, Washington, D. C.

SIR: Replying to your letter of November 16, 1902, I would say that according to the census taken in 1890, under the direction of the Hawaiian Government, the population of the Territory of Hawaii was 80,990, and that according to the returns of the Twelfth Census of the United States the population of the Territory was 154,001.

The approximate distribution of the population at these two censuses, according to color and race, is as follows:

	1900.	1890.
Hawaiians.....	29,799	34,436
Non-Hawaiians.....	7,867	6,186
Americans.....	28,819	18,999
Europeans.....	26,767	17,002
Chinese.....	61,111	12,360
Others.....	a 648	b 1,007
Total.....	154,001	89,990

a South Sea Islanders, 415; negroes, 233.

b Polynesians, 668; other nationalities, 419.

These figures have been compiled from the report (see page 29) of the Commissioner of Labor, transmitted to the President pro tempore of the United States Senate under date of February 4, 1902, and from the report (see insert opposite page 16) of the general superintendent of the census of Hawaii for 1890.

Very respectfully,

EDWARD MCCAULEY,
Acting Director of the Census.

EXHIBIT No. —.

TREASURY DEPARTMENT,
OFFICE OF THE LIGHT-HOUSE BOARD,
Washington, November 20, 1902.

Hon. JOHN H. MITCHELL,
United States Senate, Washington, D. C.

SIR: The board has the honor to acknowledge the receipt of your letter of November 15, 1902, to this office, asking that there be sent to you copies of estimates or recommendations heretofore made by the Department in regard to the erection of light-houses in the Hawaiian waters.

In reply the board begs leave to state that the light-house service in Hawaii is not within the jurisdiction of the Light-House Board, and therefore that the board has made no estimates or recommendations relative to the erection of light-houses in Hawaiian waters.

The board, however, has made, without effect, in its last two annual reports and estimates, and has repeated in those for 1902, the following recommendation:

It is also recommended that \$25,000 be appropriated to maintain the light-house establishment in case it should be turned over to the Light-House Board.

If the Treasury Department has made any estimates or recommendations of this nature it is not known to the Light-House Board; and the board is aware that any action has been taken by Congress relative to the creation of light-houses in Hawaiian waters.

Respectfully,

C. T. HUTCHINGS
Captain, U. S. Navy, Naval Secretary

EXHIBIT No. —.

HONOLULU, HAWAII, *September 11, 1902.*

Hon. JOHN M. MITCHELL,
*Chairman Senatorial Commission of the United States
on Pacific Islands and Porto Rico, Honolulu, Hawaii*

SIR: In view of the inquiries made by you of Hon. H. E. Allen, secretary of the Territory of Hawaii, relative to the feasibility of creating a channel extending from Honolulu Harbor to Kalihi, I respectfully beg to submit that three years ago, as a result of a conversation I had with Mr. B. F. Dillingham, of our city, and in furtherance of his request in writing for an option to purchase the Princes D. Kawananakoa and J. Kalanianaʻole their right, title and interest in the land, fish ponds, and tide lands of Mokauea (since vested in Kapiolani Estate, Limited), bordering in the vicinity of a proposed channel then discussed to be opened, I employed on behalf of the princes, Mr. W. A. Wall and Capt. A. A. Rose, to make soundings of Kalihi Harbor and the latter made borings on the tide lands extending from Honolulu Harbor to Kalihi Harbor.

Some 600 soundings were taken, giving the different depths of the harbor, and 16 borings were made at distances of 500 feet, and

the formation that exists of each boring to a depth of 30 feet were placed in separate bottles, all of which I have, together with the report of Captain Rosehill on same, and also a map showing the Kalihi harbor and the soundings made by Mr. Wall.

Upon the completion of the above an option was given to Mr. Dillingham for the purchase of said lands, fish ponds, and tide lands, which option has since expired. I think Mr. Dillingham had an estimate made of the cost of cutting a channel 350 feet wide, 30 feet deep, and of a distance of 8,200 feet.

If desired by your honorable committee, I will be pleased to wait upon you with such information as I have acquired in the premises.

Yours, respectfully,

JOHN F. COLBURN,
Treasurer Kapiolani Estate, Limited.

HONOLULU, HAWAII, *September 11, 1902.*

Mr. JOHN F. COLBURN,
Treasurer Kapiolani Estate, Limited,
854 Kaahumanu Street, Honolulu, Hawaii.

DEAR SIR: Responding to your courtesy under date of September 1, suggesting certain information in your possession in regard to the proposed creation of a channel extending from Honolulu Harbor to Kalihi Harbor, we beg to say the committee shall be pleased to have you communicate with us in writing, giving such information as is in your possession and which you may deem of importance for us to consider, and personally present the same to us, together with any maps or other information that you may have respecting this matter. Our rooms are at the naval station.

We make these suggestions as the most expeditious way to obtain the information, on account of our limited time.

With great respect, we are,

Faithfully, yours,

JOHN H. MITCHELL, *Chairman.*

EXHIBIT L.

N. KOHALA, *September 23, 1902.*

The UNITED STATES SENATORIAL COMMISSION,
Honolulu.

GENTLEMEN: Allow me to say a few words concerning Hawaiian immigration.

In my opinion, Asiatic immigration, as advised by many parties in Hawaii, would not solve our labor problem:

(1) Because Asiatics, even if they were allowed, would not remain in the country, and would not, if they did, build up our permanent population, because the vast majority of immigrants of that race are single men.

(2) Living as cheaply as possible to hoard up money in order to return home with it as soon as possible. It is said that we need about 50,000 laborers. Suppose that each one saves \$50 a year; that

amounts to two millions and a half. What a drain! Especially when as it is bound to do, it goes on for years.

On the other hand, were Portuguese assisted immigration, which has proved so beneficial to the country, allowed by Congress, the population, and consequently the labor question, would be settled in a few years: (1) As the Portuguese come to remain; (2) they have numerous families; (3) they are desirable whites; (4) Christians; (5) good citizens; (6) their children, educated in our common schools, adopt readily American customs and ideals; (7) they invest every dollar they save in the country.

Portuguese immigration would, of course, be more expensive, the result being permanent, the first outlay would be largely repaid in a few years.

Hoping that my communication will prove agreeable, I remain, gentlemen,

Yours, very respectfully,

E. DE HARVEY

EXHIBIT No. —.

ELEELE, KAUAI, September 18, 1900

Senator MITCHELL,
Chairman Senatorial Commission.

DEAR SIR: If the conclusions arrived at by your investigation are to be drawn from personal opinions expressed by men with a grievance but without financial interests, I fear the future welfare of these islands will receive a pretty hard blow.

A residence of eighteen months as chief engineer of the McArthur Sugar Company has given me an opportunity to view the labor question from the standpoint of a patriotic American citizen, to my satisfaction.

I have had twenty-five years' active experience with skilled and unskilled labor in all branches of work from farm to navy-yard in the States of Indiana, Illinois, Kansas, New Mexico, California, Oregon, and Washington. The conclusions I have made are these: Any man can live better, make more money, and enjoy life better in the States than coming here, excepting high-priced experts. The class of labor that I know of in the States that could be forced to stand a standing army to work these plantations, let alone coming of their free will for wages.

From all I can learn the soil here is entirely different from any in America. The cultivation of any crop requires an immense quantity of moisture, owing to the porous character of the land.

The cultivation of cane requires the application of from 10 to 15 inches in depth of water in a year over the land, applied about once in ten to twelve days. To obtain supplies of water in such immense quantities means the outlay of millions of dollars in pumping plants, reservoirs, and canals, and could never be accomplished except by enormous capital.

Again, large areas of the best land are covered with rocks, and requires an expense of from \$50 to \$175 per acre to clear.

Under such conditions the opportunities for small farmers and the cultivation of crops other than sugar cane or some crop producing heavy returns is precluded.

The cultivation of sugar cane requires the initial investment of several million dollars for land, water supply, mills, railroads, landing facilities, quarters for help, and teams.

The cost per acre for labor in cultivation is enormous compared with the cultivation of wheat, corn, etc. The ordinary methods of obtaining help as in vogue in the States are simply out of the question, as the number of hands required runs into the thousands here as compared to a baker's dozen on a wheat ranch. We require several thousand additional hands to care for and harvest the crops now growing.

If there are any American farm hands out of a job, why don't they come down! Simply because times are too good at home; and emigrants are even down here trying to sneak away some of the help we now have.

If these plantations make money, the home people certainly get their share of the benefit, and when the plantations are prosperous the city of Honolulu will also be prosperous and provide work for skilled labor in its factories and building trades.

I say, by all means provide ways and means to supply Chinese and Japanese, as both are essential, under proper safeguards, and don't lose any sleep over the average American laborer not being able to take care of himself. So far as the natives are concerned, I have seen nothing to indicate a desire on their part to engage in manual labor, except for two or three days at a time or in the capacity of luna or teamster, and as such many give very satisfactory service.

I believe a trip of inspection through one plantation will convince you of the truth of my assertions as I see them, and give a more intelligent understanding of the situation than can be obtained in any other manner.

My views are disinterested from a financial standpoint. I was sent here to take the position I now hold, and am ready to go back at any time and be sure of getting as good a living as I get here.

In fact, my observation is that enterprising Americans do not care to remain here for a great length of time, and I have yet to find any inducement for them to remain permanently.

Very respectfully submitted.

C. H. MILLER, *Chief Engineer.*

HONOLULU, HAWAII, *September 23, 1902.*

C. H. MILLER, Esq.,

Chief Engineer, Eleele, Kauai, Territory of Hawaii.

MY DEAR SIR: Responding to yours of September 18, at hand yesterday, I beg to say it is not our intention to arrive at conclusions drawn from personal opinions expressed by men with a grievance but without financial interests, as you seem to think. It is, however, our intention to hear all sides, as well those having financial interests as those having a grievance, and, after getting all the facts, we hope to be able to reach such conclusions as may be in the true interests of the Territory.

We should be very glad indeed to hear from you should you come before the committee. We published a general notice in the papers on our arrival here, inviting all who desired to be heard to come before the committee. We expect to be in session here up to and including

Thursday of this week, when our labors will cease. Should it suit your convenience to come before the committee, we should be very glad indeed to have the benefit of any suggestions you may make in the interest of the people of the Territory.

Yours, very truly,

JOHN H. MITCHELL, *Chairman.*

EXHIBIT No. —.

HONOLULU, HAWAII, *September 16, 1902.*

*To the Honorable Chairman of the Senate
Subcommittee on Pacific Islands and Porto Rico.*

SIR: As a civil engineer of twenty years' standing and an American citizen, resident in California, in no way interested in any plantation in these islands, I beg to offer you my unbiased opinion, or analysis of the labor conditions existing in these islands.

For three years past I have been engaged in a professional capacity as consulting engineer in examining the various properties and improving the water supplies, and have visited about 60 of the 64 plantations.

CLIMATIC CONDITIONS.

The country, as you are aware, is so hot that field work is entirely too severe for the Caucasian race, and white men can not be induced to do this severe work. As a consequence, reliance has to be had entirely on Chinese, Japanese, and native labor. The native population is small and so rapidly diminishing, and the fact that Chinese have been excluded under the restriction act has placed the entire labor force in the hands of the Japanese. Without their aid it would be impracticable to cultivate the properties and the plantations would have to suspend operations.

LABOR CONDITIONS.

Japanese laborers seem to be extremely happy with the conditions on the plantations, as a general rule quitting work at half past 4 o'clock in the afternoon and having the balance of the time for bathing and recreation. Their average wages vary from \$17 to \$30 per month depending on their capacity and the character of the work. Besides this, they receive free medical attention and medical supplies from the plantations, which also furnish a physician, and they seem to be well satisfied with their lot.

PLANTATION DEVELOPMENT.

The making of a sugar plantation involves a large expenditure of capital in building waterworks, plantation railways, sugar mills, and purchases of live stock, locomotives, rolling stock, etc. Some properties have required an expenditure of from \$2,000,000 to \$3,000,000 for a particular purpose. Nearly all the machinery and supplies have been bought and manufactured in the shops of San Francisco, Chicago, Pittsburg, and New York. The repairing of this machinery and

will create a constant field for the occupation of the white mechanic of the United States. The suspension or the modification of the present labor conditions would destroy this market.

WHITE EMPLOYEES ON THE PLANTATIONS.

As a general rule, there are from 10 to 50 white men employed on each plantation as foremen, sugar boilers, bookkeepers, mechanics,

Nearly all of these men have their families residing with them on the plantations, and were the plantation interests to be destroyed by the new labor legislation they would be deprived of a living and be compelled to move to some other country, as, outside of sugar-cane culture, there is very little opportunity for openings for citizens of the United States in this country.

To cite an instance of what has been done in the way of plantation development, I might cite that of the Makaweli property, on the island of Kauai. About twelve years ago the 4,000 or 5,000 acres included in this estate was pasture land, having nothing but a limited number of cattle on it, which gave employment to about two cowboys. American and island capital was induced to invest its money in developing this property. As a consequence, they have spent \$250,000 in bringing out the Hanapepe stream, which carries about 30,000,000 gallons of water daily, through flumes, pipes, and ditches, to irrigate the property. Railroads, sugar mills, and other improvements were also made at a cost, say, of \$1,000,000, and, as a result, this property now employs about 1,500 men, including 50 white men, many of them having families and homes on the place. Without Japanese or other labor it would be impossible to operate this property. Were it to cease as a sugar plantation it could be employed for no other purpose than as a cattle ranch again, and all those men, with their families, would be deprived of a living, and many of the citizens and property owners of California who have made conscientious investments would have their property interests destroyed.

I sincerely hope that this subcommittee will recommend no legislation which will be injurious to a great number of innocent American citizens and would be of benefit to no one.

Respectfully submitted.

M. M. O'SHAUGHNESSY,

Consulting Engineer, Member American Society of Civil Engineers.

EXHIBIT No. —.

HONOLULU, HAWAII, September 12, 1902.

TO: JOHN H. MITCHELL,

Chairman Subcommittee of Senate Committee

on Pacific Islands and Porto Rico, Honolulu, Hawaii.

SIR: Observing from the local papers that A. S. Humphreys, late justice of the peace, and George D. Gear, present second judge of this court, were credited with statements made before your subcommittee to the effect that there never existed, and does not now exist, any necessity for a third judge of the first circuit court of this Territory, I have taken the liberty of requesting Mr. Henry Smith, clerk of the judiciary

department of this Territory, to prepare a statement showing the character and volume of business transacted by this court during the years immediately preceding the 1st day of January, 1902.

The statement which I have requested has been prepared by Smith and is now in my possession. It shows a considerable increase in the business done by this court since the 14th day of June, 1901 over that done for an approximately corresponding period prior to that time, and in my opinion constitutes a satisfactory and complete refutation of the volunteered and unsubstantiated statements made by Messrs. Humphreys and Gear.

There is no data at hand from which could be immediately prepared a statement showing the character and volume of the business act pending before this court at this date, but it can be readily estimated and approximated from the statement furnished by Mr. Smith. I have no doubt that an accurate statement of the business actually pending could be furnished in the course of three or four days, if required.

As I have no desire to be drawn into a public controversy with my late associate or my present associate, I would esteem it a favor if you would kindly afford me an opportunity to personally present to you in private, for the information of the subcommittee, the statement which has been furnished to me by Mr. Smith, and your wishes as to any additional data or information upon the subject.

Awaiting your early reply, I am, very respectfully, yours,

W. J. ROBINSON

EXHIBIT No. —.

HONOLULU, September 8, 1901.

To the Honorable Subcommittee of the Committee of the United States Senate on Pacific Islands and Porto Rico

GENTLEMEN: The undersigned, a citizen of Hawaii and resident of Honolulu, engaged in the practice of law and formerly a Territorial official, namely, circuit judge of the first circuit, by appointment of President Dole of the republic of Hawaii and reappointment by President McKinley, respectfully calls the attention of the Committee to the need of a separate public building for Federal officials in this Territory.

It has been my observation, both as an official and as a private citizen, that the housing of Federal officials in buildings formerly used by the republic of Hawaii has led to unnecessary criticism, inefficiency, and annoyance.

At present there are, I believe, no buildings here that have been constructed by the Federal Government, except the naval hospital, some army quarters, and some miscellaneous structures put up by the Marine-Hospital Service on Quarantine Island.

I respectfully call your attention to this matter, believing it to be in the interest of both the Territorial and the Federal Government that it should receive your early consideration.

Respectfully submitted.

REUBEN D. SILVERMAN

EXHIBIT No. —.

Headquarters of the Republican Territorial central committee of Hawaii, 411 Fort street.]

HONOLULU, HAWAII, *September 24, 1902.*

LOU. JOHN H. MITCHELL,

Chairman of the Subcommittee of United States

Senate Committee on Pacific Islands and Porto Rico.

SIR: On behalf of the executive committee of the Territorial central committee of the Republican party of Hawaii, I am directed to forward to you the inclosed resolutions, adopted this day, and request that the same be made a part of your report.

I am, sir, yours faithfully,

CLARENCE L. CRABBE,

Chairman Territorial Central Committee.

Whereas Robert W. Wilcox, Delegate in Congress from Hawaii, heretofore advocated in the Congress of the United States, and in the public press, the transfer of the care and custody of the Hawaiian leper Asylum from Territorial to Federal authorities, and also that lepers from the mainland be brought to and kept at Molokai; and Whereas the said Wilcox has this day formally and specifically presented to the committee of the United States Senate now holding sessions in Honolulu a reiteration of his desire that the foregoing policy should be adopted: Be it

Resolved, by the executive committee of the Republican central committee of the Territory of Hawaii, That we believe that the opinion of the overwhelming majority of the people of Hawaii is totally opposed to the transfer of the control of the leper asylum to the Federal Government and to the permitting of lepers to come to Hawaii from abroad; That we denounce this attempt of Mr. Wilcox to make Hawaii the dumping ground for the lepers of the entire United States as against the peace and welfare of the unfortunate inmates of the asylum and as tending to fix upon Hawaii for all time the stigma of being a leprous country.

We hereby declare that the Republicans of Hawaii are unalterably opposed to the transfer of control of the leper asylum to the Federal Government and to allowing any lepers to come here from abroad. The unfortunates at Molokai are a part of our own people, and it is a privilege which we claim to provide and care for them, and pledge ourselves and our party to do everything within its power to prevent the consummation of this attack upon the people and the fair name of Hawaii.

I hereby certify that the annexed resolutions were passed at a meeting of the executive committee of the Territorial central committee of the Republican party of Hawaii, held this 24th day of September, 1902.

A. L. C. ATKINSON, *Secretary.*

EXHIBIT No. —.

HONOLULU CHAMBER OF COMMERCE,

Honolulu, Hawaii, October 9, 1902.

Hon. JOHN H. MITCHELL,

*Chairman Subcommittee Senate Committee on**Pacific Islands and Porto Rico, Washington, D. C.*

DEAR SIR: By vote of the Honolulu Chamber of Commerce at its regular meeting on the 8th instant, I inclose herewith a copy of a resolution passed at that meeting regarding charges made by Delegate Wilcox against the board of health before your committee in Honolulu.

It is proper to state that this indorsement by the chamber was entirely unsolicited on the part of the board of health, and it is hoped that you may see fit to embody the same in your report to the Senate.

I remain, very respectfully, your obedient servant,

JAS. GORDON SPENCER.

Secretary Honolulu Chamber of Commerce.

Resolution unanimously passed by the Honolulu Chamber of Commerce at the regular monthly meeting, held on Wednesday, October 8, 1902.

Resolved, In view of recent statements made by Delegate Wilcox before the Senatorial committee, this chamber desires to express entire confidence in the president and members of the board of health and it condemns as entirely false the statements made by Delegate Wilcox as to the inferior character of the merchandise and food supplied to the leper settlement by the Government.

[SEAL.]

HONOLULU CHAMBER OF COMMERCE

By CHAS. M. COOKE, *Vice-President.*JAS. GORDON SPENCER, *Secretary.*

EXHIBIT No. —.

It is the object of this article to give a brief outline of the land claims of the Hawaiian Islands and the transactions thereunder from the time of the "Mahele" or great division to the present. Numerous articles and statistics in this connection have heretofore been published, but none apparently with the object of bringing together all of the principal facts and data in one article, thereby affording to those unfamiliar with the matter a reasonably comprehensive statement. To supply such a statement is therefore the purpose of this article.

J. F. BROWN,

*Agent of Public Lands.*HONOLULU, *December 12, 1899.*

It would not be fair, however, to imply that all of the lands were of the eccentric types given. A more common type of main division was a strip of moderate width extending from the sea to the mountains, so that its chief could share in the products of the sea and of the land at different elevations.

It should be noted that the later "great division" of lands in 1848, while changing radically the basis of ownership, did not, and in fact could not, change the old divisions.

THE BASIS OF PRESENT LAND TITLES.

The old feudal tenure of lands was terminated and the new order upon which all present titles are based, established by the series of acts extending from 1846 to 1855, the principal ones being the general division of all the lands of the country between the King, Kamehameha III, and the chiefs, the further division of the lands given up to the King into government and crown lands, and the awarding to the common people the comparatively small lots that they had occupied or used.

The details of these transactions are of great interest, but general results only need be stated.

Approximate division of lands, 1848-1855.

Government lands.....	1,489,981
Crown lands.....	1,615,500
Chiefs' lands.....	5,111,000
Kuleanas (ordinary tenants' lands).....	5,111,000
Total.....	4,116,481

NOTE.—The area of kuleanas or ordinary tenants' land was comparatively small and was composed of the very choicest land in the whole country. In this division a number of valuable lands were overlooked or ignored and, as "unassigned lands," were for a long time of disputed ownership. By judicial decisions and by legislation in 1890 most of these lands were added to the Government and crown domains, a few, however, being confirmed to private owners.

EARLY LAND POLICY OF THE GOVERNMENT.

Immediately after the division of 1848, of which results have been given, the Government proceeded to sell much of its land at private sale and at low rates of from 12 cents to \$1 per acre. The lands thus sold were selected and surveyed at the option of the purchaser, and many thousand acres of the "cream" of Government lands were thus disposed of.

This method, though perhaps a necessity of the time, had several disadvantages, not the least of which was the leaving of numerous scattered remnants of Government land, being the unsalable or undesirable portions at that time.

Under this system of private sale probably 500,000 acres were disposed of, these sales being largely to natives.

The first act requiring sales to be made at public auction was enacted in September, 1876, applying to sales of lands or leases over \$500 value.

By an act of the provisional government in 1893, all such sales of lands or leases, of whatever value, were required to be made at public auction after thirty days' public notice.

HOMESTEAD LAWS, 1884 TO 1895.

The first homestead act to facilitate acquirement of small holdings was enacted in 1884, and amended in minor particulars in 1888, 1890, and 1892.

This act and amendments, which remained in force until passage of the "land act of 1895," gave opportunity for acquiring lots in general not over 20 acres in extent, under conditions allowing ten years for payment of purchase price, requiring the erection of a dwelling and a residence of three years on the land. A substitute might reside on the land with consent of the minister of interior (as amended in 1892).

Under the provisions of these homestead laws there were taken up (omitting holdings canceled and surrendered):

	Number.	Acres.	Value.
Patented upon fulfillment of conditions.....	527 377	8,490.81 6,820.76	\$62,794.55 45,312.30
Remaining to be patented.....	150	2,670.05	17,482.25

During this same period there were taken up under special conditions as to improvement and cultivation without residence:

	Acres.	Value.
Patented upon fulfillment of conditions.....	3,552.84 2,942.44	\$10,610.63 8,023.13
Remaining to be patented.....	610.40	2,587.10

The general results of these homestead laws were good. Numerous families of small means were put into possession of homes, and considerable improvement in the way of cultivation could be noted.

The laws, however, did not meet all the requirements of the case. The area permitted to be taken was too small to tempt any but those of limited means and very moderate ambition.

Residence alone did not imply utilization of the land, and a perfunctory compliance with the residence condition was easy. A better guarantee of bona fide intentions was needed.

THE LAND ACT OF 1895.

To promote the settlement and improvement of the remaining Government land, under conditions favorable to the settler but not to speculators, and to meet the needs of different classes desiring lands, the land act of 1895 was enacted as being specially adapted to the requirements of the case.

An important feature of this act was the general requirement of cultivation and improvement of lands taken up, as well as residence thereon for a term of years. There was authority, however, under the act for the sale of lands at auction, under special conditions as to payments for same and cultivation without residence, to meet the cases of persons who desired to improve and cultivate land, but, having occupations elsewhere, were unable to live on the same.

METHOD OF ACQUIRING LAND UNDER THE LAND ACT OF 1895.

General qualifications required of applicants.—Must be over 18 years of age; be citizen by birth or naturalization, or have letters of denization; be under no civil disability, nor delinquent in payment of tax.

Homestead lease.—Nine hundred and ninety-nine year lease, conditioned upon maintaining home upon the premises, paying taxes, and cultivating small percentage; area that might be acquired, 8 to 45 acres dependent on quality; no payment other than small application fee. Husband and wife might not both be applicants; applicant must not be owner of any other land (except taro or wet land); lease inalienable, not subject to attachment, levy, or sale, or to any process of the court; might not be mortgaged, assigned, or sublet.

Right of purchase lease.—Lease for twenty-one years with right of purchase at original appraised value any time after two years' residence and cultivation of 25 per cent; area that might be acquired, up to 1,200 acres, dependent on quality; husband and wife might not both be applicants; applicants could apply only for such amount as, taken with any lands owned by them, would come to the limits named; rent at 1 per cent on appraised value to be paid until purchase was made.

Cash freeholds.—Lands sold at auction at an appraised value as under price, purchase price due in four installments during three years; 25 per cent of cultivation further required; perfect title; qualifications and areas that might be acquired same as under right of purchase lease.

Special agreements.—Sales at auction under special conditions, with payments by installments, with requirements of cultivation, with or without residence; limit of area that might be sold under special agreements, 600. (Practically the area has been limited to 100 acres of first-class land as under the other systems.)

Cash sales.—Sales made unconditionally for cash at public auction. These sales usually made to meet cases where exceptionally large improvements were contemplated, as buildings, reservoirs, pumping machinery, etc.

Olaa district sales.—Special sales at a value appraised in the year 1895, of lands held under crown leases in the district of Olaa. Here the Lessee could purchase his lease holding up to the 200 acres where 25 per cent of same had been put under cultivation and further improvements to the value of \$200 made. Distinct from the general sale of the land act and applying only to the Olaa district.

Summary of transactions under the land act of 1895.

	Number.	Acres.	Value.
Homestead leases	115	1,549.56	\$ 4
Right-of-purchase leases	356	18,665.78	11
Cash freeholds	23	783.82	
Special agreements	122	7,066.17	5
Cash sales	40	2,996.89	3
Olaa district sales	142	15,532.00	6
Total	798	46,594.22	27

NOTE.—Value of homestead lease land is an arbitrary estimate. Formal appraisement not required under the law.

A comparison of transactions during the period of 1884-1895 with those of the period from 1895 to date (under "land act") shows for the latter period a very much larger proportion of lands taken up under conditions of homestead or improvement as compared with cash sales."

Transactions during 1884-1895 (eleven years).

	Acres.	Value.
Cash sales.....	37,675.34	\$195,588.96
Under homestead or improvement conditions.....	12,043.65	73,405.16
Total.....	49,718.99	268,994.12

Under land act of 1895 (four years).

	Acres.	Value.
Cash sales.....	2,996.89	\$39,923.73
Under homestead or improvement conditions.....	43,597.33	239,643.16
Total.....	46,594.22	279,566.89

The "land act of 1895" has proved well suited to the conditions in the Hawaiian Islands. Under it the demand for public land has been active and fair prices have been realized for the benefit of the public treasury. Speculation and "land grabbing" has been minimized, and a marked improvement and development of lands taken is evident.

The success of the act would not be questioned by any impartial observer familiar with the facts.

The extremely varied quality of the lands, the intermingling of public and private lands, and the special needs of the people, together with the duty of best utilizing the limited public domain, required laws and laws drawn to meet such special conditions, and these in all essential points have been met by the "land act of 1895."

GENERAL LEASES.

The foregoing statements have applied to those lands directly sold or taken up under condition looking to ultimate purchase. It remains to consider the question of lands held under leases for term of years, upon the termination of which all interest of lessee terminates.

From the time of the great division of 1848 to the present time the policy of leasing lands for a term of years has been pursued, both in the case of the "Government lands" and of the "Crown lands" controlled by the commissioners for the same.

In 1876 the first law requiring sale of Government leases to be made at auction was enacted, but such law did not apply to the Crown lands, which were not put under this regulation until the passage of the land act of 1895.

Under the lease policy lands were freely leased, both by the Government and by the Crown commissioners, in large areas and for long terms, but in 1891 the Government, while continuing the policy of leasing land, improved upon former methods by reserving to itself the right to take up any portion of the leased land suitable for settlement, which reservation proved later of much value.

This policy was continued after the passage of the land act of 1895 but with stricter regard to amounts leased, terms of lease, and reservation necessary for public interest.

Until the date of the land act of 1895 the Crown lands were leased without auction sale in such amounts and for such terms (until limited by law in 1865 to thirty years) as the commissioners approved. Although by the land act of 1895 these lands were merged in the general domain of "public lands" and became subject to that act practically they had nearly all been leased in large tracts and for long terms without reservation.

As between the two classes of land therefore now constituting "public lands" the former Crown lands are more generally encumbered with long-term leases.

VALUE OF A LEASE SYSTEM.

Although the old method of leasing was shortsighted and with or nothing to commend it, a proper lease system is of distinct value.

Numerous tracts of land are found of which it is difficult to estimate agricultural possibilities, if indeed any exist.

Other tracts, owing to the intermingling of public and private lands and the fragmentary character of some of the public lands, are surrounded by private lands owned or controlled by a single owner, so that the sale of the same would be at a distinct disadvantage to the Government and result only in swelling the holdings of already private owners at an inadequate price.

Practically it is found that many persons will pay a rental representing a larger value than the purchase price that could be obtained.

A lease therefore may be made to return the best results in revenue while a reservation of the right to take up portions suitable for other use leaves the way open at any time for such use if later conditions require it.

The revenue from rent of lands has steadily increased, although the area of land leased has in the same period been reduced by thousands of acres.

Rent roll, Government and Crown lands.

1890.....	
1894.....	
1898.....	

Town lots, buildings rented, etc., not included in above. The additional revenue from such sources is about \$34,000 annually.

Under the land act of 1895 general leases were limited to a term not longer than twenty-one years.

Leases might not contain any privilege of renewal nor be made for more than any land on which an unexpired term of two years remained.

The commissioners of public lands could impose conditions necessary in the public interest.

TRANSACTIONS SINCE JULY 7, 1898.

The Newlands resolution, passed by Congress July 7, 1898, following the annexation of the Hawaiian Islands created much uncertainty as to the status of the public lands and the laws governing them.

Upon the understanding and belief, however, that the laws of the United States relative to public lands did not apply to such lands in the Hawaiian Islands and that the local land laws were to remain in force pending further action of Congress the usual transactions of the land office were continued until September 28, 1899, the date of receipt of the Executive order of President McKinley suspending further transactions.

The following table shows lands taken up from July 7, 1898, to September 28, 1899:

	Number.	Acres.	Value.
Long-term leases	45	551.50	(a)
Short-term purchase leases	57	4,507.09	\$22,239.75
Land freeholds	4	67.82	169.54
Partial agreements	41	1,035.87	7,821.00
Land sales	18	1,172.59	18,719.00
Land patents under Part IX of land act	69	7,999.39	28,177.57
Total	234	15,394.26	78,126.86

a Not appraised.

Land patents issued since July 7, 1898.

Number	199
Acres	12,534.53
Value	\$67,821.54

(Of the above amount patents for 11,643 acres, valued at \$48,548.54, were issued in completion of agreements made prior to annexation resolution of July 7, 1898.)

General leases since July 7, 1898.

Number	8
Acres	1,856.86
Rental (yearly)	\$2,847.00

REMAINING PUBLIC LANDS.

By the original division in 1848 the combined area of Government and Crown lands was, as near as can be determined	Acres. 2,479,600
Patents and deeds have been issued for	728,200

Remainder	1,751,400
In this remainder is included lots taken up but not yet patented:	

	Acres.
Old homesteads	2,770.05
Old special-agreement sales	610.40
Under land act (not patented)	[28,065.33]
	31,345

Total remaining	1,720,055
-----------------------	-----------

The remainder (1,720,055 acres) of public land may be roughly classified as follows:

	Acres.
Buildable building lots	145
Open lands	25,626
Swamp lands	977
Tree lands	26,825
Pasture lands	448,200
High forest lands	681,282
High inaccessible mountain	227,000
Barren (of nominal value only)	310,000
Total	1,720,055

of 250 prostitutes; that all rooms are filled and that more are demanded; that little girls, some not more than 12 years old, and helpless women are compelled to vend their bodies that their Japanese and French masters may live in idleness and ease. That these conditions are far-reaching in their debasing and corrupting influence is a debatable question. There is not a town nor a city in the United States where such an emporium of lust and vice is openly conducted nor is there a town or city in the United States where prostitution is licensed, all assertive and irresponsible gossip to the contrary notwithstanding. What legislator, not himself a criminal of the vilest type, would vote for a bill which should provide that "the annual fee for a license to do business as a public prostitute shall be \$50." Paris is not all the great cities in the world, licenses and segregates its prostitutes, and for five years the chief of police has made strenuous efforts to have the system abolished. He asserts that neither the license nor the segregation system prevents or diminishes private prostitution, and that the issuance of a license to and the segregation of a prostitute condemn her to a life of moral leprosy—unclean! unclean! unclean! and foreclose all hope of reformation. As nothing can be politically or legally right which is morally wrong, the fact, if it is a fact, that the Iwilei assembly of harlots "is conducted under the supervision of the police department and the board of health" is a burning shame and disgrace to this community and an insult to every honest man and virtuous woman. There is absolutely no authority of any sort in law for the maintenance of these vice dens, as the laws of the Territory treat fornication as a criminal offense and punish it accordingly, and if it be true that this place is conducted under the direction of the police and with the knowledge of the heads of that department, then they are guilty of the coarsest and most flagrant violation of their oaths of office and deserve to be held up to public censure and scorn. As if to add to the shame and disgrace which this moral plague spot has brought upon the city, I understand that the hovels in which the prostitutes and their nefarious traffic were built for that purpose by a company operating under a corporate franchise from this Territory, and that at least some of the directors of the corporation which built, own, and rent the miserable bazaars of crime are men who hold high official positions in the Territory.

A community in which such things can be done is totally lacking in high public sentiment and its morals are at a low and constantly sinking ebb. It will be your duty to investigate this matter, and there can be no evasion. I hope that you will visit Iwilei some Saturday night. There and then you will observe the high carousal—lust—the vast department store of the vices—where half-naked women eagerly endeavor to peddle their bodies by the hour, and "under the supervision of the police department and the board of health."

I not only direct and instruct you to investigate this place, but I direct and instruct you to ascertain every fact and condition that possibly can bearing upon its maintenance. The owners of the place, the owners of the building, the rent paid for a building as a whole, the rent paid per room by the prostitutes, the names of the lessors, the names of the lessors, if they be individuals, or the names of the officers of the corporation, if the lessor be a corporation, the extent of the supervision exercised by the police over the place, the number

buildings, the number of rooms in each building, the number of prostitutes occupying the room, together with their nationality and any other circumstances which may tend to throw light upon the situation.

EXHIBIT B.—*Charge of Hon. Morris M. Estee, United States judge for the Territory of Hawaii, to the Federal grand jury, on April 9, 1901, relative to Iwilei, the prostitutes' stockade at Honolulu.*

Complaint has been made to this court, and, indeed, it is publicly argued to be a fact, that a species of involuntary servitude exists at a notorious place in Honolulu known as Iwilei, and that certain women are kept in servitude for the purposes of prostitution. If this be so, it is contrary to law and should be stopped.

I charge you that this republic and all Territories belonging to and which are subordinate to the United States are dedicated to human freedom; that neither slavery nor involuntary servitude can legally exist anywhere on American soil; that the most debasing of all servitude is where women are sold for the purposes of prostitution. This is barbarous and un-American, and is not only an attack upon good government but a most vital blow upon the decencies of civilized life.

The thirteenth amendment to the Constitution of the United States declares "that neither slavery nor involuntary servitude, except as a punishment for crime whereof the party shall have been duly convicted, shall exist within the United States or any place subject to their jurisdiction." Webster defines servitude to mean "the state of voluntary or involuntary subjection to a master, whereby one thing or person is subject to another thing or person for use contrary to common right." All forms of servitude are contrary to law and against common right, and any illegal restraint upon the free action of a person whereby the party restrained is under subjection to another is involuntary servitude.

In this connection the court calls your attention to an act of Congress entitled "An act to protect persons of foreign birth against forcible constraint or involuntary servitude," passed June 23, 1874, which reads in part as follows:

* * * whosoever shall knowingly and willfully sell or cause to be sold, into any condition of involuntary servitude, any other person for any term whatever, and any person who shall knowingly and willfully hold to involuntary service any person sold or bought, shall be deemed guilty of a felony, and on conviction thereof be imprisoned for a term not exceeding five years and pay a fine not exceeding five hundred dollars.

That every person who shall be accessory to any of the felonies herein declared, before or after the fact, shall be deemed guilty of a felony, and on conviction thereof be imprisoned for a term not exceeding five years and pay a fine not exceeding two hundred dollars. (See 18 United States Statutes at Large, p. 251.)

See also the Statutes of the United States, volume 24, page 635, which reads in part as follows:

That whoever commits adultery shall be punished by imprisonment in the penitentiary not exceeding three years, and when the act is committed between a married man and a man who is unmarried, both parties to such act shall be deemed guilty of adultery; and when such "act is committed between a married man and a woman who is unmarried, the man shall be deemed guilty of adultery."

That if an unmarried man or woman commit fornication, each of them shall be punished by imprisonment not exceeding six months or by fine not exceeding one hundred dollars.

So it is prescribed by section 3 of an act of Congress approved March 22, 1882 (22 Statutes of the United States at Large, p. 31).

That if any male person in a Territory or other place over which the United States have exclusive jurisdiction hereafter cohabits with more than one woman, he shall be deemed guilty of a misdemeanor, and on conviction thereof shall be punished by a fine of not more than three hundred dollars or by imprisonment for not more than six months, or by both said punishments, in the discretion of the court.

It appears from the recent official report of the Territorial grand jury, published in the Honolulu Republican for March 6, 1901, that there were then 143 female prostitutes in Iwilei, 11 of whom were French women, all the rest being Japanese, not one Hawaiian or American among them all; none were citizens.

That there are 225 rooms in Iwilei, each room renting for from \$5 to \$15 a month, and one man, a Mr. Masuda, a Japanese, paid to the owner of the property a bonus of \$9,000 to control it, and he does control it. It is thus a mere money-making institution, but its existence is all the more dangerous to society. It is safe to say that there is no other town of 40,000 inhabitants in America where there are so many women congregated in one place and protected by public officers 143 women (now 194), openly and publicly plying their calling as prostitutes. It is not necessary to inquire how this crying evil was started. It is assumed that the public officers who gave it the sanction of their approval thought they were doing right; but it is our duty to remove the evil, because its existence is illegal and immoral. The mere pointing out the mistakes of those who created it will not do that.

It seems past belief that in this small community, where there are so many pure and religious people, there should be found any number of persons who think that prostitution ceases to be an evil when it becomes public or when sanctioned by public officers, or that the recognition of this social offense does away with its danger to society or that authorized houses of prostitution is any more protective to good people than would the creation of dens of thieves be a safeguard against stealing. It seems to be an admitted fact that the presence of criminals increases crime, and that all forms of public offenses should be eradicated by the punishment of the criminals. Every crime that goes unpunished is dangerous to the well-being of the people, and a crime like that of Iwilei is an attack upon the purity of the community. There should be no debatable ground about such a place as Iwilei when public prostitution is maintained by the public as it is at present for the money there is in it. It lowers the standard of our honor and disgraces the fair name of our Territory, and to some extent it makes every citizen a party to the wrong.

Gentlemen of the grand jury, the official records of the health of the Territory of Hawaii show that during the past year less than 40 of the 143 women formerly at Iwilei became pregnant there. Some children have been born to them and have already become objects of charity. Others are not yet born. Indeed, the state of Iwilei is too disgusting to repeat.

It will thus be observed that the history of affairs at Iwilei conclusively shows that that institution is not only an attack upon the honor of the United States, but upon the morals of the community, and a most painful attack upon the honor of American citizenship here.

filling this Territory with ill-begotten children, conceived, if not born, in a place of prostitution, which of a necessity must be a breeder of criminals.

In any phase of the matter, Iwilei is a school of crime. Over one-fourth of the women there have children, born before or within this resort; most of them are now infants and the offspring of Iwilei associations. Practically all of the Japanese women, and most of them Japanese, have masters who receive the money they thus earn. These masters, if not fathers, husbands, or brothers, are purchasers of the women, and they control them as much as the liveryman controls his horses. The oft-repeated statement that if we close Iwilei it will scatter those prostitutes over the town is not true; they are scattered now. These women do not live at Iwilei; they only go there of evenings. They seek their homes uptown about 10 or 11 o'clock at night. Some have homes of their own and live at home; some are servants of families, but all go back to town. They are in no sense isolated; Iwilei is not their home; they neither eat nor sleep there, and so the place is a greater disgrace to the community and a growing danger to civilized government.

The truth is that Iwilei is not, as is often stated, a resort for seamen. It is, rather, a resort for the lowest order of men—Americans and natives alike.

I instruct you, gentlemen, to fully and fairly investigate the facts of this matter, so that we may know whether or not at Iwilei women are sold for the purposes of prostitution. You will also find out who owns them, and to whom the proceeds of their vile practices are paid. What men are accessory to these crimes; who manages the place and collects the rents for the rooms; and the names of all who divide the spoils; and if the servitude of these poor women exists for any other purpose; and, in a word, if they are held to any form of subjection by their pretended owners. You will subpoena and examine such witnesses as the district attorney or others shall point out, so that the whole truth may be made known.

It is due to the good people of these islands that these shameful proceedings be stopped. Two Territorial grand juries have given the broadest publicity to the situation at Iwilei without affording any remedy. This duty, gentlemen of the grand jury, now devolves upon you, and I direct you that in this civilized Christian community the citizens of the United States do not recognize public prostitution as a necessary evil, but rather as a public crime, which is a crime against decency as well as against law, and that all public officers who encourage or defend prostitution, either in this or any other form, are guilty of a wrong for which there can be no palliation.

The question for you first to consider is whether or not any of these women are restrained of their liberty. This I direct you to most thoroughly investigate, and if it be true as charged you will at once proceed according to law against all persons who are principals or accessories to the enslavement of these persons.

Second. I charge you to cause the indictment of all persons whom you find are guilty of adultery or fornication in this public resort; and I charge you also, gentlemen of the grand jury, that in the performance of these duties you can call upon the United States district attorney, who will aid you.

EXHIBIT C.^a—*Copy of report of Mr. Victor H. Olmstead, special investigator, to the honorable commissioner of labor.*

SLAVERY IN HAWAII.

Within a mile of the center of the city of Honolulu, the capital of the Territory of Hawaii, a system of slavery more absolute and than ever existed in the United States is in existence, with the knowledge and consent of the Territorial authorities and under official control and protection. It is a legalized institution for prostitution, the unhappy inmates of which are held in the most less bondage, subject to barter and sale, under the complete control and disposition of their owners.

The slave pen occupies about 2 acres of ground, surrounded by a board fence about 12 feet high. Within this inclosure are 5 one-story buildings, each about 250 feet long and 24 feet wide, of light construction, and standing parallel about 20 feet apart, the distance between them constituting the thoroughfares within the stockade. These buildings are each divided into two parts by a partition running lengthwise, and these longitudinal sections are subdivided into rooms of about 10 by 12 feet, which are paved with concrete (to facilitate their ready cleansing by "turning on the hose"), and are scantily furnished, all exactly alike, with a double bed, a small table, a couple of chairs, a washstand, with bowl, pitcher, and towels, and a small stove.

The buildings are owned by a Japanese company, who rent them to the slave owners for \$15 each per month, the annual income derived amounting to about \$45,000 per year. Each slave owner pays rent for from two to a dozen or more rooms, in addition to what he has to stand the expense of feeding and clothing his property. He also pays regular charges of the health officers, who exact a fee of \$2.50 per capita per month for making a physical examination and issuing a certificate of health, the possession of such certificate being a prerequisite for the person in whose name it is issued to follow the vocation of his choice without tutition under legal sanction and protection.

The inmates of this moral pesthouse gain nothing from the system beyond a bare subsistence; they are allowed to retain no property whatever, but are required to promptly turn over all receipts to their masters, who closely watch them and keep careful count of the number of their guests each night, usually collecting their ill-gotten gains as rapidly as earned by entering the room of the slave as soon as it has been vacated by a visitor. But where a man owns several slave rooms, and his business is brisk, he is frequently unable to follow this course in order that he may not lose any of his legitimate income, the idle and able creatures who earn it are brought together after 2 o'clock in the afternoon in a room within the stockade specially provided for the purpose, where they are there required to hand over to their owners any moneys they have previously collected during the course of the night.

Any attempt at insubordination or revolt is promptly and severely dealt with, the brutality with which the poor women are treated is usually reaching such lengths of cruelty as to call for expostulation. Police-men detailed to keep inmates and visitors from indulging

^a This exhibit did not appear in the answer filed by Judge Humphreys, Department of Justice, as Mr. Olmstead's report had not at that time come to hand.

derly conduct. Once in a while, but very rarely, a master is arrested, and his treatment has been particularly inhuman; but it is extremely seldom that he is punished, the victim of his brutality and the witnesses proof being in such complete subjugation and in terror of their masters and of their subsequent treatment that they can not be induced to testify against him.

The slaves are domiciled in other sections of the city by their masters, and closely guard them and bring them in herds to the stockade every evening about 6 o'clock, where they remain until about half past 2 the next morning. During the business hours of the night each slave is expected to earn at least \$5; if she is unable to bring in this much revenue she is regarded as unprofitable, and is either forced to exert herself more industriously in attracting customers by means of punishments of which she dares not complain; or, if by reason of decaying physical charms through sickness or advancing age she is absolutely unable to meet her owner's requirements, she is sold to some Mongolian who desires a personal servant or attendant. She has no voice or power in the transaction; she is a mere chattel, and can not escape her destiny; she dares not attempt to do so; she is helpless and hopeless, and submits to her thralldom; there is no other course for her to pursue.

The slaves are all Japanese, with the exception of two or three French women, and have nearly all been brought from Japan for the express purpose of prostitution. Some have been brought with the consent of their parents or guardians; others have been lured across the sea by false promises of remunerative employment in legitimate work on sugar plantations or elsewhere; a few have been beguiled into slavery from the plantations of the islands, where they were earning respectable livings, by false inducements of easier labor and higher wages as house servants in Honolulu. There are about 30 Japanese procurers employed by the company who owns and rents the rooms within the stockade described above, and these procurers operate both in Japan and Hawaii, their prey being sold to the room renters for prices ranging from \$100 upward, according to age and attractiveness. The younger and prettier the girl, the higher the price. There (are) several children in the stockade not more than 12 years old, and the average age appears to be about 15. It is heartrending to walk through the streets of this infernal inclosure and see the little girls standing in the doorways of their rooms or leaning on the window sills, clad in scanty attire and bedizened with cheap jewelry, using the arts in which they have been trained and drilled by their vampire owners, in inducing by-passers to enter. That such intolerable, degraded bondage of human beings should be permitted, encouraged, and protected anywhere within the limits of the United States is almost unbelievable, and is a foul disgrace to the American flag floating over the American Territory of Hawaii.

The following rules and regulations are framed and posted at the principal entrance to the stockade, with the approval of the Territorial official, by whom they were partially prescribed:

REGULATIONS OF THE IWILEI POLICE OFFICE.

1. Hours of occupation from 4 p. m. to 2 a. m., and the gates will be open during these hours.
2. The prostitutes must stay in their rooms and never be allowed to engage in the streets on the roadside.

3. Prostitutes, if they wish, may remain all night in their rooms. They may come in and out at any time, but they may not ply their trade after the said hour.

4. The masters of prostitutes, or their parasites, are not allowed to remain in the fence or to sleep with their prostitutes through the night.

5. Minors are prohibited from entering the inclosures.

6. A policeman shall remain within the court from 4 p. m. to 6 a. m. Their hours of duty are as follows: One policeman from 4 p. m. to 12 p. m.; one policeman from 12 p. m. to 6 a. m. These policemen will be changed, taking their turn at the court of each week.

7. The duty of the police will be to quiet any disturbances that may occur and to preserve good order in the place.

Regulation No. 4, above, is a dead letter, no attention whatever being paid to its enforcement.

The protection and maintenance of this institution is a direct and open violation of law, the penal laws of the Territory provide to the contrary, follows, on page 78:

Any person who shall in any manner solicit or be privy to or aid or abet another in soliciting of another to unlawful sexual intercourse * * * or to go to any place where a prostitute resides or carries on her business, or where persons are generally known to congregate or assemble, or shall lead, conduct, or accompany any person to such place, or act as guide or conductor for that purpose or for any other purpose herein specified, or shall procure any prostitute for any purpose, such prostitute shall be actually taken to or conducted to such person or place, and such person shall be deemed guilty of a misdemeanor, and on conviction thereof shall be fined not more than five hundred dollars, or be imprisoned at hard labor not over one year, and if such person be a licensed driver such license shall be forfeited, and he shall not thereafter be licensed to drive for two years.

The law above quoted is absolutely ignored. The health officials supervise, guard, and protect the traffickers in human flesh and souls, and the Territorial officials generally, by condoning the same, are every one of them particeps criminis.

The slave pen is regarded as one of the unique and interesting institutions of Honolulu. It is visited by all classes of society, representatives of all nationalities. Strangers and tourists, when in Honolulu are taken to the stockade and conducted through it, and gaze with interest or perchance with horror and sickening disgust on the flaunting display of enslaved vice.

It may be possible that the stockade system, under medical supervision, is the best and safest method of dealing with the social evil. Be this as it may, there is no palliation conceivable for the slavery that is endured by the unfortunate man's lust; for the absolute and unrestricted ownership exercised over these poor creatures by their soulless and avaricious owners for their purchase and sale as cattle; for the nameless and unnumbered cruelties they are compelled to endure without hope of relief; for the open and flagrant violation of the United States prohibition of slavery or involuntary servitude.

VICTOR H.

HONOLULU, HAWAII, *February 28, 1901.*

UNDER D. C.—CHARGE IN FULL OF CIRCUIT JUDGE HUMPHREYS TO THE GRAND JURY AT THE FEBRUARY, 1901, TERM OF COURT. THIS WAS THE SECOND GRAND JURY EVER EMPANELED IN HONOLULU.

GENTLEMEN OF THE GRAND JURY: The fifth amendment to the Constitution of the United States provides, among other things, that "no person shall be held to answer for a capital or otherwise infamous crime unless on a presentment or indictment of a grand jury, except in cases arising in the land or naval forces, or in the militia, when in actual service in time of war or public danger." It is in obedience to this constitutional mandate that you have been summoned here. The office which you now fill, though brief in tenure and affording inconsequential emolument, is yet one of the most important, solemn, and responsible stations to which the citizen can be assigned. The grand-jury system seems to be coeval with the earliest period of English history. It is so ancient that no one has been able to trace its origin with any degree of accuracy. It existed in the American colonies from the earliest times, having been brought from England by our forefathers, together with other provisions of Magna Charta and the common law. It was cherished by them as an institution well designed to protect the liberty of the citizen from the encroachment of arbitrary power, and of such importance to themselves and posterity as to be worthy of a place in the fundamental and supreme law of the land to operate as a limitation, restraint, and prohibition upon those whom the people might temporarily call to power, and there it remains—liberty's omnipotent injunction.

The necessary and logical result of the system was and is the abolition of one-man-power to call the citizen to the bar of criminal justice, placing the administration of criminal justice in the hands of those from whom all power under our system of government is derived, to wit, the people, and in whom I trust it may ever remain. The system placing the prosecuting officer with a discretion absolutely unconstrained by any other power or authority of presenting, or declining to present, an information against the citizen charging him with an infamous crime may be the peculiar delight of the despot, or of an executive which will not trust the people through fear that they will not trust it, but it can find no place here now, and I am glad to believe that there are but few persons who would give it a place even if such thing were possible. The system to which I have just referred existed here until the annexation of these islands by the United States on the 7th day of July, 1898, and was practiced until the 14th day of June, 1900, when the "Act to provide a government for the Territory of Hawaii" became effective. It was a system under which there were many abuses, arising mainly from the arbitrary exercise of power. These abuses, like most abuses which arise under a system of government in which the people, or but a few of the selected and chosen people, have a voice, were permitted to pass without a protest, because—

First. The majority were without a voice.

Second. The minority were either indifferent to or in sympathy with the abuses.

Third. The protest in the nature of things would have been made to the very authorities who committed the abuses.

This charge does not appear in the appendix to the answer originally filed by Judge Humphreys in the Department of Justice, but as it was submitted—as a political charge—by the persons seeking to secure Judge Humphreys's removal, it is here printed in full.

There may be some good and wise men who will differ from me these observations, just as there are some good and wise men who differ from those who believe that American institutions are the best under which men may live, grow, develop, and become thoughtful, useful and influential citizens and members of society, charged with the duty and demanding the right to sound a voice in public affairs; just as there are some good and wise men here who believe that perfection in our government had been attained in this country prior to the adoption of the Constitution of the United States, and that an all-wise Providence had given to it His special benediction, while all other nations, States and communities were left to wage a hopeless contest with the forces of Satan. The grand-jury system not only vests a large share of the administration of justice in the hands of the people, as I have observed, but it also vests this administrative power in the hands of the people of the particular community affected by its deliberations and conclusions. For instance, a man can not be indicted by the grand jury of the second circuit for a crime committed in the first circuit, and of course the converse of this proposition is true. Not only can the individual be indicted in the circuit where the crime is alleged to have been committed, but the individual members of the grand jury are supposed to be and of right should be summoned indiscriminately from the various parts of the circuit, thus protecting the citizen from the influences in a single locality which he may have antagonized from the passion and prejudices of those who feel that they have been specifically injured by the crime alleged to have been committed. In its origin and development under British laws, we observe that the one dominant idea running through the whole of the system is local self-administration of justice in matters of police and of course to the liberty of the citizen. It is a form of local self-government so dear to the heart of the true American everywhere and which but little is known in these islands and about which much has been learned, for it is provided in the organic act of this Territory that the legislature may create counties and towns and municipalities within the Territory of Hawaii and provide for the government thereof.

The language of the act can not be mistaken. Not only does the legislature provide municipal government for cities, but it also provides for the same in every village and hamlet in the Territory, so that the people of every village and hamlet may have a municipal corporation if they desire and the legislature may create the same. Congress has not only conferred upon us this power, but it has also expected and intended that the people of these islands, when organized in settlements, would promptly enter upon their political rights as free and self-governing communities. No people with the spirit of liberty and a high sense of civic duty have been so slow to do so. Self-governing communities existed under the Hawaiian Empire, answering largely to the description of municipalities in the organic act, which we find in English and American laws, and it has been my privilege and fully entitled to speak on this subject, that "the history of the world by Rome is the history of the conquest and the foundation of a vast number of cities."

^aAt the time this charge was delivered there was not, nor is there now, a district, township, nor municipal government in the Hawaiian Islands. All of all departments are appointed by the governor, and these officers are his subordinates. In this manner Honolulu, a wide-awake, progressive city of 45,000 inhabitants, is governed. The legislature recently passed an act to create a municipal government, which was promptly vetoed by the governor.

The Germans have had their political subdivisions, self-governing in matters of local concern from the most distant periods of their history. Their free cities are familiar to all students, and of one of them—Frankfurt-on-the-Main—it was asserted by Father Fuchs, of Mainz, in the sixteenth century, that he had epigraphic evidence that it was founded in the second century of the Christian era. Holland alone in the seventeenth century contained eighteen cities, each of which was for many purposes an independent state, jealous of all interference from without. If the rulers of such a city received from the Hague an order which was not pleasing to them, they either neglected it altogether or executed it in their own good time.

Our greatest writer on American constitutional law—Judge Cooley—speaking of municipal government, says:

In America the first settlers, as if instinctively, adopted it in their frame of government, and no other has ever supplanted it or even found advocates.

At the risk of being prolix, I shall quote more at length from this distinguished author:

In the examination of American constitutional law we shall not fail to notice the system taken and the means adopted to bring the agencies by which power is to be exercised as near as possible to the subjects upon which the power is to operate. In contrast to those governments where power is concentrated in one man, or a few or more bodies of men whose supervision or active control extends to all the departments of government within the territorial limits of the State, the American system of complete decentralization, the primary and vital idea of which is that local affairs shall be managed by local authorities and general affairs only by the central authority. It was under the control of this idea that a national constitution was framed under which the States, while yielding to the National Government complete and exclusive jurisdiction over external affairs, conferred upon it such powers only as related to matters of internal regulation as seemed to be essential to national union, strength, and harmony. It is this, also, that impels the several States, as if by common arrangement, to subdivide their territory into counties, towns, road and school districts, and to confer powers of local legislation upon the people of each subdivision, and also to incorporate cities, boroughs, and villages wherever the circumstances and needs of a dense population seem to require other regulations than those which are needful for the rural districts. The system is one which almost seems a part of the very nature of the race to which we belong. A similar subdivision of the land for the purpose of municipal government has existed in England from the earliest ages. In most of the American colonies the central power created and provided for the organization of the towns; in some, at least, the towns preceded and created the central authority.

When the charter of Rhode Island was suspended to bring the colony under the dominion of Andros, the American system of town governments which necessity had compelled it to initiate fifty years before became the means of preserving the individual liberty of the citizen when that of the State or colony was crushed.

Judge Cooley did not overreach the mark of history when he stated that—

Municipal government has existed in England from the earliest ages, for the fact that Englishmen have been qualified for the enjoyment of political freedom is mainly due to those ancient local institutions by which they have been trained to self-government. The affairs of the people have been administered not only in Parliament, but in the vestry, the town council, the board meeting, and the court of quarter sessions. Since the days of their Saxon ancestors the sons of England have learned at their own gates the duties and responsibilities of citizens. Associating for the common good, they have become exercised in public affairs. Thousands of small communities have been sepa-

ately trained to self-government representatives for local objects, and animated by local rivalries and image and reflection of the state. monarchy share in its government; elements are combined in its society simplicity, recognized the right of in vestry and administer parochial and exercised all of the functions to the actual grant of its charter; it of great antiquity, of wide jurisdiction and of composite organization. To to-day on the statute books of most claratory of the common law, but the merchants of London. The spirit and its independent influence popular rights. Its magistrates have and parliaments; its citizens have and religious liberty. Its traditions and glories of England. Its worth Hall, and antique pageantry are unites like an ancient monarchy the pride and power of a living institution.

Thus we see that our American life a history. Our ancestors brought they deemed valuable in the political ing what they believed to be objectionable.

One of the first acts of the legislature incorporation of all towns in the colonial corporations as local republics New England, and it had, said Chancellor effect upon the institutions and the people."

And Chief Justice Ruffin, whose grant entitle him to a conspicuous place in names, said that—

From time immemorial the counties, parishes of the country have been allowed and independent themselves for local purposes. It is most essential the police should be sustained in that manner them by the inhabitants of the particular district and public matters generally thereby diffused been attributed by profound thinkers much of self-government through representatives who mother country and which so eminently distinguishes

Judge Brown, of the supreme court upon the system of local self-government observed that—

Wherever the Anglo-Saxon race have gone, language and laws, these communities, each with its own constitution, have gone with them. It is here that subordination and obedience to the laws, of practical knowledge of civil government which distinguishes

...the people, straight, and to open the doors and will
...the minds of the American people and our
...I can only quote President McKinley's letter to
...War in reference to the instructions which the latter
...give to the Commissioners to the Philippine Islands.

1. The first step in the process of the development of the system is the selection of the system's components. The components of the system are the hardware, software, and data. The hardware components are the physical devices that make up the system, such as the computer, the network, and the storage devices. The software components are the programs and applications that run on the hardware. The data components are the information that is stored in the system.

to these instructions the Commissioners have established governments in portions of the Philippine Islands, and that some are conducting their local affairs and others. It is a strange opinion of fact that the people of these islands have to vote in the national elections, and are not permitted to elect even a petty officer of justice, and are living under a system of despotic government which would not be recognized in a civilized government of liberty and enlightenment, while the people's blood and some of them are waging war against the government in the highway of their privilege and freedom. It is what we should put to ourselves at all times is not to be a government as we have, giving to a government. A people who secure economy at the expense of liberty are after all the most unworthy of governments. Liberty is the greatest misfortune which can befall a nation. The concentration of power in the state may mean the death of liberty, but it is also the death of the people, death of the people, death of the people, death of the people. Daniel Webster, speaking in the United States Senate of May, 1844, said:

[illegible]

rately trained to self-government; taxing themselves through the representatives for local objects, meeting for discussion and business and animated by local rivalries and ambitions. Every parish is an image and reflection of the state. The land, the church, and the commonalty share in its government; the aristocratic and democratic elements are combined in its society. The common law, in its great simplicity, recognized the right of all the rated parishes to assemble in vestry and administer parochial affairs. London was regarded and exercised all of the functions of a public corporation long before the actual grant of its charter; indeed, it was a municipal principality of great antiquity, of wide jurisdiction, of ample property and revenue and of composite organization. The law of attachments which was to-day on the statute books of most of the American States is a declaration of the common law, but was borrowed from the custom of the merchants of London. The old city, distinguished for its spirit and its independent influence, has often been the bulwark of popular rights. Its magistrates have braved the resentment of kings and parliaments; its citizens have been foremost in the cause of civil and religious liberty. Its traditions are associated with the glories of England. Its worth and stateliness, its noble old Hall, and antique pageantry are famous throughout Europe. It unites like an ancient monarchy the memories of a past age with pride and power of a living institution.

Thus we see that our American liberty has an ancestry, and a history. Our ancestors brought to the American continent what they deemed valuable in the political institutions of England and rejected what they believed to be objectionable.

One of the first acts of the legislature of Connecticut in 1636 was the incorporation of all towns in the colony. The establishment of municipal corporations as local republics was the original policy of New England, and it had, said Chancellor Kent, "a benign effect upon the institutions and moral and social character of the people."

And Chief Justice Ruffin, whose great learning and patriotic sentiment entitled him to a conspicuous place in the category of American names, said that—

From time immemorial the counties, parishes, towns, and territories of the country have been allowed and indeed required by law to take care of themselves for local purposes. It is most convenient that local establishments of the police should be sustained in that manner; and indeed to the interest of the community that they should be sustained in that manner. It is most convenient that the police should be sustained in that manner; and indeed to the interest of the community that they should be sustained in that manner. It is most convenient that the police should be sustained in that manner; and indeed to the interest of the community that they should be sustained in that manner.

Judge Brown, of the supreme court of New York, in speaking of the system of local self-government in England observed that—

Wherever the Anglo-Saxon race have gone, wherever they have colonized, and wherever they have established a local administration, these communities, each with a local administration, have gone with them. It is here that they have acquired the habit of subordination and obedience to the laws, of patient endurance, of resolution, of knowledge of civil government which distinguishes them from every other race. Here have been the seats of modern civilization, the nurseries of the centers of constitutional liberty. They are the opposites of the despotic system, which collect all power at a common center to effect a given purpose, which political authority, exercise all its functions, distribute all its patronage, stifle the public voice, and crush out public liberty.

Judge Dillon, who occupies a position on the apex of authority on subject of municipal corporations, says that—

"Of all of its drawbacks the American system of popular municipal organization and administration is, beyond controversy, the fairest to the individual citizen, and on the whole, the most satisfactory in its operations and results of any that has been devised. Any other conclusion would be equivalent to admitting that the people are incapable of enlightened self-government; that holders of property ought not to be respected, and alone to be endowed with political and municipal rights; that the few should govern the many, and that our representative system, the flower of modern civilization, based upon the right of every man to a voice in the local and general government, is a failure.

To show how thoroughly, strongly, and deeply the idea of local self-government is imbedded in the minds of the American people and our foremost statesmen, I need only quote President McKinley's letter to the Secretary of War in reference to the instructions which the latter was directed to give to the Commissioners to the Philippine Islands. The President said:

"Without hampering them by too specific instructions, they should in general be directed to devote their attention in the first instance to the establishment of municipal governments, in which the natives of the islands, both in the cities and in the rural communities, shall be afforded the opportunity to manage their local affairs to the fullest extent of which they are capable, and subject to the least degree of supervision and control. In the distribution of power among the governments organized the presumption is always to be in favor of the smaller subdivision, so that all of the powers which can properly be exercised by the municipal government shall be vested in that government, and all the powers of a more general character which cannot be exercised by the departmental government shall be vested in that government, so that in the governmental system which is the result of the process the central government of the islands, following the example of the distribution of powers between the States and the National Government of the United States, shall have no administrative supervision except of matters of purely general concern and shall have no such supervision and control over local government as may be necessary to maintain and enforce faithful and efficient administration by local officers.

In obedience to these instructions the Commissioners have established municipal governments in portions of the Philippine Islands, and the people under that system are conducting their local affairs and electing their officers. It is a strange operation of fate that the people of this Territory, now American citizens, have no voice in the administration of their local concerns, are not permitted to elect even a petty constable or a school director, and are living under a system of intensely centralized government which would not be recognized in a kindergarten of governmental liberty and enlightenment, while the inhabitants of a distant land, some of whom are waging war against us, are permitted to enter the highway of civic privilege and franchise.

The question which we should put to ourselves at all times is not how cheap but how good a government can we have, giving to all a voice in its administration. A people who secure economy at the expense of popular liberty are after all the most extravagantly governed. The loss of civic liberty is the greatest misfortune which can befall any people. Centralization of power in the state may mean the saving of dollars and cents, but it also means death to the hopes, death to the highest aims and aspirations of the people, death to civic virtue and patriotism. Daniel Webster, speaking in the United States Senate on the 7th day of May, 1834, said:

"The contest for ages has been to rescue liberty from the grasp of executive power. We never have engaged in her sacred cause, from the days of the downfall of those great aristocracies which had stood between the king and the people to the time of our own independence, has struggled for the accomplishment of that single object. Of the long list of champions of human freedom, there is not one name dimmed by

the reproach of advocating the extension of executive authority; on the contrary, the uniform and steady purpose of all such champions has been to limit and curtail it. To this end the spirit of liberty, growing more and more enlightened and more vigorous from age to age, has been battering for centuries against the solid buttments of the feudal system. To this end all that could be gained, the imprudence, snatched from the weakness, or wrung from the newly crowned heads has been carefully gathered up, secured, and hoarded as treasures, the very jewels of liberty. To this end popular and representative government has kept up its warfare against prerogative with various success; sometimes winning, sometimes losing, sometimes witnessing the martyrdoms of the great men and Russells; often baffled and repulsed, but still gaining on the enemy, holding what it gained with a grasp which nothing but the complete extinction of its own being could compel it to relinquish. At length, the people with that instinct and that spirit which makes their voice resistless have been able to say to the monarch, thus far shalt thou come and no farther. Through all this history of the struggle for liberty, executive power has been regarded as a lion which must be kept in check from being the object of enlightened popular trust, so far from being the natural protector of popular right, it has been dreaded, uniformly, always as the great source of its danger. And who is he so ignorant of the history of the world at home and abroad; who is he, yet dwelling in his contemplations among the maxims and dogmas of middle age; who is he, from whose bosom all originality of American spirit has so entirely evaporated and exhaled that he will not see it is the peculiar duty of executive power to care for liberty? Who is he who is so generous and confiding toward power where it is most dangerous, and jealous toward those who can restrain it, who is he that, reversing the order of the political system, poise the pyramid of the political system upon its apex? Who is he who is looking with contempt the guardianship of the representatives of the people, and with equal contempt the higher guardianship of the people themselves, that declares that the security for freedom rests in executive authority, that belies the blood and libels the fame of his own ancestors, by declaring with solemnity of form and force of manner, have invoked the executive power to come to the protection of liberty? Who is he that charges his fear of insubordination, or the recklessness of putting the lamb beneath the lion's paw

Gentlemen of the grand jury: There may be designing men here; there may be men here, as there have ever been, evincing a vertebrateless subserviency to those temporarily in power, that their lust for pelf and power may be gratified, will not say it is a political question not entitled to a place in a judicial proceeding. But such men are either indifferent to or ignorant of our history, or else they craftily seek to impose upon the ignorant and confiding fellow-citizens. How a system so interwoven with our history, upon which all scholars, jurists, and statesmen are agreed, and which Judge Cooley truly says, "seems to be a part of the nature of the race to which we belong" and that "no one can supplant it, or even found an advocate," can be regarded as a political question, must be quite beyond the comprehension of an unbiased, and intelligent mind. The question of local self-government can not any more be made a political question than can the people to trial by jury, or to be secure from unreasonable searches and seizures, or than can any other canon of liberty of which we are proud and jealous.

Gentlemen of the grand jury: You are an inquisitorial body, your powers are very large indeed. It will be your duty to see that as to the commission of any crime which may be within the jurisdiction of any individual grand juror, or which may be submitted to you by the attorney-general, and, finally, such as may attract your attention by private parties. But I warn you, beware of professional and paid informers, a species of vermin that seem to have prospered exceedingly well in this country under the nourishment afforded by liberal legislative

After careful examination and inquiry I have been unable to find that the State or Territory makes or ever has made appropriation for the use of informers. In that respect Hawaii as in many other instances stands alone and unenvied. Speaking from observation and experience as a practitioner at the Hawaiian bar I may say that I have never known a paid informer to testify in the courts in Honolulu who did not confess to a record as a criminal or who did not otherwise by his testimony show himself to be vastly more deserving of punishment than the person he was seeking to convict. And to a certain extent this observation applies to those parasites who hang around the station house and enjoy an unearned support at the expense of honest taxpayers under the guise of being detectives. That every officer has not only the right but the duty to inform against all offenses belonging to his proper sphere which come to his notice and to trace them if no one will deny; for what else is he appointed if not to support and assist in the enforcement of the law? Governments have not infrequently held out regular rewards, proportioned to the offense or crime of which information is given. It was formerly so in England. The more a government is a government of law and not of executive management alone the less effective must necessarily become, upon the whole, a preventive police; for one of the main ideas of a strict government of law and civil liberty is that the citizen be allowed to do all that he chooses, provided he do not offend against the laws. I do not mean to say that all preventive police is contrary to civil liberty. On the contrary it is infinitely better to prevent crimes than to punish them; yet it is certain on the other hand that a preventive police cannot and ought not to be established on so extensive and thorough a plan in a free country as it is possible to do in a despotic oligarchy.

As to informers, it is hardly necessary to state that none but the worst portion of the community will show themselves willing to make a profession of informing for money; people who are incapable, perhaps, by their lost reputation, or unwilling to make a living in the steady and industrious pursuit of a regular trade. These informers therefore will not limit themselves to informations of fully committed crimes and to lawful evidence of them, but they have always been found prone to foment crimes, to mature offenses which otherwise would not have been consummated, and to invent evidence and procure perjured witnesses, who share in their rewards; so that the professional informers become in turn a most criminal portion of the community, and constitute a most alarming evil totally inadmissible in a well regulated society.

If we are told that by a system of informers many offenses may be discovered which otherwise might never be brought to light, we shall place the whole question at once in its proper place by asking that question which we are bound to ask whenever we wish to judge correctly of an institution, viz, what is among other effects, its moral operation? The many sacrifices which have been offered by the institution are doubtless a grave subject. It is the moral effect which this hateful institution has had which is infinitely greater than all the physical pain which it inflicted with fiendish zeal. Those who were burned would at any rate now slumber in the grave, but the nation which practiced it continues to be ruined. The history of every despotic government is replete with proofs of the misery entailed by the perjury of informers. The informers during the Roman Empire

formed one of its worst features and grew out of the pestilence and demoralization greatly promoted by the public ruin. The secret informations in the Republic of Venice were awful. The brass lie hollow and with open mouth in front of the palace of the Doge received anonymous informations. All the imprecations in France against the "mouchards" were well founded. The secret police under Napoleon and all the countries he conquered, in all classes, from the highest to the lowest, and the counter secret police to observe the first, some of the worst and most melancholy traits of that unhappy period. Governments are frequently desirous either to get rid of individuals against whom they have not sufficient evidence to justify a conviction or to obtain more power by a show of danger. For this purpose they have ensnared their victims in pretended conspiracies. This is a legal procedure, to which all despotisms resort, if convenient. Technically termed trepanning under Charles II and James II public trials at the time are full of evidence of this infamous practice and the diaries and correspondence of the times show us the use of the term. Various acts to stimulate and encourage the apprehension of felons were passed in England in 1692, 1694, 1699, 1711, 1742, granting rewards ranging from £10 to £50. Officers seduce poor people, especially, to utter counterfeit money afterwards to prosecute them. A certain degenerate by the name of McDaniel confessed in 1756 that he had caused by his testimony men to be condemned to death. When he was tried with testimony for conspiracy and perjury the people feared so much his acquittal some flaw or other that they were slain on the spot. In 1795 a case happened in which 20 men had become the victims of perjury. In 1817 a number of police officers conspired to induce poor people to pass counterfeit money and seized them in the act. They changed small offenses into capital ones; for instance, if a watch had been stolen, they swore that it had been tied with a string and torn from it by violence. Thus theft became robbery and received the informer's reward of £50. Another revolt happened in 1817, when two soldiers wrestled for a wager of a guinea and with the greatest difficulty escaped death, the sentence of hanging having been pronounced by the perjured exaggeration of police officers. Mr. Wood, a London alderman, asserted in 1816, in Parliament, that while visiting the prisons he had found a number of men, mostly Germans, who had received counterfeit money with which to buy bread, and were seized upon in the act of passing it by police officers. These iniquitous rewards were at length abolished in 1818 by George III, c. 70. Ever since the days of Titus Oates the informer has been regarded with loathing and contempt, neither to be trusted. There have been too many instances in which innocent people have been convicted through the confession of informers.

You should not only inquire into crimes alleged to have been committed, but into the management of all public institutions. You may comment upon and criticise the administration of any officer in this Territory and no personal, private, or political consideration should prevent you from doing so. In a government where we are living under in this country to-day, where the voters have no voice nor direction as to matters of public concern, conscientious, and independent grand jury can and should

ment influence for good. While you may comment upon such matters as you deem proper, I charge and specifically direct you to fully investigate that portion of this community known as Iwilei. I understand that this locality is colonized by prostitutes. The last grand jury reported to this court that "the condition of the premises and general management, which is conducted under the supervision of the police department and the board of health,^a is as satisfactory as could be expected, provided this shameless vocation must be tolerated as a necessary evil." Gentlemen, the proviso was well added, for "this shameless vocation" must not be, shall not be, tolerated. It has come to my knowledge that there are accommodations at Iwilei for upward of 250 prostitutes; that all rooms are filled and that more are in demand; that the girls, some not more than 12 years old, and helpless women are compelled to vend their bodies that their Japanese and French masters may live in idleness and ease. That these conditions are far-reaching in their debasing and corrupting influence is not a debatable question. There is not a town nor a city in the United States where such an aquarium of lust and vice is openly conducted, nor is there a town or a city in the United States where prostitutes are licensed, all secretive and irresponsible gossip to the contrary notwithstanding. What legislator, not himself a criminal of the vilest sort, would vote on a bill which should provide that "the annual fee for a license to do business" as a public prostitute shall be \$50." Paris, of all the great cities in the world, licenses and segregates its prostitutes, and for five years the chief of police has made strenuous efforts to have the system abolished. He asserts that neither the license nor the segregation system prevents or diminishes private prostitution, and that the issuance of a license to and the segregation of a prostitute condemns her to a life of moral leprosy—unclean! unclean! unclean!—and forecloses all hope of reformation. As nothing can be politically or morally right which is morally wrong, the fact, if it is a fact, that the Iwilei assembly of harlots "is conducted under the supervision of the police department and the board of health" is a burning shame and disgrace to this community and an insult to every honest man and virtuous woman in it. There is absolutely no authority of any sort in law for the maintenance of these vice dens, as the laws of the Territory treat fornication as a criminal offense and punish it accordingly, and if it be true that this place is conducted under the direction of the police and with the knowledge of the heads of that department, then they are guilty of the coarsest and most flagrant violation of their oaths of office and deserve to be held up to public censure and scorn. As if to complete the shame and disgrace which this moral plague spot has brought upon the city, I understand that the hovels in which the prostitutes ply their nefarious traffic were built for that purpose by a company enjoying a corporate franchise from this Territory, and that at least two of the directors of the corporation which built, own, and rent these miserable bazaars of crime are men who hold high official positions in this Territory. A community in which such things can be done is totally lacking in high public sentiment and its morals are at a low and constantly diminishing ebb. It will be your duty to investigate this matter fully; there can be no evasion. I hope that you will visit Iwilei some Saturday night. There and then you will observe

^a See Exhibit C.

the high carnival of lust, the vast department store of the vices, half naked women eagerly endeavor to peddle their bodies by the and all, all "under the supervision of the police department and board of health."

I not only direct and instruct you to investigate this place direct and instruct you to ascertain every fact and condition that possibly can bearing upon its maintenance. The owners of the place, the owners of the building, the rent paid for a building as a whole, the rent paid per room by the prostitutes, the names of the lessees, the names of the lessors if they be individuals, or the names of the officers of the corporation, if the lessor be a corporation, the nature of the supervision exercised by the police over the place, the number of buildings, the number of rooms in each building, the number of prostitutes occupying the room, together with their nationality, and every other circumstance which may tend to throw light upon the subject.

I instructed the grand jury impaneled at the August term of court to make inquiry as to whether any minors were employed in saloons of this city as barkeepers. The grand jury reported that no minors were so employed. I charge you to make similar inquiry in this connection I will state that there is no law here prohibiting the employment of minors in saloons, but such a law does exist in the State in the Union and is a wise police measure. It is of great importance that reforms are accomplished in this connection by statute or adjective law, and it is not only proper, but I suggest and call attention to any defects in our liquor laws, and other law, which you may observe during the course of your investigations.

I instruct you, gentlemen, to make a thorough examination of the insane asylum. Inquire as to the inmates, their food, the sanitation of the buildings and premises. Within the walls of human suffering no affliction so much claims pity and sympathy as insanity. Rich and poor are stricken alike, and both are defenseless. Treated with care and tenderness it is but a passing affliction, but neglected by neglect and cruelty it is unspeakably awful. To guard it from wrong and oppression, to relieve suffering, and, if possible, to heal it, is the sacred office of the physician. In the care of the insane two principles should be carefully guarded: the guardianship of the State, and the obligation of proper care and guardianship of the liberal treatment of the lunatic poor. I charge the last grand jury, that "it is hard to understand how a physician, enjoying a large private practice, can give time and attention to an institution of this kind." That is what I want with me, for they reported to the court that in their opinion the visiting physician, however capable and conscientious, cannot properly attend to the requirements of this asylum," and I recommended "that a resident physician be appointed who shall devote his entire time and attention to the inmates." They also reported that the last legislature made an appropriation for new buildings which had been used, although ward No. 2 was "in the process of decay." You will send for the president of the board of the Territorial treasurer and ascertain why this appropriation has not been made available, if the appropriation was in fact made.

I charge you, gentlemen, to visit the Territorial prison and investigate every detail of its management. I may remark

either. Rude justice, violent, lawless, excessive retribution fills a nation from which the justice of society has leaked out. Let society bear to punish homicide, and blood revenge becomes an institution. Let us forbear to punish adultery, and the aggrieved kills the offender, not merely when caught in the act, but on calculation and in cold blood.

Gentlemen, the attorney-general or his deputy will examine all witnesses who may appear before you, but you have the right to examine such witnesses also, and you should not hesitate to do so when you deem it necessary. You will exclude all persons, including the attorney-general, from your presence and hearing while you are deliberating and voting upon any question which may have been brought before you.

It is the duty of the attorney-general to advise you as to the law applicable to any particular state of facts, but it would be grossly improper for him to argue upon the facts in any matter before you, and in no event should he be requested or allowed to express his opinion as to the guilt of any person accused of crime. The attorney-general has the power to enter a nolle prosequi in any criminal case, but this proceeding must take place in open court and not in the retreat of the grand jury room. If in any case you find an indictment, it will be the duty of the attorney-general to prepare it at your request.

You will hear the witnesses for the prosecution; and if in your judgment the evidence of such witnesses, unexplained and uncontradicted, would warrant a conviction by a trial jury, it will be your duty to find an indictment. You will not permit accused persons or their attorneys or witnesses to appear before you or permit them or any other person whomsoever to speak to you on the street or elsewhere in regard to any matter or thing you may be investigating or have under consideration. The oath which you have taken obliges you to keep all of our proceedings secret, and you should constantly wear this as a shield before your eyes. It is the policy of the law that the preliminary inquiry as to the guilt or innocence of a person accused of crime should be secretly conducted.

If any private party desires to call your attention to any crime alleged to have been committed or to any condition of public concern which he desires to have you investigate, no matter who he is, he should personally appear before you and be sworn and examined like any other witness. If any person, high or low, addresses you, or any of you, a communication in writing or in print in regard to your duties or any matter which may have been brought to your notice, it will be your duty to report the fact to the court. It would be just as much a contempt to write or print you a communication under such circumstances as it would be to address a similar communication to the judge of this court while engaged in the trial of a case. Congress passed a law a few years ago which provides that:

Any person or persons shall attempt to influence the action or decision of any juror or petit juror, upon any issue or matter pending before such juror, or before any of which he is a member, or pertaining to his or their duties by writing or sending to him any letter or letters, or any communication in print or in writing in relation to such matter or issue without the order previously obtained of the court in which the said juror is summoned, such person or persons so offending shall be deemed guilty of a misdemeanor and upon conviction thereof be punished by a fine not exceeding \$1,000 or by imprisonment not exceeding six months, or by both fine and imprisonment, according to the aggravation of the offense.

This act is but declaratory of the common law and rests on considerations of the soundest public policy. If, therefore, in violation of law, to influence your action or decision, any letter or communication in print or writing, relating to any issue or matter pending before or pertaining to your duties, is sent to you without the previous order of this court, you will promptly present the matter to the court.

Witnesses appearing before you may be sworn by your foreman if he be absent, by any one of you. I will hand your foreman a copy of oath, which form, and no other, you will use in swearing witnesses. You may when necessary invoke the services of an interpreter but only the official interpreters of this court can be used.

No indictment can be found by you unless at least twelve members concur in the finding. When an indictment is found by you you will indorse thereon, "A true bill," and have such indorsement signed by your foreman. No member of the grand jury can be excused except by the order of the court. If any member of the grand jury is absent at any time or delinquent it will be the duty of the members to present the fact to the court. You may elect one of your members as clerk to keep the minutes of your proceedings; but only the minutes need be kept as will enable you to make your final report to the court, which report you will present upon the conclusion of your labors. Court will convene at 10 o'clock a. m., and adjourn on Friday, which, with a recess from 12 m. to 2 p. m., will constitute your session. You may now retire.

EXHIBIT.—Judge Humphreys.

In the circuit court, first circuit, island of Oahu, Territory of Hawaii.
In probate—at Chambers. Before Humphreys, Judge.

In the matter of the estate of Annie T. K. Parker, a minor.

DECISION.

On the 5th day of December, A. D. 1901, A. W. Carter, guardian of the estate of Annie T. K. Parker, a minor, filed with me his second annual account. At the same time the guardian presented an inventory of the estate of his ward, from which it appears that he has invested nearly all of the money in his hands in the estate of his ward in the bonds of certain private banking institutions; that is to say, \$27,000 has been invested in the bonds of the McBryde Sugar Company, Limited, \$11,500 in the bonds of the Oahu Railway and Land Company, Limited, and \$1,000 in the bonds of the Waialua Agricultural Company, Limited, making a total of \$42,500 in these alleged securities of \$42,500.

The accounts were referred to a master, who was directed to do the same and also to make inquiry as to the value and validity of the security afforded by the bonds of the McBryde Sugar Company, Limited, and the Waialua Agricultural Company, Limited. It appeared in the bonds of the Oahu Railway and Land Company, that the same had escaped the observation of the court at the time this account was submitted to the master, he was not directed to institute a

ference to the standing of that company or the value of the property and its bonds. The trust deed given by it to secure bondholders is similar to that executed by the McBryde Company. The master does not appear to have made an independent investigation as to the securities of the McBryde and Waialua companies, but he did, however, receive the testimony of certain witnesses produced by the guardian, and upon that testimony he reported to the court his conclusion, as follows:

The property of the Waialua plantation appears to be worth about \$3,500,000 and to be good security for a loan of \$1,000,000. The property of the McBryde plantation appears to be worth not less than \$2,000,000 and to be good security for a loan of \$1,000,000.

The court desiring to hear further evidence as to the security afforded by the bonds of the McBryde Company, in which so large a part of her estate has been invested at a rate of interest, to wit, 6 per cent, greatly less than the current rate, caused certain witnesses to be summoned who were examined by the court on the 8th day of April, A. D. 1902, the guardian appearing at that time with his counsel and cross-examining the said several witnesses. The testimony heard by the master, as well as that taken by the court, has been transcribed and is on file herein. Copies of the trust deeds executed by the corporations named to secure the bonds are also on file. The objection to the investment of trust funds in the securities of the Oahu Railway and Land Company rests upon what, in the absence of a statute, are taken to be the well-settled rules of the common law and the oft recognized principles of equity jurisprudence in regard to the investment of funds of that character. There is no evidence of witnesses before the court as to the financial standing of that company, but the court has had reference to newspaper and stock exchange reports covering a considerable period of time as to the market value of its stock and bonds, from which it appears that its bonds have been for many months and are now selling above par, and that its stock, while now selling at a little less than par, has frequently sold above par. Both are held in high repute.

The authorities seem to justify the court in treating newspaper and stock-exchange reports as a proper source of information as to the market value of stocks, bonds, and articles of merchandise. In *Lush v. Druse* (4 Wend., 317) the value of wheat at a certain point was allowed to be proved by a witness who had derived his knowledge solely from the books of large dealers in wheat at that place, and in *Fennerstein's Champagne* (5 Amer. Law. Reg. N. S., 464) the Supreme Court of the United States held that the market value of articles of merchandise at a particular place in a foreign country was well provable by letters written by third persons abroad in the ordinary course of business to other third persons offering to sell at specified prices. In *Sissons v. Cleveland, etc.* (14 Mich., 489), it is said that—

The principle which supports these cases will allow the market reports of such dealers as the commercial world rely upon to be given in evidence. As a matter of fact, such reports, which are based upon a general survey of the whole market, and are constantly received and acted upon by dealers, are far more reliable than individual entries or individual sales or inquiries, and courts should not justly be the subject of ridicule if they should deliberately close their eyes to sources of information which the rest of the world relies upon and demand evidence of a less certain and satisfactory character.

See also *Cleveland R. R. Co v. Perkins*, 17 Mich., 296, Starkie Ev., 10 ed., 95.)

The investment of the funds of his ward in the bonds of the Waialua Agricultural Company, Limited, by the guardian in this case, and particularly the large sum invested in the bonds of the McBryde Company, Limited, can not be defended upon any principle or authority. The investment in the securities of the latter (McBryde Company) especially deserves to be characterized as unauthorized, extravagant, improvident, reckless, and a breach of trust in view of the guardian's admission that at the time of the investment he had neither examined an abstract of title of the property alleged to be owned by the company nor read the trust deed by which the bonds are alleged to be secured, and in view of the further and significant fact that he purchased by far the greater part of them from a corporation in which he was a director and of which he was treasurer, to wit, the American Sugar Company. As a faithful, prudent, diligent, cautious, and conservative fiduciary it was his duty to have examined the title to the property alleged to be pledged as security for the bonds, and to have carefully and critically examined the terms of the trust deed of trust. (Underhill on Trusts, 269-287; Lewin on Trusts, 325.)

The situation is not improved any by the fact that the officers and directors of the American Sugar Company approved of and consented to the sale of the McBryde bonds owned by it to the ward of the guardian. The concurrence of such directors in the sale of the bonds tends to show that the American Sugar Company thought it was safe to sell the same and that it was doing well in disposing of them to the ward of the guardian. The rule is inflexibly established that where in the management and performance of the trust, trust property of any kind, real or personal property, the trustee can not, without the approval and consent of his principal, directly or indirectly become a purchaser. Such a purchase is always voidable and will be set aside on behalf of the beneficiary, unless he has affirmed it after obtaining full knowledge of all of the facts. It is entirely immaterial to the validity and operation of this rule that the sale is intrinsically fair, that no undue advantage is obtained, or that a full consideration was paid, or even that the price is the highest which could be obtained. The policy of equity is to remove every possible temptation from the trustee. The rule applies just as forcibly where the trustee is a trustee in case, simply as the agent for another. (2 Pomeroy, 958.)

As a director and as the treasurer of the American Sugar Company it was the duty of Carter to exercise an impartial and unbiased judgment as to the wisdom of a sale of the McBryde bonds; as guardian of the ward it was also his duty to exercise a like unbiased judgment as to the wisdom of the purchase of the bonds by him as the trusted guardian of the interests of his ward. (Bennett (10 Ves., 381), Lord Eldon says:

Then if the principle be that the solicitor can not buy for his own benefit that where he buys for another the temptation to act wrong is less. It is not use the information for his own benefit it is too delicate to hold him to misuse that information for another person is so much weaker. He may be at liberty to buy for another * * * that distinction is too thin to stand the rule of justice. (Tomaine v. Hendrickson, 27 N. J. Eq., 162.)

The bonds issued by the Oahu Railway and Land Company, the Waialua Agricultural Company, and the McBryde Sugar Company purport to be secured by deeds of trust executed by those

to third parties as trustees, whereby certain properties of the respective companies are conveyed to the trustees named in the respective indentures of trust, to be held as security for the bondholders, but upon the trusts, and subject to the provisos, exceptions, reservations, and limitations in said deeds mentioned. The provision of the indenture of trust executed by the McBryde Sugar Company and the Waialua Agricultural Company are, except with reference to the property conveyed, identically alike. Both deeds contain this provision, to wit:

In case of default in payment of interest or any of the bonds hereby secured, the persons therefor having been presented and payment demanded, should such default of payment continue for the period of three months after such demand, then and thereupon the principal of all of said bonds outstanding and unpaid shall, at the option of the holders of a majority of said bonds, signified in writing, become immediately due and payable, provided that nonaction of any of said bondholders in case of any default shall not extend and shall not effect any subsequent default of any rights arising therefrom.

There is no other provision in either of said deeds of trusts under which a bondholder may have the right to declare the principal of his bond due upon nonpayment of the interest. He may be forced, if he is so unfortunate as to be a minority bondholder, and unable to secure the cooperation of the majority bondholders, to bring successive actions for the collection of his interest, resulting not only in delay in the realization of income, but in the expense which is attendant upon all litigation, thereby reducing the net income to a sum greatly less than that anticipated by and pledged upon the face of the bonds. If the majority bondholders are the owners of the plantation, or if the plantation, or others having an interest in it entirely separate and distinct from and greater than their interest as bondholders, should require the majority of the bonds, they would, if we can take into account the motives which usually influence men in matters where their interests are at stake, hardly sacrifice their interests for the benefit of the minority. In other words, they would not, nor could they in reason be expected to consent to a foreclosure for nonpayment of the interest if it were clearly contrary to their protection as stockholders, or as interested parties otherwise, to do so.

The situation is plainly one in which the big dog, if he may not eat the little dog, can effectually hold the smaller one at bay while he complacently licks his chops over the bone.

No observing man needs to be told that in the event of foreclosure of the bonds of a private business corporation, where the bonds are not guaranteed or underwritten by a solvent trustee or other party, corporate or individual, and where the private property of stockholders of the corporation is, as in this Territory, exempt from liability for the debts of the corporation, the minority are at the mercy of the majority of the stockholders, being in most instances compelled to take common stock in a new corporation created out of the remains of the old and unsuccessful one, and forced to send good money after bad by supplying the new corporation so formed with the necessary working capital. Investment in the bonds of a new enterprise which begins its career with an insufficient working capital, and the success of which depends upon a number of contingencies, is more apt than otherwise to leave us in the condition in which the amiable and confiding son of Peter Goldsmith was discovered. We go to the fair with a fine cow; returning home with the descending shades of night we find that our

only assets are a bundle of shagreen spectacles. The hazardous nature of a minority bondholder's investment was well emphasized by Judge Sutherland, of the supreme court of New York, who, in *King v. Bot* (50 Barb. 453, p. 485), observed:

In case of foreclosure the small bondholders usually become the victims of management and combinations of a few of the large bondholders.

The duty of a trustee does not end with the mere investment of funds in his hands as a fiduciary factor; his duty as such is continuing. Not only must he carefully and safely invest the moneys of his principal in the first instance, but he must also zealously watch and the security upon which the investment rests and promptly call it becomes necessary to do so by reason of the development of a special hazard, or if the interest is not paid through either the negligence, perverseness, or inability of the mortgagor to pay it. The guardian in this case can not exercise any independent, free, unmeasured, and uncontrolled discretion with reference to calling a loan made by him to these corporations in the event of the default of the interest, no matter how frequently the delinquency occurs or however much the safety of the investment may be patent from the provisions of the trust deeds in question. It is an undisguised, plain, palpable delegation of authority, duty, and discretion by the guardian to others, to wit, to the majority bondholders who are strangers to his trust and over whom the court can exercise no authority or control. These people, whoever they are, are stockholders in or ordinary unsecured creditors of the corporation, and can veto, and if it is to their interest to do so the motives and influence of human nature tell us that they will veto, the discretion of this guardian. The guardian, by investing in securities, and by the deeds of trust, has relieved himself from the fetters imposed upon him by his own custody and management of the fund by sharing the management with others and giving those others as much authority as he wishes to give himself. He has no power to foreclose if the persons in whose hands the fund is placed refuse to permit him to do so. "Nay, he has disarmed himself of the power of obeying any order that the court may make in relation to the fund" if the interest be not paid. (*White v. Bondholders*, 43.)

That this delegation of duty is wholly contrary to every principle with which equity has safeguarded the relation of guardian and ward is shown by all the text writers and every adjudged case where this principle has been involved testify.

Underhill on Trusts, 269, 286, 287.

Lewin on Trusts, 331.

1 Peary on Trusts, 463.

Webb v. Jonas, 39 Ch. Div., 660.

As often as the question has been before the courts, they have declared, emphasized, and enforced that a trustee shall not mix trust funds in his possession with his private funds. This distinction applies as forcibly to the mingling by the trustee of his funds with the funds of a third party. I take it that in any case where the question might be raised it would not be disputable that a trustee would be prohibited from contributing a certain amount of his own funds where a similar amount had been contributed by another person, both amounts being secured by one mortgage taken in

common trustee. Such a contributory mortgage (and the trust deeds in this case are nothing more or less) as an investment for trust funds are reprobated by all of the text writers and in every case which I have been able to find. The proposition is treated by Mr. Lewin as too plain for extended discussion. He says:

Of course trustees should not join with others in a mortgage so as to mix up the trust funds with the rights of strangers; and still less could they take a joint mortgage in the name of a common trustee, for this would also be a delegation of their duty.

Lewin on Trusts, 331.

Mr. Perry gives this view his approval (1 Perry, 463).

Mr. Underhill says:

The mortgage must not be a contributory mortgage—that is, a mortgage where the trustee joins with other persons in a joint loan—for in that case the trustees would be putting it out of their power to realize without the joinder of third parties. In other words, they would be intrusting the trust property to persons who were not trustees of it. A contributory mortgage is therefore *prima facie* a breach of trust.

In defense of this trust deed with reference to a foreclosure for nonpayment of interest, it has been argued that what would be for the advantage of the majority would also be for the benefit of the minority bondholders. We have seen that this may not be true if the majority of the bonds are held by the stockholders of the company or creditors having a large amount of claims unsecured against the corporation. At any rate, the argument was well met by Lord Justice Kekewich in *Webb v. Jonas* (39 Chan. Div., 660, at p. 668), where his lordship says:

It has been said that no step could be taken, no money could be received, no terms of arrangement could be made, without its being for the benefit of all. It is said that this is an essential part of a contributory mortgage. That may be so, and this may be an ordinary form of contributory mortgage; I do not know that it is not; but if what I have just adverted to be a necessary result and a necessary incident of a contributory mortgage, that, to my mind, is one of the strongest reasons for saying that trustees can not invest on a contributory mortgage. To my mind, trustees not having any power expressly given them are bound to invest on a mortgage where they have the entire control in their own hands and where they can exercise their own discretion for the benefit of their cestuis que trust, and not where they are bound to consult others, or where if they do consult others they are bound to act for the benefit of others as well as for themselves. It robs them of that control which is an essential part of the propriety of the security. Another objection is that if they are bound to foreclose they must bring the other parties before the court. That may or may not be so important a matter; and though no doubt, according to the decision in *Lake v. South Kensington Hotel Co.* (11 Chan. Div., 121), one set might commence proceedings for foreclosure, making the other set defendants, that obviously is not the ordinary or convenient course. They would have to correspond with other trustees, there might be proceedings pending with regard to other trusts, they might be involved in all sorts of difficulties—difficulties which frequently are incident to an investment on mortgage and must necessarily be so according to our law of real property, but not difficulties which trustees ought to embrace in the first instance and to make reserve for themselves against the rainy day. If the rainy day comes the trustees ought to be utterly unembarrassed by their own acts, though the law or other adverse circumstances may embarrass them.

I can see no reason why this argument does not apply with all of its force to the present case; indeed, I can see every reason why it should apply with the greatest force to this case, as in that case the mortgage appears to have been so expressed that either set of mortgagees might foreclose, while, in the case at bar, the guardian can not foreclose, at least for nonpayment of interest, without the consent in writing of a majority of the bondholders. The question as to right of a guardian to associate strangers with him in the administration of the discretionary

duties of his office, as, for instance, in investing the funds of his in a contributory mortgage, such as we have here, has never passed upon in this jurisdiction. In Banning's case (9 Haw.), which is relied upon as an authority for the guardian, certain investments made by the trustee under the will of Banning in the bonds of private corporations were approved, but it appears from the testimony in that case, from the stenographic report of the arguments of counsel, the briefs, and the decision of the court, that the question discussed was neither argued, considered, nor decided, nor does the question appear to have been decided in any of the cases cited in counsel or the court in the Banning case. Indeed, in the Banning case the decision may very well have turned on the power of the trustee under the will, for the court observes "He (the trustee) has in fact made them (the investments) conscientiously followed the directions of the testator." It need hardly be added that as the trustee conscientiously followed the directions of the testator," he was exonerated in all events, as the directions of the testator were his guide and law. But in so far as the Banning case holds that a fiduciary may invest trust funds in the bonds or other securities of private corporations, municipal, mercantile, or industrial corporations and that the courts of equity and probate in this Territory can not, without transgressing legislative functions, direct the trustee as to what securities he may invest in, the court must and does respectfully decline to do so in the present decision. The court has never considered that the decisions of the supreme court of Hawaii antedating the annexation of the Territory to the United States are binding upon it, barring, of course, any decisions as may have construed statutes still in force and effect, and decisions as may have established rules of property. By an act of the Hawaiian legislature in 1892, it is declared that "the common law of the Hawaiian Islands as ascertained by English and American decisions is declared to be the common law of the Hawaiian Islands, except as otherwise expressed by the Hawaiian constitution or fixed by Hawaiian judicial precedent, or established by national usage." The existence of this statute—its application to the investment of trust funds by those who are intrusted with them—has not been considered by the court in the Banning case. It is true that there was not (nor is there now) any constitutional provision in Hawaii limiting the investment of trust funds, but it does appear that such investments were fixed by judicial precedent in the Banning case or by national usage.

That investments of trust funds in the bonds of private corporations were not permissible at common law is conceded by the court, and which hold that such investments may be made.

The Banning case seems to have been based largely upon the Massachusetts decisions which certainly do sustain the investment of trust funds in the bonds of private corporations, where such corporations have a recognized standing in the community and have demonstrated their ability to successfully do the things which the courts are created to do. But the Massachusetts courts, in common with the courts of other jurisdictions and with the text writers, do not approve of investments in the bonds of new corporations, the success of which depends upon a number of remote and speculative contingencies.

Adair v. Brimmer, 74 N. Y., 539.

Of the last case Mr. Pomeroy says (2 Equity, p. 1592, No. 1):

The opinion of Mr. Justice Woodruff in this case upholds in a most admirable manner the high morality of equity in determining and enforcing the obligation of trustees toward their beneficiaries.

In *Mattocks v. Moulton* (84 Me., 545), the court reviews the Massachusetts cases and says: "The trustee must always bear in mind that he is dealing with trust funds which were not given to him to be used in developing or furthering business enterprises, but to be guarded carefully and invested cautiously, so that principal as well as interest may be forthcoming at the appointed time. While he must be as diligent and painstaking in the management of the trust estate as the average prudent man is in the management of his own estate, he may not always place the trust funds where he or the average prudent man would place his own funds. In measuring the duty of the trustee with the usual conduct of the man of average prudence in the care of his own estate, reference is to be had to the conduct of such a man in making permanent investments of his savings outside of ordinary business risks, rather than to his conduct in taking business chances. There are often occurring good business chances in which a man may invest some of his own money without danger of being called imprudent, whatever the result. But it will generally be conceded that a mere business chance or prospect, however promising, is not a proper place for trust funds." In *Kimball v. Redding* (31 N. H., 352), the court says:

Safety is the primary object to be secured in an investment of this kind, * * * we think that an investment is not to be deemed safe without evidence that it is sound and that the trustee ought to be able to point out some ruling feature to distinguish it from a mere adventure. If he invests in property, it ought to be property which yields an actual income, which has a valuation, in the general sense of the community, founded on that income, and not upon remote eventualities and a succession of contingencies.

And the court further observed, in regard to the investment, "the high expectation that was entertained in its favor did not tend to change its character as a mere adventure or to clothe it with any of the elements of actual property." Now, there must be some reason for the most unusual and, because it is unusual, the striking position of the Massachusetts court in regard to trust funds. I find that, according to the Twenty-fourth Statistical Abstract of the United States, prepared by the Treasury Department, there is deposited in the savings banks alone in Massachusetts the enormous sum of \$533,845,790—more than three times the amount on deposit in the neighboring State of Connecticut; more than four times the amount on deposit in the great State of Pennsylvania, and more than eight times the amount on deposit in similar institutions in any other State in the Union, with the exception of New York, and vastly more than the Empire State in proportion to population. This immense sum is on deposit in the savings banks alone, and of course does not include the large sums

deposited with trust companies and commercial banks. This prominent fact alone is enough to show that there was not only a need but that there was an imperious, overwhelming, irresistible necessity for allowing trustees the greatest latitude in the investment of funds growing out of the unparalleled money conditions which existed in that most prosperous State in the Union for a great many years.

Men remember battles, fires, and wrecks,
Or any other things that bring regrets,
Or break their hopes or hearts or heads or necks,

and we can not blind ourselves to the maelstrom of speculation which this trusting community was sucked and its veins opened by land sharks, speculators, and promoters during the three years following the annexation of these islands. The memory of that high tide of chance, when allured by the prospect of great riches and led to the seductive and plausible promises of avaricious and unscrupulous promoters whose professed knowledge of the secrets which lay in the womb of the future entitle them to be classed as prophets, who "spake three thousand proverbs and whose songs were a song and a five; who could speak of trees, from the cedar tree to the hyssop, even unto the hyssop that springeth out of the wall; of beasts, and of fowls, and of creeping things, and of fishes; of women, and even children invested their savings in wild-cat enterprises, will, suspended in gall, linger long. Many of these enterprises are now only bitter memories—mere speculative tombstones. Take the American Sugar Company, some facts in the history of which appears from the testimony of the general in this case. That company was incorporated with a capital of \$1,000,000; a fine wharf was constructed, a number of costly pumps were built, 800 acres of cane was planted, and a large number of servants and laborers were employed. The water of the sea from which it was expected to irrigate the cane, held in solution tites of salt in solution that it was death to vegetable life; the property had to be abandoned as a sugar plantation. From stock reports it appears that its stock of the par value of \$100 per share sold, in the madness of speculation, for \$200 per share, and is not worth now, according to the evidence of the guardian, for \$10 per share. The property is now used as a stock ranch. The broad acres which a few months ago were covered with cane tossing to the sunlight the promise of wealth, "the wind slowly o'er the lea." I might cite other instances from the records of this court, showing the acute speculative mania which seized this community during the period mentioned. I mention the Maunalei plantation, upon which upward of \$400,000 was invested, which was sold by a receiver of this court, with the consent of the parties, for less than a dime on the dollar of the amount invested.

Prudent men, careful men, watchful men could be summoned out number to testify that they invested in these new and untried enterprises and that they believed them to be good. The answer to that is that the law does not give a trustee the right of choice in investments which may be exercised by prudent men in their own affairs. A business man of even more caution may, and often does, assume intentional risks in the investment of his own property. For the sake of obtaining an ordinary income he will often invest in such a manner that

ultimate loss is considerable, and such speculative use of his property could not be regarded as illegitimate or deserving of any censure.

A man may do as he will with his own property. Absolute freedom from risks is impossible. The most stable forms of property may lose their value, lands may depreciate, even nations may become bankrupt. From these risks which inhere in every kind of ownership the law does not profess to save the beneficiary; but from risks growing out of the uncertainty of speculative investments the law does protect him by making the trustee personally responsible for all trust funds invested by him in such manner. It is the settled rule of equity, in the absence of express directions in the instrument creating the trust or of statutory permission, that trustees can not invest trust property upon any mere personal security nor upon stocks, bonds, or other securities of private corporations. (2 Pomeroy Eq., 1074.) In the recent case before the Maryland court of appeals the rule as accepted in the United States generally is expounded by Mr. Justice McSherry, as follows:

It is of the most vital importance that trustees be held to a strict and rigid accountability, and however serious may be the consequences which in particular cases the application of this rule may entail upon the individuals affected or upon their sureties, insensibility to those consequences is a stern and imperative mandate of judicial duty. It is infinitely better, even in exceptional cases of manifest hardship, that a trustee should suffer the results of his own error and mistakes of judgment than that unsettled principles which have uniformly governed courts of equity in protecting the interest of *cestui que trust* against the trustee should be relaxed or strained in the slightest degree for his acquittal or relief. His duty requires of him the exercise of such diligence and absolute good faith, and whilst the law affords him ample protection, if he seeks the aid and follows the direction of the courts having jurisdiction over the subject, it generally fixes upon him the responsibility for all losses which may result from unprofitable or unfortunate investments made upon his own discretion and judgment. (*Zimmerman v. Farley*, 70 Md., 561, cited in 2 Beach on Trusts, 553.)

We wish all worthy corporate enterprises success; at the same time we intend to protect, with all of the safeguards of law and equity, the dependents upon this court. The clamor of stock manipulators can not move us from our position; the threat of promoters inspires us with no terror; the groan of the widow and the cry of the orphan do fill us with immeasurable pity, and, having an eye single to their welfare, we do not intend that corporations with alleged securities, having an alleged gilt edge but a back of grosser metal, shall break into the vaults of the court and take from it the funds of fiduciaries. As matters now stand there is but one way to get such funds out of these vaults, and that is to employ dynamite in liberal quantities when the police are asleep. If the Massachusetts doctrine, that a trustee can invest trust funds in promissory notes, stocks, and bonds of private corporations, is to become the law of this Territory, may God pity our widows and orphans.

The Massachusetts theory referred to in Banning's case (9 Haw., 453), that for the court to "direct what securities and what only may be accepted by trustees, so that they would be exonerated in the event of loss, trenches upon legislative functions," is a view not held by any other court or text writer.

Lewin on Trusts, 619 et seq.

² Pomeroy Eq., 1064.

Wheeler v. Perry, 18 N. H., 307.

That "investments" in sugar properties, and particularly in undeveloped sugar properties not dividend paying, are not investments for trust funds is a proposition to which I cannot close my eyes to the history of this country, do other than my absolute assent. The view that they are not proper investments for trust funds has been generally followed in this country by those as their accounts in this court show, and has been maintained by the ablest members of the bar. Mr. A. S. Hartwell, whose high professional attainments and superior business ability has been recognized all times, was zealously seconded in denouncing the investment of funds in this class of securities in the Banning case by Mr. W. H. Wemyer. The argument of Mr. Hartwell so forcibly expressed the nature and the purely speculative nature of such investments that I was contented in quoting from it at some length. He said:

It is a different thing altogether from Massachusetts investments, this is bonds for raising money for the purpose of establishing and running a plantation, no matter how much money has been paid out there, whether wisely, the \$400,000 subscribed by the shareholders had been expended on the Kahuku plantation. In the first place it is a mere leasehold. Mr. Dwyer's testimony before this court stated what he thought would be the value of the leasehold in the absence of a sugar plantation. He was a witness called by the defendant. The bonds he thought would be practically worthless if the plantation should not be a success. * * * And right here, if the court please, I want to say and to insist that it is not the proper thing for any sugar security to be held by a trustee, no matter how much he may desire to see the sugar industry in this country; no matter how much he may believe it will succeed, he should not be a trustee. The sugar trust of New York controls the price of sugar to-day, and if they put the price at a quarter of a cent lower than it is now it remains to be seen how many of the plantations in this country will do more than take off their standing cane. If labor is not available it is a matter of the gravest concern whether any of the plantations in this country will ever plant another crop. * * * Now, take again the plantation bonds; I have referred to the fact that \$135,000 had to be raised for some of its bonds before agents could be found to carry it on. What bonds? James Campbell, the lessor, took about \$40,000. James Campbell would get 5 per cent of all the sugar made on that plantation if it succeeded. A pretty good motive, one would say, for taking the bonds. Campbell took \$30,000 for the very good and business-like reason mentioned by Mr. Bolte, one of the officers of the company, because they hoped and expected to do business with the plantation in selling it coal and lumber. The Works took \$28,000, but the evidence is they took it in payment of the bonds. Theo. H. Davies & Co. took \$3,000 for the purpose of running the plantation over there at Kahuku. Grinbaum & Co. took \$9,000, the agents of the plantation. They were pretty safe, having the handling of all the sugar that would be produced in taking \$9,000 in bonds. Bishop took \$15,000. Bishop & Co., who have been interested in almost all the financial ventures of this country, are a very conservative firm. But that cautiousness and conservatism might be justified upon that house to stand to the relief of certain firms and help them in their distress. * * * These investments are not bad investments or investments of political affairs of this country, not on account of the distrust in the country concerning the silver business. It is not the failure of the Barings, or the financial disasters in Australia, it is not the wild-cat railroad ventures which makes these securities bad securities; it is because they are not securities because they are not based upon solid values or permanent values which will become better and they may not become better, that is not the question. They do not come within the rule with regard to trust investments that I have mentioned to them. I submit that when the bonds of a sugar plantation are issued, if they receive no dividends are issued, it is an extremely risky thing to do. Why? If the plantation pays no dividends to its shareholders it is not a business. It does not pay. What are the bonds worth then? What can you do with the machinery except for the manufacture of sugar? It has always been so with these mortgages on sugar plantations were somewhat like the mortgage on an elephant. When the time comes that the property is worthless

and these mortgages are foreclosed you then simply get the value of the property for other purposes besides sugar and nothing else, because the mortgages would not be foreclosed if sugar were paying.

Assuming (what I do not for a moment believe) that the present values of the land and machinery of the Waiialua and McBryde companies are fairly estimated, it does not at all follow that such values are that stability which a trustee should require, for it goes without saying that the permanent value of any mortgage security must depend largely, if not entirely, upon the permanent earning capacity of the property mortgaged, and where such earning capacity is in the least degree precarious or rests upon conditions and numerous contingencies beyond the power of the mortgagor to control or protect, it follows that an investment in such security is speculative in the highest degree. If the production of cane upon these plantations should be discontinued, the land could not be sold for one-fourth of its present alleged value or cane, while mills, pumps, and railroads would hardly fetch the cost of removal. It is not wise to obstruct our vision of these conditions, and it is but little less than a crime to permit the custodians of trust funds to invest the money of women and children, the insane, the weak, the dependent, and the helpless in securities that pending events might cause to be swept into wastebaskets of finance. "Riches have wings," and sometimes their wings are spread very rapidly. The value of the property of any sugar plantation must depend upon the ability of its manager to cause it to produce sugar at a profit, and his ability to do that must in turn depend not merely upon the productiveness of the land, but upon the rainfall, the cost of labor, coal, food supplies, freight, and the price of sugar. While there is probably no immediate danger of an open American market being accorded to sugar grown either in the Philippines or Cuba, yet it is unlikely that the United States will permanently establish or long continue a policy of levying an import duty upon sugar from the Philippines, or that it will long resist the importunities of Cuba for admission to an open market in the United States, either by reciprocity or by annexation.

It is getting to be well understood by everybody that the formal annexation of Cuba has merely been deferred by the preliminaries which were recently gone through with for the election of a set of officials for the Cuban Republic. Cuba will never have independence in the sense in which that term is ordinarily understood. The Platt amendment, which the Cubans have inserted in their constitution, has established an American protectorate over Cuba. Whether the so-called Republic exists one year or ten years, it can never have the same relations to the other nations of the world as have Mexico, Venezuela, Haiti, or any other of the states in its region. Under the Platt amendment Cuba's Government can never enter into a treaty with a foreign power which would tend to impair such independence as she will have under this stipulation, or allow any foreign power any lodgment in the island for colonization or any military or naval purpose; she can not contract any debt the interest on which could not be met by the surplus of her ordinary revenues over her expenditures. The United States has the right to intervene for the preservation of Cuban independence, for the maintenance of order, or for the discharge of the obligations with respect to Cuba imposed by the treaty of Paris on the United States; and for the protection of the Cuban people and for the defense of the United States interests the Cuban Government promises

to sell or lease to the United States lands to be agreed upon between the two Governments for military and naval stations.

These stipulations, of course, impose a condition of dependence upon Cuba from the outset. Cuba is a ward of the United States, and the people of Cuba, of the United States, and of the world know this. Some parts of the soil of Cuba the Stars and Stripes will remain flying after the formal transfer of sovereignty is made to the Cuban Government next May, June, or whenever else the transfer takes place. The military and naval stations will be occupied by the United States from the beginning of the existence of the Cuban Republic. The American flag will remain up in Cuba after Cuba theoretically takes its place among the family of nations. Even this technical independence, however, will be comparatively short, for both the Cuban people and the people of the United States want annexation and know that it will come at an early day. Physically Cuba is part of the territory of the United States, and was so recognized by Jefferson long before Florida had been formally annexed to this country. Every American statesman of consequence since Jefferson's time has looked upon Cuba as an ultimate acquisition of the United States. The ceremonies which will be carried through with in Habana and other parts of Cuba in May or June, when the American flag will constructively be pulled down and the Cuban flag be technically run up, will be interesting and impressive on the surface of things; but the person who looks back of this stage and grasps the vital forces of political evolution which are at work on the American continent will see that all this acting is merely the prelude to the events which will raise the Stars and Stripes all over the island again, and which will keep it floating there forever.

Mr. L. V. de Abad, special Cuban commissioner and secretary of the Cuban delegation in Washington, very recently issued an open letter to the Congress in which, after making an appeal for a generous tariff policy with Cuba, he says:

The island of Cuba is to-day a military dependency of the United States; if it were a territory, and to-morrow, when the Platt amendment becomes operative, although called a republic, it will, in view of that amendment, be less independent than it would have been under the autonomic constitution granted by Spain.

The degree of sovereignty enjoyed by Cuba is not to be compared with that enjoyed by Bulgaria or Servia, because these countries are protected by the Treaty of Berlin, which secured the signatures of a number of powers, and the Republic of Cuba has no guaranty, save that bestowed by an act of Congress, which has since been repealed by a subsequent act.

Both in Cuba and in the Philippines there are square miles of cultivated lands available for sugar where there are single acres of land in this Territory; and there are 20 available native laborers in Cuba and 50 available laborers in the Philippines for every white man and Japanese at work upon the plantations in these islands. The price of sugar must under these conditions (leaving the work of development which is taking place in beet growing in the United States entirely aside) very soon take on a permanent lower range of prices than seems more than probable. That with a lower price for sugar the increase in a supply of cheap oriental labor many of the old-established sugar properties will pay smaller dividends, while some of the new ones will be compelled to discontinue operations, appears inevitable. What will be the value of a sugar property compelled to suspend? The American Sugar Company and Maunalei attest.

The evidence in regard to Waialua Agricultural Company is not as complete as I should like to have before me; but as further showing the remote, uncertain and speculative character of this alleged investment I may quote the evidence of Mr. E. D. Tenney, secretary of that company, as follows:

Q. How long before you calculate the company will pay dividends?—A. Well, that is a question that depends altogether on circumstances, on the condition of the sugar interests. So many factors enter into it I would not want to go on record as saying when it would pay dividends. If things are favorable dividends should be paid within two years; unfavorable, nothing will be paid; can't tell.

Out of a total area of 20,000 acres of land held by the company only about 2,500 acres of the cane land is owned by it in fee. The lands are leaseholds having an average term to run of about 45 years. The capital stock of the company fully paid is \$4,500,000.

According to Exhibit A attached to the annual report of the company, and taking its own figures, the company values its real estate at only \$706,809.20, or nearly a quarter of a million dollars less than its authorized bond issue. In the real estate valuation is not included the leaseholds, valued at (according to the company's figures) \$694,146.28, but it will hardly be contended that trust funds should be invested in that class of property. The company is indebted to its factors in a sum exceeding \$500,000, and it appears from the records in the case of *Soper et al. v. the Waialua Agricultural Company et al.* that a large number of the paid-up shares of the company were absorbed by the promoters. In regard to the McBryde Sugar Company we not only have the testimony heard by the master and the court in this matter, but also the benefit of the evidence heard by the master in regard to these bonds in the matter of the estate of Bernice P. Bishop, deceased, of which we have availed ourselves. The McBryde Sugar Company, Limited, was incorporated May 29, 1899, with a capital stock of \$3,500,000. The shares are of the par value of \$20 each and are now all paid up, with the exception of 9,300 shares, which are in the treasury of the company. The guardian seemed to lay some stress upon the fact that this stock was in the treasury of the company. He evidently overlooked the following provision under which this stock is excluded from the mortgage, to wit:

Excepting and reserving from this conveyance and the operation thereof all shares of the capital stock of the grantor, now or at any time hereafter, during the continuance of these presents, held or owned by it, the grantor, including all such stock, if any acquired by the grantor through sales thereof for delinquency in payment of assessments. The stock of the company according to the master's report is selling at 25 cents on the dollar.

The company has a bonded indebtedness of \$750,000, and is indebted to its factors on open account in about the sum of \$600,000. It has never paid a dividend, although it has been in existence three years, and Mr. Miller, who occupies a trusted and responsible position with the company, says; "I don't expect it will pay any dividends for three years any way, possibly longer." He also testifies that the books show the item of real estate to be \$1,082,194, and Exhibit D attached to the annual report of the company for the year ending December 31, 1901, shows this item to be \$1,272,387.53. As no valuation is placed upon the leaseholds as an item separate and distinct from the real estate, we must presume that they are included in the figures just given for

real estate or else that the company does not take them into account resources. This valuation can hardly be regarded as entirely independent and impartial, as it is the estimate of the borrower upon its own property; besides it must be remembered that this valuation is based upon the property as a sugar plantation capable of yielding a large return and can not be taken as a criterion of the value of the land if the property is abandoned as a sugar plantation.

Situated in the very heart of the plantation, between its Ellele and Koloa properties, is a lease of government land known as Kalaheo, which is a valuable stream. This lease contains 4,045 acres, and will expire on February —, 1909, a little less than seven years. According to the testimony of Mr. Miller, about 2,000 acres of this moribund lease is in cane, and as "it will be three years anyway, possibly longer before the company pays a dividend, it will be readily seen that as a basis of a loan for trust funds it is, aside from the inherent objection to leases, decidedly illusory, and in view of the demand, the clamor of American citizens in this Territory for homesteads, and the declaration of the President, which has been hailed as a benediction, that "we do not wish a region of large estates tilled by cheap labor; we wish a healthy American community of men who themselves till the land for themselves," it may be treated as a foregone conclusion that the lease of Kalaheo will not be renewed, at least not for a rental of \$330 a year which the property now yields the government. It further appears from the evidence of Mr. Miller that—

the artesian wells put down developed salt in excessive quantities, so we had to abandon the wells, and then we tunneled for surface water, and obtained sufficient supply, more than sufficient for one pump.

Here we find a condition such as drove the American Sugar Company from cane planting to stock raising. And right here it may be stated as a most impressive fact that in the last report of the company to its stockholders not one word is said with reference to the salt in solution by the water from these wells. It is true that the witness speaks hopefully and confidently of the water which may be developed by tunneling and by impounding flood waters, but this method of serving water in these islands is experimental. The "oldest inhabitant" always has his story to tell of the "wettest winter and the driest summer" in his experience. When the success of an enterprise is dependent upon either "wind or weather" we ought to give the most second thought before investing trust funds in it.

A number of reputable gentlemen have testified that they believe the bonds of this company to be good, and one, Mr. P. C. Jones, has said that he would not hesitate to invest trust funds in them. It appears from his evidence that the bank with which Mr. Jones is connected has "handled" these bonds; but just how they were "handled" does not appear; whether as a matter of brokerage, or whether the bank loaned money upon them with a satisfactory margin to the sole maker of a note we do not know; at any rate it does not appear that any bank in this city now owns the bonds or has ever owned any of them, and in the case of every witness who testified and who has invested in these bonds it appears that his knowledge of the security is based upon actual inspection of the property but upon what others say about it, which we trace to interested sources. Mr. S. C. Allen, who

vested \$75,000 in the bonds and who is also a stockholder, when asked about the property said:

"I know something of it; I am not very familiar with it; I was down there—I have not been there since 1858. I killed off a herd of wild cattle about 1858 at Kalahele.

He further states that he never read the trust deed nor employed anyone to do so for him. Allen is the only witness who has testified to putting his own money into this enterprise. Mr. Kinney testifies that he borrowed \$50,000 upon these bonds from the acting president (John Lloyd) of the German Saving and Loan Society, of San Francisco, depositing as security \$50,000 of the bonds at par, and that the loan was afterwards extended for six months. Mr. Lloyd's loan was at the rate of 7 per cent; the bonds bear only 6 per cent. It is inconceivable that Mr. Lloyd would lend \$50,000 at 7 per cent upon a mortgage bearing only 6 per cent; but he had other security, to wit, the security afforded by the solvent maker of the note. Mr. Kinney also states that if this property is a failure as a sugar plantation, it can pay 5 per cent on \$500,000 as a stock ranch. The answer to that is, the company has contracted to pay not 5 per cent on \$500,000, but 6 per cent on \$750,000. Five per cent on \$500,000 would give the present bondholders less than 4 per cent on their investment.

This case is not one in which the trustee has made an investment of trust funds in a doubtful venture at a high rate of interest; but it is one in which he has made an investment of such funds at a low rate of interest in what seems to me to be a very doubtful venture. All of the witnesses, except Mr. Damon, state that first-class loans upon first real estate mortgage can be placed at from 7 to 9 per cent, and that the demand for such loans by borrowers is greater than the supply of money in the market. Mr. Damon, who could not state the current rate of interest, as "it varied," was requested to furnish the court with a list of loans made by his bank upon real estate mortgages from October, 1901, up to the present time. Such list was furnished and from that it appears that of 15 loans made by the bank of Bishop & Co. (Damon's bank) 13 were for 8 per cent, 1 was for 10 per cent, and 1 only was for 6 per cent.

Upon no possible theory consistent with his duty to his ward and with her rights can the investment made by this guardian be defended.

It is accordingly ordered that he be surcharged with the investment of \$25,000 in the bonds of the McBryde Sugar Company; with \$11,500, the investment made in the bonds of the Oahu Railway and Land Company; with \$4,000 invested in the bonds of the Waialua Agricultural Company, and that he be surcharged also with interest at 6 per cent on these sums, respectively, from the date of the said several investments.

And it appearing further that the interest of this guardian in this matter is in direct conflict with that of his ward, and said guardian having signified his intention to appeal from this order, it is ordered and adjudged that J. J. Dunne, esq., a member of the bar of this court, do, and he is hereby, appointed guardian ad litem of Annie T. K. Parker, a minor, with full power and authority to represent her as guardian ad litem on appeal.

A. S. HUMPHREYS,
First Judge.

Dated April 12, 1902.

EXHIBIT No. —. Testimony of A. S. Humphreys.

EXTRACT FROM SENATE COMMITTEE REPORT No. 1933, FOLIO 85

* * * the board of health appointed a committee consisting of three reputable contractors and builders, C. B. Ripley, F. J. Wilber, and John Ouderkirk, whose duty it was to examine, measure, photograph, and appraise the value of all buildings within the quarantined district, as well, also, any buildings elsewhere outside of the district ordered burned.

* * * * *

EXTRACT FROM RULE OF THE BOARD OF HEALTH.

If a building is in such an insanitary condition that it can not be made any means disinfected and put in a sanitary shape by the usual means other than fire, then it should be destroyed by fire. Second-class buildings are considered by the board as not being insanitary, but because of their adjoining infected premises and being in such a condition that rats can easily pass from one building to another, we pronounce them to be infected with plague, even though a death does not occur in the premises, and therefore they are condemned to be destroyed by fire.

EXTRACTS FROM OFFICIAL DOCUMENTS RE FIRE CLAIMS.

[Official resolution of the board of health.]

The premises (naming the location) having been inspected by the board, are, in the opinion of this board, insanitary, a source of filth, a cause of sickness, and are incapable of being rendered sanitary by fumigation or any other means, and that it is necessary for the health and safety that the buildings on same should be destroyed by fire, and that such destruction should be carried out forthwith.

* * * * *

EXTRACT FROM LETTER OF HON. S. B. DOLE TO PRESIDENT McK.

On Saturday, the 20th instant, while the fire department was burning the condemned buildings under orders of the board of health in the northern part of Honolulu, one of the spires of Kaumakapili church caught fire so high up that it was beyond the reach of the fire engines, and resulted in the total destruction of the church with the exception of the walls, which are brick, and the spread of the fire to neighboring buildings. The headway thus gained soon put the fire beyond the control of the fire department, and by half past three in the afternoon the greater part of Chinatown was destroyed. It has been the intention of the board of health to have burned the greater part of the buildings eventually, as a necessary measure for the suppression of the plague.

EXHIBIT —.—Judge Humphreys.

HAWAII'S "BLUE" LAWS—CONSTITUTION AND LAWS OF 1840—A PRACTICAL ILLUSTRATION OF THE MISSIONARIES' LOVE FOR THE HAWAIIANS.

CONSTITUTION.

It is our design to regulate our Kingdom according to the above principles and thus seek the greatest prosperity, both of all the chiefs and all the people of these Hawaiian Islands. But we are aware that we can not, ourselves alone, accomplish such an object. God must be our aid, for it is his province alone to give perfect protection and prosperity. Wherefore we first present our supplication to Him that he will guide us to right measures and sustain us in our work. It is therefore our fixed decree—

I. That no law shall be enacted which is at variance with the word of the Lord Jehovah, or at variance with the general spirit of His Word. All laws of the islands shall be in consistency with the general spirit of God's law.

II. All men of every religion shall be protected in worshipping Jehovah and serving Him according to their own understanding; but no man shall ever be punished for neglect of God unless he injures his neighbor or brings evil on the Kingdom.

III. The law shall give redress to every man who is injured by another without a fault of his own, and shall protect all men while they conduct properly, and shall punish all men who commit crime against the Kingdom or against individuals, and no unequal law shall be passed for the benefit of one to the injury of another.

IV. No man shall be punished unless his crime be first made manifest; neither shall he be punished unless he be first brought to trial in the presence of his accusers and they have met face to face, and the trial having been conducted according to law and the crime made manifest in their presence; then punishment may be inflicted.

No man or chief shall be permitted to sit as judge or act on a jury to try his particular friend (or enemy) or one who is especially connected with him. Wherefore, if any man be condemned or acquitted, and it shall afterwards be made to appear that someone who tried him acted with partiality for the purpose of favoring his friend (or injuring his enemy), or for the purpose of enriching himself, then there shall be a new trial allowed before those who are impartial.

EXPOSITION OF THE PRINCIPLES ON WHICH THE PRESENT DYNASTY IS FOUNDED.

The origin of the present Government and system of polity is as follows:

Kamehameha I was the founder of the Kingdom, and to him belonged all the land from one end of the islands to the other, though it was not his private property. It belonged to the chiefs and people in common, of whom Kamehameha I was the head and had the management of the landed property. Wherefore there was not formerly and is not now any person who could or can convey away the smallest portion of land without the consent of the one who had or has the direction of the Kingdom.

These are the persons who had the direction of it from that time down—Kamehameha II, Kaahumanu I, and at the present time Kamehameha III. These persons have had the direction of the Kingdom down to the present time, and all the documents written by them, and no others, are the documents of the Kingdom.

The Kingdom is permanently confirmed to Kamehameha III and his heirs, and his heir shall be the person whom he and the chiefs shall appoint, during his lifetime; but should there be no appointment then the decision shall rest with the chiefs and house of representatives.

PREROGATIVES OF THE KING.

The prerogatives of the King are as follows: He is the sovereign of all the people and all the chiefs. The Kingdom is his. He shall have the direction of the army and all the implements of war of the Kingdom. He also shall have the direction of the Government proper to the poll tax, the land tax, the three days' monthly labor, though in conformity to the laws. He also shall retain his own private lands and lands forfeited for the nonpayment of taxes shall revert to him.

He shall be the chief judge of the supreme court, and it shall be his duty to execute the laws of the land; also all decrees and treaties with other countries; all, however, in accordance with the laws.

It shall also be his prerogative to form treaties with the rulers of other kingdoms; also to receive ministers sent by other countries. He shall have power to confirm agreements with them.

He shall also have power to make war in time of emergency, when the chiefs can not be assembled, and he shall be the commander in chief. He shall also have power to transact all important business of the Kingdom which is not by law assigned to others.

RESPECTING THE PREMIER OF THE KINGDOM.

It shall be the duty of the King to appoint some chief of rank and ability to be his particular minister, whose title shall be Premier of the Kingdom. His office and business shall be the same as that of Kaahumanu I and Kaahumanu II, for even in the time of Kamehameha I life and death, condemnation and acquittal, were in the hands of Kaahumanu. When Kamehameha I died his will was: "The Kingdom is Liholiho's, and Kaahumanu is his minister." That important feature of the Government, originated by Kamehameha I, shall be perpetuated in these Hawaiian Islands, but shall always be in subservience to the law.

The following are the duties of the premier: All business connected with the special interests of the Kingdom, which the King wishes to transact, shall be done by the premier under the authority of the King. All documents and business of the Kingdom executed by the premier shall be considered as executed by the King's authority. Government property shall be reported to him (or her), and he (or she) shall make it over to the King.

The premier shall be the King's special counselor in the great business of the Kingdom.

The King shall not act without the knowledge of the premier, and the premier shall not act without the knowledge of the King, and the

the King on the acts of the premier shall arrest the business. All important business of the Kingdom which the King chooses to transact in person he may do it, but not without the approbation of the premier.

GOVERNORS.

There shall be four governors over these Hawaiian Islands—one for Hawaii, one for Maui and the islands adjacent, one for Oahu, and one for Kauai and the adjacent islands. All the governors from Hawaii to Kauai shall be subject to the King.

The prerogatives of the governors and their duties shall be as follows: Each governor shall have the general direction of the several tax gatherers of his island, and shall support them in the execution of all their orders which he considers to have been properly given, but shall pursue a course according to law, and not according to his own private views. He also shall preside over all the judges of his island, and shall see their sentences executed as above. He shall also appoint the judges and give them their certificates of office.

All the governors, from Hawaii to Kauai, shall be subject, not only to the King, but also to the premier. The governors shall be the superior over his particular island or islands. He shall have charge of the munitions of war, under the direction of the King, however, and the premier. He shall have charge of the forts, the soldiery, the arms and all the implements of war. He shall receive the government dues, and shall deliver over the same to the premier. All important decisions rest with him in times of emergency, unless the King or premier be present. He shall have charge of all the King's business on the island—the taxation, new improvements to be extended, and plans for the increase of wealth, and all officers shall be subject to him. He shall also have power to decide all questions and transact all island business which is not, by law, assigned to others.

When either of the governors shall decease, then all the chiefs shall assemble at such place as the King shall appoint, and shall nominate a successor to the deceased governor, and whosoever they shall nominate and be approved by the King, he shall be the new governor.

HOUSE OF NOBLES.

At the present period these are the persons who shall sit in the Government councils—Kamehameha III, Kekauluohi, Hoapiliwahine, Kuakini, Kekauonohi, Kabekili, Paki, Konia, Keohokalole, Leleiohoku, Kekuanaoa, Kealiihonui, Kanaina, Keoni Ii, Keoni Ana, and Haalilio. Should any other person be received into the council, it shall be made known by law. These persons shall have part in the councils of the Kingdom. No law of the nation shall be passed without their assent. They shall act in the following manner: They shall assemble annually for the purpose of seeking the welfare of the nation and establish laws for the Kingdom. Their meetings shall commence in April, at such day and place as the King shall appoint.

It shall also be proper for the King to consult with the above persons respecting all the great concerns of the Kingdom, in order to promote unanimity and secure the greatest good. They shall, moreover, transact such other business as the King shall commit to them.

They shall still retain their own appropriate lands, whether districts or plantations, or whatever divisions they may be, and they may conduct the business on said lands at their discretion, but not at variance with the laws of the Kingdom.

RESPECTING THE REPRESENTATIVE BODY.

There shall be annually chosen certain persons to sit in council with the nobles and establish laws for the nation. They shall be chosen from the people, according to their wish, from Hawaii, Maui, Oahu and Kauai. The law shall decide the form of choosing them, and also the number to be chosen. This representative body shall have a voice in the business of the Kingdom. No law shall be passed without the approbation of a majority of them.

RESPECTING THE MEETINGS OF THE LEGISLATIVE BODY.

There shall be an annual meeting as stated above; but if the nobles think it desirable to meet again they may do it at their discretion.

When they assemble, the nobles shall meet by themselves, and the representative body by themselves; though at such times as the nobles shall think it necessary to consult together, they may unite at their discretion.

The form of doing business shall be as follows: The nobles shall appoint a secretary for themselves, who, at the meetings, shall record all decisions made by them; and that book of records shall be preserved in order that no decrees affecting the interests of the Kingdom may be lost.

The same shall be done by the representative body. They too shall choose a secretary for themselves, and when they meet for the purpose of seeking the interests of the Kingdom, and shall come to a decision on any point, then that decision shall be recorded in a book, and that book shall be preserved, in order that nothing valuable affecting the interests of the Kingdom should be lost, and there shall be no new law made without the approbation of a majority of the nobles and a majority of the representative body.

When any act shall have been agreed upon by them, it shall be presented to the King, and if he approve and sign his name, and also the premier, then it shall become a law of the Kingdom, and no law shall not be repealed until it is done by the voice of those who established it.

RESPECTING THE TAX OFFICERS.

The King and premier shall appoint tax officers and give them certificates of office. There shall be distinct tax officers for each of the islands, at the discretion of the King and premier.

When a tax officer has received his certificate of appointment, he shall not be dismissed from office without first having a formal trial, and having been convicted of fault, at which time he shall be dismissed. Though if the law should prescribe a given number of years as a term of office, it may be done.

The following are the established duties of the tax officers. They shall assess the taxes and give notice of the amount to all the people, so that they may understand in suitable time. The tax officers shall

be assessment in subserviency to the orders of the governors and in accordance with the requirements of the law. And when the taxes are gathered, they shall gather them and deliver the property to the governor, and the governor shall pay it over to the premier, and the premier shall deliver it to the King.

The tax officers shall also have charge of the public labor done for the King, though if they see proper to commit it to the land agents it is well, but the tax officers, being above the land agents, shall be accountable for the work. They shall also have charge of all new business which the King shall wish to extend through the Kingdom. In all business, however, they shall be subject to the governor.

The tax officers shall be the judges in all cases arising under the tax law. In all cases where land agents or landlords are charged with oppressing the lower classes, and also in all cases of difficulty between land agents and tenants, the tax officers shall be the judges, and also all cases arising under the tax law enacted on the 7th of June, 1839.

They shall moreover perform their duties in the following manner: Each tax officer shall be confined in his authority to his own appropriate district. If a difficulty arises between a land agent and his tenant, the tax officer shall try the case, and if the tenant be found guilty, then the tax officer, in connection with the land agent, shall execute the law upon him. But if the tax officer judge the land agent to be in fault, then he shall notify all the tax officers of his particular island, and if they agree, they shall pass sentence on him and the governor shall execute it. But in all trials, if any individual take exception to the decision of the tax officer, he may appeal to the governor, who shall have power to try the case again, and if exceptions are taken to the decision of the governor, on information given to the supreme judges, there shall be a new and final trial before them.

OF THE JUDGES.

Each of the governors shall, at his discretion, appoint judges for his particular island, two or more as he shall think expedient, and shall give them certificates of office. After having received their certificates, they shall not be turned out, except by impeachment, though it shall be proper at any time for the law to limit the term of office.

They shall act in the following manner: They shall give notice beforehand of the days on which courts are to be held. When the time specified arrives they shall then enter on the trials according as the law shall direct. They shall be the judges in cases arising under all the laws excepting those which regard taxation, or difficulties between land agents, or landlords and their tenants. They shall be sustained by the governor, whose duty it shall be to execute the law according to their decisions. But if exceptions are taken to their judgment, whosoever takes them may appeal to the supreme judges.

OF THE SUPREME JUDGES.

The representative body shall appoint four persons whose duty it shall be to aid the King and premier, and these six persons shall constitute the supreme court of the Kingdom. Their business shall be to settle all cases of difficulty which are left unsettled by the tax officers and common judges. They shall give a new trial according to the con-

ditions of the law. They shall give previous notice of the time holding courts, in order that those who are in difficulty may appear. The decision of these shall be final. There shall be no further trial after theirs. Life, death, confinement, fine, and freedom from it all in their hands, and their decisions are final.

OF CHANGES IN THIS CONSTITUTION.

This constitution shall not be considered as finally established until the people have generally heard it, and have appointed persons according to the provisions herein made, and they have given their assent to this constitution shall be considered as permanently established.

But hereafter, if it should be thought desirable to change it, notice shall be previously given, that all the people may understand the nature of the proposed change, and the succeeding year, at the meeting of the nobles and representative body, if they shall agree as to the addition proposed or as to the alteration, then they may make it.

The above constitution has been agreed to by the nobles, and have hereunto subscribed our names, this 8th day of October, in the year of our Lord 1840, at Honolulu.

KAMEHAMEHA III.
KEKAULUOHI.

LAWS OF THE HAWAIIAN ISLANDS.

CHAPTER I.—*An act pointing out the manner in which the laws shall be promulgated.*

The subjection of the people to the chiefs from former ages down to the present is a subject well understood, as is also a portion of the ancient laws. That subjection and those laws are not now, as a matter of course, continued, but there are at the present time many new laws which it is well that all the people should become acquainted with. There is no way to make them thoroughly understood except by printing them wherefore in a council of the government the following acts were passed.

1. Hereafter no law of the Kingdom shall take effect without having been first printed and made public.

2. Copies of the law shall be delivered to all the following persons: To all nobles belonging to the council; to each of the representative body; to each of the judges; to each of the officers; to each of the police officers; and should a Hawaiian newspaper be published, it shall be published in that, and consuls of foreign countries shall be furnished with ten copies each.

3. Should the purport of any law not be understood, or should judges be in doubt for want of clearness in the law, they may in such case ask explanation of the supreme judges, who will make known the exposition.

Should any two laws be at variance with each other, then the law bearing the latest date is the one in force.

This law having had the sanction of the house of nobles, we have hereunto set our name this 2d day of November in the year of our Lord 1840, at Lahaina, Maui.

KAMEHAMEHA II.
KEKAULUOHI.

CHAPTER II.—*Of the representative body.*

In accordance with the requirements of the constitution, certain persons will be chosen to sit in council with the nobles. For the present they shall be chosen in the following way, but at some future period the number will be increased, though not now:

1. Two persons shall be chosen from Hawaii, two from Maui and adjacent islands, two from Oahu, and one from Kauai.
2. The choice shall be made as follows: Whosoever pleases on the land of Hawaii may write to His Majesty, mentioning the names of the two persons of wisdom whom he chooses to sit in council with the nobles. They may write in the following form:

His Majesty KAMEHAMEHA III:

The object of our writing this letter is to inform Your Majesty of certain persons on this island of Hawaii whom we consider men of wisdom and prudence.

The name of the first is _____.

The name of the second is _____.

It is our desire that these two persons should sit in council with the nobles the present year. By us,

The above letter, when written, may be circulated among the people, and all who are pleased with those men may put their names. And even should there be many such letters written it will be well, for the person who has the most names in those letters will be the person chosen and be the representative from Hawaii.

In these ballot letters there may be a great number of signatures to the same letter. The names of all who vote will be counted, and the persons having a majority will be the ones who are chosen.

The elections shall be conducted in the same manner also on Maui, Oahu, and Kauai.

3. Should any man forge another's name as a signature to a letter written as above, or should anyone write his own name twice, or should one write the name of another without his approbation, he shall be fined \$10 for every name thus criminally written.

4. As soon as His Majesty the King ascertains the names of the persons who are chosen, the premier will then write and inform them of the day and the place of meeting of the legislature, that they may be in a state of readiness.

5. All the expenses of the representatives in going to and returning from the meeting shall be paid by the government, and also all expenses while in attendance.

This edict having been passed by the house of nobles, we have herewith set our names, this 2d day of November, in the year 1840, at Lahaina, Maui.

KAMEHAMEHA III.
KEKAULUOHI.

CHAPTER III.—*An act to regulate the taxes.*

There is much in this law which does not relate directly to assessment and taxation. A portion of it is merely explanatory, a portion applies directly to taxes, another portion applies to labor, another portion applies to the former prohibitory system, a portion is direct law. That part which simply disapproves of certain evils is instruction. If a penalty is affixed, that is absolute law.

1. *Respecting the poll tax.*—There shall be two forms of taxation the Hawaiian Kingdom. The one a poll tax to be paid in money, the other a land tax to be paid in swine; or these shall be the standard taxation, though in failure of these articles other property will be received. The amount of poll tax shall be as follows: For a man, \$1; for a woman, 50 cents; for a boy, 25 cents; for a girl, 12½ cents.

This is the ratio of taxation for adults and children above 14 years of age; but feeble old men and women shall not be taxed at all. In the back part of the islands, where money is difficult to be obtained, arrowroot will be a suitable substitute; thirty-three pounds of good arrowroot will be taken for a dollar. Cotton also is another suitable article; 16 pounds will be accounted equal to a dollar. Sugar is another suitable article; also nets. If any individual do not obtain the money at the time when every man is to pay his taxes, and if he do not obtain arrowroot, nor sugar, nor nets, until the specified months for payments are passed, viz, October, November, and December, and if the last days of December have passed, then every man shall be fined the value of \$2 (if this tax is not paid), and the same rates of increase shall be observed in relation to those whose taxes are less than that of a man. The fine shall be paid in some property that can be sold for the value of \$2, but not in property subject to immediate decay or depreciation.

2. *Land tax.*—The following is the rate of taxation for plantations and farms including plantations. There shall be no state, county, town, and district tax, but only the following: A large farm, a swine 1 fathom long; a smaller one, a swine 3 cubits long; a very small one, a swine 1 yard long; if not a fathom swine, then \$10; if not a 3-cubit swine, then \$7.50; if not a yard swine, then \$5.

If neither a fathom swine nor \$10, then 2-yard swine, or, if failing these, then four 1-cubit swine, or if not these, then some other property of equal value with a fathom swine. Or, if none of these, then inquiry shall be made both of the landholders and landlords, and he whose fault shall be dispossessed of this right in the land. Or, if the fault is common to the landlord and tenant, then they shall have three months to put the land in good order, at which time they all shall leave it. For in that case it appears that the land was truly valuable, the landlord and tenant neglected to pay the taxes. This is doing real damage—it is downright laziness. In the same manner as the persons are fined and then dispossessed, so also shall those persons be fined and dispossessed who hold small farms included in larger ones.

But those plantations which have no farms in them, under the direct taxation of particular chiefs, and have never had during the remembrance of any of the people now alive, they shall be taxed as follows in this new assessment: A large plantation, 2-fathom swine; a smaller one, 1-fathom swine; a very small one, a 3-cubit swine.

The above shall be the conditions of taxation and dispossession of farms.

It is furthermore added, for the purpose of clearness and equality of taxation, that if the tax officer and the owner of the swine do not agree as to the size of the swine, then the tax swine shall be weighed, and a fathom swine shall be considered as weighing 333 pounds, a 3-cubit swine 250 pounds, and a yard swine 167 pounds. In the system of taxation this shall be considered as the regular weight of all tax swine.

If the weight of a swine shall exceed that which is prescribed for a fathom, 3-cubit, or yard swine, then the tax officer shall pay for

less above the proper weight; and so also if the weight of the swine be short of what is prescribed in the law the land agents shall pay the deficiency.

Furthermore, the governors of the several islands shall notify His Majesty the King of all the lands which are annually forfeited, and give them out again at his discretion, or lease them, or put them in the hands of those who have no land, as he shall think best.

(Of the labor tax.—Hereafter a tax in labor shall not be required every week of the month. On two weeks labor shall be done for His Majesty the King and also the landlords, and two weeks the people shall have wholly to themselves. The first week in the month the people shall work two days for the King and one for the landlords; the second week in the month they shall work one day for His Majesty the King and two days for the landlords, and the next two weeks the people shall have to themselves. But if there be important public work to be done, which is for the benefit of the people at large, then there shall be twelve working days. The people shall work three days each of those weeks which belong especially to themselves, and when the work is finished or ended then that kind of labor is at an end; but regards such kinds of labor as are merely for the private interest of chiefs or owners of counties, towns, districts, plantations, and farms, and even including the King, shall take the benefit only of his own particular days in the week and the people shall work only on Friday, and sometimes on Thursday, for the landlords, and the landlords shall be exact to observe their particular days. And so also the tax officers shall be particular to appropriate only the King's days to his labor. If the landlords or inferior chiefs see proper to appropriate their days for the benefit of His Majesty the King in the performance of any particular labor, then the King shall return as many days' labor as he has received from them. In the same way there may be an exchange of days with the common people.

If the King is in particular need, or landlord, it will not then be proper for the people to refuse to exchange days. They shall exchange, and on the above conditions, though any man may refuse to exchange when it is of special disadvantage to himself.

The same privilege shall also be given to the people. Whenever they are in straitened circumstances and shall wish to be absent from the Tuesday or Friday labor, they may then exchange with the tax officers or landlords, and it shall not be proper for them to refuse; though if any man should be guilty of downright deception and should find fault in no straits, that shall be considered as absenting himself from a day's labor.

Those landlords and chiefs who are guilty of appropriating to their own use the labor of the people on days which do not belong to them, and do not return an equal number of days to the people therefor, shall be punished. The tenants shall be freed for six months from working for their chiefs who have thus treated them.

The following also is the fine of those who do not go to the public labor for the King and landlords: A half a dollar for each man. If a man arrive on the ground at dinner time, a fourth of a dollar shall be the fine; or if the man do not arrive till after the falling of the signal for commencing at 7 o'clock, he shall be fined an eighth of a dollar. If the failure be on the King's day, the fine shall be paid to the King; if on the landlord's day, it shall be paid to the landlord. Tenants, subtenants, and

cultivators of small lots shall all pay to the landlords of their particular farms or plantations. So also headmen of states, counties, towns, ships, and districts shall receive from their particular tenants, subtenants, and cultivators of their lands. But tenants of those lands who have not been subject to private taxation shall pay only to the King in case of absence from public labor.

When public labor is to be done of such a nature as to be a common benefit to King and people, and therefore twelve days in a month devoted to labor, then all persons, whether connected with the land or not, and also all servants shall go to the work or pay a fine of half a dollar. Those also shall go who have been freed by the payment of \$9 a year, and all who have been freed by their masters, having paid a fine of half a dollar a day.

They shall not go, however, on the King's day nor on the landlord's day, but merely on those days belonging to themselves.

At the period when the taxes are collected, according to the notice given by the tax officers, during those days there will be no field labor required, neither by the King nor by the landlords, nor until the tax officers give notice of the same. The labor of the people during those days will be to carry their taxes to the place directed by the tax officers.

But all persons who are sick and those in attendance on the sick shall, on the examination of the tax officers, be freed from the fine of nonattendance on the labor days.

He that absents himself without giving previous notice shall be fined half a dollar. He that gives previous notice shall pay but five cents.

If any man wish to be entirely freed from public labor, he may go to the landlord and pay nine dollars, four and a half for the King, four and a half for the landlord, and then the man shall be entirely free and shall not be required to go to the labor of the King nor to that of the landlords.

Those feeble old people who are freed from the yearly tax shall also be freed from the yearly labor of the landlords, King, and all kinds of public labor.

Let all those who are called landlords and governors and tax officers consider well what kinds of produce are suited to each particular land and to all the lands from one end of the island to the other. And they shall give special charge on this subject to the tenants of the lands, so that they may cultivate extensively all such articles as shall be profitable. The landlords shall derive their profit and loss from their own days only, and so also the King shall derive his profit and loss from his days only. And the people shall derive their profit and loss from their days. But the landlords shall strive to stimulate the people to such kinds of labor as shall be profitable to the country.

It is furthermore specified that on all days of labor there shall be two seasons of rest for the laborers; one at breakfast time, the other at dinner. If one should remain idle while the rest are at work, he shall be two days' work at some other labor. But men shall not be fined unjustly. Those that are really idle and lazy shall be fined. At three o'clock the labor shall cease; and then if the people wish to remain and hear the reading of the laws, it shall be at their option to do so or not.

4. *Respecting parents who have numerous families, and also respecting the infirm.*—Those parents who have a number of children

ee or more, and neither of the children supported by their friends, if some are thus supported and three remain, those parents sustain every burden, and therefore the father shall not go to the field on or days to work for the King, and they shall pay no poll tax on the year when the half dollar is required, but on the year when the full dollar is required they shall pay a half tax.

These are the rules for those having three children. But it shall be proper for any man to adopt the child of another for the purpose of avoiding the labor tax. He may, however, adopt the children of his deceased relations and friends when the children are thus left orphans.

If any parent have four children, and neither of them adopted by another, then that parent shall not go to the public labor, neither for the King nor for the landlords, nor shall they pay any poll tax.

If any parent have five, six, or more children, whom they support, either of them being separated from the family, or if some do live separate from the rest, and five or six more remain, then those parents shall by no means be required to pay any poll, land, or labor tax until their children are old enough to work, which is at fourteen years of age. Then, for three years the boy shall pay a fourth of a dollar per year—the seventeenth and eighteenth years he shall pay half a dollar. After the eighteenth year he shall then for two years pay three-fourths a dollar, and after he is twenty he is then an adult. The same rate shall be observed in relation to girls, they being adults when they arrive at twenty years of age.

The burden of parents who have numerous families may be further relieved, and their circumstances be rendered more pleasant, by increasing the size of the farms.

Furthermore, whenever a single individual has a large number of invalids living at his house, amounting to as many as four, he shall inform the tax officers thereof, and if he perceive that the man is really burdened, then he shall neither go to the public labor of the King nor to that of the landlords. He shall take good care of them, and the amount of his land shall be increased in order that they may be supplied with food; and on the year when the poll tax is a dollar he shall pay but half a dollar, and when the tax is half a dollar he shall pay nothing until some of the invalids are gone and he is relieved. When he shall pay taxes and go to the public labor also, provided he is wholly relieved. And here is a word of advice for industrious landlords, tenants, landlords, subtenants, servants of chiefs, persons having no land, and vagrants. According to this book, it is best to have one, and one only, fixed business, and to engage in it with high hopes in Him who aids us by the rain from heaven. Such a course would be a benefit to all who live and labor in our kingdom.

Respecting idlers.—As for the idler, let the industrious put him to shame, and sound his name from one end of the country to the other. And even if they should withhold food on account of his idleness, there shall be no condemnation for those who thus treat idlers.

If a landlord or a chief should give entertainment to such a sluggard, he would thereby bring shame on the industrious. For three months the tenants of him who thus entertains the sluggard shall be freed from labor for their landlord. Such is the punishment of him who befriends the sluggard. Let him obtain his food by labor.

6. *Respecting applications for farms, forsaking of farms, disposing of farms, and the management of farms.*—No man living on a farm whose name is recorded by his landlord shall, without cause, desert the land of his landlord, nor shall the landlord causelessly dispose of his tenant. These are crimes in the eyes of the law. If any portion of the good land be overgrown with weeds, and the landlord see that it continue thus after a year and six months from the circulation of this law of taxation, then the person whose duty it is shall put the place which he permitted to grow up with weeds under a good state of cultivation, and then leave it to his landlord. This shall be a penalty for all in every place who permit the land to be overrun with weeds. The same rule shall apply to sublandlords and subtenants.

But if any man be in straitened circumstances, wishes to leave a farm, or if he have business in another place, this is the course he shall pursue: He shall first give notice to his landlord, and having informed him, he shall then put the farm in as good a state as he found it, after which he may leave it.

Landlords, oppress not your tenants; condemn them not without cause while they continue to do well. If a land agent do thus to his tenants, and dispossess them without a crime on their part, he shall pay a fathom swine to his tenant, and the tenant shall not be dispossessed. Wherefore, ye landlords, land agents, and sublandlords do not thus to your subtenants—take not causelessly from them the products of their lands, nor their domestic animals, nor any other article which is not given you. All the avails of your own work days are yours. There is no penalty for the landlords who condemn themselves to that right.

Furthermore, let every man who possesses a farm in the Hawaiian Kingdom labor industriously with the expectation of thereby securing his own personal interest, and also of promoting the welfare and peace of the Kingdom.

Those men who have no land, not even a garden nor any place to cultivate, and yet wish to labor for the purpose of obtaining the objects of their desire, may apply to the land agent or the governor or the King for any piece of land which is not already cultivated by another person, and such places shall be given them. The landlords and King shall aid such persons in their necessities, and they shall not go to the field labor of the King and landlords for the term of three years, after which they shall go. But if neither the landlords nor King render them any aid until they bring such uncultivated ground into a good state of cultivation and they eat of the products of the land without any aid, then they shall not for four years be required to go to the field on the labor days of the King nor of the landlords. After the four years they shall go to the field and also pay taxes. But the poll tax they shall always pay.

If any landlord wishes to transfer or lease any portion of his field or uncultivated grounds and the land agent objects, he has a right to do so if he designs to cultivate it himself; but if he waits a year and does not do it then the objections of the land agent become groundless and he shall pay all the loss sustained by the landlord in consequence of his objections.

It is furthermore recommended that if a landlord perceive a considerable portion of his land to be unoccupied or uncultivated and yet suitable for cultivation, but is in possession of a single man, that

lord divide out that land equally between all his tenants; and if they are unable to cultivate the whole then the landlord may take possession of what remains for himself and seek new tenants at his discretion.

7. Of residuum lands.—All residuum lands which have been separated by the chiefs as residuums from the main plantation, district, or estate are now to be restored to that portion of land to which they formerly belonged. Let the occupancy and business of each State, district, plantation, and farm be clear and distinct, each by itself. Let no one take that which belongs to another, for this is the statute in relation to such persons. If anyone takes the residuum which belongs to another, then the farm of him who took the residuum shall be given to the owner of the residuum. Such is the penalty of those who seize residuums; their farm shall be given to those whose residuums were seized.

This edict does not apply to those pieces of ground which have been already appropriated as building lots and house yards; nor does it apply to those pieces of ground which have been set apart as the royal domain lands, for such divisions were not taken as residuums. Nor do the edicts apply to places which have been taken by the chiefs for the public interests of the King. Residuums proper, which were taken from the land, are the only ones to be restored, not, however, those residuums which were taken previous to the country's becoming subject to Kamehameha I.

On Hawaii these are the residuums to be restored, those which have been seized since the battle of Mokuohai; on Maui, all that have been taken since the battle of Kauwaupali; on Oahu, all since the battle of Manu; on Kauai, all since the friendly meeting of Kaumualii, with Kamehameha I on shipboard. But possessors of house lots that are like the farm gardens must aid the owners of the farms from which they were taken in payment of the yearly tax.

8. Of free and prohibited fishing grounds.—(1) *Of free fishing grounds.*—His Majesty the King hereby takes the fishing grounds from those who now possess them, from Hawaii to Kauai, and gives a portion of them to the common people, another portion to the landlords, and a portion he reserves to himself.

These are the fishing grounds which His Majesty the King takes and gives to the people: The fishing grounds without the coral reef, the Kilohee grounds, the Luhee ground, the Malolo ground, together with the ocean beyond.

But the fishing ground from the coral reef to the seabeach are for the landlords and for the tenants of their several lands, but not for others. But if that species of fish which the landlord selects as his own personal portion should go on to the grounds which are given to the common people, then that species of fish, and that only, is tabooed. If the squid, then the squid only; or if some other species of fish, that only and not the squid. And thus it shall be in all places all over the islands; if the squid, that only; and if in some other place it be another fish, then that only and not the squid.

If any of the people take the fish which the landlord taboos for himself this is the penalty—for two years he shall not fish at any fishing ground. And the several landlords shall give immediate notice respecting said fisherman that the landlords may protect their fishing grounds lest he go and take fish on other grounds.

If there be a variety of fish on the ground where the landlord takes his particular fish, then the tenants of his own land may take them but not the tenants of other lands, lest they take also the fish tabooed by the landlord. The people shall give to the landlord one-third of the fish thus taken. Furthermore, there shall no duty whatever be laid on the fish taken by the people on grounds given to them, nor shall any canoe be taxed or tabooed.

If a landlord having fishing grounds lay any duty on the fish taken by the people on their own fishing grounds the penalty shall be as follows: For one full year his own fish shall be tabooed for the tenants of his own particular land, and notice shall be given of the same so that the landlord who lays a duty on the fish of the people may be known.

If any of the landlords lay a protective taboo on their fish, when the proper fishing season arrives all the people may take fish, and when the fish are collected they shall be divided—one-third to the fishermen and two-thirds to the landlord. If there is a canoe full, one-third shall belong to the fishermen and two-thirds to the landlord. If the landlord seize all the fish and leave none for the fishermen the punishment is the same as that of the landlords who lay a duty on the fish of the people.

If, however, there is any plantation having fishing grounds belonging to it but no reef, the sea being deep, it shall still be proper for the landlord to lay a taboo on one species of fish for himself, but on one species only. If the parrot fish, then the parrot fish only; but if some other fish, then that only, and not the parrot fish. These are enactments respecting the free fishing grounds and respecting the taking of fish.

(2) *Respecting the tabooed fishing grounds.*—Those fishing grounds which are known by the people to have shoals of fish remaining under them shall, at the proper season for fishing, be placed under the protective taboo of the tax officers for the King. The fishing grounds on Oahu thus protected are: 1, Kalia; 2, Keehi; 3, Kapapa; 4, Māeakuli; 5, Pahihi. On Molokai as follows: 1, Punalau; 2, Ooia; 3, Kawai; 4, Koholanui; 5, Kaonini; 6, Aikoolua; 7, Waiokamaheleiki. On Lanai, the bonito and the parrot fish. On Maui, the kuleku of Honuaula and other places. On Hawaii, the albacore. On Kauai, the mullet of Huleia, Anehola, Kahili, and Hanalei, the squid and fresh-water fish of Mana, the permanent shoal fish of Niihau, and all the transient shoal fish from Hawaii to Niihau, in sufficient quantity to fill two or more canoes, but not so small a quantity as to fill one canoe only. But if the fishermen go and borrow a large canoe that all the fish may be put into one, then there shall be no duty upon them.

On the above conditions there shall be a government duty on all transient shoal fish of the islands. The tax officer shall lay a protective taboo on those fish for His Majesty the King, and when the proper time for taking the fish arrives, then the fish shall be divided in the same manner as those which are under the protective taboo of the landlords.

If the tax officer seize all the fish of the fishermen, and leave nothing for those who take them, then he shall pay a fine of \$10, and shall have nothing more to say respecting the royal taxes. But if the order

izing all the fish of the fishermen was from the governor, then he shall no longer be governor, though he may hold his own lands, and the tax officer shall not be turned out of office. At the proper time the tax officer may lay a protective taboo on all the King's fish and the landlords all around the island. But it is not proper that the officer should lay the taboo for a long time. The best course is for the officer to give previous notice to the fishermen, and then the common people and the landlords to fish on the same day. Thus the rights of all will be protected.

But no restrictions whatever shall by any means be laid on the sea about the reef, even to the deepest ocean, though those particular fish which the general tax officer prohibits and those of the landlords which swim into those seas are taboo. The fine of those who take prohibited fish is specified above.

Advice to the governors and landlords.—It shall be the duty of those whom the King gives lands to see that they do not establish other landlords under themselves, but over the people. Let that business come to an end. The establishing of a multitude of landlords over the tenant; the traveling of the people a great distance to the work of their landlords, and thereby leaving all the affairs of their lands in bad condition; the harboring of a multitude of sluggards, and women, men, who do nothing, the chiefs and the landlords grinding their teeth; the making of feasts by higher ranks, for the purpose of getting the property of the poor; the taxing of those people who desire to do business with their landlords, and that, too, by the district and land agents, and without any fault on the part of the people, the landlords are hereby urging the people to trade contrary to their wishes; the unequal punishment of criminals by the judges—the proper name for those mentioned in this section is thievish seizure, unjust oppression, imposing unjust burdens, avarice. These are the wealth-destroying acts which impoverish the Kingdom. This conduct of the governors and heads of districts and chiefs shall cease. Let no criminal act of this kind be done hereafter, for, lo, these are the blasts of the land. Let none of the landlords under the King and none of the land agents do them do any of all the things forbidden in this law. If anyone of the persons spoken of in this edict do any of the things forbidden in this law, he shall pay all damages sustained by him to whom he does damage, and if he continue to do thus his fine shall be that he shall no longer be a landholder in these islands, and he shall be fined to half the amount of the property which was sought. Such is the fine of those who set aside the directions of this section.

The business of the governors and land agents and tax officers of the general tax gatherer is as follows: To read frequently this law to the people on all days of public work, and thus shall the landlords do in the presence of their tenants on their workings days. Let everyone put his own land in a good state, with proper reference to the welfare of his body, according to the principles of political economy. The man who does not labor enjoys little happiness. He can not obtain any great good unless he strives for it with earnestness. He cannot make himself comfortable, not even preserve his life, unless he labor for it. If a man wish to become rich, he can do it in no way except to engage with energy in some business. Thus kings obtain kingdoms by striving for them with energy." The divine teacher said

to our first ancestors thus, "In the sweat of thy face thou shalt eat bread," and that is the business of those most particularly spoken of in this law. Reflect well on the meaning of the words spoken herein.

10. *The business of the chiefs the present year.*—On the first year after the promulgation of this law it shall be the duty of the chiefs under His Majesty the King to read frequently what is herein written and reflect well on the meaning of this new law of the Kingdom, to search out encouragement for the people to labor with the animating hope that the sweat of the face will obtain its due reward; to see to the requirements of this law in order that the Kingdom itself may be regenerated; to select suitable times to be devoted to seeking the welfare of the officers of the Kingdom, and your own also, and that of the landlords and common people, together with that of strangers who are permitted to dwell in these islands, that they may prosper and be happy. This is the business for which you should meet for consultation: to promote the welfare of the industrious and of others; to discipline those lazy persons who live in hordes around you, through whom heavy burdens are imposed upon your laboring tenants; to select up agents capable of acting according to the requirements of this law and tax officers, both to aid the general tax gatherer, and to act upon your own particular lands; to place your children and young brothers in the high school of the nation; to seek for a higher kind of prosperity than that which we have heard existed under the reign of Kamehameha I, when the old man and woman, with the child, could sleep safely in the highway; to remove the ignorant land agents and those officers who tax the people unjustly—from which causes the people are oppressed and the Kingdom impoverished; to put an end to every thing which is at variance with this law; to cherish the good which will drive away the enemies of these islands; to put an end to your covetousness, by which the poor are dispossessed of that which is lawfully their own; to treat with kindness those who devote their strength to labor, till their tattered garments are blown about their necks, while those who live with you in indolence wear the costly apparel, for which the industrious poor have labored. Wherefore have compassion upon them in accordance with the requirement of that covenant to which you have sworn: "Love thy neighbor as thyself." Let the chiefs reflect well on these duties in order that they may perpetuate their ranks as chiefs on these islands. Scatter the people about upon the lands, that they may cultivate them and become rich. Thus will their good will to us be increased, and thus the people of the Kingdom will be eased somewhat of their burdens.

11. *Duties of the tax officers.*—On the first year after the publication of this law, these shall be the duties of the tax officers which the governors appoint to aid the general tax gatherer: The general tax gatherer shall instruct the agents of states, counties, districts, plantations, and farms, that they all labor faithfully on the public labor of the King to grow that kind of produce which is best suited to the particular land in every part of the islands; though cotton is a production which is considered by this law as very important. Let it be planted in abundance as a new source of wealth to these islands. That is a third article in which taxes will be received, of which the tax officer shall give universal notice. In the same manner he prompts the people in relation to the money tax for the poll, and

tax for the land, so also he shall prompt them in relation to the growth of the cotton. Other kinds of produce may be cultivated at the option of the officers and people. If they are industrious their wishes will be realized. Let the tax officers see that the taxes are assessed in strict accordance with the requirements of this law; let them enumerate the people, male and female, together with the children, who pay the yearly tax, and make a separate enumeration of old men and women and those children who do not pay the taxes; let them take a yearly account of the deaths and births, by which it may be ascertained whether the people of the Kingdom are really increasing in numbers or not, and by that means the amount of the tax can be known.

Furthermore, ignorant persons shall be no longer employed, neither as tax officers nor as land agents, for that is a means of oppressing the people and making them poor, they being so accustomed to impose taxes at will and receive the property of others without pay. This is perhaps the reason why the people at the present time are so lazy and work so feebly.

You landlords, to whom lands are given in charge, no longer rule your tenants in ignorance, lest the tax officers, being enlightened in the principles of this book, nullify your title as landlord and we give the lands to those who are ready to aid the feeble portions of the community. The ignorant shall receive their proper reward, poverty, and the lands shall be given to other lords. This penalty, poverty, shall be the reward both of chiefs and people if they act in reality contrary to the above.

The business of females.—This is the appropriate business of all the females of these islands—to teach the children to read, cipher, and other branches of learning; to subject the children to good moral and school laws; to guide the children to right behavior and to keep them in schools, that they may do better than their parents. But if the parents do not understand reading, then let them commit the education of their children to those who do understand it, and let the parents support the teacher; inasmuch as they feel an interest in their children, let them feel an interest in the teacher, too. But if any woman do not conduct according to the requirements of this section, let her return to the labor of her landlord, as in former times, to her labor, however, as is appropriate to women. The tax officer will see to and manage this business.

Of laying new restrictions.—All the governors are hereby forbidden to lay new burdens of their own inventions on the lands. When you condemn anyone unjustly, do not lay the blame on the laws of the Kingdom, and when you lay the grievous burdens on the people, do not cast the blame on His Majesty, the King, nor on the law; do not behave thus, lest even the country people rise up before you and demand of you the meaning of this book. Wherefore execute none of your own peculiar plans unless the King first subscribe his name to what you wish to say to the people. The proper course is when any governor perceives that some new crime is becoming prevalent, or perhaps makes some discovery which may be of value to the Kingdom of the people, if carried into execution, for him then to give notice of this discovery to all the governors, and when they signify their approbation, then present the same to the King, and if he suffix his

name, then it becomes a law of the Kingdom, for it is much better to execute such plans as will not be condemned by any of the sections of this law, that plan having been formed for the benefit of the Kingdom and been unanimously approved.

But those governors, land agents, landlords, and chiefs who set aside the edicts of this book which regulate the taxes of the whole Kingdom and pursue a course unjust, burdensome to the poor, and oppressive to those who labor in employments to increase your wealth, a court to render destitute those who patiently endure fatigue and the scorching rays of the sun, who pretend that your oppression of the people is in accordance with the Word of God; who punish the crimes of the lower classes in a manner at variance with the meaning of the law; who lay taboos on those employments by which the people seek to enrich themselves, especially if you perceive that a number of men are engaged in the same employment, and make it profitable, then you monopolize it to yourselves and forbid any to engage in it unless they pay a tax to you; who lay unequal taboos to enrich one class while they impoverish others who should be equally enriched while they are well; those agents of the general tax gatherer who compel the people who are destitute of money and pork to pay their taxes in articles which do not grow upon the land; and the compelling the people to a great distance to labor for their landlords; whosoever of you do any of the things forbidden in this section he shall pay all damages and if he persevere in such a course he shall forfeit one-third part of all his lands. If he afterwards continue to pursue the same course he shall forfeit another third, and if he continue still, he shall forfeit the remainder. [See the eleventh section.] These lands thus forfeited the King will give to those industrious persons who conform to the law. Such shall be the punishment of those high-minded persons who set aside the requisitions of this law respecting the property of the Kingdom.

Furthermore, those country people who search for knowledge, wherever they may be and in whatever part of the kingdom, if they write to me or my premier, and we perceive that their proposition is a good one, it shall then be adopted as a statute of the kingdom. The governors and the King, too, will suffix their names to the writing. I will also promote such seekers after knowledge to higher stations and make them officers in their various places. And such persons shall receive one-tenth part of the King's income at their station, and one-tenth part of the land agent's income. Such is the reward which His Majesty offers to all in the kingdom who act as above, and they shall moreover be admitted to the council of the nation.

Furthermore, whoever of the country people engages vigorously in any new employment not practiced in this country before, and prove to be a valuable business to the nation and to those who engage in it, and if it was previously unknown, then this is the decision in relation to such a man. He shall be freed from public labor on the labor days, both of the King and of the land agents, and from public labor of the kingdom. He shall pay no yearly money tax. The King will give \$10 to the man who thus searches out a new business, provided the business be continued. Such is the reward which His Majesty the King offers to all who search out a new employment in any part of the kingdom of the Hawaiian Islands.

14. Respecting the descent of lands to heirs.—Be it furthermore enacted in relation to lands which Kamehameha I and Kamehameha II gave to land agents, that after the publication of this law respecting taxation, whenever any one of those land agents dies his heir shall render an account to His Majesty the King of the lands which belonged to the deceased, and these shall return one-third of those lands to the King. According to this rule all the lands, whether few or many, of every man who dies shall be divided. But if two months elapse after the death of any person and the heir neither present himself before the King nor send a written notice, then the lands of the heir shall be divided equally. Hereafter the lands of all heirs shall be divided thus when the King is not notified. If the deceased, however, had but one heir, that shall descend to his heir. If he had two farms, then one-half of one of them shall revert to the King. From this time forth the King and his premier must be informed of all bequests of lands and whatever relates to the heirs. But if the deceased have no heir at all, then his land and all his property shall be the King's. Thus it is ordained in relation to the land agents of His Majesty the King and also in relation to the land agents under them over the common people. But the lands of orphans, widows, and old men shall be protected by the land agents; let not the heirs, however, among the common people forget the directions of their landlords.

If anyone spoken of in this law seize the land of lawful heirs which is protected by this law, the punishment shall be as follows: Two-thirds of the income of said land obtained by the new landlord in a year shall be delivered to the heir, and it shall be thus delivered each year for four successive years, and then the land shall belong to the new landlord. The fine shall be the same for those who apply to the King for lands occupied by heirs of the deceased, though if the heir do better than the deceased his third shall not be restored to the King. And if the deceased person have children of his own, then the King will not take the third, nor the third of him who does better than the deceased person. But if that heir had been enriched by previously being heir to another chief, the King will then take the third.

15. Of the division of water for irrigation.—In all places which are watered by irrigation those farms which have not formerly received a division of water shall, when this new regulation respecting lands is circulated, be supplied in accordance with this law, the design of which is to correct in full all those abuses which men introduced. All those farms which were formerly denied a division of the water shall receive their equal proportion. Those bounties which God has provided for the several places should be equally distributed, in order that there may be an equal distribution of happiness among all those who labor in those places. The allowance of water shall be in proportion to the amount of taxes paid by the several lands. For it is not the design of this law to withhold unjustly from one in order to unjustly enrich another, according to the old system which has been in vogue down to the present time. That the land agents and that lazy class of persons who live about us should be enriched to the impoverishment of the lower classes who with patience toil under their burdens and in the heat of the sun is not in accordance with the designs of this law. This law condemns the old system of the King, chiefs, land agents, and officers. That merciless treatment of common people must end.

If the governor think proper to adopt a protective policy, let him protect all alike; and there shall be an equal division of protected articles in order that every man may obtain the object of his desire according to the amount of his labor. Such is considered to be the proper course by this law regulating the property of the Kingdom, not in accordance with the former customs of the country, which was for the chiefs and agents to monopolize to themselves every source of profit. Not with this law.

[Here follow some further explanations respecting the system of taxation. Those seven sections which follow are designed to explain and enforce what has been previously said.]

16. *Respecting the variations in taxes.*—The first year after the promulgation of this law throughout the different islands of this group the poll shall pay but half tax, thus: A man, half a dollar; a woman, quarter of a dollar; a child over 14 years of age, one-eighth of a dollar. On that year the lands shall pay a full tax. The fathom swine shall be but a yard length, the three cubit swine shall be a cubit and a half, and the swine of a yard's length shall be only one cubit long. In failure of the yard swine, five dollars; in failure of the cubit and a half, three dollars and three-quarters; in failure of the one cubit, two dollars and a half. The rule shall be the same if the tax be paid in any other property than the two articles mentioned. On that year the poll shall pay a full tax, and this yearly variation shall be perpetual. If the poll pay a full tax, the poll shall pay only half in that year.

17. *The business of the chiefs.*—Ye chiefs of the nation, reflect on these fundamental laws of the Kingdom. From this time change your course of procedure. A change in accordance with this law shall be both more just and be really better for yourselves. The multitude of people who live with us in idleness or do but little, which we have supposed to be a business style of living, let that cease. The perquisites of your office held in this country from of old are to be the avails of your lands obtained on all your working days. Those are yours—one-tenth part of the yearly taxes collected from your lands is yours, not, however, the poll tax. But the chiefs who do not belong to the council are not included; their standing shall be that of the landless, though by improvement in their manner of conducting business they will rise to the same rank by seeking the welfare of the laboring classes, that they may enjoy full protection, and also by promoting the happiness of the weak and of strangers from other lands.

18. *Respecting landlords.*—Reflect well, all ye landlords of the Kingdom, on all the regulations of this law, lest you be dispossessed, according to the principles of the eleventh section. Search for your own labor days; search out such kinds of business as will support the country, and those tenants who live upon the lands under you, the high and the low may be under the like subjection to the same laws enacted by the chiefs for the protection of the Kingdom. On the second year after the promulgation of this law, which is the year on which a full poll tax is paid, those landlords who do not belong to the national council shall pay to the King one-tenth part of all the avails of their labor days. On the year which pays but a half tax on the poll, the landlords shall pay to the King one-fifth of their income, and this shall be a perpetual tax of the Kingdom on the landlords, having an annual change in the proportion.

19. *Respecting officers to be appointed anew.*—This explanatory section is for all those officers that are newly appointed to enforce these laws of the Kingdom, and also for all those who are called officers. You are appointed as persons, to assign labors in perfect accordance with the requirements of this law. If you see the chiefs, landlords, or any other people doing that which is forbidden in this law, you are to give them correct information of the crime they are committing—the crime of seizing those articles which are said to belong to the common people. You are to give notice of those acts which not being well understood, and liable to involve the actors in difficulty, that the idler is to be punished with hunger and poverty—that it is the duty of the people to labor for that property which is appropriate to the several farms all round the island—to superintend the numbering of the people, including children and feeble persons, also the deaths and births in each year—to search out a course by which those parents who have a multitude of children may retain them without having them separated from each other, and by which an individual having the charge of several feeble persons may be able to support them—to consult with the landlords as to what kind of production is most appropriate to their several lands, according to the suggestions of this law—to reflect well on the means by which the amount of property may be increased each year above that of the preceding, that it may be ascertained also whether there really is an increase of property on the islands or not.

20. *Tabooed articles on the mountains.*—Of all the things which grow spontaneously on the mountains, the landlord can taboo nothing for himself except one kind of timber. This, however, does not apply to timber prepared by the hand of man; that is his. If any of the common people take the timber which the landlord had tabooed for himself, he shall pay one of every two sticks to the landlord, however many he may have taken. His Majesty the King taboos the sandalwood for himself. The visitors of the mountains shall not touch that timber until such time as the King shall say, when all the people may cut it by paying two-thirds to the King, reserving one-third to themselves. He also taboos all large trees such as one man can not clasp. That tree shall not be felled for nothing. It may be cut for canoes, paddles, and such great works as small timber will not answer for. The landlord or tax officer must be previously notified, but no other person. Whoever violates the taboo on those trees and fells without reason a large tree, or breaks down the small shoots of sandalwood in the mountains, shall be fined one hundred rafters, each five yards long. But if the man be furnished with a whipsaw, they are the third class of persons who may cut large trees of the forest, but not sandalwood. But there is one thing that is taboo on all the mountains of the land, that is, to kindle fires and burn up all the verdure of the mountains. Whoever does this shall be punished according to the aggravation of the offense. If the crime be small, the fine shall be less; if large, then he shall be fined by being put to hard labor for two years and a half. Such is the punishment of all who kindle fires on the mountains.

21. *Of the application of the laws.*—During the ensuing six months the governors and landlords shall settle the difficulties in relation to residuum lands, and other difficulties also. First let the difficulties on the manner of doing business be settled; establish your men on your lands, that they may be well off; seek a reward for the laboring class

according to the amount of labor performed; and all officers shall be rewarded according to their correctness in transacting business. After six months from this time chiefs, landlords, and people shall be punished for all violations of this law according to the within requirements.

22. Respecting the councils of the nobles.—In the fore part of Ap the nobles shall meet in council to consult on the welfare of all who reside in the Kingdom. By such a course the nobles may perpetuate their rank above the people, in subservience to all the laws of the Kingdom to which you give your assent.

But for a man to engage in only one kind of business is the sure way to enrich the nation; thus, one engaged in agriculture, another in the fisheries, another in canoe building, another in trade; each in his important business of the nation having a separate class of laborers, in accordance with the opinion of the skillful.

All taxes assessed previous to the enactment of this law shall be paid, and all labor previously given out shall be performed in full after which the old system shall end.

This law was enacted on the 7th of June, in the year of our Lord 1839.

At a subsequent examination of the nobles certain changes were made, to which we have set our names this 9th day of November, the year of our Lord 1840, at Lahaina, Maui.

CHAPTER IV.—Of laws which are not of universal application.

In the constitution it is stated what laws are applicable to the Kingdom at large. A single noble can not make a law, not even His Majesty the King, but the nobles must assemble according to the requirements of the constitution. Wherefore if a single governor pursue an incorrect course, the fault is his own; it does not attach to the Kingdom until the King and premier approve the act; then the Kingdom is involved.

There are many little evils existing in villages which the general laws of the nation can not correct, for the circumstances of one village are unlike the circumstances of another village; wherefore the following edicts have been agreed to:

1. If the people of any village, township, district, or State consider themselves afflicted by any particular evils in consequence of there being no law which is applicable, it shall be lawful for them to go to the tax officer, judge, or any chief, and he shall give notice to all the people of the place who may assemble at the place mentioned by the officer. Then they may devise a law which will remedy their difficulties. If they shall agree to any rule, then that rule shall become a law for that place, but for no other. It shall not, however, be in their power to make any law which is at variance with any law of the Kingdom on a subject of universal importance, but laws respecting roads, fences, animals, and all such like things they may pass.

2. All private individuals also shall enjoy the same privilege. No man may make a law which shall be applicable to his own premises, and if a man makes the law of his land, his yard, or his house clear

understood beforehand, that law is binding, and whosoever violates shall pay the penalty according to the requirements of the law, though such law can be at variance with the general spirit of the laws of the nation, nor can there be an oppressive law nor one of evil tendency.

These edicts having been passed by the nobles, we have hereunto set our names this 9th day of November, in the year of our Lord 1840, at Ahaina, Maui.

KAMEHAMEHA III.
KEKAULUOHI.

CHAPTER V.—*Of police officers and constables.*

1. It shall be the duty of the several governors to appoint constables and peace officers for the protection of the people and villages. The governor shall act in this thing according to his own discretion. If the village be large there must be a greater number of constables. If the village be small there may be a smaller number of constables, at the discretion of the governors. If the governor be embarrassed in any respect and therefore think it best to appoint a new officer over any kind of business, he may do it at his discretion.

The badge of the constables shall be a little stick, made round, with the name of the King at the top of it, and it shall be his duty always to carry the badge that he may be known as a constable. If he does not carry the badge it will be improper for him forcibly to seize a man, lest it be thought that he is not a constable and a quarrel ensue. In such a case the blame will attach to the police officer; but if he carry his badge and anyone resist him and hurt him, then the blame will attach to the man and the officer will be faultless.

2. It shall be the duty of the police officers to watch, spy out, and detect criminals, carry them to and deliver them up to the judges, who will bring them to trial. It shall be their duty to seize all persons who violate the laws, and in case of a quarrel or a mob it shall be their duty to restore or demand peace and seize the guilty persons. If any peace officer know of a person's committing a crime and do not seize him nor make it known to the judge, he shall be punished to one-half the amount which the criminal would have been; and if they merely hear of disorder or mischief, it shall be their duty to go and see for the purpose of quelling it. If any one of them receive a bribe, and therefore conceal crime, he shall be fined to four times the amount of the bribe which he received. Then if the bribe he received was \$1 his legal fine shall be \$4.

3. If any man, not being a police officer, shall carry the badge of one, he shall be fined \$5. If a police officer shall seize a man entirely without grounds or without any reasonable ground of suspicion, he shall be fined \$10 and pay all damages sustained by the person thus groundlessly seized. If a police officer attempt to seize a man and he resist, the man shall be fined \$10, even though he do not wound the officer. But if the officer be wounded by him, he shall then be fined in the same manner as all others guilty of assault.

If any man aid a person whom the police officer attempts to apprehend, his fine shall be \$10 for his opposition to this officer, and if the criminal actually escape in consequence of his aid, he shall be fined again, at the discretion of the judges but not to a higher amount than

would have been paid by the criminal whom he rescued. But if a police officer be wounded by him he shall be fined again, as all men are who commit assaults.

The police officers shall be paid for their services in the following manner: If a police officer seize a man for crime and he be tried and convicted, then one-fourth part of the fine shall go to the police officer. The same also shall be the reward of all men. Whoever has knowledge of a crime and enters a complaint to the judges shall receive one-fourth of the fine.

This law shall go into operation on the 1st day of January, in the year of our Lord 1841, in all places on these islands.

This law was passed at a council of the nobles held at Lehaia, Maui, and received our signatures this 10th day of November, in the year of our Lord 1840.

KAMEHAMEHA III
KEKAULUOHI.

CHAPTER VI.—Quarantine laws.

Whereas it has been clearly ascertained that the smallpox has prevailed on board of one or more ships now cruising in the Pacific Ocean which may be expected to visit the Sandwich Islands, and whereas that disease is understood to prevail at the present time in ports on the western coast of America frequently visited by ships on the way to the Sandwich Islands: Therefore,

Be it enacted by the kings and nobles of the Sandwich Islands council assembled:

1. That after the promulgation of this law all canoes and boats and all persons not authorized by the board of health are prohibited from visiting any foreign ships whatsoever until they shall have been examined by a health officer or one of the board of health as hereafter named and pronounced healthy. And whosoever shall visit a ship contrary to this law shall forfeit \$40, to be paid one-half to the Government and the other half to the person who shall give information of the same.

2. All vessels having the smallpox or any other contagious disease on board, and all vessels having had any contagious disease on board within a period less than four months are hereby prohibited from anchorage at any port, harbor, or roadstead of the Sandwich Islands until visited by a health officer or by one of the board of health, having received his approbation. And any master or officer of such vessel who shall land or permit to be landed any person or persons affected with a contagious disease, or any article containing such contagion, shall, on being duly convicted thereof, be fined not more than \$1,000, or be imprisoned one year.

3. All vessels having had contagious diseases on board as above mentioned on arrival at the Sandwich Islands, or at any port thereof, shall be entirely at the direction of the board of health for a period not more than forty-two days. And all vessels in quarantine, or laid under restrictions as above, a yellow flag at the maintop. And whosoever shall on board any vessel thus put under the yellow flag shall forfeit his vessel and shall be entirely at the direction of the board of health for a period not longer than forty-two days.

4. For the purpose of carrying into execution the above regulations, it shall be the duty of the several governors to set apart a board of health for each of the harbors of the Sandwich Islands. And said board of health shall have full power to enact such laws and regulations as may be necessary to protect the health of their several places. They (the governors) shall also appoint health officers, whose duty it shall be to examine every vessel suspected of having a contagious disease on board, and the health officer shall be entitled to receive from the master of every vessel thus examined by him \$5.

Done at Honolulu on this 29th day of May, in the year of our Lord

(Signed by the King.)

CHAPTER VII.—*A statute for the regulation of schools.*

The basis on which the Kingdom rests is wisdom and knowledge. Peace and tranquillity can not well prevail in the land unless the people be taught in letters and in that which constitutes prosperity.

If the children are not taught, ignorance must be perpetual—the children of the chiefs can not prosper, nor any other children: Therefore, be it enacted—

1. Wherever there is any number of parents having fifteen or more children of a suitable age to attend school, if they live near each other, in the same village, or in the same township, it shall be their duty to procure themselves a teacher, which they shall do in the following manner: The tax officer shall give notice by a crier of the time and place at which all the male parents of the township, district, or village shall meet, and they shall choose three of their number as a school committee for that place. If the number of children in any village is less than fifteen then their fathers shall unite with another company near by.

2. Said school committee shall then apply to the general school agent, spoken of below, and they together shall look out a teacher for that place. If there are but few children, then there shall be but one teacher; if more, then two teachers; and if the children are very numerous, then there shall be three or more teachers, as they shall think best.

3. When the teacher is obtained, then the general agent, the teacher, and the school committee shall agree as to the wages. If the teacher have no land and they shall agree in the opinion that it is important he should have some, then the general school agent shall endeavor to secure some which is not occupied, and that land shall be given to the teacher, but not in perpetuity. When he shall cease to act as teacher, then the land shall revert to the Government. But if the land do not afford the teacher a full support, then they shall furnish him with as much more as they shall agree to be necessary. It shall be furnished from the avails of the King's labor days and from the yearly tax, but not the poll tax.

The general land agent shall have power to take the unoccupied lands of the landlords, but he shall give previous notice to the landlords, that there may be a mutual understanding between them.

4. Furthermore, it shall be the duty of the children to be generous to their teacher and aid him by working on his land, according as they shall agree or according to their good will.

5. A further reward to the teachers of schools shall be freedom from all public labor for the chiefs and land agents, and neither they nor their wives shall pay any poll tax while they are acting as teachers in schools.

6. It is not proper that all teachers should be paid alike. A wise teacher who is exceedingly laborious in his business and has many pupils should be paid a high price, while he who is less wise and less laborious in his business should be paid a lower price. But no person is by this law considered a teacher unless he have a teacher's certificate from the general school agent.

7. If the school committee perceive that the avails of the land given by the King to the teacher are more than they agreed that the teacher should have, then they shall take the charge of the surplus for the benefit of some other schools, and if the property be such as that the care of it is a burden, then the school committee shall receive one-tenth in payment for their care.

8. At all places where the children are in want of a schoolhouse the tax officer shall notify the people and they shall build it under the direction of the school committee. And inasmuch as the labor is such as concerns the chiefs only, but is alike for the benefit of the people and the rulers, it shall be considered as national work, and even transient persons and servants shall labor.

9. The proper ages for children to go to school shall be considered to be from 4 years and upward to 14 years of age. If any man have a child of a suitable age to go to school, but below 8 years of age, and do not constantly send him to school, then that parent shall not be freed from the public labor of the King and the land agent, on the labor days, whatever may be the number of his children; neither shall his portion of land be increased, nor shall he be permitted to cut on the mountains such kinds of timber as the King gives to the people. All those kinds of timber are taboo to those parents who send not their children to school. Nor shall those parents fish on the fishing grounds which the King gives to the people. Those parents have a preference for darkness; therefore let the taboos of the times of darkness apply to them. But if a child be more than 8 years of age and do not go to school, then the fault shall not be considered as the parent's only, but the child's also. That child shall go to the public labor of the King and land agents on all labor days. No child (over 8 years of age) who does not go to school shall be freed from public labor; they shall all go to work.

10. Children when at school are required to be quiet and listen to the instruction of the teacher. But if anyone is mischievous, the teacher shall be allowed to administer to him proper correction, if not improper. If the school becomes disorderly and the teacher is tried thereby, or on account of the misconduct of some particular pupil, then the teacher and school committee may consult together and act according to their mutual judgment.

In time of school it is not proper for children to go a distance from home. In time of vacation they can go, and when the school begins anew then return. Though if a child be afflicted by the sickness of a parent or some near relation (or some other cause), he may go by giving previous notice to the teacher.

But it shall be illegal for the teachers to hinder those of their pupils who desire to enter into the marriage relation or those who wish

move to another place with their parents, but when they thus remove, they must enter the school at that place.

11. If a teacher fail of doing his duty, and become negligent or guilty of a crime, then he shall be brought to trial before the school committee and general school agent of the place, and they shall decide respecting him. If it is their judgment to diminish his wages or even take away his office as teacher and withhold his whole wages, they shall have a right to do it.

Whenever a teacher is dismissed or dies, then his land, house, and land shall revert to the King and shall be under the care of the school committee, who shall give them to another teacher. Though if he built his own house or paid his own property for it, or if his house was included in his wages which he received as teacher, then the house shall not be given up.

12. It shall be the duty of the school committee to encourage the parents in whatever will promote the education of their children, and shall also themselves encourage the children to go to school and acquire knowledge, and shall aid the teacher in whatever is necessary for the prosperity of the school. The school committee must do these things gratuitously—they will receive no pay, for it is but a small amount of labor which they will perform.

13. There shall also be annually appointed certain men of intelligence as general school agents, as follows: One for Hawaii, 1 for Maui, 1 for Molokai, 1 for Oahu, 1 for Kauai, and 1 superintendent of the whole. They shall be appointed by the legislature at their annual meeting. These persons shall be the school agents for the year.

14. The business of the general school agents shall be to consist with the school committees and teachers in accordance with what is before stated. The general school agents shall superintend, manage, and provide for the teachers, and shall encourage them and their scholars. They also shall be the judges of the law in relation to schools. The supreme judges are the only persons above them. They shall report to their superintendents their various acts, and the result of their observation, and the superintendent shall report to the legislature at the annual meeting. Their pay shall be as follows: When they are traveling to examine schools the land agents shall furnish them food and necessities, and they shall be paid \$25 a year of Government property, but not money.

15. Furthermore, those scholars which attend the mission seminary at Lahainaluna shall be freed from the money tax, and all public labor of the chief, and all scholars that go to school to learn geography, arithmetic, and other higher branches taught in the higher schools, those scholars shall not go to the public labor of the chiefs and land agents till they become 18 years of age.

16. The regulation of this section applies only to children born during the reign of Liholiho, and during the present reign of Kūikeyaouli, but does not apply to those born previous to these reigns.

No man born since the commencement of the reign of Liholiho who does not understand reading, writing, geography, and arithmetic shall hold the office of governor, judge, tax officer, nor land agent, nor hold any office over another man, nor shall a man who is unable to read and write marry a wife, nor a woman who is unable to read and write

marry a husband. But this edict does not apply to those who were born previous to the reign of Liholiho.

17. If anyone suffer a misfortune which is the cause of his ignorance, if his sight be defective, or if he lives in a solitary place distant from school, or is unfortunate in any other manner which is the cause of his ignorance, and still his or her mind is made up to marry a wife or husband, then he or she may go to the governor, who shall make inquiry, and when it becomes clear to him that the person's ignorance is not the result of laziness, but a real misfortune, it shall then be the duty of the governor to give him or her a certificate of marriage.

18. Furthermore, it shall not be proper for the general school agents to give the teacher's certificate to ignorant persons, nor to persons known to be vicious or immoral. If a man can read, write, and understands geography and arithmetic, and is a quiet and moral man, and desires a teacher's certificate, it shall be the duty of the school agent to give him one, and not refuse.

19. Furthermore, all the tax officers are required to listen to the commands of the general school agents when they give orders for the payment of the teacher or teachers, in accordance with the requirements of this law, or when they give orders for rebuilding school houses. The tax officers shall obey the requirements of this law. But they shall notify the premier of all property which they pay over to the school agents or teachers.

20. By this law the statutes enacted in relation to schools on the 15th of October, 1840, are repealed. When this law is published, on the day that it takes effect, then that law shall be no longer regarded. But school committees regularly appointed shall hold their office through the year, when, if the people choose, they may appoint new ones. Furthermore, all lands regularly given to the teachers in accordance with the regulations of that law are confirmed to the teachers by this new law in the same manner as lands newly given to by the general school agents.

The day on which this law shall take effect shall be as follows: Should it be proclaimed in any village or township, then the day on which it is proclaimed shall be the day of its taking effect in that place. If it is not proclaimed, then it shall take effect on the 1st day of September next in all places in the Hawaiian Islands.

All the requirements of this law having been agreed to by the nobles and by the representatives, we have set our names to the same this 21st day of May, in the year of our Lord 1841, at Lahaina, Ma-

KAMEHAMEHA III
KEKAULUOHI.

CHAPTER VIII.—*Law respecting the making of roads.*

If any governor wish a road made, he shall appoint three surveyors who shall lay out the road. And the people also may do the same. If they wish a road made, they may proceed according to the directions in Chapter IV. But this law is enacted for the further regulation of the subject.

1. If it be desired to make a new road, it shall be done as follows: There shall be three men appointed, who shall estimate the amount of property sacrificed by means of the road. Those interested in the road shall make the appointment—if the nobles, then they shall appoint; or if the people, then they shall appoint.

2. If any man's house stand in the contemplated road, the committee of three shall estimate the amount which said man ought to receive for the damage he sustains in the loss of his house. And he shall be paid according to their estimate. The same also in case a taro pond or other property be damaged by the road. The owner shall be paid according to the estimate of the three men.

3. If the road cut the various plantations alike or nearly so, and does not cut them so as to occasion much damage, but in such a manner that the loss and gain too are mutual, then there shall be no damages paid for the loss of land by the roads. No man can refuse to give up his land for a road. The decision shall rest entirely with the committee.

4. If the chiefs are the persons who direct respecting the road, then they shall pay the damages sustained by the road. If the road is made at the direction of the people, then they shall pay the damages sustained.

This law was enacted on the 11th day of November, in the year of our Lord 1840, at Lahaina, Maui.

KAMEHAMEHA III.
KEKAULUOHI.

CHAPTER IX.—*A law for the regulation of Hawaiian weights and measures.*

The weights and measures approved by the Hawaiian laws are those of Massachusetts. The yard, the gallon, the ton, and the pound are all in accordance with the weights and measures of Massachusetts. If weights and measures of anyone do not accord with these, they are not approved by this law.

Here follows a full explanation:

1. If anyone speaks of 1 foot, it shall be 12 inches; 1 yard, it shall be 3 feet; 1 fathom, it shall be 2 yards; 1 chain, it shall be 11 fathoms; 1 furlong, it shall be 10 chains; 1 mile, it shall be 8 furlongs.

2. If anyone speaks of 1 pound, it shall be 16 ounces; 1 quarter, it shall be 25 pounds; 1 hundredweight, it shall be 4 quarters; 1 ton, it shall be 20 hundredweight.

The weights used in weighing heavy articles are those of Massachusetts.

3. In measuring cloth and such like things, when one speaks of 1 nail it shall be 2½ inches; 1 quarter yard, it shall be 4 nails; 1 yard, it shall be 4 quarters; 1 fathom, it shall be 2 yards; 1 pie, it shall be 3 nails.

This measure also is like that of Massachusetts.

4. In the measurement of liquids, when one speaks of 1 pint it shall be 2 gills; 1 quart, it shall be 2 pints; 1 gallon, it shall be 4 quarts; 1 hog-head, it shall be 63 gallons; 1 pipe, it shall be 2 hogsheads; 1 ton, it shall be 2 pipes, or 252 gallons.

These are the weights and measures adopted in this country; not like those now used in Great Britain, but like those formerly used there, and now used in Massachusetts.

5. If anyone uses weights or measures at variance with those mentioned above, and in consequence of such variance the one with whom he trades suffers loss, or if he uses them deceitfully, he has broken this law and shall be dealt with as a thief.

This law shall take effect on the 1st day of January, in the year of our Lord 1841.

This law was enacted by the Nobles of these Hawaiian Islands this 12th day of November, in the year of our Lord 1840, at Lahai Maui.

KAMEHAMEHA III
KEKAULUOHI.

CHAPTER X.—*Of marriage and divorce.*

From the time of Kaahumanu down, the laws which she established over the Kingdom in relation to marriage have been valid, and they are still so at the present time.

Her's were as follows:

It is illegal for one man to have two wives.

It is illegal for one woman to have two husbands.

A man can not cast off his wife at his pleasure.

A woman can not cast off her husband at her pleasure.

If a man and woman are agreed to live together as man and wife, and the nothing in the way to render it illegal, then let them marry in accordance with Word of God.

But those persons who are united according to the former customs of this country and are still living together, one man and one woman, and there is nothing to render their union illegal, their union is hereby confirmed anew in the same manner those who are married.

But from the present time all persons are prohibited from uniting together according to the former customs, it is proper to marry.

Here also are some further explanations.

If two persons wish to marry, it is not proper to act hastily, proceed cautiously, in order that one may become acquainted with the character of the other, lest difficulties arise after marriage.

Furthermore, it is improper for an old woman to marry a boy, also for an old man to marry a girl, but it is peculiarly proper that their ages be near alike.

Wherefore it shall be the duty of school-teachers and also of the priests who solemnize marriages to instruct men and women in the particulars.

The following persons are prohibited from marriage:

I. A boy who has not arrived to 14 years of age.

II. A girl who has not arrived to 12 years of age.

III. A man who has a wife living and has not obtained a writ of divorce, together with the consent of the governor for him to marry again, he shall not marry.

IV. A woman whose husband is living and has not obtained a writ of divorce, together with the consent of the governor for her to marry again, she shall not marry.

V. A boy under the age of 20 years can not marry without the consent of his parents, if they are living. So also a girl under the age of 18 years can not marry without the consent of her parents, if they are living. But if the parents criminally withhold their consent, then judges may institute an examination and decide whether the marriage shall be solemnized or not.

VI. It is taboo for a man to marry the following relations:

(1) His grandmother, (2) his grandfather's wife, (3) his wife's grandmother, (4) his father's sister, (5) his mother's sister, (6) father's brother's sister, (7) mother's brother's wife, (8) wife's father's sister, (9) wife's mother's sister, (10) mother, (11) father's wife, (12) wife's

ther, (13) daughter, (14) wife's daughter, (15) son's wife, (16) sister, (17) son's daughter, (18) daughter's daughter, (19) son's son's wife, (20) daughter's son's wife, (21) husband's son's daughter, (22) husband's daughter's daughter, (23) brother's daughter, (24) sister's daughter, (25) brother's son's wife, (26) sister's son's wife, (27) wife's brother's daughter, (28) wife's sister's daughter.

VII. It is taboo for a woman to marry the following relations:

(1) Her grandfather, (2) her grandmother's husband, (3) her husband's grandfather, (4) mother's brother, (5) father's brother, (6) father's brother's husband, (7) mother's sister's husband, (8) husband's father's brother, (9) husband's mother's brother, (10) father, (11) mother's husband, (12) husband's father, (13) son, (14) husband's son, (15) daughter's husband, (16) brother, (17) grandson, (18) son's daughter's husband, (19) daughter's daughter's husband, (20) husband's son's son, (21) husband's daughter's son, (22) son's son, (23) sister's son, (24) brother's daughter's husband, (25) sister's daughter's husband.

VIII. It is taboo for the following foreigners to intermarry with females of this archipelago, viz: All foreign deserters; they shall by no means marry a wife here. And hereafter no foreigner who is here without the consent of the governor in writing shall be permitted to marry.

IX. No foreigner shall marry a wife here unless he first go before the governor and declare under oath that it is his design to remain in the country, and also take the oath of allegiance to this Government and obtain from the governor a certificate of marriage.

X. No foreigner shall marry here unless he first exhibit evidence that he has not a wife living in any other country, nor until he has resided in these islands two full years. And if anyone shall be guilty of falsehood at the time of his marriage and afterwards it appears that he has a wife in some other country, then all his property shall be forfeited and given to the wife whom he deceitfully married, and he shall be driven out of the country.

XI. These, and these only, are the persons who shall solemnize marriages in this country: Those priests who are living here in conformity with the laws of this country. And even they shall not do it dependently. Those who desire to be united in wedlock shall first go to the governor, or to his agent, and obtain a written assent to their marriage, and then it shall be proper for the priest to solemnize the marriage.

XII. Whoever solemnizes marriages shall keep a book where he will record the names of the persons whom he marries. On the last day of December of every year every person who solemnizes marriages shall give notice of the number of marriages which he has solemnized during the year. And it shall be proper for the King at his pleasure to send a man to examine into the correctness of the records kept by those who solemnize marriages.

If anyone disregard this and the eleventh section of this law, or if anyone shall unite persons in marriage in a manner at variance with any part of this law, he shall be fined \$100.

OF THE DUTIES OF HUSBANDS AND WIVES, AND OF DIVORCE.

It is the duty of all persons who are married in accordance with the laws of the land to live in peace and observe the vows which they made

at the time of their marriage. But as for the persons who regard not their vows the following laws are for them:

1. If one party conducts improperly and forsakes her husband or his wife, then they shall be brought to trial; and if it appears that the forsaking party was highly criminal, he shall be fined at the discretion of the judges, but not more than \$10. If desertion again take place after the fine, then the fine shall be doubled for each new desertion, even to the farthest extent. But if the judges perceive that a woman is in special danger on account of the frequent assaults of her husband, it shall be proper to confine that man with irons, at the discretion of the judges and in proportion to the danger of the wife.

2. If a husband and his wife quarrel and one assault or beat the other, or do anything else by which a wound is inflicted, they shall then be brought to trial and punished according to the aggravation of the offense, but more than others who commit assaults. If they quarrel again after the trial, the punishment shall be doubled and shall continue to be doubled for each new offense, even to the farthest extent. But if the judges perceive that the woman is in special danger on account of the frequent assaults of her husband, it shall be proper to confine that man in irons, at the discretion of the judges, proportioned to the danger of his wife.

3. If two married persons do not live happily together, but quarrel often and become famous for the same, and also disregard their marriage vows, they shall then be brought to trial, and, being convicted of the charge as specified above, they shall both be confined in irons. They shall be confined separately, not together, and shall be confined at night only, and in the morning shall be set at liberty, to go where they please, but at night shall be confined again, and shall be confined every night until they cease quarreling.

4. If the husband sail to a foreign country and she remains five years without hearing of his being alive, nor anything respecting his return, it shall then be proper for the woman to apply to the governor, who will give her a written permission to marry, after which she may marry another husband. But if her former husband returns he is still her husband still; the new husband must be put away.

5. If a man or woman be banished to another island for a period of four years or more, then he or she is dead in the estimation of the law, and the innocent party may apply to the governor, who will give a written permission to marry again, after which he or she may marry another companion or not at pleasure.

6. If anyone return from the place of his banishment and find his companion married, the person so returned may make application to the governor, who will watch his character for one year, and if he has a moral life and is faultless then he shall receive a certificate of marriage, after which he may marry again.

7. If a married person be afflicted by an inconstancy of his or her companion (who has been convicted of adultery), and on that account his or her mind is made up to separate for life, then he or she may apply to the governor, who will give a bill of divorce, after which he or she (the innocent party) may marry again. But if the two persons are nearly of the same character, and it is not clear that one is better than the other, then the governor shall refuse; they shall not be divorced. If one is of unblemished character and his companion commits adultery, they and they only can be divorced.

5. If a man become exceedingly angry with his wife or a woman with her husband, and the angry party attempts to take the life of the other, and the judges perceive that the life of the innocent person is early in danger, then a bill of divorcement shall be given to the innocent person, who may marry again. But the guilty person shall by no means marry again until death.

6. If a man and his wife are separated for life, and have children, but disagree in relation to the child or children, then the judges shall decide the case and give their support to the innocent party.

This law shall go into effect on the 1st day of January, in the year of our Lord 1841, at all places on these Hawaiian Islands.

Having been enacted by the nobles we have hereunto set our names on the 12th day of November, in the year of our Lord 1840, at Lahaina, Maui.

KAMEHAMEHA III.
KEKAULUOHI.

CHAPTER XI.—*Law for the protection of the Sabbath.*

It is a well-established fact that a nation can not enjoy peace nor the people prosper unless they are taught in morals and religion. Wherefore the Sabbath is of great importance; because on that day the people are extensively taught in those branches. If anyone interferes with another in his observance of the day, or if anyone disturbs the peace and quiet of the day, he is criminal; he does an injury to the public and to every individual who is seeking the greatest good. Wherefore it is proper for the laws to give protection to the Sabbath, and to all those who observe the day, lest anyone should interfere with the greatest good of the land by making the day a nullity. Wherefore, *Be it enacted by the King and nobles of the Hawaiian Islands in council assembled,*

1. All unnecessary worldly business is by this law prohibited from being done on that day. It is not proper to cultivate the ground, engage in fishing, to seek for wealth, or do anything of the kind unnecessarily. But works of necessity, which can not be done before or put off till after the Sabbath, together with works of mercy for the distressed, may be done. All other kinds of work are taboo. Whoever violates this law shall be fined \$1, and if he does it again he shall be fined \$2, and thus it shall be doubled for every repetition of the offense even to the furthest extent.

2. All worldly amusements and recreations and all plays are at variance with the quiet of the Sabbath if engaged in on that day; they are also at variance with the best interests of the Kingdom, and are by this law made taboo. Whoever violates this taboo shall be fined \$1; if he violates it a second time he shall be fined \$2, and thus the fine shall be doubled for every repetition of the offense even to the furthest extent. Whosoever shall give his sanction by standing and looking on, he too has violated the law.

3. All loud noise, and all wild running about of children, and all conduct which creates confusion in worshipping assemblies on the Sabbath are an interference with the right of the good who are strict in their observance of the Sabbath. Wherefore they are taboo. Whoever violates this law shall be fined \$1, and if he does it again he shall

be fined \$2, and thus the fine shall be doubled for every repetition of the offense, even to the furthest extent.

If the person committing the offense be below the age of 14 years then he shall be examined in connection with his parents, and the person who is in fault shall pay the fine.

4. This law shall go into execution on the 1st day of January, the year of our Lord 1841, at all places in this archipelago.

All the words of this law having been approved, we have hereunto set our names on this 13th day of November, in the year of our Lord 1840, at Lahaina, Maui.

KAMEHAMEHA III.
KEKAULUOHI.

CHAPTER XII.—*A law prohibiting reviling, swearing, and slander.*

If any man is not respected and beloved it is a great misfortune to him; he can not enjoy peace and happiness when he is thought to be a bad man; nor can a man be happy, or well refrain from anger even in sin, when one speaks to him in reviling language. Wherefore this law is passed for the protection of people's good name.

1. If one shall revile another with an evil intent, in order to make him odious or angry, the person doing this shall suffer the shame of irons, at the discretion of the judges, but not exceeding one month. So also shall the man be punished who swears at another with an evil intent.

2. If any one lie slanderously respecting another, with an evil intent or with anger, in order to involve an innocent person in difficulty or in order to put a good man to shame, or to bring upon a man the anger of others, or the anger of government, the man that does thus shall be punished according to the aggravation of the offense. If the saying be perfectly false, the fine shall be large; if nearly true, there shall be no fine. If it be a mere mistake without any anger, there shall be no fine. If the person slandering and the person slandered are both persons of distinction, the fine shall be large, but shall never amount to more than one-fourth of the criminal's property. But if the slanderer be a poor man, he may be put to a hard labor, but the time shall not exceed four months, and it may be less, according to the magnitude of the offense in the estimation of the judges.

3. This law shall take effect on the 1st day of January, in the year of our Lord 1841, on all the places on these Hawaiian Islands.

All the words of this law having been sanctioned, we have hereunto set our names this 14th day of November, in the year of our Lord 1840, at Lahaina, Maui.

RESPECTING THE NEW MEETING OF THE NOBLES.

On the 1st day of April, in the year 1841, the nobles met at Luau in Lahaina, according to the requirement of the constitution, and afterwards three persons came forward, appointed by the people, and joined the council of the nobles.

At this council several alterations were made in the existing laws and several new laws enacted.

The changes in the old laws are as follows:

1. *Law of taxation.*—In relation to all laws on taxation it is enacted that whenever the governor shall perceive that any man suffers

ment of the unjust bearing of a particular law it shall then be the duty of the governor to free the man in accordance with strict justice, not enforce that particular phase of the law.

6. *Of men who violate the law.*—When a man is condemned to work for the government according to law, the land agents may claim the labor of the men belonging to their lands on their working days. But the best way is for the man who has the charge of the public labor to keep account of the labor days which the land agent has a right to demand, and then let the criminal first work the government portion of the time, and afterwards that of the land agent.

7. *The time of paying taxes.*—The following words shall be inserted in Chapter III, section 1, page 25: "From the 1st of October to the 1st of December."

8. *Of transient laborers.*—Transient persons who have regular daily employment shall not go to the Tuesday labor of the King, but all transient persons who have not regular daily labor must go.

9. *Of shoal fish.*—From the eighth section of the third chapter of this law, which is found on thirty-eighth page, certain words shall be deleted, as follows:

fish in sufficient quantities to fill two or more canoes, but not so small a quantity as to fill one canoe only.

The transient shoal fish spoken of in this law are (1) the akule, (2) the manaholo, (3) the alalauwa, (4) the uhukai, (5) the kawelea, (6) the wakawa, (7) the kalaku.

These kinds of fish shall be divided equally whenever they arrive at these islands or whenever they drift along.

10. *Of duties laid by land agents on the fish of the people.*—On the thirty page, chapter 3, section 8, read thus: "The people of other lands shall give to the landlord one-third of the fish thus taken on said land."

11. *Of public labor on rainy days.*—If it rains much on the King's labor day, so as to darken the heavens, then it shall be improper to labor; let the labor cease as the amount of rain shall require, at the King's loss, or the land agent's, as the case may be. But if the rain is trifling, such as not to interfere with labor, then it shall continue and only those who are weak and benumbed shall return. But if the people prefer to leave the work entirely and work on one of their own lands, that, too, shall be proper.

12. *Of large families.*—If any tenant of a land have a number of children, so that he is freed from taxation, then his landlord shall not be called on to pay on his account. The taxes shall be diminished according to the number of working men.

13. *Of the punishment of fishermen.*—In the third chapter, eighth section, page 37, the following words are erased: "For two years he shall not fish at all on any fishing ground." The following words shall be inserted in their place:

Who take one fish criminally he shall pay five, and always at that rate. And if a man will be taken five canoes full shall be paid, according to the amount taken, even to the farthest extent.

14. *Of multiplying land agents.*—In the third chapter, ninth section, page 39, the following words shall be inserted: "And their land agents." It will then read thus:

It shall be the duty of those to whom the King gives land, and also of their land agents, to see that they do not establish, etc.

11. *Of the tax for the year 1841.*—The following is the land tax for the year 1841, and is published for the information of the tax office and of the people universally:

1. Money is the standard by which all taxes and assessments are to be estimated, and it would be very well if all men would pay their taxes in money.

2. Kukui nuts are valuable property. In places where the kukui nuts abound the tax shall be in those, according to the seize of the land so the tax shall be apportioned out. The price shall be a dollar and a half per barrel. Six barrels and two-thirds will be equal to a fathom swine.

3. Arrowroot is valuable property. Where arrowroot is abundant the taxes shall be taken in arrowroot. And the tax shall be proportioned to the seize of the land. The price shall be the same as that of live pork—that is, three cents per pound. Three hundred thirty-three pounds are equal to a fathom swine.

4. Turmeric is also a valuable article. Where turmeric is abundant the taxes shall be in that. The price by the pound shall be the same as that of arrowroot.

5. Where none of these kinds of property can be obtained, and where they are not abundant, there the tax shall be laid in fish, and shall be in proportion to what the tax of the land would be in money. If the land would be taxed a fathom swine, then there shall be an amount of fish equal in value to ten dollars.

6. If none of the articles mentioned above can be obtained, then the tax officer shall ascertain whether there be any other article of a fair value, but if the people possess no such article, then swine will be taken.

7. Furthermore, every man shall carry his taxes to a place suited for vessels to go and receive them, to such place, too, as the tax officer shall appoint.

These taxes are confined to the present year, but if found to be profitable will be continued, but if not will be abandoned.

12. *Of articles on the mountains which are taboo.*—In the third chapter, section 20, on page 53, the following words shall be inserted:

But the Ohia Lehua which one man can clasp shall not be tabooed. All people shall have a right to take it. Nor shall there be any taboo on those things which are lying on the top of the ground, nor on the fruit on the trees or roots growing in the ground. It shall be improper for the konohiki to taboo any other article of timber.

13. *Of those who are absent on the labor days.*—In the third chapter, third section, on page 29, certain words are erased, and certain words shall be inserted. The following words shall be erased: "Two five cents," and the words inserted shall be "one rial," and "land agents and officers shall not refuse that price." It will then be as follows:

He that gives previous notice shall pay one rial, and the land agents and officers shall not refuse that price.

14. *Of the interchange of labor weeks.*—The nobles have agreed that the people shall labor on two weeks for the King and land agents. It has been agreed that those two weeks shall be in succession, it is well. If it be agreed to work on one and pass one, or to exchange, that is also well.

15. *Of cursing.*—In the twelfth chapter, at the end of the first section, on page 81, the following words shall be inserted:

But if the criminal choose to pay a fine in money or other property, and so escape as it is well, though in that respect it shall be as he can agree with the one whom he injured, the judges also seeing that there is a due proportion between the crime and punishment.

16. *Of the people who work on the labor days.*—The following words shall be inserted in the third section, on page 29:

But if a man go abroad, and the labor day of the King or Kingdom arrives, if the man engage in labor, it shall then be the duty of the tax officer to give him a certificate, and then he shall not be required to work again when he returns to his own place.

17. *Of the tithe of the property obtained on the labor days of the people.*—The following words shall be inserted at the end of the thirteenth section, on page 52:

The tax officers shall take the property to the King.

18. *Of new-born children.*—When a child is born, then the father or mother shall inform the tax officer, who shall record in a table the name of the child, the name of the parents, name of the land, the day, the month, and the year that the child was born.

If neither the father nor mother give this notice, then those parents shall be guilty of an impropriety. He shall not be freed from labor on the labor days, even if he have a number of children.

19. *Of judges who are guilty of injustice.*—If a judge be guilty of criminal misconduct, and with a criminal design, and punish a man unjustly, or set a guilty man at liberty, or if he do this on account of prejudice, he shall then be brought to trial before the supreme judges, and when convicted he shall cease to be a judge, nor shall he receive any pay for that year in which he committed the offense.

20. *Of those persons who refuse to comply with the sentence of the judges.*—Whatever persons are condemned by the judges to pay a fine or to labor, if they refuse obedience to the sentence of the judge, then death shall be the consequence or a rope; let him be perfectly fast until he gives assent to the decision. But if the criminal give notice of his intention to appeal to the governor or to the supreme judges, it shall be proper for him to do so. He shall not be confined; let him appeal. But if the governor try him anew, or the supreme judges, and find the man really guilty, according to the previous sentence, then the punishment shall be increased.

If the fine were \$10, then \$1 more shall be added. If the punishment were two months' hard labor, then the time shall be lengthened five days. And in that proportion shall the punishment of all persons be increased who appeal without grounds.

21. *Of the protection of the fisheries.*—The following words are to be inserted in the eighth section of the third chapter, on page 38:

The general tax officer may lay a protective taboo on the King's fish, and also on those of the land agents, but the land agents and the King also may eat of their own fish tabooed by themselves even before the taboo of the tax officer is repealed.

22. *Of taring unfurnished lands.*—In the third chapter, section 2, the following words shall be inserted:

If the tax officer perceive that the land is unfurnished, having but few men, then it shall be his duty to diminish the taxation in a due proportion. He shall not look at the size of the land merely, nor at the number of men only, but shall look at both together, and assess the tax justly, that the burdens of all the people may be made alike.

23. *Of dispensing with labor days.*—In the third chapter, third section, on page 30, the following words shall be inserted:

If the King choose to dispense with the labor of the people at any particular place on the islands, and instead thereof to lay a regular tax on the people, it is proper to do so, but the tax shall not exceed \$4.50 each man, according as is mentioned in the law. And if any man be taxed according to this permission, and he do not pay, he shall then be required to work the full number of days he has missed, and the same also with the land agents.

24. *Of the enactment of new laws.*—The constitution declares that:

No new law shall be enacted without the consent of the majority of the house of nobles and representatives. That is well, as the chiefs believe, but here is a further explanation.

"If His Majesty, the King, the premier, and the nobles resident near perceive a particular evil, and on that account think best to pass a new law, they may do it, and that law shall stand until the next meeting of the legislature, when it shall be at the option of the nobles and representatives to confirm or annul it."

All the words of these twenty-four divisions having been approved by the nobles and the representatives, we hereby confirm the same and subscribe our names this 31st day of May, in the year of our Lord 1841, at Lahaina, Maui.

KAMEHAMEHA III
KEKAULUOHI.

CHAPTER XIII.—*Law respecting the running of horses.*

Whereas at the present time certain persons are in the habit of running horses in some of the large villages of these Hawaiian Islands, and whereas children, and sometimes parents, too, are endangered thereby, and even life itself put to hazard; and whereas no benefit arises from such practice: Therefore, the nobles and house of representatives in council assembled have agreed to all the words of the following law.

1. By this law is prohibited all running or swift riding of horses on roads, streets, and all avenues in villages, and also in all places of assembly or public resort, and in all places where the traveling is abundant. Whoever violates this law, or does that which is forbidden in this section, shall be brought to trial, and on conviction thereof shall be fined \$5, one-fourth to the complainant and three-fourths to the Government, and the criminal shall also pay all damages sustained by any individual by his swift riding. The only places for running are off at a distance where people are not traveling.

2. Furthermore, all persons riding on horseback or in a carriage on the streets where people are traveling shall ride in or near the middle of the street, in order that persons on the side of the streets may pass safely. Whosoever violates this law by design, or with an evil intention, and thereby brings a person into difficulty or inflicts an injury on that man shall be brought to trial, and on conviction shall be fined \$5, one-fourth to the complainant and three-fourths to the Government.

3. It is also taboo to train and teach wild and untrained horses to run on the streets where men are traveling. It is also taboo for men to assemble and ride for pleasure, a number together in villages, or with large numbers are walking and attending to their lawful business. Whosoever violates the prohibitions of this section shall be fined, on conviction thereof, \$5, one-fourth to the complainant and three-fourths to the Government. He shall also pay all the damages which any man may have sustained by his fault.

4. It is also taboo to set at liberty wild cattle, or permit them to go large, or even to lead them carefully in the streets of a village or any place of public resort. Whoever shall do thus in violation of this law shall pay for all the loss or damage which anyone may sustain from him, and shall moreover pay a fine of \$5, one-fourth to the complainant and three-fourths to the Government.

5. Whosoever is punished for a breach of this law, or any prohibition of any section thereof, and shall afterward commit the same offense again, his fine shall be doubled, and it shall continue to be doubled for every repetition of the offense, even to the furthest extent.

Whenever this law is proclaimed in any village or district, the day of its proclamation shall be the day of its taking effect in that place, but even if it be not proclaimed it shall take effect at all places on these Hawaiian Islands on the 1st day of September of the present year.

All the words of this law having the assent of the nobles and representatives in council, we have hereunto set our names at Lahaina, Maui, on this 20th day of April in the year of our Lord 1841.

KAMEHAMEHA III.

KEKAULUOHU.

CHAPTER XIV.—*A law respecting mischievous beasts.*

Whereas there is at the present time a considerable number of people who are greatly annoyed by having their cattle held in confinement without cause; and whereas the former laws of this country applicable to mischievous beasts were unjust; and whereas some of the farmers are greatly annoyed by having their vegetables destroyed; and whereas there are many mischievous cattle: Therefore, in a council composed of His Majesty, the subordinate nobles, and the representatives, all the words of the following law were approved:

1. In all places where there is a considerable amount of cultivation it shall be illegal for beasts to go at large, unless the cultivated grounds are inclosed by a fence. If beasts are permitted to go at large in such places, and a beast destroy the food of any person, then the owner of the animal shall pay the owner of the food for all the food thus destroyed. Or if the animal were confined, but broke away from his confinement and destroyed food, the owner of the animal shall pay as above.

2. In those places where the cultivated grounds are surrounded by a fence animals may go at large, but if any animal be really mischievous and break away the fence or jump over it, then the owner of the animal shall pay according to the amount of food destroyed and the loss sustained by the injured person. But goats and sheep shall not be permitted to go at large at all in the vicinity of cultivated grounds, because they will not be confined by a fence; they will overleap it. Wherefore it is taboo for them to go at large in the vicinity of cultivated grounds.

3. If the fence become rotten, or if an adobe or stone fence fall down, by which means the cultivated grounds become exposed, then the animal, not being in fault and not being of a mischievous character, shall pay no fine. But if it was generally known that the fence was poor and out of repair, and on that account most of the people concerned their animals, or if the officer had proclaimed that people must take care of their animals, and some one refused or neglected to take care of his, then he shall pay all damages done by his animals.

4. But the best course is, when it is perceived that the fence is defective, for the officer to repair it immediately. In making fences the labor shall be done on the labor days of the King, the land agents, and the people. They shall work twelve days in the month until the fence is finished, for it is not made for the benefit of the nobles only, but for the people also. But transient laborers shall not work unless they feed cattle.

5. Furthermore, in making public fences, those who own cattle and horses shall do more than those who do not. Five cattle shall be considered equal to one man, and in making fence if the officer think best to divide it into portions he shall have a right to do so, and it would be especially proper to give a separate portion to him that has cattle. But the estimate for cattle and horses shall be as mentioned above though if they are tied by ropes or feed in a separate pasture such animal shall not be counted.

6. If an animal stray away into the cultivated grounds of a man or into his inclosure, it shall be proper for the owner of the ground to seize the animal and kindly return him to the owner, or if not, then give information that the animal is confined, in order that the owner may come for him. But if any one unnecessarily hold the animal of another in confinement and do not restore him nor consent to the owner's taking him away, or if he do not give notice of the confinement, but retains the animal secretly, then the man who seized the animal shall pay all damage sustained by the owner.

7. If an animal be seized, and it is not known to whom he belongs, then the man shall take care of the animal for one month, feeding him well, making diligent inquiry whose the property is, but if the owner do not appear and is not heard of, the man who seized the animal may then act his pleasure and his will, but he shall make his seizure of the animal public, that it may be extensively heard of. If he conceal it, he is like a thief, but if he make it public and it is not called for he is then faultless. If the owner appear after the end of the month spoken of above, he shall pay the man who has taken care of the animal for all his labor, and take him away.

8. If the owner of the animal and the person who seized him do not agree, then the judges shall decide the case. But the animal shall be restored immediately, and the judges decide respecting the payment according to principles laid down above.

9. All those words are applicable both to house and yards and inclosed plantations, but if the gate of the inclosure be left open, then the animal is not in fault for entering. If a man leave the gate of his inclosure open for the purpose of enticing animals to enter, or if he go for the animals of another and drives them in or entices them to enter, and afterwards make application for damages, he shall be brought to trial therefor, and on being convicted thereof shall be punished as a thief, thus: If he apply for \$1 he shall be fined \$4; if he apply for \$2 he shall be fined \$8, and this shall be the rate of fine for all who make such criminal application for damages when the animals have committed no fault.

10. If an animal be tied by a rope and anyone goes in a criminal manner and loosens it or pulls up the stake, he then shall pay to the owner of the animal all the damage sustained by him, and shall pay for all damages done by the animal, and shall pay a fine of \$5.

11. Cattle and horses shall not go at large in streets of villages where there are many people traveling, nor shall they be tied there for feeding, and when travelers tie their horses in the streets it shall be done only on the side of the street and with a short rope; it is not proper in the middle of the street where people are traveling.

12. Even if a man's animal do criminally enter the inclosure of another, it shall be illegal for the owner of the inclosure to take the life of the animal or inflict any wound or break his bones. The proper course is to seize the animal and confine him, but not kill him. If one kill another's beast or inflict a wound upon him with a criminal intent, he shall pay all damage sustained by the owner of the animal. But if in seizing the animal he be wounded, or die, and is not killed outright, the man having no design of doing an injury, then he is not criminal.

13. These requisitions are applicable to all animals: Whatever animal he be that criminally enters another's premises to do mischief, the owner of the animal shall pay according to the amount of the mischief. If it be a cat or a dog the law applies to them and to all animals; also to dogs who go about from place to place destroying domestic animals in the field. The owner of the dog shall pay the damage.

14. Furthermore, if a man be traveling in the street or in any other place where it is proper for men to go and a dog, shall pay the injured person according to the amount of the injury. But if a man secretly enter another's premises in the night and be bitten, then the owner of the dog is not in fault; he shall pay no damage.

15. If a man be riding in the highway, it is improper for dogs to run out and bark at the horse, lest the horse start and the man fall. The dog which is often known to do so shall suffer death. And if a dog bark at a horse and the horse, being afraid, start or run and the man fall, then the owner of the dog shall pay the man who fell. If he were much injured, the pay shall be considerable; the judges shall estimate the damages. If this law be proclaimed in any village or district, the day of its proclamation shall be the day that the law shall take effect in that place, but even if it be not proclaimed it shall, nevertheless, take effect at all places on these Hawaiian Islands on the 1st day of September of the present year.

All the words of this law having received the approbation of the nobles and representatives, we have hereunto set our names, at Lahaina, this 23d day of April, in the year of our Lord 1841.

KAMEHAMEHA III.
KEKAULUOHI.

CHAPTER XV.—*A law respecting domestics, servants, and hired men.*

There is a certain class of persons who make it an important business to engage in the service of others. That is a perfectly honorable business if conducted right. But if conducted wrong, evil arises. Wherefore the nobles and representatives, in considering the subject, have thought well to give protection to that class, and by mutual counsel have established this law:

1. It shall be legal for every man to choose his place of residence at his own will, and let himself if he choose to do so. If a man make a previous agreement with the person whom he serves, then that agreement becomes a bargain and shall be fulfilled like all other bargains.

2. If one man live as a domestic with another engaging in his service, but without any other reward than his board and clothing, as has been a common custom in this country, such a course is legal and is not forbidden by this law. But herein is the evil. If a man live thus a length of time and then be taken sick, or suffer some misfortune, if he become feeble with age, it is then illegal for his master to dismiss him or send him faultless away. Whoever does this shall be brought to trial, and shall pay his servant whom he sent away such amount the judges on examination of the subject shall think the misfortune the servant demands.

3. If one man live as the servant of another, as is a common way and a common practice among the people, and his master assign him a particular job of work, it shall be his duty to do it well, carefully regarding the charge of his master in all that he properly said to him; and if he do not thus, or if he conduct mischievously, he shall be fined in proportion to the damage sustained by his master through his disregard of his charge.

4. If one man live with another as his servant for a length of time according to the common custom of the country, it shall not be legal for the master to dismiss him without giving him previous notice, and it shall be legal for him to leave his master without giving him previous notice, lest one or the other suffer an inconvenience. Previous notice must be given. Whosoever violates this law shall be brought to trial and be fined according to the damage sustained by him on whom it was inflicted.

5. If a man suffer want in consequence of not obtaining a sufficient supply of food, and on that account does not perform the labor assigned him by his master, that servant is not in fault. He, however, should give immediate notice that his master may know it. But the best way to avoid all is to take a definite bargain in the first place, and that will prevent subsequent difficulties.

If this law be proclaimed in any village or district, the day of proclamation shall be the day of it taking effect in that place; but if it be not proclaimed, it shall nevertheless take effect on all places of these Hawaiian Islands on the 1st day of September of the present year.

All the words of this law having received the approbation of the nobles and representative body, we have hereunto set our names this 20th day of April, in the year of our Lord 1841, at Lahaina, M.

KAMEHAMEHA II
KEKAULUOHI.

CHAPTER XVI.—*Law respecting debts and usury.*

When men are trading with each other, it often occurs that one receives the property of another without paying for it immediately. In the estimation of this law, it is not well to run in debt, though not made absolutely taboo, for a man might sometimes be in straitened circumstances could he not run in debt, wherefore this restrictive law is established.

1. If two persons engage in a commercial transaction, or together and one runs in debt to the other, and they make a definite agreement respecting the debt, then payment shall be made at the time agreed upon. But if the debt be not canceled, then interest shall be paid at the rate of 1 per cent per month; and this shall be the rate

interest for all debts that are canceled at the time agreed upon. This requirement applies to common trade and to accounts which have not the signature of the debtor. But notes of hand having the signature of the debtor shall be interpreted according to the purport of the language contained in it. If the note specify that interest shall be paid, then it shall be so. But if the note do not mention interest, then there shall be no interest unless there be mentioned a particular time for payment, and that expire without the debt's being canceled, after which interest shall be paid as mentioned above.

2. Debts of promise, or accounts not having the signature of the debtor, if they are not canceled within a year from the time that interest commenced on them, shall be put into notes having the signature of the debtor. In the note the rate of interest shall be mentioned according to their mutual agreement; the law does not specify in such case. And if there be no note given with the name of the debtor, then there shall be no interest after the first year. But if the debtor refuse or be absent, and on that account no note be given, then the judge shall be notified thereof, and from the time the judge receives the notice interest may be required.

If this law be proclaimed in any village or district, then the day of its proclamation shall be the day on which the law shall take effect at that place. But even if it be not proclaimed it shall nevertheless take effect at all places on these Hawaiian Islands on the 1st day of September of the present year.

This law having received the approbation of the nobles and representative body, we have hereunto set our names this 26th day of April, in the year of our Lord 1841, at Lahaina, Maui.

KAMEHAMEHA III.
KEKAULUOHI.

CHAPTER XVII.—*Vagrant laws.*

Indolence is a crime involving the best interests of the State. Even in the days of old it was considered a crime, and at the present time it is perfectly clear that it is a misdemeanor. Those who live without labor live in direct disobedience to the commands of God and in disregard of the opinions of mankind. Wherefore in a council of the nobles and representative body this law was passed:

1. If a man be often seen running about or sitting idly without labor or devoted to play and folly, he shall be taken before the judge, and if he can not bring evidence that he labors sufficiently to pay for his board and clothing he shall then be put to hard labor for three months.

2. If he be again seen living in the same idle manner after he had been punished, then he shall be put to hard labor for one year.

3. If a man live in idleness because he have no land, then his destination shall be examined into, and if he be faultless he shall not be punished. But land shall be given him as the law requires.

By this law men and boys are forbidden to run in crowds after new fashions. Whosoever does this in an indecent manner shall be punished as follows: He shall be taken to the house of confinement and remain till he pay a fine and be set at liberty. The same also with those who obey not the police officer when he proclaims a prohibition.

It shall therefore be the duty of the police officers to watch carefully around the markets and places of public resort, that they may discover who they are who crowd after strangers, for these are indolent and lazy persons. Let them be taken before the judges and tried, and when convicted let them be punished according to the requirements of this law.

If this law be proclaimed in any village or district, the day of proclamation shall be the day of its taking effect at that place; even if it be not proclaimed, it shall nevertheless take effect on the day of September of the present year at all places on these Hawaiian Islands.

This law having received the approbation of the nobles and representative body, we have hereunto set our names this 23d day of April in the year of our Lord 1841, at Lahaina, Maui.

KAMEHAMEHA III.
KEKAULUOHI.

CHAPTER XVIII.—*Law respecting apprenticeship.*

It is a business of profit and beneficial to the country for men and children to learn the various handy crafts and new kinds of business and profitable trades, which relieve general necessity. It is therefore well for the parent to give up his child to learn such handy crafts, and it is well, too, for the man of mature years to go of his own accord to learn the same. As the nobles and representative body have reflected on the subject, they have thought proper to give such persons the protection of law, and have therefore agreed to the following edicts:

1. If a parent wish to give up his child to learn a trade, it is well for the parent and the teacher of his child to agree together in writing and let it be specified in the writing how many years the child shall learn, how he shall live, and what shall be the pay.

2. If the child be indolent and disregard the directions of his master or neglect the business or conduct badly, the child shall be brought to trial, and if it appear that he has conducted as above, or has violated the mutual written agreement, then the child shall pay all damage sustained by his master. He shall pay it in labor, and the time he shall labor shall be proportioned to the damage, to be decided by the judges.

3. The same also of the teacher of the child; if he conduct improperly, or do not teach the child according to the agreement, or if violate that agreement, then he shall pay all damage sustained by the child or parent, to be decided by the judges.

If this law be proclaimed in any village or district, then the day of its proclamation shall be the day of its taking effect at that place; even if it be not proclaimed, it shall nevertheless take effect on the day of September of the present year at all places on these Hawaiian Islands.

All the words of this law having been approved by the nobles and representative body, we have hereunto set our names on this 17th day of May, in the year of our Lord 1841, at Lahaina, Maui.

KAMEHAMEHA III.
KEKAULUOHI.

CHAPTER XIX.—*Law respecting lost and found goods.*

Men often suffer misfortunes without any fault of theirs, wherefore it is proper for the law to aid those who are thus unfortunate. All misfortunes which the law can relieve it should relieve. If a man's property be lost without his knowledge, it is well for the law to furnish the means of obtaining it. And if one find the lost property of another, it is well for the law to specify the course of procedure, lest there should be difficulty. Wherefore, in a council of the nobles and representative body all the words of this law were approved.

1. If a man's money fall in the street or in any other place and is lost, it is well for the owner of the property to proclaim it, or publish it in writing, or make it so public that it may be extensively known that he has lost his property. If the property should be of much value, it would be well to publish it in the newspaper, if there be one printed.

2. If it be proclaimed that the property is lost, or made public so that the people extensively hear of it, and one find the lost property and conceal it without making it known, he violates this law; and when his conduct is known, he shall pay the owner of the property an amount equal in value to the property which he found. If he found a dollar, he shall pay another dollar besides the original, which shall be restored. One-half of the fine shall go to the Government, but one of the principal.

3. If one finds lost property, he ought to restore it as soon as he learns whose it is. And if he do not know the owner of the property, make proclamation and tell it abroad, that men may extensively hear it. If anyone does like this, then the owner of the property shall reward him according to the amount restored. If their opinions are unlike and do not agree, then the judges shall decide between them, but the reward shall not exceed one-third of the property restored and shall be less if the judges consider it proper.

4. If a canoe go to sea and swamp, and is deserted, and afterward one find it, he shall be rewarded as above and the canoe be restored. But if he obtained it with difficulty, the reward may be greater, in the discretion of the judges.

5. If one see another's beast straying away, or destroying another's wood, it shall be his duty to restore the beast or confine him and inform the owner, and he shall pay the man who restored him the full amount of his labor.

6. If any property drift on shore, the owner not being known, as timber, fish, or any other property, if it be very valuable, one-half shall belong to the King and the other half to him who obtained it, but not so if it be of little value.

If this law be proclaimed in any village or district, then the day of its proclamation shall be the day of its taking effect in that place; but even if it be not proclaimed, it shall nevertheless take effect on the 1st day of September of the present year at all places on these Hawaiian Islands.

All the words of this law having been approved by the nobles and representative body, we have hereunto set our names on this 17th day of May, in the year of our Lord 1841, at Lahaina, Maui.

KAMEHAMEHA III.
KEKAULUOHI.

CHAPTER XX.—*Law respecting property in trust.*

Men, as they live and labor together, often commit property to other's care. Some men, too, obtain their living and their wealth taking care of the property of others. Inasmuch as there is a large amount of property committed to the charge of others, that property should be protected by the laws of the Kingdom; therefore, in a council of the nobles and representative body, the following law was approved.

1. If one man commits his property to the charge of another, he receive it, he shall take care of it according to their mutual agreement; but if there were no agreement, he shall take care of it according to the custom of all faithful persons. And the owner of the property shall pay him according to their mutual agreement; or if he did not agree, he shall pay according to the common custom of the business.

2. If one take the property of another in charge and do not take care of it according to agreement, he shall then pay all damage sustained by the owner of the property. And even if they did not agree he shall do as specified above. This law applies to all kinds of property, land, canoes, animals, and property of every kind.

3. If one man borrow tools of another, or cattle, or a horse, or anything else, and agree to return them when a particular specified time is done, then they shall do as they agreed. But if the tool or animal were injured in the hands of the borrower, he shall pay all the damage sustained by the owner of the property. If anyone borrow any thing or any article of another and do not return it at the specified time at the proper time for returning it, and on that account the owner suffer loss, then he who retains the property or does not take proper care of it shall pay all the damage sustained by the owner.

If the property be destroyed or injured by the providence of God, as by fire, the overturning of a vessel, a strong wind, or the like, then the man shall not pay damages; he shall pay damages only for his own fault.

If this law be proclaimed in any village or district, then the day of its proclamation shall be the day on which the law shall take effect at that place. But even if it be not proclaimed it shall nevertheless take effect on the 1st day of September of the present year, at all places on these Hawaiian Islands.

All the words in this law having received the approbation of the nobles and representative body, we have hereunto set our names this 23d day of April in the year of our Lord 1841, at Lahaina, Maui.

KAMEHAMEHA II.
KEKAULUOHI.

CHAPTER XXI.—*Law respecting parental duties.*

It is a great misfortune to children not to be well taken care of, and it is the misfortune theirs only, the nation also suffers, for before many years the parents will all be gone, and all the business will be devolved upon the children, not merely the business of husbandry, but that of government also. Wherefore this is a matter of great importance, and it is well for parents to reflect and take care of their children and enlighten them. It is well for the law also to aid the parents

the care of their children, wherefore in a council of the nobles and representative body, the words of this law were approved.

Parents and they only have the direction of their children without interference from others. If anyone interfere with them in the management of their children, the law shall aid them and punish him, and interfere according to the aggravation of the offense, in the estimation of the judges.

If parents wish to commit their child to the care of another, it is for them to go before an officer and make their agreement in writing, and he being a witness to the correctness of the transaction, signing his name as such, the writing shall be legal. If there be no writing or no officer sign his name, the child can not be transferred. The true parents still have the direction of the child.

If a parent see his child to be in fault he ought to instruct or punish him according to the nature of his fault, and the same also of other parents. They commit no crime by inflicting pain on a disobedient child. But those who punish unmercifully commit a crime, and shall be fined as those who commit an assault.

But if a parent maltreat his child, or do not furnish him with clothing, and other necessities, or chastise him unmercifully, it shall be the duty of him who sees it to inform the judges. And it shall be the duty of the judges to bring him to trial, and on evidence of a crime the judges shall have a right to take the child and give him to a good man, and the parent shall be fined to a sufficient amount to pay for the care of the child, and the fine shall be given to the child's new guardian.

If one man criminally entice the child of another into sin, he shall be fined as one actually guilty of the sin. But if it be not a crime in law yet it is a crime in the estimation of the parent and it is a crime with his command, then the judge shall look at the nature of the offense and shall fine him who enticed the child to violate his parent's instruction, according to the magnitude of the crime in the estimation of the judges.

If the parents are not agreed in relation to the child, then the father's decision shall stand in law, though if the mother be the higher in rank, then the decision of the mother shall stand and not the father's. This requirement, however, does not apply to those children of chiefs who have been given away previous to the enacting of this law, and towards the parent died.

If a child be left without natural parents on account of their death or absence, then the foster parents shall have the direction of the child. If the child be illegitimate, then the mother shall have the direction of the child, but if the mother be unfaithful, the judges shall have power to take the child from her at their discretion.

When the parent dies, then the child is the heir, if there be any living. The parent during his lifetime may sell his personal estate as he ever he pleases, but the land and all fixed property on the land shall descend to the child. If he have many children, they all shall share it together; though if the parent while he is living and in his mind make a written will, he may bequeath his land to whom he pleases. When he dies the heir shall exhibit the will to the King, and if the supreme judges perceive that there was a real fault in the will, they shall correct it, lest those to whom the property justly

belongs should be left destitute and those possess the property whom it does not belong.

If this law be proclaimed in any village or district, the day of proclamation shall be the day of its taking effect at that place, but if it be not proclaimed it shall nevertheless take effect on the 1st of September of the present year at all places on these Hawaiian Islands.

All the words of this law having received the approbation of the house of nobles and representative body, we have hereunto set names on this 24th day of April, in the year of our Lord 1844, Lahaina, Maui.

KAMEHAMEHA IV.
KEKAULUOHI.

CHAPTER XXII.—*Law respecting debtors.*

It is of vast importance to men engaged in trade that each party fulfill the agreement. If either fail, trade is embarrassed and the public injured, wherefore in a council of the nobles and representative body the following law was enacted:

1. If one man be in debt to another and do not cancel it at the time agreed upon, and on that account the creditor becomes anxious and fear lest he should not obtain the debt, he may then go to either of the judges who will thereupon attach the property of the debtor, but not remove it; he will merely place the property under his protection after which no one can take the said property without leave from the judge.

2. If the debt be not paid within thirty days, then the property shall be sold at auction for the payment of it, and the judge shall receive his fees out of the said property, but not out of the debt. But if the debtor be suffering some misfortune from the providence of God, he shall then be allowed a full year, and the property shall not be sold at auction until the expiration thereof. But at that time if the debt be not canceled it shall be sold. If the money received for the property exceed the amount of the debt and the judge's fees, the balance shall be restored. Nothing shall be taken unjustly, and nothing wasted.

3. If anyone in a fraudulent manner become indebted to another and do not pay the debt, or if one become famous on account of frequently contracting debts and not paying them and have no property with which to pay, he shall then be put to hard labor for a length of time proportioned to the amount of debt, which shall be decided by the judges.

For regulations respecting the payment of interest, see law respecting debts and usury, page 101.

If this law be proclaimed in any village or district, the day of proclamation shall be the day of its taking effect in that place, even if it be not proclaimed it shall nevertheless take effect on the 1st day of September of the present year at all places on these Hawaiian Islands.

All the words of this law having been approved by the house of nobles and also by the representative body, we have hereunto set names on this 18th day of May, in the year of our Lord 1844, Lahaina, Maui.

KAMEHAMEHA IV.
KEKAULUOHI.

CHAPTER XXIII.—*A law respecting the hire of labor.*

Labor hire, as well as other kinds of hire, has at the present time become an extensive business. There are persons who obtain their living and property by laboring for hire. The law does not condemn that business, for it is proper. The law protects it. It would be a sad thing for the community if the law did not give protection to him who labors for hire. Wherefore, in a council of the chiefs and representative body, the following law was enacted:

1. If one man hire another to perform labor, then they shall both be in strict conformity to their mutual agreement. If the agreement made to labor by the day, then the laborer shall work faithfully, in accordance with his previous engagement. If he be indolent or idle work so sluggardly that little labor is performed, then his wages may be diminished; he may not be paid according to the promise, because the laborer has not labored according to their mutual agreement.

2. If a man engaged to perform labor by the job, he shall complete the labor at the time on which they shall mutually agree. The man shall also perform the labor faithfully. If anyone do his work imperfectly, or really do it badly, and does not finish it well, according to the promise, his pay may be diminished, or entirely withheld if the laborer do the work very badly. And if the employer suffer material damage on account of the fault of the laborer, then he shall pay all damages sustained by him whom he has injured.

3. If one man engaged to perform labor for another and the time of laboring be agreed upon or the time when the labor shall be completed, the laborer shall fulfill the agreement which they mutually made. If the labor be not finished at the time agreed upon and the employer suffer thereby, then there is a crime, and he who committed shall pay damage, according to the amount of damage sustained through his failure.

4. All laborers of every kind who labor for hire, and all persons who hire property, shall perfectly fulfill their mutual agreement. Whoever does not thus fulfill his agreement is criminal, and he shall be fined according to the amount of loss sustained by the other party.

5. If on account of sickness or on account of the judgment of God, a man fail to fulfill his agreement, then both parties sustain loss, none shall be exacted of him. A man shall be fined for his own fault only, not for the judgment of God. The judge shall settle all difficulties between persons who are trading with each other.

6. This law does not apply to rented lands, unless the agreement be made in writing, for it is only a written agreement which is binding in relation to rented lands and house lots; nor shall they then be binding for a long time, unless countersigned by the King and premier according to the constitution. And many, however, may have liberty to rent the land for a single year, according to a former agreement of the chiefs.

This law has no special relation to common trade, for there is already another law in relation to that subject.

Should this law be proclaimed in any village or district of country, the day of its proclamation shall be the day of its taking effect. But

even if it be not proclaimed it shall take effect on the 1st day of September of the current year, and that, too, on all places of the Hawaiian Islands.

All the words of this law having the assent of the nobles and representatives in council, we have hereunto set our names at Lahaina, Maui on this 19th day of May, in the year of our Lord 1841.

KAMEHAMEHA II
KEKAULUOHI.

CHAPTER XXIV.—*Law respecting partnerships.*

If any number of persons wish to unite their property for the purpose of accomplishing some great object, or for the purpose of trade it shall be legal to do so. The law shall give protection to such partnerships which shall be formed, as follows:

1. If any number of persons design to form a partnership of property for the purposes of trade or business, then they shall first agree together on the principles of their partnership and put that agreement in writing and put their names at the bottom. One copy, however, the writing shall not be sufficient. If there be two partners in compact there must be two copies of the agreement; if three persons in the compact, then three copies of the agreement, the number of copies corresponding to the number of persons united in the partnership; the different copies must agree in every particular and every person must keep his own copy of the agreement.

When the agreement as to the partnership is completed it must be made public, that the people may hear it. The proper way is to print it; but if that be not done, then let the notice be written and the writing be made public, after which the whole number of persons included in the company become one in law.

When the public become acquainted with their partnership, or the printed or written notice, then if any of the company make a promise to any individual, then that promise is the promise of the company. Thus, if any one of them contract a debt and decease, the remaining part of the company shall pay all his debts. So also if any person become indebted to one individual of the company, and that individual decease, then payment shall be made to the surviving members of the company.

Such are the regulations concerning partnership.

This law shall take effect on the 1st day of September of the current year at all places on these Hawaiian Islands. And all persons herebefore united in partnership and continuing their union after that shall be bound by this law.

All the words of this law having received the sanction of the nobles and of the representatives, we have hereunto set our names on the 18th day of May, in the year of our Lord 1841, at Lahaina, Maui

KAMEHAMEHA II
KEKAULUOHI.

CHAPTER XXV.—*Of crimes not particularly defined by law.*

Men commit many crimes which are not definitely specified in law, and it is not possible for the law to define particularly e

rules of offense, wherefore the nobles and representatives have agreed the following regulations:

1. If a man commit a crime of such a nature that it is in a case where a particular statute applies, then the judges shall refer to the nature of the crime and the kind of punishment which would formerly have been meted; he shall also consider the principles of the new law, and shall pass such sentence on the criminal as is required by the general principles of the new system require.

2. Furthermore, all persons accessory to the commission of crime shall be punished in the same manner as the principals, unless their crime be particularly defined in some other law.

Whenever this law shall be printed and the judges see the opportunity, it shall then take effect on all places in these Hawaiian Islands.

This having received the sanction of the nobles and representatives, we have hereunto set our names on this 10th day of May, in the year of our Lord 1841, at Lahaina, Maui.

KAMEHAMEHA III
KIKIATI, 1841

CHAPTER XXVI.—*Law respecting the labor of criminals and the women laborers.*

At the present time much evil results from the assembling of a great number of criminals at the same place. Criminals are made to perform the interests of individuals, and on account of the great number of labor at the same place they are in great spirit and great trouble from the practice.

Wherefore, in a council of the nobles and of the representatives, the following law was enacted:

1. If a man be made to serve at hard labor on account of crime, he shall not work for any particular chief; he shall be employed at general works. The following is properly national works: the making of roads and fences for the roads, prison, mounds of dirt, and other works which are not for the private interest of any particular chief or individual person.

2. If a man be made to serve at any productive business, it is well, but when the avails are realized they shall be turned to the benefit of the nation. Such income may properly be turned to the payment of government debts, to the payment of tax officers, the purchase of guns, powder, paying for roads, or supporting prisoners.

Males and females shall not be made to work together, nor shall they sleep in the same house, nor in the same place; they shall be kept separate.

3. Females shall not be made to serve at labor appropriate only to males, nor at any labor inappropriate to females. The sewing of clothes, mending of mats, branding of mats, weaving, twisting of lines, and such like labor as is appropriate to females, shall be made to serve at such works at which females shall be employed. But no person shall be made to serve at hard labor.

4. If any officer shall act contrary to the regulations of this law and shall make males and females to work together, or to sleep in the same place, or compel a woman to perform labor not appropriate to her sex, or shall make one to perform labor for himself personally, or for a particular chief, the officer who does any of these things shall in his own

person sustain the punishment of that man or woman whom he has thus treated.

When this law shall be printed and put into the hands of the officers then it shall take effect at all places on these islands.

All the words of this law having been agreed to by the nobles and by the representative body, we have hereunto subscribed our names on this 18th day of May, in the year of our Lord 1841, at Lahai Maui.

KAMEHAMEHA III.
KEKAULUOHI.

CHAPTER XXVII.—*Statute regulations respecting ships, vessels, and harbors.*

1. It shall be lawful for ships and vessels of all countries at peace with this, and engaged in lawful pursuits, to come to and anchor at the roadsteads, ports, and harbors of the Hawaiian Islands. No embarrassment shall be thrown in their way by the governors or local authorities of any place. No impost, duty, or tax shall be required except by express provision of law.

2. Pilots shall be established at all the Hawaiian ports where pilots are necessary. His Majesty the King, together with the premier and governor, shall make the appointment and give the commission. The commission shall state the wages of pilotage.

3. If any man in a deceitful manner shall present himself as a pilot and act as pilot at any of the harbors of the islands and take the pay of a pilot without first having received a certificate of appointment from the King, is guilty of a violation of this law. He shall be brought to trial, and on conviction thereof shall be fined \$10, and shall furthermore restore whatever he deceitfully received in payment. And if he involve the ship in difficulty he shall pay to the captain the damages sustained by him, or in default thereof shall be imprisoned one year.

4. If any pilot shall deceitfully take higher pay than is allowed by his certificate of appointment, he shall on conviction thereof be fined four times the amount which he deceitfully claimed; thus, if he took one dollar wrongfully, he shall pay four, and if he took ten wrongfully he shall pay forty.

5. It shall be the duty of all pilots or harbor masters to give to every captain of a foreign vessel the laws of the harbor where the vessel anchors, and the captain shall give him a certificate of acknowledgment that he has received said laws. If any pilot or harbor master shall neglect thus to give a copy of the laws and the captain of the vessel thereby becomes involved in difficulty because of his ignorance of the laws, then the pilot or harbor master shall be liable, and shall pay to the captain the full amount of all damages sustained by him.

6. When a merchant vessel arrives at any port or harbor of the Hawaiian Islands, no goods shall be landed from a foreign country until a correct manifest giving a full account of the goods be delivered into the hands of the harbor master. If the captain have the charge of the sales, then he shall deliver the manifest; but if he have not, the goods are consigned to someone resident on shore, then he to whom the property is consigned must deliver the manifest.^a W

^aThe manifest must state the quantity and kind of goods.

the harbor master receives said manifest, he will then give a certificate of permission that said goods may be landed. If the certificate be not given, then the goods must not be landed. Whoever violates this law or intentionally evades it, and whoever delivers a false manifest, shall be brought to trial, and on conviction thereof shall be fined to the amount of one-fourth of the value of all the property wrongfully landed by him.

7. When goods are once landed, having been registered on the manifest, it shall not be proper for the captain again to take them on board his vessel, nor shall it be proper for him to take other property on board without giving, previous to his departure, a correct manifest of said property. Whoever violates this law or evades it shall be fined to the amount of one-fourth of the value of all the property thus illegally taken away.

8. On the last day of December of each year the harbor masters having faithfully preserved the manifests spoken of in the sixth and seventh sections, shall deliver them all into the hands of the governors, who shall deliver them to the premier of the Kingdom.

9. Ships which come to these islands for the purpose of obtaining refreshments, or for repairs, must first render a clear and explicit account of the kind and amount of purchases designed to be made, and this written account must be delivered into the hands of the harbor master of the port; and if he wish to pay for such refreshments in any other articles except money he must state what articles. And if he purchase articles not mentioned in the written account, or if he sell any article not mentioned in the first writing, then previous to his sailing from the port he shall give in another correct account. Whoever violates this law or evades it, and whoever gives in a false account, shall be brought to trial and on conviction thereof shall be fined \$200.

These accounts also shall be preserved in the same manner as those mentioned in section 8.

10. If any vessel arrived from a foreign country having a passenger on board, then the captain shall give immediate notice, in writing, of the name, country, age, and business of said passenger. And he shall neither set at liberty nor permit to be landed said passenger nor his property until the harbor master has seen said writing. Whoever violates this law shall be fined \$1,000.

11. No master of a vessel shall discharge or leave any of his men to remain on shore without the consent of the governor or his agent in writing. Whoever violates this law shall pay \$60, and he who is thus discharged shall leave the islands by the first suitable vessel. But if he do not leave according to this requirement, then he shall be treated as the deserter spoken of below.

12. If any foreigner desert from a foreign vessel it shall be the duty of the captain of that vessel to make it known immediately to the harbor master, who will search for the deserter. If said deserter be found in the harbor where the vessel is at anchor, then the captain of the vessel shall pay to the harbor master \$6, and the deserter shall be returned to the vessel. If he be found at the place remote from the anchorage, or on the mountains, or at a distance of 10 miles, then the reward shall be \$12. But if he be found on another island, then the reward shall be \$24.

If the deserter be kept on shore and boarded, the pay required will be half a dollar per day, though this section does not prevent a special

agreement between the captain of the vessel and harbor master respecting the deserter, provided it be entered into previous to his being taken.

If a foreigner deserts, and the vessel from which he deserted sails without the captain's having given notice respecting said deserter, if he delay to give notice for forty-eight hours after the desertion of the man, then he shall be considered to have discharged his man and shall therefore be fined according to the requirement of the eleven section of this law.

13. Every foreigner who deserts or comes on shore secretly without the knowledge of the governor or his agent is obnoxious to this law. Whoever does it shall be put to hard labor, from which he shall be freed until he leaves the country. He may also at the discretion of the nobles be dispossessed of all his property.

But if the nobles think best to leave him his property and substitute a flogging, it shall be lawful, though the stripes shall not exceed thirty.

14. If any native or foreigner residing on shore entice a man belonging to a foreign vessel to leave his vessel, or if anyone conceal a foreigner on shore, or if anyone see a deserter and understand him to be such and do not give notice to the harbor master nor to the nobles, then he shall be considered as accessory to the desertion, and shall be fined \$6, one half to the captain of the vessel from which he deserted and the other half to the government.

15. It shall be the duty of the governor and officers and of the people at large, as well as of the land agents, to be on the alert, and when they see a foreign deserter seize him and deliver him to the harbor master. Whoever seizes a deserter thus shall receive one-half of the reward.

16. If any foreign vessel be in difficulty, be wrecked, or suffer from a severe storm, or if in straits of any other kind, it shall be the duty of the governors and all local authorities and all the people to within their ability him who is thus distressed. And they shall receive their pay by a salvage of the part of the property rescued by them. If there be no previous contract and the owner of the property rescued, those who saved it do not agree, then referees shall be appointed to decide the amount of reward.

If any foreign vessel arrive at any Hawaiian port or harbor the captain of which have mutinied or have committed any misdemeanor by which the captain of the said vessel is brought into straitened circumstances, it shall then be the duty of the governor or harbor masters and of the officers to aid the captain of the vessel, and if he wish the criminal part of his crew put in confinement on shore they shall be merely confined. No other punishment except confinement shall be inflicted. Though if they break the Hawaiian laws then they shall be punished according to law.

If any master of a vessel wishes to discharge one of his men on shore in accordance with laws of his own country and the consul of his own nation consent to take him under his care and return him to his own land, such a procedure shall be proper. Captains of vessels and consuls shall not be hindered in doing so, though the governor must be informed thereof.

No captain of a foreign vessel shall receive on board his vessel any native to proceed to sea, nor shall any native go on board any foreign vessel unless he obtain the written consent of the governor or

nor shall he continue a man on board for a longer period than the certificate allows. Whoever violates this law or evades it shall be fined \$400.

If any master with a foreign vessel wishes a native to sail on board the vessel it shall be the duty of that master to go to the harbor master and obtain the man he desires, or if he can not obtain them then the harbor master will search for them. But the men shall not sail till they give the assent of the governor. When that is obtained, then the captain shall fill out the blank in the following bond and sign it, after which he may receive the man on board.

The bond is as follows:

I, ———, master of the ship ———, of ———, hereby declare that I have agreed with ———, a native of the Sandwich Islands, to serve on board the ship under my command, I hereby pledge myself and said vessel in the sum of \$200 to return said native to the Sandwich Islands within two years from the date of departure, provided he then be alive, and I will pay him wages according to agreement on the shipping articles.

When the above writing is properly completed and delivered into the hands of the harbor master then the man may go. If any master of a vessel take a man in violation of this section of this law he shall be fined \$400.

If a native desert from the vessel on board which he shipped, for which reason the captain of the vessel is unable to return him according to the above bond, then it shall be the duty of the captain, previous to the expiration of the time mentioned in the bond, to make known the reason of his not returning said man, and having been established by good evidence that there was no fault of the captain's, then the judges shall clear him from the payment of the bond.

If any seaman of a foreign vessel run in debt on shore and do not pay it, that debt shall not be demanded of the captain unless he had given his consent previous to the contraction of the debt, nor shall any seaman be put in confinement for debt unless it be contracted in a wrongful manner, in which case he may be confined. If the debtor have property on board the ship the debt shall be paid from that. This section does not forbid the confinement of those who have committed a criminal offense.

If a foreigner from a foreign vessel commit a criminal offense on shore and the criminal escape on board the vessel and the police officers go for the criminal and he is retained by the captain of the vessel and not delivered up, then the captain and the ship shall be held accountable for the crime.

If any vessel secretly take away a prisoner the fine shall be \$400 and the prisoner shall be returned. If he be not returned then the captain of the vessel shall also be held accountable for the crime of the prisoner and shall pay whatever the law requires [of the criminal].

If the governor perceives that the laws are disregarded by any vessel, he shall have the power to detain the vessel, or the captain of the vessel, or the property of the vessel, as he shall judge proper in order to enforce the laws.

It shall be lawful for the harbor masters of the various harbors to call for the papers of the vessels which anchor at these islands. If they are called for and not presented, then the vessel shall not trade at these islands, and no privilege shall be granted her here, and the governor may act his judgment in the case. But if the papers are

presented the harbor master shall by no means take the papers away from the ship.

All captains and masters of vessels coming to these islands and regarding the laws of the same shall enjoy full protection and succor in the same manner as native-born citizens of the Hawaiian Islands.

If it should be discovered that any captain of a foreign vessel violated the laws of the harbor and then leaves and goes to another harbor, he shall not be permitted to trade there, nor to enjoy any privilege until he has settled for his fault according to law.

The same also in relation to vessels violating the law and leaving but afterward return, and even though under another captain, it shall be the same, no privilege shall be granted until the crime formerly committed be settled for. And the governor shall pursue such course as he perceives to be necessary in order to carry out the law.

If any vessel arrive and lie off and on or even anchor at any place at the Hawaiian Islands, and at once commit any act in violation of the laws before the harbor master or pilot arrive, then the captain of the vessel and not the pilot shall be accountable for that crime.

LAWS APPLICABLE TO THE HARBOR OF HONOLULU ONLY.

Vessels approaching Honolulu and desiring a pilot will set the national ensign and pilot signal, on which he will go off immediately and shall be rewarded according to the following rate: For taking a vessel in, \$1 per foot; for taking a vessel out, \$1 per foot.

When a vessel arrives in the harbor then the harbor master shall immediately go on board and carry the harbor laws according to requirement in section 5. Then the captain shall exhibit the papers of the vessel and make known the business for which the vessel came. He shall also deliver to the harbor master the manifests specified above.

Vessel entering the harbor for refreshments or for repairs and for trade, will pay harbor duties as follows:

For the outer harbor, 6 cents per ton; for the inner harbor, 10 cents per ton; for the buoys, \$2.

But if the vessel have goods on board selling at regular sale, then she shall pay the same rates as are paid by merchant ships.

4. Vessels entering the harbor for purpose of trade will pay harbor duties as follows:

For the outer harbor, 50 cents per ton; for the inner harbor, 60 cents per ton; for the buoys, \$2.

Any foreign vessel entering this harbor and then leaving it for another harbor of the Hawaiian Islands shall not on its return to this place be required to pay harbor duties again. But if she visit another foreign country or prosecute her business at sea and then return, the vessel shall pay duties as on her first entrance. But if a merchant vessel be driven in by stress of weather or by misfortune and do not enter for purposes of trade, then the said vessel shall pay the same duties as vessels entering for refreshments. If after entering the harbor the vessel trade to small amount, not exceeding \$1,000, she still does right.

all vessels which land or take off a considerable amount of cargo shall pay the 50 or 60 cents per ton according to the above requirement.

5. If it be a Hawaiian vessel and have a Hawaiian register, she shall pay no harbor duties. If the vessel be owned by a resident foreign

who has taken the oath of allegiance to this government the vessel shall pay no harbor duties. If the vessel be owned by a resident foreigner having a dwelling house or shop on shore where he permanently resides, though he have not taken the oath of allegiance, the vessel shall pay but half duties. But if the vessel be owned by two or more persons, one of whom resides in a foreign country, there shall be no diminution of the harbor duties.

6. All vessels at anchor are forbidden to throw stones and other rubbish overboard in the harbor. Let it be carried on shore. Any vessel throwing its rubbish into the harbor shall be fined \$1 for the first offense. If done again, \$20, and thus the fine shall be doubled for every repetition of the offense.

7. Furthermore, at half past 7 o'clock in the evening the gun shall be fired from the fort, when all boats and vessels shall return to their ships; the whole must return, and at 8 o'clock another gun will be fired. When the second gun is heard then all vessels remaining in shore will be seized and delivered to their respective owners, who will pay to the police officers \$2 for each vessel taken ashore. And it shall be the duty of the police officers to examine and search all the houses of entertainment and other places frequented by those men. And whatever native or foreign resident shall be guilty of entertaining a seaman on shore in violation of this law shall pay \$1. And whoever shall oppose the police officers when force is used against such persons shall be fined \$10.

8. No vessel shall leave the harbor until a certificate from the harbor master shall be granted certifying that the port regulations have been complied with, for which he has the right to demand \$1. And a vessel which sails without such certificate shall be fined \$10. And the pilot is hereby forbidden to take any vessel out of the harbor until such certificate is presented. And those vessels and their crews and the papers of ships belonging to their respective countries are prohibited not to deliver up the papers until the regulations of this section are complied with.

LAW APPLICABLE TO THE PORT OF LANA'IA 1892.

1. Whenever a foreign ship or vessel shall anchor off Lana'ia she shall be visited as early as convenient by the harbor master, who shall report to the commander of said foreign vessel a copy made of his appointment, signed by the governor of the island.

2. Every master of a foreign vessel who comes to the anchorage of purchasing refreshments for his vessel at Lana'ia shall pay to the harbor master \$10, in return for which said master shall be entitled to receive 5 barrels of provisions, with the privilege of purchasing at a lower price in the market supplies for his vessel belonging to the crew of the vessel. He shall also be entitled to the protection of the law, both for himself, his officers, his men, and the property belonging to him, and he and those under the command obey the laws of the island.

3. It shall be considered irregular for a ship from foreign ports to spend the night on shore without the leave of the governor, and who

The Board is that the captain pay the \$10 to the harbor master. But if the vessel prefer to pay more than the \$10, and that is taken to the fort and shall be delivered to the captain on the paying \$0, as is done with all persons who have been confined.

ever is found on shore one hour after sunset shall be put in confinement until morning and then be delivered to the master of the vessel to which he belongs, who shall pay to the harbor master \$6^a for every man thus delivered.

4. If on account of sickness or for other reasons any master of a vessel shall wish to have his men on shore during the night, he shall first apply to the governor of the place, and, receiving his permission, the men may reside on shore, but shall remain within the limits assigned them by the governor, or shall be subject to confinement and penalty according to the third section of this law.

5. Henceforth two lights will be kept burning, one directly above the other and opposite the entrance for boats. All ships anchoring at Lahaina and making any purchases shall pay \$1 each toward the support of said lights.

When these laws are printed and given to any captain of a vessel then the laws will be applicable to that vessel. And on the 1st day of September of the current year they will become binding in all parts of the Hawaiian Islands.

All these harbor laws are enacted by the nobles and representative and we have set our names on this 4th day of May, in the year of our Lord 1841, at Lahaina, Maui.

KAMEHAMEHA III.
KEKAULUOHI.

CHAPTER XXVIII.—*A law to promote the quiet of the night.*

Whereas it has become a real evil that many persons by making loud noise in the night so disturb the rest of quiet persons that they can not sleep; and whereas innocent persons are thus made to suffer through the fault of the guilty; and whereas it is the business of the law to relieve the distresses of the people and protect the injured; therefore, at a council of the nobles and of the representative body the following law was enacted:

1. All loud hallooing and other noise by night are taboo. If one call loudly to another by night, after 9 o'clock, and that too without good reason for thus calling, or make a noise without a reason for it, or sound an instrument unnecessarily, that man commits a fault, and shall be fined from \$1 to \$5, according to the magnitude of his offense; and if the police officers or judges think it necessary to confine him in prison till morning, they may do it.

2. This statute applies to all who go about in a riotous or tumultuous manner by night, and it applies to every kind of noise which disturbs the rest of those who sleep. But if a man be in straitened circumstances, he may call aloud, as in case of fire, or if there be any other just reason for the noise, it may be made, but there shall be no hallooing or noise unless there be a necessity of it.

If this law be proclaimed in any village or in any district, then the day of its proclamation shall be the day of its taking effect at that place, but if it be not proclaimed, then the 1st day of September of the current year shall be the day of its taking effect at all places of these Hawaiian Islands.

All the words of this statute having been fully approved both by the

^a Since altered to \$2.

house of nobles and house of representatives, we have therefore set our names hereunto on this 6th day of May, in the year of our Lord 1841, at Lahaina, Maui.

KAMEHAMEHA III.
KEKAULUOHI.

CHAPTER XXIX.—*A law respecting gambling.*

Whereas there are many people who neglect profitable business which would be of advantage to themselves, their children, and the country, and spend their time in employments which waste their property and do injury to their children, it therefore becomes the duty of the law to ward off these evils and seek to promote the greatest good. These are the reasons for enacting the following law:

1. If two persons gamble and one win of other, if the sum be actually paid down before the face, they shall each pay a fine equal to the full amount of the wager. But if they merely make mention of property as a mere symbol, then they shall each pay a fine of \$5. But if the property thus symbolically mentioned is very small, then the fine may be diminished in proportion to the value of the property spoken of.

2. If the gambling be done on the Sabbath day then the fine shall be double what is mentioned in the first section.

3. If children below the age of 14 years gamble, then the punishment shall be committed to the parents, but if they do not inflict any, then the law will be applicable.

If this law be proclaimed in any village or district, then the day of its proclamation shall be the day of its taking effect in that place, but even if it be not proclaimed it shall nevertheless take effect on the 1st of September next.

This law has received the approbation of the house of nobles and house of representatives. We have therefore subscribed our names on this 11th day of May, in the year of our Lord 1841, at Lahaina, Maui.

KAMEHAMEHA III.
KEKAULUOHI.

CHAPTER XXX.—*A statute respecting forgery.*

From ancient times down to the present all men have well understood that forgery is a great crime. Then it was death, but at present the law is not so severe as it was then. It must, however, be prohibited, and so great a crime must be punished.

Wherefore, in a council of the nobles and representative body, all the requisitions of this law were approved.

1. If one individual deceptively subscribe the name of another to any writing for any purpose of gaining possession of his property, or obtaining something valuable, he shall be punished in the same manner as a thief. Whether he actually gained possession of the property or not makes no difference. If, however, he did not gain possession, he shall merely pay quadruple, but if he gained possession, he shall then pay quadruple, and in addition shall restore the principal. If the forgery were for a large amount of property, he shall be banished. The punishment shall be precisely as in the case of theft.

2. If anyone deceitfully subscribe the name of another to any writing, which does not endanger property, he shall then be punished according to the nature of the offense. If anyone suffer in any from the writing, then the criminal person shall pay according to amount of suffering, which is to be submitted to the discretion of judges, they examining into the nature and magnitude of the offense.

3. If a man commit the like offense again, after having been punished, he shall then be banished to another country, at the discretion of the judges, they considering the magnitude of the offense.

If this law be proclaimed in any village, or in any district, the day of its proclamation shall be the day of its taking effect at that place; but even if it be not proclaimed, it shall nevertheless take effect in all places on these Hawaiian Islands on the 1st day of September of the current year.

To all this the nobles have given their approbation, and also the representative body; we have therefore hereunto set our name this 19th day of May, in the year of our Lord 1841, at Lahaina, I.

KAMEHAMEHA I
KEKAULUOHI.

CHAPTER XXXI.—*Law respecting the counterfeiting of money.*

In the management of trade men must necessarily make use of money. It is in that estimates are made; it is also the basis of reference, and is the article in which debts may always be canceled. Therefore, if any man adulterate the money so that it becomes of unequal value, the community suffers, trade is embarrassed, the property of individuals is not safe; wherefore, in a council of nobles and representatives the following law was enacted:

1. If anyone counterfeits a coin for the purpose of trading fraudulently, or if anyone take counterfeit coin, made by another, for the purpose of trading it away, as one trades away good money, that shall be brought to trial and, on conviction thereof, shall be banished to another land, there to remain for the term of five years.

2. If anyone be accessory to the making of false coin, or if anyone make it without giving notice thereof to the government, or if anyone endeavor to increase his property by trading in false coin, or in money which he knows is not good, he is guilty of the crime as the one spoken of in the first section. Whoever does it shall be brought to trial and, on conviction thereof, shall be banished to another country, there to remain for the term of five years.

3. If any man receive counterfeit coin from another and pay it again to a third person without knowing it to be bad money, he commits no crime, but that money shall be returned to the former possessor, and he shall pay good money in place of the bad which was returned.

4. If anyone receive money which is counterfeit, and afterwards cover it, or hear from one who is acquainted with it that it is counterfeit, then that man is criminal if he trades it away to another without giving notice that it is counterfeit. Whoever does thus shall pay good dollars for every bad, and in addition to this shall pay to the government. And this shall be the rate even to the full extent.

If the criminal be a foreigner and from another country, and he forfeited the money at some other place, but landed on these shores with said money in his possession, the law will in that case be applied to him in the same manner as it does to native-born citizens who commit the crime on shore.

On the 1st day of September of the current year this law shall take effect at all places on these Hawaiian Islands.

All these edicts having been approved by the house of nobles and representatives, we have hereunto set our names on this 7th day of June, in the year of our Lord 1841, at Lahaina, Maui.

KAMEHAMEHA III.

KEKAULUOHI.

CHAPTER XXXII.—*Law respecting perjury.*

There is a distinction between falsehood and perjury. If a man be brought to trial for the commission of some fault, and he denies it, although really guilty, still he is not a perjurer. He is only guilty of falsehood. The following is perjury: If a man be brought to trial before the judges, and there come forward a witness, and take hold of the Word of God, and swear by it to speak the truth, and afterwards say that which is false for the purpose of freeing a guilty man from punishment, he is a perjurer. If a man merely make a mistake that does not make him a perjurer. But if a man designedly attempt to free a guilty person, or involve an innocent one, and in consequence of such design, states a falsehood, or conceals what he knows, he is a perjurer, and the following law shall apply to him.

This law applies to him who stands before the chiefs and judges, and gives testimony at a trial, and that testimony proves to be false. Such an act is highly criminal, wherefore in a council of the nobles and representative body all the words of this law were approved:

If a man be brought to trial and a witness come forward and lay his hand on the Word of God swear to speak the truth, and afterwards testify falsely with a design to procure the condemnation of the accused or the acquittal of the guilty, his punishment shall be as follows: If the statement have reference to the life or death of a man, he shall be banished to another country, there to remain for the term of ten to fifteen years, according to the magnitude of the offense.

If his testimony have no reference to the life or death of a man, he shall be whipped twenty lashes, and then suffer such further punishment as he thought to bring on an innocent person, or as he thought to free a guilty person from. Thus, if he testify falsely that a man is stolen, he shall then suffer the punishment of a thief. If he testify falsely that a man has been guilty of rioting, he shall suffer the punishment of a rioter.

If a man be suspected of perjury, he shall not be punished until another witness appears than the one who was belied should come forward, a witness having no interest on either side, and that impartial witness should so testify that it becomes clear that the accused man did not testify falsely, then his guilt shall be considered as established, and he shall be punished as specified above.

If a man be punished for the crime of perjury, he can never afterwards appear before the chiefs or judges as a witness; his words shall never again be received as truth.

This law shall go into effect on the 1st day of September of the current year at all places in this archipelago.

All the words of this law having received the sanction of the house of nobles and house of representatives, we have hereunto set our names on this 7th day of May, in the year of our Lord 1841, at Lahai Maui.

KAMEHAMEHA III
KEKAULUOHI.

CHAPTER XXXIII.—*Law respecting assaults.*

Listen, ye people of all lands, the high and the low, for no man shall escape who disregards the words herein written:

1. This law forbids quarreling. If two persons quarrel and one strikes another with his fist or anything else, but without hurting him much, he shall be fined \$6 as in case of riot. If a severe wound inflicted, the fine shall be increased, even to the farthest extent, proportioned to the injury done to the wounded person.

2. If one way lay another by night or even by day, or go slyly to his place and attack him by force, and commit an assault upon him, strike him, or give him a blow with the fist, and yet do not kill him, or if two persons meet each other in the street and one use violence to the other, on account of some previous ill will, and do him an injury, all these crimes are alike. If any man do either or all these things, he shall be brought to trial, and on conviction thereof shall be banished to another country, there to remain for the term of four years. But if the judges discover some mitigating circumstance he shall diminish the number of years, or substitute a fine of money, of from one to five hundred dollars, according to the magnitude of the offense.

If this law be proclaimed in any village or district, the day of proclamation shall be the day of its taking effect in that place. If even if it be not proclaimed, it shall nevertheless take effect at all places in this archipelago on the 1st day of September of the current year.

All the words of this law have been approved by the house of nobles and house of representatives, and we have therefore subscribed our names to the same on this 31st day of May, in the year of our Lord 1841, at Lahaina, Mani.

KAMEHAMEHA III
KEKAULUOHI.

CHAPTER XXXIV.—*Law respecting lewdness.*

This law forbids lewdness. A man and woman who are not married according to the laws of the land, and sleeping together carnally, they are lewd persons, and according to this law shall be condemned and punished, as specified in the following particulars:

1. If a man commit a rape upon a woman, making use of force against her, because the woman does not assent to his solicitations, and actually have carnal intercourse with her without the consent of the woman, the fine of that man shall be \$50. But if the man thus committing a rape upon a woman be a man of distinction, or a man of property, or if the woman be a person of distinction, and the circumstances of the man have special aggravations, the judges may increase

ishment of the man thus highly criminal, and if the judges think that they may banish him to another land, there to dwell for four years, or they may put him to hard labor in a prison, at the discretion of the judges.

2. If a man by violence attempt to commit a rape upon a woman, and the woman by fleeing, or by her strength, or by making an outcry, or by the aid of another escapes, so that the man has no carnal connection with her, he shall in that case be brought to trial, and on conviction thereof shall be fined to half the amount of the man who usually consummates the crime. In all cases of punishment for rape one-fourth of the fine shall go to the government and three-fourths to the assaulted woman.

3. If a man go secretly to the place of a woman while she is kept for the purpose of having carnal connection with her without her consent, that is the same as rape. A man that does this shall be brought to trial and on conviction thereof shall be punished in the same manner as in case of rape mentioned above.

But a woman of bad character, even though she suffer violence, shall receive no part of the fine of the condemned man. Women of good character, and they only, shall receive a portion of the fine from the criminals.

4. If a man have a wife of good character, having never been involved in law, and having no appearance of being vicious, if that husband take other women and sleep with her, then that innocent wife may say a word in relation to her husband. If the wife chooses to separate from him for life, she shall have a right to do so, and she may marry another husband. In that case the adulterous husband shall be banished to another land, there to remain for four years. But if the woman choose to continue with her husband, she may do so, and he shall not be banished to another land, but shall be punished as follows: He shall pay fine of \$30—one-half to the husband of his accomplice and one-half to the Government—though the police officer shall take his portion before the division is made. But if his accomplice have no husband, then the whole shall go to the Government and the police officer. But if the man be not paid in money nor other property, he shall then be made to work in the prison for the term of eight months. But if the wife of the said man be of bad character, then she shall have nothing to say in the case; they shall not separate; the man shall not be banished to another land. His fine shall be \$30, or he shall be put to hard labor as required above.

5. The same that is required in relation to the husband of a respectable wife, when that husband is guilty of adultery, the same also shall be required in relation to the wife of a respectable husband when that wife commits adultery. If that woman take another husband, and they keep together, then her own proper husband shall have a word to say respecting her. If he choose to separate from her for life, he shall have a right to do so, and he may marry another wife. In that case the adulterous wife shall be banished to another land, there to remain for a term of four years. But if the husband choose still to remain with his wife, he has a right to do it, in which case she shall not be banished to another land, but shall be punished as follows: She shall pay fine of \$30—one-half to the wife of her accomplice and one-half to the Government—the police officer, however, shall take his portion before the division is made. But if her accomplice have no wife,

and the teacher who instructs him, or other persons of respect perceive that said prisoner appears well, appears quiet, having appearance of repentance, then on their giving notice to the governor he may set said prisoner at liberty, and he shall serve no longer be confined longer. It is ended; he is pardoned. But this does not apply to those who are banished to another land.

If this law be proclaimed in any village or district, then the day of its proclamation shall be the day of its taking effect in that place, even if it be not proclaimed, it shall nevertheless take effect on the first day of September of the current year at all places in this archipelago.

All the words of this law have been approved by nobles and their representatives; we have therefore hereunto set our names this day of May, in the year of our Lord, 1841, at Lahaina, Maui.

KAMEHAMEHA IV
KEKAULUOHI.

CHAPTER XXXV.—*A law respecting the racing of horses secretly.*

The law respecting the abuse of animals is well understood by the people, but still horses are not safe. There is a considerable number of persons who go secretly and seize horses in the night and race them, and by such a mischievous course some horses have been killed. It is clear that there is a very great crime, but there is no statute which particularly prescribes the punishment. Wherefore, in a council with the nobles with the representatives, the following statutes were enacted.

1. If one seize the horse of another secretly by night, without the knowledge of the hostler, or by the owner of the horse, and race him, the criminal person shall pay \$25—\$10 to the owner of the horse to the informer, and \$5 to the government. If the horse be damaged, he shall in addition pay to the owner of the horse the full amount of the damage. If he do not thus pay, he shall be flogged 20 lashes and then put to hard labor for the owner of the horse for the space of two months, and two months more for the informer, and if the horse were injured by him, the labor for the owner of the horse shall be prolonged according to the amount of damage sustained.

2. If a man repeat the offense described in the first section after he had been once punished, his punishment shall be double to his first one.

If this law be proclaimed in any village or district, the day of its proclamation shall be the day of its taking effect in that place, but if it be not proclaimed, it shall nevertheless take effect on the 1st day of September of the current year at all places in this archipelago.

All the words of this law have been approved by the nobles and their representatives. We have therefore set our names hereunto on the 23d day of April, in the year of our Lord 1841, at Lahaina, Maui.

KAMEHAMEHA IV
KEKAULUOHI.

CHAPTER XXXVI.—*Law prohibiting theft.*

We hereby prohibit all stealing and felonious seizure and violent plundering and taking secretly the property of others. Whoso

any of these things with a real thievish intent is obnoxious to law and shall be punished as follows:

Whosoever shall steal or take secretly with a thievish design the property of another, and whosoever shall lyingly carry away and create in a thievish manner the property of another shall be punished as follows:

1. If the stolen property be less than \$2, then he shall be fined four times the amount of the property which he stole. If \$1 be stolen, \$4 shall be the fine, which, with the original sum, makes \$5, \$2 to the Government and \$2 to the owner of the stolen property, together with the original sum, which makes \$3. If \$2 be stolen, then the fine shall be \$4 to the Government and \$4 to the owner of the stolen property. If he fail to pay these, he shall be put to hard labor, which he shall perform of a value equal to the fine, a portion of the labor for the Government and a portion for the owner of the property.

2. If the amount of property stolen be more than \$2 but less than \$100, the thief shall then be fined according to the first section of this law, and shall, moreover, be put to hard labor for a term of from four to eight months, as the judges shall determine from the character of the theft.

3. If the property stolen amounts to more than \$100, then the stolen property shall all be restored and [the thief] shall pay all the loss sustained by the owner of the property. When all this is paid, then the thief shall be transported to another land, there to remain for a term of from five to ten years, according to the aggravation of the theft as decided by the judges.

4. If a man be punished according to the above requisitions and afterwards steal again, either little or much, it shall then be proper to transport him to another land, at the discretion of the judges, according to the degree of his incorrigibility or the greatness of his crime.

5. If the thief be unknown or is not seized by the owner of the property and he does not know who stole it, then whosoever brings it to light shall receive one-fourth of the fine and the owner of the property one-fourth, together with the original amount.

6. If a man steal property and be detected by the owner and they shall agree together as to the settlement, they may do it, and that agreement of theirs shall stand. But if it become public after their settlement, then the thief shall pay the Government portion of the fine according to law, but shall pay nothing more to the owner of the property.

7. If anyone be condemned to reside in another land according to the requirement of this law and he prefer to pay a fine in money, this shall be the amount he shall pay: Two hundred dollars for each year for which he is sentenced by the judges. Whoever pays a fine thus shall be freed from transportation, though at the discretion of the judges.

8. Should this law be proclaimed in any village by a crier, then the day of its proclamation shall be the day that it takes effect. But if not proclaimed, then the 1st day of December, 1840, shall be the day that it takes effect, and by this act all former laws respecting theft are repealed.

This act is passed by the Government of these Sandwich Islands on the 10th day of September, in the year of our Lord 1840, at Lahaina, Maui.

KAMEHAMEHA III.
KEKAULUOHI.

CHAPTER XXXVII.—*Law prohibiting burglary.*

We hereby prohibit the breaking open of houses and the secreting of windows, and also the forcing of doors and windows. If any man does either of these things to the house of another he is obnoxious to this law:

1. If any man secretly break open a substantial house of another at night and enter and steal property, little or much, the crime is similar, and he shall be punished according to the requirement of the third section of the law prohibiting theft.

2. If any man secretly break open a substantial house of another at night and enter with felonious intent, and while some person is resident in the house, said burglar having weapons of death in his possession, that is a great crime, and the man committing it shall be condemned to reside on another land till death.

4. If the house broken open be one of thatch, or not a substantial house, or if there be some other thing which shall materially mitigate the crime, then it shall be in the power of the judges to diminish the punishment or change it, and not adhere rigorously to the above specifications. The judges are to look at the nature and magnitude of the offense.

5. Should this law be proclaimed by a crier in any village, then the day of its proclamation shall be the day of its taking effect in that place. But if not proclaimed, then the 1st day of December, 1840, shall be the day of its taking effect, and by this act all former laws relative to burglary are repealed.

This act is passed by the Government of these Sandwich Islands on the 10th day of September, in the year of our Lord 1840, at Lahai Maui.

KAMEHAMEHA III
KEKAULUOHI.

CHAPTER XXXVIII.—*Law respecting murder.*

1. We prohibit murder. Let no one of any country commit murder here. Whoever takes the life of another with a malicious design to kill, he shall die. Whoever in anger destroys human life, yet not intending to kill, he shall be imprisoned four years.

2. Whoever aids in destroying human life with an intent to kill shall die. Whoever aids in destroying human life, yet not designed to kill, he shall be imprisoned four years.

3. Whoever with malice incites or entices to the commission of murder, if the murder be actually committed, he shall die. Whoever incites or entices another to kill, and no life is thereby taken, he shall be imprisoned four years.

4. Whoever in anger stabs with a sharp instrument or strikes with a weapon or throws missiles, and the life of an individual is thereby destroyed, he shall die. Whoever stabs with a sharp instrument or strikes with a weapon or throws missiles with malicious intent to kill, yet no one dies thereby, he shall be imprisoned four years.

5. Whoever threatens to take the life of a person and the deed is actually committed, he shall die. Whoever threatens to take the life of a person and actually beats him, but not to death, he shall be imprisoned four years.

6. Whoever robs and kills a person, he shall die. Whoever robs a person but spares his life, he shall be imprisoned four years.
7. Whoever kills a shipwrecked person, whoever drives fatally a person into a place of death, whoever destroys a child after his birth, whoever (maliciously) burns a house with fire—all this are reckoned as murders. And if the criminal sentenced to imprisonment chooses to commute with money he shall pay \$50 for each of the four years, and can be lawfully discharged; but in failure thereof he shall be put to work till the four years expire, then be discharged. If the said criminal is again guilty of the same crime, he shall be fined \$100 for each year, and in this ratio shall his sentence be increased till the fourth offense. This shall be the judgment of those who escape capital punishment.
8. Furthermore, whoever plots the death of the King, and prepares the means of his destruction, his crime is similar to that of murder; he shall be put in irons and banished to another land, there he remain till he dies.

KAUIKEAOULI.

The foregoing law respecting murder was enacted in the year 1835, and is still in force at the present time. The following additions have been made, however:

9. If anyone attempt to dethrone the King who has possession of the Kingdom, or to transfer the Kingdom to any other chief, or to any other person than the one who owns the Kingdom, he shall be banished to another country for life, and all his property shall be confiscated.

10. Whoever shall plot the death of a governor or of any high chief, or speak evil of the chiefs for the purpose of bringing them into difficulty, and whoever shall threaten the life of any high chief, or the dispossessing him of his rank, and whoever shall either in conduct or words exhibit treason, and whoever shall excite others to treason against the King or governor, or against any high chief—whoever does any of these things is guilty of a great crime, and he shall be condemned. His punishment shall be that of banishment to another land at the discretion of the judges, they looking at the magnitude of the offense. It shall not, however, exceed ten years nor be less than five. He shall furthermore be dispossessed of all his real estate, though if the King choose to give it to his child, he shall have a right to do so at his discretion.

We have given our assent to the above, and therefore set our names on this 2d day of June in the year of our Lord 1841.

KAMEHAMEHA III.

KEKAULUOHI.

CHAPTER XXXIX.--*A law respecting drunkenness, established in the year of our Lord 1835.*

1. We prohibit drunkenness. Whoever drinks spirituous liquors and becomes intoxicated, and goes through the street riotously, abusing those who may fall in his way, he is guilty by this law. He shall pay \$5 in money, or in other property of the same value, and for want thereof he shall be whipped twenty-four lashes, or be condemned to labor one month, or be imprisoned one month, at the expiration of which he shall be discharged.*

2. If the intoxicated person, or a riotous person not intoxicated breaks down a fence he shall pay \$1 for each fathom, be the same more or less. And if the offender does not make redress according to the enactment, he shall rebuild the fence which he has broken down. If the breach in a fence or in a house be small—for this law is applicable to houses also—the fine likewise shall be small, and if the aggressor refuses to pay it, shall be imprisoned one month and then liberated. This is the punishment for damaging a fence or a house.

3. When the individual who damages a fence or a house pays the amount forfeited by his crime to the owner, he, the owner, shall pay to the judge one-fourth of every dollar which the fence-breaker or the housebreaker shall pay.

KAMEHAMEHA III.
KEKAULUOHI.

CHAPTER XL.—*A law regulating the sale of ardent spirits.*

Whereas we have seen that drinking of ardent spirits and other intoxicating liquors is of the greatest injury to our country; therefore I, with my chiefs, have sought for the means of suppressing it:

1. We prohibit all selling of spirits by any person whatsoever, either openly or secretly, without written license. Whoever is detected selling, or doing contrary to this law, shall be fined \$50; and if he sells again he shall be fined \$100; thus shall the fine be increased by the addition of \$50 for every repetition of the offense, to the utmost violation of this law.

2. If, however, any person, whether foreigner or native, sell spirits by the barrel or large cask, he will not be amenable to this law. Any person who sells in any smaller quantity will be liable to the penalties.

3. Any house having been licensed for retailing spirits may sell by the glass, but not by any larger measure, and its doors must be closed by 10 o'clock at night, and visitors must go away until morning. And on Sunday such house shall not be open from 10 o'clock on Saturday night until Monday morning.

4. We prohibit drunkenness in the license. If anyone, whether foreigner or native, drink and become drunk at such house, the owner of the house where he got drunk shall pay the following fine: \$10 for the first offense, \$20 for the second, and thus the fine will be increased by the addition of \$10 for every repetition, to the extent of his misdemeanors.

5. The officers appointed to this duty will watch and they will quietly observe what is going on in the said houses. Let no one obstruct them in their duty.

6. Any house licensed for selling spirits and conducting in a manner at variance with this law will, on conviction, have its license taken away and it will not be given back again.

KAMEHAMEHA III.

LAHAINA, *March 20, 1838.*

CHAPTER XLI.—*Law prohibiting the manufacture and use of intoxicating drinks.*

In our inquiries after the best means of promoting the interests of the Kingdom, it has appeared to us that increase in the production of food is of great importance. Scarcity of food is, of course, a great evil to the country.

It is said that the present is a time of scarcity, and we therefore have been searching for the cause of it. One reason we ascertain to be the following: Articles of food—potatoes, sugar cane, melons, and other things—are taken and transformed into intoxicating drink; the people remain in idleness, without labor, in consequence of their being drunk; wherefore the land is grown over with weeds and is impoverished.

In consequence of our desire to promote the order and welfare of the kingdom we have assembled to reflect on the subject, and now enact this law.

1. If any man take potatoes, sugar cane, melons, or any other article of food, and transform it to an intoxicating liquor and drink it, he shall be fined \$1, and if he do the like again the fine shall be \$2, thus the fine shall be doubled for every offense, even to the utmost extent.

2. If anyone make an intoxicating liquor such as is mentioned above, and give it to another to drink, he too shall be fined according to the first section of this law.

3. Whosoever shall drink that which another has prepared in order to produce intoxication, as mentioned above, he too has violated this law, and shall be fined in the same manner as he who prepared the drink.

4. If a man be fined according to the above requirement, and have no money, he may then pay his fine in produce, or if he have no produce, he may pay it in labor, the labor being proportioned to the amount of the fine, or if he do not labor according to the requirement the punishment may be increased or he may be confined in irons.

5. When this law is proclaimed by a crier in any village, the day of its proclamation shall be the day that it takes effect at that place. But if it be not proclaimed it shall take effect on the last day of November at all the places at these Hawaiian Islands.

Enacted by the Government of these Hawaiian Islands, at Honolulu, Oahu, this 1st day of October, in the year of our Lord 1840.

KAMEHAMEHA III.

KEKAULUOHI.

CHAPTER XLII.—*A law respecting stabbing with a knife and carrying instruments of death.*

Many evil-minded persons belonging to the shipping, having while on shore committed various criminal acts with knives, etc., to the general danger of life and limb:

It is therefore hereby made known to all persons whatsoever, that if any person or persons are hereafter found on shore with a knife, sword cane, or any other dangerous weapon in his or their possession, or if they shall be immediately seized and taken to the fort, and unless good cause be shown for having such dangerous weapon he or they shall for every such offense pay a fine of \$10, or receive 25 lashes on the back.

Be it also known that if any person or persons shall maliciously stab and wound any person, and death does not ensue therefrom, the said offender or offenders, if convicted, shall receive 100 lashes on his or their back, and pay a fine of \$50, or upon nonpayment shall be imprisoned for two months.

The law now in force respecting murder will be carried into execution upon all offenders.

KAUIKEAOUI

CHAPTER XLIII.—*Law respecting the pay of police officers for seizing foreigners*

At the present time many of the police officers are blamed spoken evil of, and it is said that they entice people to violate the law and then seize them to obtain their money, and some are seen unguilty, and consequently much evil results. In consequence of this conduct, or rather these charges, in a council of the nobles and of their representatives, the following law was enacted:

1. If any police officer seize a foreigner for a violation of law that foreigner be fined, no part of the fine shall go to the police officer. He shall be paid in another way. Nor shall any portion of the fine go to the judge, but to the Government only, according as the law declares.

2. Police officers shall be paid for seizing foreigners as follows. When one is seized, the Government shall take the name of the officer who seized him, and at the end of the year the governor shall see what officer has done the most business and done it best, and he shall be paid the most pay, and the officer who has done less business or not done so well shall have less pay. Every officer shall be paid according to the amount of business done by him, and the correctness with which he does it. It shall be proper to advance part pay to the officers before the close of the year, for the relief of their necessities. But at the end of the year full payment shall be made according to the excellence of their conduct.

3. This law does not apply to deserters who are taken, nor does it apply to those who are taken for remaining on shore at night at the hour specified. The officers shall have their pay for these out of the money paid for them.

When this law is printed and put into the hands of the police officers it shall then take effect at all places in this archipelago.

All the words of this law have been approved by the nobles and their representatives. We have therefore hereunto set our names on the 31st day of May, in the year of our Lord 1841, at Lahaina, Maui.

KAMEHAMEHA III
KEKAULUOHI.

1842.

In the month of April, in the year 1842, the house of nobles and the house of representatives assembled in accordance with the requisit of the constitution, the place of meeting was Luaehu, on Maui. P. Kanoa was chosen clerk for the nobles and Kapae the clerk for the house of representatives. The following are the laws and resolutions passed at this session:

CHAPTER XLIV.—*A law respecting banished persons.*

Some persons who are banished to another place are exceeding mischievous during their stay there, while others live very quiet

is therefore proper that they should be dealt with according to their behavior. These are the reasons for the enactment of this law.

I. If a man be banished to another place, and he go in accordance with the sentence of the law, and live quietly, maintaining a good character as one endeavoring to forsake his evil habits and change them for the better, if the nobles hear of this, it shall be proper for them at their annual meeting to institute an examination and make inquiry and if they find that what they heard was true, they may grant a pardon to said criminal.

The man shall be confined no longer at his place of banishment; he may return to his own place. This, however, does not apply to those who are banished for adultery.

II. If a man be banished to another place, the Government shall supply his food for the first six months, and the man shall cultivate the ground for himself, and when the six months mentioned above are expired, the government will aid the man no longer; he must support himself. And when the term of years during which he is to reside at his place of banishment is nearly expired, he shall then cultivate and save for the Government a certain quantity of food, equal in amount to that which had formerly been furnished him by the Government, but if he do not leave this amount of food for the Government, he shall not have his liberty.

III. If a man be banished to another place and abscond (from his place of banishment), he shall receive 25 lashes and be returned again to his place. If he abscond again, he shall receive 50 lashes. And the number of lashes shall be increased in the same ratio for every time that he absconds.

In consideration of this law it will be wise for all banished persons to industriously cultivate the ground, that they may live pleasantly. Or if they do not grow food themselves, they will have nothing to eat except the wild food of the mountain, the kupala and other things growing wild.

IV. Furthermore, if a man while living at his place of banishment conducts mischievously, he shall be flogged at the discretion of the judges, though the judge shall not indulge revenge but shall pass just sentence.

All the words of this law were approved by the nobles and also by the representative body; we have therefore hereunto set our names on this 27th day of April, in the year of our Lord 1842.

KAMEHAMEHA III.
KEKAULOUHI.

CHAPTER XLV.—A new law relating to the business of the tax officers.

On account of the frequent difficulties that occur between the people and the tax officers respecting the falling of the signal, and respecting the time of leaving work, and respecting a variety of other things done by the tax officers, therefore [it is enacted]:

I. That the whole thirteenth section on the eighty-seventh and eighty-eighth pages is erased, and also the words "half a dollar, fourth of a dollar, eighth of a dollar," in the third section of the third chapter. And the man who does not go to work on the labor days of the King and of the land agents shall be fined as follows: One-fourth of a dollar. But if the man arrive at dinner time, one-eighth of a dollar is the fine. If he arrive just after the falling of the signal of the tax officer

at 7 o'clock, he shall pay a sixteenth of a dollar. A man who gives previous notice that he shall not go shall pay 1 rial. The officer and the land agent shall not refuse that sum.

II. Furthermore, it shall be the duty of the officer to consider what number of men is necessary to accomplish the proposed work, and the designed work be finished before the specified time the people nevertheless return; and so also if the specified time arrives and work is not finished they may still return.

III. Furthermore, the cultivation of land and other kinds of business done for the tax officers shall not be required to be done at a distance, but only at places near where the people live who do the work. Though if the King have labor to be done which can not be accomplished by the people of that particular place, then all the people of that county or of that township may be called to do that particular labor, but when finished the work shall cease. But if work be done in this way the signal shall not fall at the place of labor, but at a place near the residence of the people.

IV. Again, if there is a difficulty in relation to the proceedings of the tax officer in any of his transactions, he shall then be brought to trial before the governor and an unbiased jury, and if the tax officer be found guilty he shall be fined \$10, to be deducted from his yearly salary, and that money shall be paid over to the school agent, and when he perceives the teachers to be in want he shall give it to them. If the decision of the governor be thought to be unjust, the case may be appealed to the supreme judges. If the tax officer be afterwards found guilty of a second offense, his office shall be taken from him.

V. If the tax officer prolong the labor after the time specified by law he shall be condemned on a trial before the governor. But if the people leave the work without being dismissed by the tax officer they shall pay a rial each. But if one creates confusion among the laborers or call out that the labor is ended and thus stop others in their work \$2 is the fine of the man who conducts thus.

This act having received the approbation of the nobles and also the representative body, we have hereunto subscribed our names this 29th day of April, in the year of our Lord 1842.

KAMEHAMEHA III
KEKAULUOHI.

CHAPTER XLVI.—*A law respecting prisoners who abscond.*

If a man be brought to trial and condemned and his punishment assigned, then if said prisoner absconds in order that he may escape the punishment, he shall, when found, receive an additional punishment. He shall have twenty-five stripes laid upon him, though the judge shall have a right to reduce them to twelve. After having received these the first sentence shall then be executed upon him either by fine or hard labor, according to the original decision of the judge.

If he abscond again, after having been once punished, he shall then receive double the number of stripes which he received before, and thus the stripes shall be increased every time he absconds.

This act was passed by the nobles and representatives on this 3d day of May, in the year of our Lord 1842, at Lahaina, Maui, and we have therefore hereunto suffixed our names.

KAMEHAMEHA III
KEKAULUOHI.

CHAPTER XLVII.—*A law for the regulation of court..*

There are two distinct kinds of courts. One kind where the judges and tax officers decide the case by themselves, and the other kind where they can not act by themselves, but certain other persons must be associated with them. These persons who are associated with them shall constitute the jury.

The suits where the judges and tax officers may by themselves alone pronounce sentence are as follows:

1. All suits relating to assessments and taxation, and the dispossession of lands, and the neglect of lands, and, indeed, all the business of the tax officers, they may transact without the aid of a jury. No juries are to sit with the tax officers; but if the case be not settled satisfactorily it may be appealed, according to the privilege granted in the constitution.

2. The judges also may try suits brought for small offenses. There shall be no jury in such cases; but for trying high crimes there must be a jury impaneled. This is the limit: If the fine or damages amount to less than \$100 then the judges can try the case themselves; but if they amount to more than \$100, must be a jury. The same also is the case in respect to the supreme judges. If the fine or risk of property amount to more than \$100 a jury shall be impaneled. In this archipelago no man shall suffer the penalty of death or banishment, or any other punishment of like magnitude, unless a jury be impaneled and they condemn him.

3. But if a man be brought to trial for any minor offense and he desire a jury there may be one allowed him. But he must first pay into the hands of the judge \$25, and then a jury shall be impaneled, and at the trial if the man demanding the jury be not condemned, then the above-mentioned \$25 shall be restored; but if the person demanding the jury be condemned, then he shall suffer the loss of that money in addition to the fine for his crime.

4. If the amount of property involved in a dispute exceed \$100 it shall be settled as follows: The plaintiff shall exhibit in writing a particular account of the dispute and shall pay into the hands of the judge the sum of \$100. On demand of the defendant there shall be given him a copy of the complaint, and a legal jury shall be impaneled. At the trial the jury shall decide who shall suffer the loss of the \$100. But if the trial be before the supreme judges, then the appellant shall first pay \$200 and the jury shall decide who shall suffer the loss.

5. At all trials for civil actions the costs of court shall first be paid, after which the sentence of the jury shall be executed. If the property be insufficient the parties shall suffer that loss—the expenses of the jury and court shall not be left unsettled.

6. If a man be tried for a criminal offense, and he desire counsel, he may select whom he pleases, though he can not select a man of bad character, nor one who uses bad language, nor a man disapproved by the judge.

7. If a witness come forward upon the trial of an important case he shall not be allowed to testify until he has taken his oath [or affirmation] on the Word of God to speak the whole truth with which he is acquainted, after which he may testify to what he knows.

8. At all courts it shall be the duty of the judge to preside and keep order, and if anyone insult the court or create disorder he may be flogged,

confined in irons, or fined, according as the judge shall perceive to be necessary in order to preserve the order of the court; though the punishments shall not be inflicted by the inferior courts but merely by the courts held before the supreme judges, or before the governors. If the accused person make disturbance, or use insulting or reviling language, the judge may, in addition to the above, assign him a counsel, and then the trial shall proceed though the criminal shall be taken to another place, and the counselor only shall be permitted to speak for the criminal; the criminal shall not speak for himself at all, and no one except his counselor.

9. At all jury trials the judge is to decide as to the application of the law. He is to explain the meaning of the law. That is not the department of the jury. If the jury wish to know the law the judge may give them information and explain whatever is not clear. The business of the jury shall be to listen to the testimony of the witnesses and search for the truth. If from what they hear, and the reasonings they make in their reflections on the purport of all that comes to their knowledge, they think the accused person has done what he is accused of, then the jury shall say: "The complaint is sustained, the man is guilty." But if they are in doubt, and think, as they listen to all the testimony, that the man was falsely accused, the jury shall say: "The complaint is not sustained, the man is not guilty." If they are agreed that the man is not guilty, then that is the end of the trial; but if they say the man is guilty, then the judge shall decide the punishment as he shall see is required by the law. If he is in doubt on the subject, he may postpone the decision for further consideration and make it known at such subsequent period as he may choose.

10. If a man be tried before the judges, or before a governor, if the man consider that unjust sentence has been passed upon him, it shall be in that case be proper for the man to appeal. He must, however, pay the fine to the judge if the punishment be a fine, and if at the trial the man be cleared his money shall be restored to him at his interest. But if he were sentenced to labor or banishment, he shall not be compelled to labor or sail, but may wait the result of his appeal. He must, however, pursue the following course: The criminal must find for himself a bondsman, a man of property; this man of property must give to the judge a bond of the following import:

I hereby promise to be responsible for _____, and at the time for his trial in the month of _____ I will deliver him to the court. But if he absconds and does not appear before the court, then I will pay to the judge the sum of \$_____.

The number of dollars mentioned in the bond shall be a little more than the fine for the offense [or proportioned to the crime]. When the time of trial arrives, if the criminal do not appear before the court, then the bondsman shall pay the amount specified in the bond. But if he can procure no bondsman, then he shall be kept in prison until the time of trial.

11. In the month of June of each year the supreme judges shall assemble at Honolulu, prepared to try any cases which may be appealed to them according to the requisitions of the laws.

The same also at Lahaina in the month of December. There shall be two sessions of the court in each year, one at Maui and the other at Oahu. If any person present a case for trial at any other time it will not be tried until the prescribed period. And they will not be

case to trial of which they are not informed at least one month previous to the session of the court.

12. The jury shall be appointed in the following manner: The governor of the island of Hawaii and the representatives of that island shall unite and select forty wise, reflecting, just men, not foolish men, men of anger, not intemperate men; they shall select none but just men, and shall write their several names on separate pieces of paper the same kind and shall deposit the papers in a box. When preparation is making by the governor for an important trial, then the box shall be carried into his presence and the tax officer or some other officer shall draw out twelve names without previously looking at them. These men thus drawn shall constitute the jury for that court.

13. The manner of forming a jury at Maui, Oahu, and Kauai shall be the same as that prescribed for Hawaii. There shall be no jury elsewhere in the country, but only at the residence of the governor and his presence. If the supreme judges bring a man to trial who has been previously tried by a jury, no man who was on the former jury shall be permitted to sit upon the new one. An entirely new jury shall be drawn.

14. The pay of every native man called to sit on a jury shall be a quarter of a dollar per day. But if the trial be before the supreme judges then the pay shall be half a dollar per day. If the trial be for criminal offense and the complaint be not sustained, then the government shall pay the jury. So also, if the trial be for a high crime, and the man is condemned to suffer death or banishment or to work hard labor, in all such cases the government shall pay the jury. If for small offenses, punishable by fine, where the man himself demands the jury, in such cases he shall pay them, but from the \$25 previously paid into the hands of the judge.

15. Foreign juries shall be appointed in the following manner where there are sufficient number of foreigners. There are only two places where there is a sufficient number of foreigners to justify the holding of a session of the supreme court among them, for in capital crimes the jury must never be less than twelve in number. In case of other offenses the number may be less, but never below eight. The following persons shall select the jurymen, viz, the governor, the tax officer of the place, and the representative and representatives of that particular island, and they shall be selected in the following manner: The appointing officers shall assemble and call to mind such foreigners as are just and quiet in their lives, not angry persons nor drunkards, but such as are thought to be wise and lovers of peace. The names of these persons shall then be written separately on small pieces of paper the same kind, and the papers shall be put into a small box prepared for the purpose. On Oahu there shall be forty selected, on Maui fifteen; on Hawaii and Kauai it shall be discretionary with the governors.

16. When the time for a session of the court approaches, then the tax officer, or some other officer in his place, shall draw out six or more names, according to the necessities of the court, though the number drawn should always be something greater than the number required on the jury, lest some fail and the court be embarrassed. If the jury be constituted of foreigners only, then there shall never be less than eight. If the jury be constituted of half foreigners and half natives, the foreigners shall never be less than six, and the same also

of natives. Furthermore, if a foreign vessel be at anchor at the place of the court and the governor choose to appoint the captain or captains on the jury, he shall have a right to do so. This is to be left entirely to the discretion of the governor, he considering the nature of the difficulty.

17. At the time of trial, if any one of the jury who was properly summoned do not appear, he shall be fined \$10, though the judge may excuse him if there is sufficient cause; but the jurymen must be notified at least forty-eight hours before session of the court. The judge or officer shall show him a subpoena. When the jury assembles, there shall be exhibited just cause why any one of the jury should not appear or good evidence that he is unjustly prejudiced, then the judge shall look at the case, and if he consider the accusations to be well grounded, he shall set that jurymen aside and another shall be put in his place. But no one shall be set aside if the judge consider that there is sufficient ground for it.

18. When the jury is organized, they shall then be sworn to do justice according to what they shall conscientiously believe to be truth and without bias, and to condemn him whom they really believe to be guilty at fault and justify him whom they really believe to be just, listening to the testimony of the witnesses and reflecting well on everything which has a tendency to establish the truth.

They have nothing to say respecting the law. That is the department of the judge. He shall determine the meaning and he shall pronounce the sentence of punishment.

19. All foreigners who act on a jury shall be paid for their services \$1 per day. If the trial be one of great importance, so that \$2000 has previously been paid into the hands of the judge, then each jurymen shall receive \$2 per day.

20. When a man is tried for a capital offense, he shall not be condemned to die unless the jury is perfectly agreed. But in trials for the other crimes three-fourths of the jury shall be sufficient to decide the case. But if three-fourths do not agree, the judge shall have power to send them to a tight room, shut the door, set a guard, and confine them there until three-fourths are agreed. The judge shall have this respect act in his discretion.

21. If the judges are about to bring a man to trial and any person is supposed to be acquainted with facts connected with the affair, it shall be proper for that man to attend the trial and give in his testimony; and if he be subpoenaed by the judge to attend and he does not go, he shall be punished to a degree proportioned to the importance of the trial, but it shall not be less than \$10, and may exceed to any extent to which the judge shall think proper.

If the witness do not wish to go he may refuse, unless he be notified at least twenty-four hours previous to the trial.

22. If the accuser and the accused be both foreigners, then the jury shall be made up of foreigners only.

If there be no foreigner on either side, then there shall be no foreigner on the jury.

If there be a foreigner on one side and a native on the other, then forming the jury half shall be foreigners and half native; but if a native be accused by a Frenchman, then this law respecting the formation of the jury will not be applicable. (See French treaty.)

All the words of this law having received the approbation of the nobles and representatives, we have hereunto set our names on this 5th day of May, in the year of our Lord 1842, at Lahaina, Maui.

KAMEHAMEHA III.
KEKAULUOHI.

CHAPTER XLVIII.—*Proclamation.*

Know all men whom it may concern, that from and after the 20th day of the current month all government property shall be set apart by itself and shall be entirely at the direction of the national council, and a portion thereof shall be appropriated except by consent of this council. Neither the King, premier, nor any governor, nor any other person, can take for his own personal use any government property; it shall be held sacred to purposes of government, and all such property shall be committed to the care of a national treasury board.

And it is hereby proclaimed that the government will never pay any debt contracted even by His Majesty the King, nor by the premier, nor by any governor, nor by any other person, unless the debt be contracted through the treasury board and the obligation have the signature of the King and premier.

Whoever contracts a debt he alone shall be liable for the debt, and his property alone shall go for the payment of it; and, lest there should be mistaken opinions as to what kind of property may be seized for the payment of debts, it is hereby clearly proclaimed that lands and fixed property upon them can never be sold at auction, neither can they be permanently transferred. They can not even be leased for years without the consent of the King and premier. This kind of property therefore can never be seized for debt, for the government has never relinquished its right to the soil; but, nevertheless, if a man have no personal estate, the land and fixed property upon it may be sold at auction on this condition, that no person can be the purchaser except a native-born citizen, and the right of him who purchases in this manner shall be the same as the right of other natives to their lands.

And if any governor, judge, tax officer, or any other government agent embezzle the government property or appropriate it secretly to his own use, or whoever shall refuse to pay it over to the treasury board—whoever shall do any of these things shall be punished as in case of theft, to be tried and convicted by a competent court.

No also in case of peculation, embezzlement, or fraud in the treasury board or in either of them. He or they shall be tried as in case of theft, and on conviction shall be liable to the same punishment.

This proclamation having received the approbation of the nobles and representatives, we have hereunto set our names, this 10th day of May, in the year of our Lord 1842, at Lahaina, Maui.

KAMEHAMEHA III.
KEKAULUOHI.

CHAPTER XLIX.—*An act for the regulation of taxes, duties, and government property.*

Not even wisdom itself can give protection to a nation without a revenue. Money is in many cases the same as strength, and the nation therefore has energy in proportion to its revenue. It is also a well-established principle that the people ought to aid every object which is for the benefit of the country, and it is also the duty of the rich to do more than the poor, for they enjoy more.

At the present time the government is embarrassed and its em-

barrassment will increase unless the revenue be increased. In consideration of these things the following law is enacted:

1. The law respecting the land tax for the year 1841 still remain in force for the current year. The third section, however, found on page 68, is repealed. Arrow root will be no longer received for taxes, it is an unprofitable article.

2. The officers and people are hereby informed, however, that there is a new article which is very valuable, and that is coffee. The people would do well to pay their land tax in coffee rather than in swine, particularly in places well adapted to the growth of coffee, and those persons who are in pursuit of wealth would do well at the present time planting coffee. Those who raise coffee will find it the same to them as money. The price allowed the present year will be 5 pounds to the dollar. But that price will not be permanent; it will fall at no distant period.

3. A new tax is also to be assessed on the stores and victualing houses. If any foreigner or native own a store in any part of this archipelago, if it be a wholesale store it shall pay a tax of \$25 per year, and the owner shall receive a wholesale license. But if the store be of a domestic character—that is, wholesale and retail—the tax shall then be \$50, and the owner shall receive both a wholesale and retail license.

If any man own a retail store, where goods are not sold by the large quantity, the tax of that store shall be \$25, and the owner of it shall receive a retail license. These shall be the rates of taxation for stores of every kind. But no unlawful article can be vended in them.

If any man keep a public house for the entertainment of captain's vessels and gentlemen of the higher class, that house shall be taxed \$40 a year, and the owner shall receive a license to keep a house of entertainment.

If a man keep a victualing house for other persons than captain's vessels or persons of distinction, entertaining only those of a lower class who wish admission, such a house shall be taxed only \$25, and the owner shall receive a license to keep a victualing house. But no unlawful article shall be furnished in said houses.

4. This law shall take effect at all places on these islands on the first day of July of the current year, and after said day there shall be no store, boarding house, nor victualing house kept without a license specified above, and whosoever shall keep a store or boarding house after said day without a license shall be fined \$100, and all the goods purchased by the people shall be confiscated. The kapu shall be proclaimed, however, after which the seizure may be made.

5. It is furthermore enacted that all persons keeping houses of entertainment shall keep good in their houses.

There shall be no noise or disturbance; and it shall be proper for the government to station officers to see to the character of said houses, and if any keeper of a house oppose the officer who is stationed to see to the house, or if he keep a noisy and disorderly house, the license of said house shall then be forfeited.

6. Foreigners from other countries shall never be required to pay a poll tax, but their property is liable to taxation, and therefore the present law is passed. But those foreigners and natives who have leased land with the consent of the King and premier of the Kingdom and have erected stores on said land, they shall not be taxed according to the above requirement, but licenses shall be given them with pay.

7. It is furthermore enacted that from and after the first day of January, in the year 1843, there shall be an ad valorem duty of 3 per cent laid on all goods, wares, merchandise, and on every article of value imported to these Hawaiian Islands from foreign nations. None of the above articles shall be landed in these shores until the duty be paid, or bonds for payment be given, and the harbor master has given his consent, and he will not give his consent unless the owner of the property conforms to the above requirement.

Respecting times for paying duties, see an act passed May 9, 1839.

8. If any violate this law, and land goods without paying the duty without the consent of the harbor master, or if a man in any way set the law aside, all the property which is improperly landed shall be seized and confiscated.

9. The eighth section shall not be considered as applying to whaling ships that anchor for the purpose of refreshments. It shall be proper for them to barter at pleasure for refreshments and whatsoever is necessary for their vessels. But if they sell cloth or any other article on shore and receive money in payment, then such goods shall pay a duty. And if any captain of a whaling ship sell in this manner without first paying the duty his ship will thereby become a merchant ship, and the captain shall moreover be fined the sum of \$50.

10. There shall be no export duty on any of the productions of these islands. But if any one carry silver or gold out of the country, whoever does this shall pay an export duty of 3 per cent; and whosoever shall carry money out of the country in violation of this law shall be fined just such an amount as he carried away.

11. If goods are brought here from foreign countries and deposited in the design of exporting them again, those goods shall pay duties equal to others; but if the owner give notice in writing that they are for exportation, he shall then be entitled, when they are taken away, to have back 2½ per cent, leaving one-half per cent transit duty. This shall apply to every kind of property that is landed, but the collector of customs must direct in relation to the storage of such goods. If goods are brought into a harbor for reshipment, they shall pay the same transit duty as if landed.

12. It shall be the duty of the governor of each particular island to see that this law be executed at his place. The governor shall establish such regulations as are necessary, and shall give the licenses to keepers of stores and houses of entertainment, and he shall pay the moneys into the hands of the treasury board.

13. It is further enacted, in relation to all ships which anchor at Lahaina, that whereas masters of ships have uniformly refused compliance with the quarantine laws, and the expense of examining their property has therefore fallen on the Government, and whereas the income to the Government is not so great as the expense incurred, therefore in this time potatoes will not be presented in the manner they have formerly been. Ships will, however, continue to pay \$10 each for storage, after which trade on shore will be free.

All the words of this law having been approved by the nobles and the representatives, we have hereunto set our names this 11th day of May, in the year of our Lord 1842, at Lahaina, Maui.

KAMEHAMEHA III.
KEKAULUOHU.

CHAPTER L.—*A resolve in relation to the appointment of a government interpreter and recorder.*

Whereas this government in its connection with foreigners is often embarrassed for want of acquaintance with routine of business in other countries, it is therefore hereby recommended,

That His Majesty the King should appoint some foreigner as recorder and interpreter for the government. His business shall be to superintend the arrangement of government documents and act as interpreter at all trials of foreigners before the supreme judges.

He shall also give information as to the manner of conducting business in foreign countries. He shall also be present as interpreter whenever His Majesty transacts any government business with a foreigner, and it shall be his duty to give information on the subject of that particular business as done in other countries.

It shall be his duty to attend on trials before the governors, whenever directed by His Majesty, and inasmuch as there is often great embarrassment from a misunderstanding of language, or from the ignorance of the interpreter, it will therefore be particularly proper for foreigners who wish to speak to His Majesty on any business which requires his official action, to first call on the legally appointed interpreter.

This resolve of the house of nobles and the house of representatives has received our signature this 12th day of May, in the year of our Lord 1842, at Lahaina, Maui.

KAMEHAMEHA III.
KEKAULUOHU.

CHAPTER LI.—*Quarantine laws.*

Whereas it has been clearly ascertained that the smallpox has prevailed on one or more ships now cruising in the Pacific Ocean, which may be expected to visit the Sandwich Islands, and whereas that disease is understood to prevail at the present time in ports on the western coast of America, frequently visited by ships on their way to the Sandwich Islands, and whereas that disease is extensively prevalent on some of the islands of this ocean, therefore be it enacted by the notables and the representative body in council assembled:

SEC. I. *Respecting pilots.*—1. That every pilot shall ex officio constitute one of the boards of health for the ports where they reside.

And it shall be the duty of all pilots at all ports of the islands where they see foreign vessels approaching to go off immediately and lie to the windward side of the vessel, but not board her until they have first presented the captain with a blank certificate as follows:

I, _____, master of the ship _____ of _____, hereby most solemnly declare that the name of the port at which the vessel under my command anchored or hove to was _____, which port I left _____ days ago. I do not hear that any contagious disease was at that time prevailing there or at any place nearby. No man on board my ship has been seized by any contagious disease. I have heard of any such disease on board of any vessel that I have spoken on my way to this place. No man has died or been sick of a contagious disease on board my vessel during the last six months from date thereof.

On board ship _____.

Master

When the captain has filled out the above blank and subscribed his name below, then the pilot may board the vessel and she may anchor.

the pilot shall also deliver to the captain a white flag which he shall keep flying at the main for half an hour, at which time the flag shall be returned. By the hoisting of such a flag it is clearly declared that the ship is free from contagion.

If any pilot violate or disregard either of these requisitions he shall be fined \$10 for the first offense. If he be guilty a second time he shall be fined \$20, and in this ratio shall the fine be increased for every successive offense committed.

2. If the captain do not put his name to the blank certificate mentioned above, then the pilot shall deliver to him a black and yellow flag, two-fourths black and two-fourths yellow. And the captain shall hoist said flag at the main. And the vessel shall not anchor until the port physician visit the ship, and he together with the pilot shall direct where the ship shall anchor.

If any pilot shall bring a ship to anchor in violation of this requisition, or knowing that there is just ground to suspect that there is contagion on board, then such pilot shall be fined \$500.

3. If the pilot or port physician board any ship and afterwards discover that the ship is of a contagious character or such a ship as is liable to quarantine, in that case the pilot and physician shall be quarantined; they shall remain on board the vessel and not return on shore until such time as it shall be free for the captain and officers also to come on shore.

Whenever pilot or physician violates this law he shall be fined \$500.

SEC. II. *Boats and canoes prohibited from visiting strange vessels.*—

After the promulgation of this law, all canoes and boats and all persons not authorized by the board of health are prohibited from visiting any foreign ship whatsoever until she shall have been examined by a health officer or one of the board of health, according to the above requisitions, and the white flag has been hoisted, after which she may be visited.

Whoever shall visit a vessel in violation of this law shall be fined \$40, one-half to be paid to the Government and the other half to the informant.

2. If one is accidentally brought in contact with a contagious ship, or being on board discover her to be so, or then ascertains that she is quarantined, in such case he shall remain on board said ship, as is required above of the pilot and physician. Whoever violates this law shall be fined \$500. And if anyone be discovered while in the act of violation, or while in the act of leaving a quarantined vessel, it shall be lawful to fire upon him or do whatever is necessary in the judgment of the governor or superior officer.

SEC. III. *Of shipmasters and of foreign ships visiting the islands.*—

1. It shall be the duty of all shipmasters to examine carefully the blank certificate handed them by the pilot and to fill out said blank, and then put the name and date. And this shall be done under the same liabilities as if under oath. But if the captain is unable to subscribe the certificate on account of its not stating the truth in relation to his vessel, it shall then be returned to the pilot. Whatever captain refuses obedience to this law, or subscribes his name to a falsehood, shall be fined \$500.

2. If any master of a vessel refuses obedience to the requisitions of the health officer, or anchors when forbidden, or does not hoist the flag required by the pilot, or refuses obedience to any requisition of the quarantine laws, he shall be fined \$500.

And it shall be lawful for the governor to fire or do anything which is necessary in his judgment in order to the execution of the laws.

3. All vessels having had the smallpox or any other contagious disease on board, unless six months have elapsed since all appearance of disease ceased, are hereby prohibited from anchoring at any port, harbor, or roadstead of the Hawaiian Islands until visited by a health officer or one of the board of health and received his approbation after which they may anchor.

If any master of a vessel violates this law he shall be fined \$500.

4. The pilot and port physician shall have power to quarantine ships, as well vessels of war as others, provided they have come from ports supposed by the board of health to be infected, or dangerous, but after once put under quarantine they shall be under the direction of the full board. And they may lengthen or shorten the time of quarantine at their discretion.

5. If a vessel be put under quarantine, the captain shall in the daytime keep constantly flying at the main a black and yellow flag, and in the night at the same mast two lights, one above the other. He shall not come on shore, nor shall he permit any person on board his ship to come, or to go on board of another ship; he shall permit no article to be taken from his ship until such time as the board of health shall appoint. If any captain violates this law, or if any captain attempts to take his ship to a prohibited place, he shall be fined a thousand dollars, and it shall be proper for the governor and those who have charge of the business to fine or take any other step which may be necessary to force obedience to the requisitions of this section.

All the prohibitions which apply to coming on shore, or bringing any articles on shore, apply also to boarding another vessel or carrying any articles on board.

SEC. IV. *Of passengers and other persons on board quarantined ships.*—All restrictions which are laid on quarantined vessels which come to the islands are also applicable to all passengers and officers and people of said vessels. They are all under the laws of the board of health. If any one come on shore, or send any baggage or writing on shore, or go to any other vessel, he is guilty, and shall be fined in the same manner as the captain would be, doing the same act. And whatsoever the captain is prohibited from doing, all people on board his ship are doing the same.

SEC. V. *Prohibitions applicable to all persons.*—This last edict is applicable to all that is said above. If any man does in reality violate any one of the above laws, and do it knowingly and with evil intent and with the design of transgressing the law, and in consequence of his doing thus a contagious disease is communicated on shore, whoever does this is a murderer and shall be hanged.

SEC. VI. *Of health officers.*—For the purpose of carrying this law into execution, the governors shall appoint five health officers for each harbor of the Hawaiian Islands. And they shall have the direction of vessels in accordance with the above laws. And they shall have power to establish laws over all the people in times of danger from sickness, and it shall be their duty to devise plans to prevent the introduction of contagious and other diseases. And the governors shall also appoint port physicians who shall of course be members of the board of health. And the port physician shall visit every vessel that is suspected of contagion, or where the black and yellow flag is hoisted, (

f the pilot call for him. And he shall look into the character of the suspected vessel, and shall proceed according to the requisitions of his law, and shall make known to the board of health the result of his investigations.

His pay shall be \$5 for each ship thus examined by him, to be paid by the government.

By the enactment of this new law the former quarantine law is repealed.

All the words of this law having received the sanction of the nobles and representatives, we have therefore subscribed our names to the same on this 17th day of May, in the year of our Lord 1842, at Lahaina, Maui.

KAMEHAMEHA.

KEKAUUAHII.

CHAPTER LII.—*Additional school law.*

In the estimation of the nobles and of the representative body schools for the instruction of children in letters are of vast importance. We are firmly determined to give protection to the schools and also to teachers of good character and also to treat with great severity all those who oppose schools or throw hindrances in the way of that business. The great evil of the past year has been that the teachers have not been properly paid.

A portion of the balance belongs to the parents. It is important that parents should have so much sincere regard to the welfare of their children as to influence them to attend to instruction.

For if they are unable to read they can neither marry husbands nor wives; they can never act as land agents nor be employed in any office nor others. The parents, too, must suffer inconvenience, for their lands can not be increased, they can not fish gratuitously nor take timber from the mountains without paying for it. It is therefore important that parents should consider this subject well and stimulate their children to learn.

It is also the duty of parents to aid in supporting the teacher in such manner as shall be mutually agreeable and should do it generously lest the government be burdened.

The land agents are also in fault for withholding land from the teachers. Hereafter, if the general school agent apply for land in accordance with the provision of the school law, and the land agent refuses and actually withholds it, it is a crime for which he shall be dispossessed and his land given to another. So also if they pay no attention to the general school agents, as they travel round to regulate the schools.

The tax officers are also sometimes in fault. If the general school agent call on him for government property, as he is allowed to do by school law, and the tax officer refuses, he shall then pay his own property, because he has without cause withheld the property of the government, the law shall be executed upon him. So also if he do not build the schoolhouse according to the direction of the general school agent.

Another evil is that the officers give certificates of marriage to those who can not read. The officers should carefully examine the law and withhold certificates from all who are ignorant of reading.

Another evil is that the scholars in the schools are noisy. It is the duty of teachers to instruct the scholars in this particular and to con-

sult with the school committee on the measures to be pursued. The government will always support the teachers and school committee while they do well, for a school is of little value if the scholars are disorderly. There is but one right way and that is for the scholars kindly and faithfully regard the instructions of the teacher. If the scholars conduct improperly they must be punished as the law requires.

Furthermore the school committee appointed in conformity to the law, while they perform faithfully their duties, shall be freed from going to the labor of the King and the Friday labor of the land agents. But if there is any national labor to be done, they shall work on the appropriate days of the people, but not on the days of the King nor the land agents.

It is furthermore agreed that there shall be two general agents in Hawaii the present year, and each shall receive \$35. The general agent of Maui shall receive \$35 and that of Molokai, \$25; the one of Oahu shall receive \$30 and the one on Kauai \$35, to be paid in Government property, but not in money.

These resolves, passed by the nobles and representatives, we hereby approve and have therefore subscribed our names this 13th day of May in the year of our Lord 1842, at Lahaina, Maui.

KAMEHAMEHA III.
KEKAULUOHI.

CHAPTER LIII.—*Amendments to be inserted in Law XXII, on page 123.*

1. If any person enter a complaint to a judge of such a nature that it is necessary to attach property for debt, it shall then be the duty of the judge to cause such property to be attached as he is acquainted with. But if the plaintiff know of other property, he may give notice to the judge, who will cause that property also to be attached. But if there be any subsequent difficulty in consequence of the attachment having been wrongfully made, the blame and loss shall be on the plaintiff.

2. When one person institutes a suit against another before a judge for debt, the judge shall then issue a written summons to the defendant requiring him to appear, and for said summons the judge shall receive \$1, and the person who serves it shall receive 25 cents. The judge shall also receive \$2 for rendering and executing judgment. If property be attached and sold at auction, the judge shall receive 6 per cent on all the property thus sold. The witnesses shall also be paid according to the requisition of another law. [See Chapter XLV.] These rules of payment apply to the trial of minor offenses, but not to jury trials. If the debtor have sufficient property, he must pay the costs. But if his property be not sufficient, then the plaintiff must pay. Though if the debtor has not been in fault, the plaintiff shall pay the costs; and if they have been alike in fault, then the costs shall be equally divided between them.

According to the decision of the nobles and representatives, we have given our assent that the above should be inserted in the former law, and we have hereunto subscribed our names on this 16th day of May, 1842, Lahaina, Maui.

KAMEHAMEHA III.
KEKAULUOHI.

CHAPTER LIV.—*Burdens of the lower classes.*

Previous to the enactment of the new code of laws on the subject of taxation every man was required to pay a poll tax of \$1 annually.

At the present time it is a dollar for one year and a half a dollar for the next.

Formerly the tax of a common size farm was 1 fathom swine, 40 kapa, 40 paus, 1 dog, 80 fathoms of fish line, and a fish net 800 meshes in length. This was the Government tax.

Now the whole of this taxation is abolished except the fathom swine, and even that is reduced to half its former size every other year.

Formerly, besides this government tax, there was another tax laid by the local governors, another by the higher landlords, and another still by their subordinates.

At the present time there is no assessment except for the government tax. No other tax can be laid.

Formerly, if the landlord became dissatisfied, he at once dispossessed his tenant even without cause, and then gave his land to whomsoever asked for it.

At the present time that practice is at an end; lands are held by a strong tenure; they can not be seized without cause.

Formerly, a prohibition rested even on the ocean, so that men must not take fish from it.

At the present the prohibition is removed, so that every man may take fish where he pleases with very few exceptions.

Formerly there were distinct taxes on states, counties, towns, and districts. Now there are no such taxes; they are strictly prohibited.

Formerly, if the king wished for the property of any man, he took it without reward; even seized it by force or took a portion only, just in action accordance with his choice, and no man could refuse him. The same was true of every chief, and even the landlords treated their tenants thus.

At the present time such conduct is all ended. No chief whatever has power sufficient to do it now. Should one attempt it, he would instantly cease to be a chief on this archipelago.

Formerly, if a man had a number of children, they were a very heavy burden on account of their increasing the amount of his taxation.

At the present time children entirely free a man from government work, also from the land tax and poll tax.

Formerly the chief could call the people from one end of the islands to the other to perform labor.

At the present time this is prohibited, and the people can be required to work only near by their home.

Formerly, if the king wished the people to work for him, they could not refuse. They must work from month to month. So also at the call of every chief and every landlord.

At the present time there is nothing of the kind. If any chief should attempt to pursue such a course, it would be a crime such as would free all his tenants from laboring for him at all until the time specified in the law.

Formerly the people were regularly required to work every Tuesday and Friday—that is, four days in a month for the king and four for the landlord, eight in the whole, and as many more as the chiefs chose.

At the present time the whole number is limited to six days in a month, leaving twenty laboring days for the people.

Formerly, if the people did not go to the work of the king which was required, the punishment was that their houses were set on fire and consumed.

Now, if they do not go they must pay a rial, or, at most, a quarter of a dollar.

But still, the people are wailing on account of their present burdens.

Formerly they were not called burdens. Never did the people complain of burdens till of late—till these dreadful weights mentioned above were removed. This complaint of the people however would have a much better grace if they with energy improved their time on their own free days; but lo! this is not the case.

They spend many of their days in idleness, and therefore their lands are grown over with weeds, and there is little food growing.

The chiefs, of their own unsolicited kindness, removed the grievous burdens mentioned above. The people did not first call for a removal of them. The chiefs removed them of their own accord, therefore the saying of some of the people that they are oppressed is not correct. They are not oppressed, but are idle.

In view of these complaints of the people, and in view of their idleness on their own free days, the following new law is enacted:

1. If a farm be seen to be grown over with weeds and little food upon it, and yet a good farm for cultivation, in such a case the tenant shall be dispossessed, though he shall not be dispossessed without trial, nor at the mere suggestion of his landlord. The criminal person shall be dispossessed, whether it be the landlord or the tenant.

2. Furthermore, forbearance shall be exercised for one year more, and then if the idleness of the people continues it shall be the duty of the tax officer, whenever he sees a man sitting idle or doing nothing on the free days of the people, to take that man and set him at work for the government; and he shall work till night.

The landlords also may do the same with the tenants of their lands when they are idle. This law is passed on account of the idleness of the people on their own free days. While they are at work for themselves they shall not be set to work for others.

These enactments having received the sanction of the nobles and the representative body, we have set our names to the same on this 10th day of May, in the year of our Lord 1842, at Lahaina, Maui.

KAMEHAMEHA III.
KEKAULUOHI.

CHAPTER LV.

Be it known to all whom it may concern, that the council of the Kingdom have come to a definite agreement to set apart all the governing property from one end of the islands to the other for such business as the government shall be agreed upon, and for the payment of debts of the Kingdom, in order that the debts of the Kingdom may be cancelled at once. They therefore nominated officers to receive and pay out moneys according to specific directions.

We do therefore hereby constitute you, Dr. G. P. Judd, Timothy Haalilio, and John Ii, a treasury board for the Kingdom, and charge you to receive the poll tax, the poalua money, and all money paid

instead of the swine tax; also all money paid for criminal offenses, the harbor dues and duties, the land rents, and all tax money, and every kind of property which can be made use of in paying government debts.

We also hereby charge the governors and all officers to give you timely notice respecting such moneys and such property, and then you will, at your discretion, leave it for awhile or take it into your hands immediately.

We furthermore charge you to execute this business promptly and faithfully, and in the month of April, 1843, render in writing a full account of all your doings.

In testimony whereof we have subscribed our names at Lahaina, Maui, on this 10th day of May, 1842.

KAMEHAMEHA III.
KEKAULUOHI.

At this meeting of the chiefs the following persons were appointed officers of the Kingdom:

The representative body appointed Paki, Kanaina, Kaauiwai, and Kapena assistant supreme judges.

The King appointed Dr. G. P. Judd, recorder and translator for the Kingdom.

Two or three other acts were passed which are not here translated, as they were more in the form of advice and instruction than law, and would be of no special interest to foreigners.

EXHIBIT —.—Judge Humphreys.

LEPROSY IN THIS COUNTRY—THERE ARE 278 CASES REPORTED IN THE UNITED STATES.

The Secretary of the Treasury yesterday sent to the Senate the report of a commission of medical officers of the Marine-Hospital Service appointed to investigate the origin and prevalence of leprosy in the United States. The report shows 278 cases of leprosy in the United States, distributed by States as follows: Alabama, 1; California, 24; Florida, 24; Georgia, 1; Illinois, 5; Iowa, 1; Louisiana, 155; Maryland, 1; Massachusetts, 2; Minnesota, 20; Mississippi, 5; Missouri, 5; Montana, 1; Nevada, 1; New York, 7; North Dakota, 16; Oregon, 1; Pennsylvania, 1; South Dakota, 1; Texas, 3; Wisconsin, 3.

Of the total number, 176 are males and 102 females, 145 American born, 120 foreign born, and the remainder uncertain.

It is stated that 186 of the cases were contracted in the United States, but the opinion is expressed by the commission that this number is too large and that some of these cases were brought from abroad.

Summarizing, the commission say that the number of cases is smaller than is generally believed. They also say that leprosy is conveyed from one person to another in the United States, such conveyance being most markedly noticeable in the States in the Southern coast; that a large majority of the cases in the United States (33 per cent) are at large; that at present only 72 of the cases are isolated and provided for by the States or cities in which they are located, and that many of these now at large, if not all, would be willing to be cared for by the public if proper leprosaria existed for their treatment and comfort. The commission recommend the establishment of a retreat for lepers

and express the opinion that it should be in the arid Southwest or a similar region farther north or on an island in the Gulf of Mexico or on the Pacific coast.

Of the 155 cases reported from Louisiana 101 are in New Orleans County and 37 in the leper home at Iberville. Of the 7 cases in New York 4 are in Kings County and 3 in New York City. The commission express the opinion that the figures given do not represent the total number of lepers in the country, because they say that the local character of the disease causes persons affected to conceal it as long as possible. They also express the opinion that it is most frequently contracted by inhaling dust where lepers have been located.

EXHIBIT No. 1.

PETITION OF MRS. PRATT AND MRS. WILCOX PRAYING REIMBURSEMENT OF THE QUEEN FOR CROWN LANDS.

To the honorable subcommittee of the United States Senate Committee on Pacific Islands and Porto Rico:

The undersigned respectfully desire, with the consent of your honorable committee, to join in the petition and prayer that Liliuokalani be suitably and equitably recompensed by the United States for the loss of her sovereignty, fees, emoluments, and perquisites as Queen of the Hawaiian Kingdom;

And your petitioners humbly pray:

That the Congress of the United States may, by such inquiry, research, and evidence as may be necessary therefor, determine the title in and to those certain pieces and parcels of real estate situated in the former Kingdom of Hawaii, now Territory of Hawaii, known as the "Crown lands" at the time of the assumption of title to and control of the same by the United States of America, as also to the rents, issues, and profits thereof;

That, upon so determining the premises, Congress of the United States may by appropriate and necessary enactment affirm such title, or if for any reason it shall be met or the premises require, that it shall provide for the payment of the value of said "Crown lands" and of the rents, issues, and profits thereof in money; and

That your petitioners may be permitted to hereafter submit, for the consideration and aid of your committee, and of Congress, such further record, evidence, or argument as shall or may be necessary or pertinent to such inquiry and finding.

And your petitioners will ever pray.

ELIZABETH KEKAANIAU PRATT.

THERESA OWANA KAOHELELANI WILCOX.

EXHIBIT No. 2.

To the honorable Subcommittee of the United States Senate Committee on Pacific Islands and Porto Rico.

GENTLEMEN: The undersigned, Emma Alexandria Kilioulaniuiamamao Kalanikauikaalaneo Defries, your petitioner, respectfully submits the following facts for your consideration and judgment, namely:

First. At the time of the overthrow of the Government of the Kingdom of Hawaii, the reigning Queen was enjoying the rents, issues, and profits of certain lands within the Kingdom called the "Crown lands," and covering nearly 1,000,000 acres and yielding an income of \$20,000,000.

Second. The fee of said lands at the time of said overthrow was vested in the heirs of the Kamehamehas, to whom said lands originally belonged, and who set the same aside for their successors, who were to have simply a life interest in the same.

Third. Your petitioner prays that the Government of the United States may recognize the justice of the claim of Liliuokalani, our former

Queen, and grant her suitable compensation for the loss which sustained through said overthrow of her Government; and your petitioner further submits that the heirs to said "Crown lands" should receive just compensation for the loss which they have sustained in absolute ownership which the Government of the United States established over said "Crown lands."

Fourth. Your petitioner is a descendant and an heir of the Kamehamehas, as shown by the annexed printed statement of her pedigree to which she refers, and which she makes a part of this petition.

Fifth. That your petitioner will suffer great loss and injury, and has no remedy under the Constitution of the United States or the laws of the land, if the Government of the United States fail or refuse to make suitable compensation to her for her interest in the said "Crown lands."

Wherefore your petitioner prays that some provision may be made for the payment to her, or her heirs or assigns, of such a sum of money as may be deemed just and equitable.

And your petitioner will ever pray, etc.

EMMA ALEXANDRIA KALANIKAUKAALANEO DEFRIES,
Petitioner.

Dated Honolulu, Territory of Hawaii, September 29, 1902.

TERRITORY OF HAWAII, *Island of Oahu, ss:*

Emma Alexandria Kilioulaninuiamamao Kalanikaaukaalaneo Defries, being duly sworn, deposes and says that she has read the foregoing petition, and that it is true to the best of her knowledge and belief.

A BEAUTIFUL HAWAIIAN OF HIGHEST ROYAL LINEAGE.

Kalanikaauikikilo Kalawaiakua Waikanakaole (w.) was the mother of my great-great-grandmother, Kilioulaninuiamamao Hikaiwainui (w.), first born to Kiwalao (k.), son of Kalaniopuu (k.), King of Hawaii in the year 1764, long after the death of Kualii (k.). She grew up under the care of three high chiefs, Naili (k.), Kueue (k.), Iwikauikaua (w.). Naili (k.), a brother to Kamakaimoku (w.), wife of Kalaninuiamamao (k.); Kueue, or Kanokalani (k.), a son to Naili (k.), and a great-great-grandfather to J. Nawahi and others, and the third was a very high chiefess, Iwikauikaua (w.). Her heiau still recalls her memory in Kihuna, Hawaii, where my great-great-grandmother, Kilioulaninuiamamao Hikaiwainui (w.), and her cousin, Kaleipaopao (w.), were both brought up from childhood. She was married in the year 1780 to the chief warrior, Kapakapilinuiaehu (k.), grandson of Kalanikaumakaowale (k.) and son of Kauloaiwi (k.). In the year 1781 a son was born to them. He grew up under the care of Kamehameha Kaunokoia (k.) and his wife, Kiliwehi (w.). The latter died in Kaanapali district in the same year. She requested to have her remains buried at Pakaalamo, her birthplace.

EXHIBIT No. 3.

The honorable subcommittee of the United States Senate Committee on Pacific Islands and Porto Rico.

GENTLEMEN: The undersigned, Henry De Fries, your petitioner, respectfully submits the following facts for your consideration and judgment, namely:

First. At the time of the overthrow of the Government of the Kingdom of Hawaii the reigning Queen was enjoying the rents, issues, and profits of certain lands within the Kingdom called the "Crown lands," and covering nearly 1,000,000 acres and yielding an income of \$1,000,000.

Second. The fee of said lands at the time of said overthrow was vested in the heirs of the Kamehamehas, to whom said lands originally belonged, and who set the same aside for their successors, who were to have simply a life interest in the same.

Third. Your petitioner prays that the Government of the United States may recognize the justice of the claim of Liliuokalani, our former Queen, and grant her suitable compensation for the loss which she sustained through said overthrow of her Government; and your petitioner further submits that the heirs to said "Crown lands" should receive just compensation for the loss which they have sustained in the absolute ownership which the Government of the United States has established over said "Crown lands."

Fourth. Your petitioner is a descendant and an heir of the Kamehamehas, as shown by the annexed printed statement of her pedigree, to which she refers and which she makes a part of this petition.

Fifth. That your petitioner will suffer great loss and injury, as she has no remedy under the Constitution of the United States or the law of the land, if the Government of the United States fail or refuse to make suitable compensation to her for her interest in the said "Crown lands."

Wherefore your petitioner prays that some provision may be made for the payment to her, or her heirs or assigns, of such a sum of money as may be deemed just and equitable.

And your petitioner will ever pray, etc.

WITNESSES:

N. FERNANDEZ,

Notary Public, First Judicial Circuit, Territory of Hawaii.

MEMBERS OF THE DE FRIES LINE OF NOTABLE HAWAIIANS.

EDITOR ADVERTISER: Genealogy and history of Mr. and Mrs. Henry Howard Kauauanuiamahi De Fries is hereby given and delivered in our hands this 22d day of August, in the year of our Lord one thousand nine hundred and one, being the twentieth anniversary of the birth of their son John Alexander Liholiho Kalaninohopono-o-Lunalilo.

His father, Henry Howard Kauauanuiamahi De Fries was born at Kohala, Hawaii, March 1, 1856. His mother is from the lineal line of Liloa (k) by his son Hakau (k) and to Umiwiula (w), mother of Kauauanuiamahi (k) and his only brother, Mahi (k). They gained victories in the battle of Mahiki, but finally dissatisfied, in the name of Kaili they raised weapons, spears, etc., to kill themselves. Kauauanuiamahi (k) was heard to say: "It is better for us both to die on this battlefield by the strength and power of our God (Kaili). Our family will hereafter rise with pride, and will take interest also in any battle allotted to them," and his brother Mahi was heard to say: "Our love to our children, how could we die." No loss of time was allowed by his brother Kauauanuiamahi. He raised his weapons on his only brother and said: "There are many here to be our companions in death," and the two brothers ended their lives side by side.

These are the ancestors of Henry Howard Kauauanuiamahi De Fries. Liloa (k) marries Pinea (w) issue Hakau (k); Hakau (k) marries Kukuaniapae (w) issue Pineakalani (k) and a sister Keauomeha (w); Pineakalani (k) issue Hakaualalapuakea (w), marries Keawenuiaumi (k) issue Ilikikuhine (w); Ilikikuhine (w) marries Keliolono, issue Opu (k), marries Hinakauhiohope (w) issue Ilikielele (w), marries Makakuokalani (k) issue Umiwiula (w), marries Mahi (k) issue Kauauanuiamahi (k) and his brother Mahi (k), this last named, had no issue. They lived together from childhood. Through Kauauanuiamahi (k) they had issues, grand issues, and great-grand issues. Kauauanuiamahi had three wives. The first wife is Kalanikauleleiaiwi. Their issue was Alapai (k). His second wife is Kepookapuokalani. Their issue was Kepookapuokalani (k) and a sister, Kaleiheana. His third wife is Kaohukiokalani. They had 7 issues. Only 3 survive: Opu (w), Kuheana (w), and Paluanubikanaloa (k). Alapai marries his half sister, Kaleiheana, issue is Koaikalani (k); marries his aunt, Opu. Their issue is Kaneelele (k) and others. He marries Wahninekualana (w). Their issue is Kekoakokalani (k) and 2 others. He marries Keliipunui (w). Had 22 children, all dead, but 2 survive from one of their daughters, Hale-o-Keawe (w) married Mr. John De Fries, sr. By this marriage they had 4 issues, first son Henry Howard Kauauanuiamahi. He marries Emma Alexander Kalanikaualaneo Kilioulaniuiamamao, a lineal descendant from Queen Keopuolani, Kamehameha I, wife. The second son is Haleokeawe, John Keaumakalani; marries Hattie Kawailani, of equal lineal line to her husband, through his ancestors. By this marriage no issue. The third son, Hiram Paluanubikanaloa, marries a lady from Salt Lake City; 4 issues, the fourth issue is a daughter, Julia Wahninekualana; marries William Rice, a prominent descendant by his mother's side; 8 issues. In numbering up the grand issues of Hale-o-Keawe and her issues and also her mother's, the old lady had 22, the daughter had 4, and the son and daughter had 23, this place Hale-o-Keawe and her husband, John Henry De Fries, sr., have 27 issues living. Here are the ancestors of Keliipunui (w), the mother of 22 children.

Life of Kekoakalani (k): Kauauanuiamahi (k) marries Kaohukiokalani (w), 7 issues, 3 survive: Opu (w), Kuheana (w), Paluanuhikanalaoa (w), marries a lady of high rank. Her ancestors are from the lineal descent of Kalonanui (k), marries Kahalakaiuholua (w) issue Kalamakua (w), marries Kelea (w) issue Laieloheloheikawai (w), marries Piilani (w) issue Kaleiheana II, sister of Kihaapiilani (k) and Lonoapiilani (k). Kaleiheana II marries Kaaeokalina (k) issue Kekaokalani (k), marries Kuhelani (w), his own cousin; their issue is Pualinui (k), marries Pupuiaikanaka (w) issue Kaunakakai (w), marries the son of Kauauanuiamahi (k), his name is Paluanuhikanalaoa (k), and their issue is Keliopunui (w) and a son, Kaliliaimoku; Keliopunui marries Kekoakalani (k), 22 issues, all dead but 2. Their names are Kekoanuioakalani (k) and Paluanuhikanalaoa II, and from one of Keliopunui (w) and Kekoakalani (k), daughter Hale-o-Keawe (w). Through her they had issue and grand issue and great-grand issues to Keliopunui (w). This old lady lived one hundred and seven years, the mother of 15 children. She died at Puaikaula, Puuloa Harbor, at the house of one of her grandsons, Mr. John Keaumakalani. She was born at Kaupo, on the island of Maui. From her it was learned that she was born about the time of the battle of "the red mouthed cannon" Kepuwahaulaula, or Kawai (the water), fought by the combined forces of Kahekili (k) and his brother, Kaeo, king of Kauai, against Kamehameha I, who was victorious. This battle was noted as being the first one in which a cannon from the foreigners was used with deadly effect. Our noted chronicler, the late Judge Fornander, has set this time to be about 1791, which would prove the old lady we are speaking about to be 107 years of age. She was the mother of 22 children, 15 of whom lived for some years and were married, had issues, and died young. Her youngest son is 40 years of age. During the time when Mr. R. C. Wyllie was minister of foreign affairs, on account of her being very politic, a special silver medal was made for her, which she highly prized. It must be known she was only married once. The medal is now in the possession of her youngest grandson, Hiram Paluanuhikanalaoa De Fries, now in Salt Lake City.

These are the ancestors of Pupu (w), mother of Kaunakakai (w) and life of Pualinui: Lonoahu (k) marries Kaleikapu-a-Lono issue Lonoiaikanaka (w), marries Hulukane (k) issues Kauhiokeka and Kapaeululumoku (w), this last issue marries Hewahewanui (k) issue Heleualani (w) and Kapikokaakua (k), Pio issue Pupunuiiaikanaka (w), she marries Pualinui (k) issue Kaunakakai (w) and Kuheleaulani, Kaunakakai (w) marries Paluanuhikanalaoa (k) issue Keliopunui (w) and Kalilikane (k), Keliopunui (w) marries Kekoakalani (k), 15 children. A history is also given of Kaaeokalani (k) as being the first to use the word (kamau) in walking, very much stricken in years Kaaeokalani (k) and his only son responded to Kalaniakua (k) Kuhaua, setting a certain day to build his Imu Loli in Kaupo, Maui, as it is the custom amongst high chiefs to pay respect to one high in rank. Kalaniakua seeing Kaaeokalani (k) and his son, Kekaokalani (k), coming hail out to them with joy, saying E. Kaaeokalani (k), e, hele mai, e naue ae nei ke Akua, e-a. Kaaeokalani (k) and his son responded, A-e ke kamau ae nei i ka la luu loli ou e Kalani." These words were not secret by Keliopunui, and knowing that her death was drawing nigh she wanted every word written which came to her memory.

This genealogy and history comes from the old lady herself and others that knew her and her husband.

We have come to the four issues of Hale-o-Keawe (w) and grand issues.

Henry Howard Kauauanuiamahi genealogy is now ended. His issues will be given in through Mrs. Emma Alexandria Kalanikau kaalaneo De Fries' genealogy. * *

EXHIBIT No. 4.

The Honorable Subcommittee of the United States Senate Committee on Pacific Islands and Porto Rico.

GENTLEMEN: The undersigned, Wilhelmine Dowsett, one of the daughters of Kaumana Pilahiulani Widemann, your petitioner respectfully submits the following facts for your consideration and judgment, namely:

First. At the time of the overthrow of the Government of the Kingdom of Hawaii, the reigning Queen was enjoying the rents, issues, and profits of certain lands within the Kingdom called the "Crown lands" and covering nearly 1,000,000 acres, and yielding an income of \$20,000,000.

Second. The fee of said lands at the time of said overthrow was vested in the heirs of the Kamehamehas, to whom said lands originally belonged, and who set the same aside for their successors, who were to have simply a life interest in the same.

Third. Your petitioner prays that the Government of the United States may recognize justice of the claim of Liliuokalani, our former Queen, and grant her suitable compensation for the loss which she has sustained through said overthrow of her Government, and your petitioner further submits that the heirs to said Crown lands should receive just compensation for the loss which they have sustained in the absolute ownership which the Government of the United States has established over said Crown lands.

Fourth. Your petitioner is a descendant and an heir of the Kamehamehas, as shown by the annexed printed statement of her pedigree to which she refers, and which she makes a part of this petition.

Fifth. That your petitioner will suffer great loss and injury, as she has no remedy under the Constitution of the United States, if they fail or refuse to make suitable compensation to her for her interest in the said Crown lands.

Wherefore your petitioner prays that some provision may be made for the payment to her, or her heirs or assigns, of such a sum of money as may be deemed just and equitable.

GENEALOGY OF A FAMOUS FAMILY OF THESE ISLANDS.

GENEALOGY OF ROYAL LINEAGE OF MRS. WIDEMANN SUPPRESSED DURING THE LIFE OF JUDGE H. WIDEMANN.

The following is the genealogy of Mrs. Kaumana Pilahiulani Widemann, wife of the late Judge Hermann Widemann. Her ancestors are here given in full, from Opukahonua (k) to Kumuhonua (k) from Kumuhonua (k) to Hulihonua (k) from Hulihonua (k) to Kumu-uli (k) from Kumu-uli (k) to Paiakalani (k) from Paiakalani (k) to Kahiko (k) and his wife Kapulanakehau (w) their issues are Lihauula (w), Wakea (k) and Makuu (k); Papanuihanaumoku (w) the wife of Wakea (k) descended from Kumuhonua (k), also her parents were Kulaniehu (k) and Kahakauakoko (w) from Hawaiiiloa (k) and his wife Hualalai (w) descended Mauiialii (k) and Oahu (w) and Kauai (k), Oahu (w) marries Kunuiakea-akua (k) their issue is Kunuiakea I (k) from him and his wife Kahikiwalea (w) issued children and grandchildren and great grandchildren, from Hulihonua (k) and Kumu-uli (k) descended the gods known by their names as follows: Ku (k), Lono (k), Kane (k), Kanaloa (k), Kauakahi (k), and Maliu (k), through Kanaloa (k) issued Laka (k) and Malua-po (k) marries Laweikeao (w) their issue is Kinilau-a-mano (k) from Kinilau-a-mano (k) and his wife Upolu (w) their issue is Haho (k) from Haho (k) down to Wakea (k) and his wife Papanuihanaumoku (w) issued Hoochokuokalani (w) according to old customs of Pio or Niau Pio, she married her own father Wakea (k) and their issue was Haloa, from Haloa to Ulu (k) and Nana Ulu (k) from Nana Ulu (k) to the four Mauis (k) from the Mauis (k) to Hema (k) and Puna (k) from Puna to Laa (k) from Laa (k) to Hanalaanui (k) and Hanalaaiiki (k) from Hanalaaiiki (k) descended Kihaapiilani (k), Lonoapii (k), Kamalalawalu (k), Kauhiakama and his brother Keumikalakauaeuakama (k) down to his issues Kauakahiakua (k), Kaikihiashumanu (w), Kamaalewa (k) and Piilanikapunuiaeu (w) married the son of Kauhiakama (k), his name is Kalanikaumakaowakea (k), and their issue are Kauloaiwikamaikeahienanuiaeu (k) and Piipiiwahine (w) married Nalupipio (k), their issue is Piilanikane II (k) married Kekuiapiia II (w), daughter of Kekuaokalani (k) and Kiliwehi (w) and granddaughter of Keliimaikai (k) and his wife Piia (w), sister of Kaashumanu (w) and Kakeiheimalie (w), their issue was Punamanokalanipo (w), she married Kealaimoku (k) their issue was Kolia (k), Akamu (k) and Mrs. Kaumana Pilahiulani Widemann (w); we have come to Piilanikane II (k), father of Punamanokalanipo (w), wife of Kealaimoku (k) and mother of Mrs. Kaumana Pilahiulani Widemann (w), now here are the ancestors of Kekuiapiia (w), wife of

Piilanikane II (k): Kekaulike (k), king of Maui, also married Haalei (w) issue are Kekuamanoha (k) and Namahana (w) marries Keeumoku (k) issue were Kaahumanu (w) and Kaheihemalie (w), Hakuole (k) Kuakini (k) and Kekuiapiia I (w) married the brother of Kamehameha I, his name was Keliimaikai Kalanimakuloku-ikepookalani (k) and their issue Kekuaoakalani (k) marries his cousin Kiliwehi (w) their issue is Kekuiapiia II (w) married Piilanikane II (k) issue is Punanokalanipo (w) she married Kealaimoku (k) their issue was Kolia (k) Akamu (k) and Mrs. Kaumana Pilahiulani Widemann (w), we have come to Punamanokalanipo (w), wife of Kealaimoku (k). Now we have the ancestors of Kealaimoku (k), father of Mrs. Kaumana Pilahiulani Widemann (w), through the lineal line of Kalonaiki (k) and Kalonaiki (k), Hanalaaiki (k) and Hanalaanui (k) down to Kihanuilulumoku (k) and to his son Liloa (k) descended Hakau (k) and Umialiloa (k) married Kapukini (w) issue Kapulani (w) Keanuiaumi (k) Kealiiokaloa (k) married Makuahineopalaka (w) their issue is Kukailani (k), he married Kaohukiokalani (w) their issue is Makakaualii (k) married Kapukani (w) their issue is Iwikauikaua (k) married Keakamahana (w) their issue was Keakealani (w) married Kaneikauaiwilani (k) their issue was Kalanikauleleiaiwi (w) she married Kaulahea (k) their issue was Kekuiapoiwanui (w) she married Kekaulike (k) their issue was Kamehamehanui (k) married Kekumano (w) their issue was Peapeamakawala (k) married Kekualaula their issue was Kalawa (k), Kukailimoku (k) and Kawahinekauwaole (k) married Kaiwila their issue was Kealaimoku (k) married Punamanokalanipo (w) their issue was Kolia (k) Akamu (k) and Mrs. Kaumana Pilahiulani Widemann. We have come to Peapeamakawala (k) here are the ancestors of his wife Kekualaula-o-Keaunui-a-Maweke (w): Kalonaiki (k) married Kikena-a-ewa (w) their issue is Piliwale (k) married Paakanilea (w) issue Kukaniloko (w) married Luia (k) issue Kalanimanui (w) married Lupekapu (k) issue Kaihikapu (k) married Kanehoalani (w) issue Kakuhiehewa (k) married Kahaiaonui (w) issue Kaihikapuakahoohewa (k) married Kaa-a-Hoohila (w) issue is Kahoowahaokalani (k) married Kawelolauhuki (w) issue is Kauakahiakahoowaha (k) married Mahu (w) issue is Kualii (k) marries Kalanikahimakauilii (w) issue was Peleioholani (k) and Lonokahikini (w) married Kamahana (k) issue Kaneoneo (k) married Kamakahalei (w) issue is Lelemaholani (w) marries Keaunui-a-maweke (k) their issue is Kekualaula-o-Keaunui-a-Maweke (w) she married Peapeamakawala (k) issue Kalawa (k) Kukailimoku (k) and Kawahinekauwaole (k) married Kaiwilawa (w) their issue Kealaimoku (k) he married Punamanokalanipo (w) their issue were Kolia (k), Akamu (k) and Mrs. Kaumana Pilahiulani Widemann (w).

Kaumana Pilahiulani married Hermann Widemann their issue were: Otto Kapahikapuokakae, Emma Kalanikaileleiaiwinuiamama, Martha Pilahiulani Hakaukalalapuakea Kitaapiilani, Emilie Kekauluohi, Wilhelmina Kekelaokalaninui, Alice Laukapu (dead), Ma Akahiakuleana (dead), Carl Panaewa, Alwine Kalaninuiiminaana, Hermann Kalaninuiukuhonoikamoku, Gertrude Piilanikapu-o-Lehu, Anna Kaikilaninui Kalaninuiamama; H. R. Macfarlane married Emma their issues are: Harry Keaweikekahialiioikamoku, Irmga Kamili Uminuikukailani, Selen Kalanikaumana, Mary A-a Kiliwel, C. O. Berger marries Martha their issues are: Charles Kihanuilulumoku, Hermann Alaikauakoko (dead), Olga Puna Hooipo-i-ka-Malanu

Elda Manokalanipokapuokalani, Wilhelmina Kapulani Kaumuokalani; W. Macfarlane marries Emilie their issue are: Walter Kalaninui-Kailimoku, Alice Kalanihelemailunaapiia, Guy Kalanimalokuloku-Kepookalani; J. M. Dowsett marries Wilhelmina their issues are: Herbert Kualii, Llewellyn Lunalilo, Aileen Kekuiapoiwa Liliha; Carl marries Helen Parker their issue is Hermann Kuihealani; C. C. Conradt marries Alwine, no issue; Wm. Lanz marries Gertrude their issue is Eruba Kaumananui Keopuolani.

EXHIBIT No. 5.

name title and pedigree of Mrs. Peke Stone and Mrs. Maria A. Boyd, deceased, to the so-called Crown lands of the Territory of Hawaii, now held by the Government of the United States.

AFFIDAVIT.

TERRITORY OF HAWAII, *Island of Oahu*, ss:

On this 16th day of September, A. D. 1902, personally appeared before me Peke Stone, and, duly sworn, deposes and says, that she is entitled to a certain portion of the so-called Crown lands, by reason of her relationship and connection by blood to Kamehameha III, or Kaiukeouli, one of the reigning sovereigns under the monarchy of the Hawaiian Islands. By tradition which is handed down from parents to children she proclaimed and swore that her father, Napunako, before dying, told her and her sister, Maria A. Boyd, deceased, their pedigree and history of his birth, and solemnly made them promise that they will never divulge its contents unless they were slighted by the reigning sovereigns or some petty chief. He told them that if they wish to prolong their lives in this world they must be silent, for the lives of those connected with the Kamehamehas were continuously in danger if found out. He stated to them that he was the son of Malu-Kakalani, with Pupuka, her husband by ancient marriage (hooao). Maluleiliokalani was the daughter of Namahana (w) and Kekuamanoha (k), both brother and sister, a savage custom among the chiefs of those times. Namahana (w) and Kekuamanoha (k) were the children of Kekaulike and Haalou (w). Now, this same Kekaulike was the father of Kamehameha Nui, or Kamehameha the first, with Kekuiapoiwa (w). Kamehameha the first married (hooao) Keopuolani and had issue Liholihi (Kamehameha second) and Kaiukeouli (Kamehameha third).

Through this pedigree, which is undisputed, and which was well known by the high chiefs in the past, she claims recognition in the so-called Crown lands, formerly the private property of Kamehameha the third.

MRS. PEKE STONE.

Subscribed and sworn to before me this 16th day of September, A. D. 1902.

EXHIBIT No. —.

Before the subcommittee of the Senate Committee on Porto Rico and Pacific Islands.

PETITION FOR LEAVE TO FILE DOCUMENTS BY THE OAHU RAILWAY AND LAND COMPANY.

The undersigned, the Oahu Railway and Land Company, a Hawaiian corporation, on behalf of itself and other corporations whose bonds were held by the Hon. A. S. Humphreys, at that time first judge of the circuit court for the first circuit of the Territory of Hawaii, improper investments for trust funds, asks leave of this commission to file, as showing errors of fact and law in said holding, copies of the following documents:

1. Certified copy of master's report in the matter of the estate of Bernice Pauahi Bishop, deceased.
2. Certified copy of record of circuit court, showing approval of Hon. George D. Gear, second judge of circuit court, of said report.
3. Certified copy of master's report in re the guardianship of Anna T. K. Parker.
4. Certified copy of the decision of the supreme court overruling Judge Humphreys on the power of trustees to invest trust funds in industrial securities in the Territory of Hawaii, in re guardianship of Anna T. K. Parker.

Respectfully submitted.

OAHU RAILWAY AND LAND COMPANY

By its attorneys, HATCH & SILLIMAN.

In the circuit court of the first judicial circuit, Territory of Hawaii
In the matter of the estate of B. P. Bishop, deceased.

CERTIFICATE.

TERRITORY OF HAWAII, *Honolulu, Oahu, ss:*

I hereby certify that the document hereto attached is a full, true and faithful copy of the report of the master on file in the clerk's office of the circuit court of the first judicial circuit, Territory of Hawaii.

Witness my hand and seal of said court at Honolulu, Oahu, this 24th day of September, A. D. 1902.

[SEAL.]

J. A. THOMPSON,

Clerk Circuit Court of the First Circuit

In the circuit court of the first judicial circuit of the Territory of Hawaii. In the matter of the estate of B. P. Bishop, deceased.

REPORT OF GEORGE A. DAVIS, MASTER, TO THE HON. GEORGE D. GEAR, SECOND JUDGE OF THE CIRCUIT COURT OF THE FIRST JUDICIAL CIRCUIT.

[Sitting in probate upon the annual account of the trustees under the will, for the year ending June 30, 1901.]

The trustees charged themselves with the following sum, \$285,040.00 and then asked to be allowed the sum of \$255,907.48, leaving the balance of \$29,133.40.

I have carefully examined the accounts and the vouchers as filed in this court and find them correct. The accounts are kept in a satisfactory manner, and the system adopted by the trustees as to the expenditure of the money of the trust estate used in the running of Kamehameha schools is carefully guarded.

The trustees of this estate have invested \$47,850 of trust funds in certain securities, to wit, Oahu Railway and Land Company's 6 per cent bonds and the McBryde Sugar Company's 6 per cent bonds. The provisions of the will of the late Mrs. Bishop as to investments by trustees of trust funds are as follows:

Par. 13. I direct my trustees to invest the remainder of my estate in such manner as they may think best. I give unto the said trustees full power to lease or sell any portion of my said estate and to reinvest the proceeds and the balance of my estate in real estate, or in such other manner as to my said trustees may seem best.

Par. 17. (First codicil.) I give unto the trustees named in my will the sole power to sell and dispose of any lands, or other portion of my estate, and to exchange lands and to otherwise dispose of the same, and to purchase land and to take leases of land whenever they think it expedient, and generally to make such investments as they consider best.

Under these paragraphs there is a large authority on the part of the trustees to invest the trust funds, and that authority is of the broadest kind. The extent of this authority seems to be indicated by the fact that these trustees have power to carry on the business of cattle ranches.

Par. 17. (First codicil.) And I further direct that my said trustees shall not sell any real estate, cattle ranches, or other property, but to continue and manage the same unless, in their opinion, a sale may be necessary for the establishment and maintenance of said schools or for the best interests of my estate.

There is, unfortunately, no statutory authority in this Territory directing trustees to invest trust funds in their hands in securities authorized by the statute. Such legislation would be wise and of great benefit to trustees and to courts of equity. In England the trustee act of 1893 expressly authorizes the investment of trust funds in securities set out in the act, and much danger and risk is avoided both by the trustees and their advisers. In Massachusetts the right of a trustee to invest in corporate stocks and bonds is fully authorized. (See Dicken's App., 152 Mass., 184.)

The rule as to the investment of trust funds in the absence of a statute is that a trustee shall exercise a sound discretion. The supreme court of the Hawaiian Islands in the case in re Estate of Banning (Hawaiian, 453), laid down the rule that in the absence of a statute limiting the class of securities in which the trust funds may be invested, the court could not undertake to direct what securities only a trustee may invest in, so as to exonerate him in case of loss. This would trench upon legislative functions. It is required of a trustee in making investments that he exercise that prudence which is used by men in the investment of their own funds, having regard not only to the interest to be made but to the security of the principal and of the permanency of the investment; the trustee must act with honesty, prudence, faithfulness, and with a sound discretion.

The principal wealth of this country is derived from the cultivation and manufacture of sugar. Corporations have been formed and vast sums of money have been invested in modern machinery and in fertilizing the soil so that it shall be productive steadily, and surely the sugar industry has grown to its present prosperous condition. The

corporations who own and control the plantations of these islands have acquired title to the lands in fee simple, or have secured long leases, and the prudent investor is amply protected against loss. The first mortgage bonds of these great corporations are, in my opinion, a safe investment. The assets shown in the evidence taken by me on the several hearings and attached to this report can lead to but one conclusion, and that is that such investments are both permanent and safe.

The value of real estate in Honolulu and elsewhere in this Territory depends largely upon the sugar industry. It is, in fact, the only great source of wealth that we have, and our commercial and financial existence depends upon this industry, and the real estate of this country would not be a safe investment if this great industry, by any unforeseen circumstances, was crippled or destroyed or rendered unprofitable. Great wealth has been acquired in the past from the production and manufacture of sugar, and the future is reasonably safe.

Chief Justice Shaw, in the case of *Lovell v. Minot* (20 Pick., 119) held the rule claimed by the appellant that no investment can be considered safe or can be approved by a probate court or a court of equity except in public securities, however well supported by authorities, is a rule established in English courts of equity, is wholly inapplicable to this country and untenable. The court in this case held that a investment made by a trustee or guardian upon a promissory note which was secured by shares in a manufacturing corporation where the amount of the loan was about three-fourths of the par value of the shares, such investment was made with sound discretion. In the case of *Harvard College v. Armory*, in 9 Pick., 461, the court held all that can be required in such a case is that the trustee shall conduct himself faithfully and exercise a sound discretion in making an investment. They also added:

Such is the fluctuating character of all funds that it is difficult, if not impossible to lay down any rule broad enough to meet all cases.

1 Lewin on Trust, page 604, says:

The court will not in general control the discretion of trustees in reference to the adoption of any particular species of investment.

Upon an examination of the evidence taken before me on the several hearings as to the bonds of the Oahu Railway and Land Company, I find that the capital stock of the company is \$4,000,000; that the bonded debt (6 per cent coupon bonds) is \$2,000,000; the company has assets which are valued at \$7,004,826.42; the value of the assets directly covered by a deed of trust to secure the bondholders is estimated at \$5,733,804.96. Taking this valuation it would leave a surplus of assets conveyed by deed of trust to secure the bondholders of \$3,733,804.96.

Admitting that the valuation placed upon the assets is too high, and that \$4,000,000 would be a conservative estimate, a surplus of \$2,000,000 would be ample security for the bondholders and would make the investment a safe and sure one.

The bonds of the Oahu Railway and Land Company are redeemable in seven years, and in these times of great depression and scarcity of capital they stand at a premium of from 4 to 5 per cent. An itemized statement of the assets of this company included in the deed of trust with the company's valuation thereon, is attached to this report. Also find from the evidence that the company is paying 6 per cent upon a capital of \$4,000,000.

I have no hesitation in recommending to your honor that an investment of trust funds in the bonds of the Oahu Railway and Land Company is a safe, conservative, and prudent investment, and that a trustee who invests in these bonds acts with sound discretion, prudence, and faithfulness.

As to the investment of \$41,850 by the trustees in the 6 per cent bonds of the McBryde Sugar Company, upon the evidence taken before me at the several hearings, it appears that the value of this great corporation is about \$4,881,450, and the mortgage bonds issued are only \$750,000. Such an excess of assets and such valuable property as is possessed by this company, to wit, 13,031 acres of land held in fee simple, of which 6,000 acres is cane land and under cultivation, leaves no room for doubt as to the protection and security provided for the redemption of these bonds.

Not only are the bondholders protected at a conservative estimate of the valuation of the assets, to wit, \$4,000,000, by a surplus of about \$3,250,000, but the property, in the event of the total failure of the production of sugar in this Territory, would yield an income of 5 per cent upon \$500,000 if used as a cattle ranch alone; but it seems to me to be absurd to speculate upon the ultimate failure of sugar in this Territory. The value of the securities may fluctuate, but the enormous output of sugar and the vast sums invested in its production and cultivation place the industry beyond any question as one which will be safe in the future.

On this plantation there was cane enough in the ground this year to pay the entire bonded indebtedness. The holders of these bonds are amply protected. The investment of the trust funds by the trustees in the bonds of this corporation I find was made with prudence and faithfulness, and the trustees in making such investment exercised a sound and wise discretion. The evidence taken at the several hearings is attached to this report, and must satisfy the most skeptical that the McBryde Sugar Company's 6 per cent bonds are among the gilt-edge securities of this Territory.

THE DEED OF TRUST.

I have examined the deed of trust of the McBryde Sugar Company, Limited, to F. M. Swanzy, George R. Carter, and E. A. Woodhouse, as trustees for the bondholders, which is dated the 1st of July, A. D. 1900. Practically all of the assets of the corporation are conveyed to the trustees of the company, present and future, excepting only the capital stock of the company purchased by the company and subject to the usual proviso for redemption on payment of bonds, principal, and interest and the further proviso that until default in the payment of the bonds, principal, and interest the company should and do possess, operate, maintain, and enjoy all of the property conveyed by the deed. The trustees are to hold the property upon trust in case of default in payment of the interest upon any of the said bonds and in the payment of the principal when the same becomes due. After such payment shall have been demanded, or in case there shall have been a default in the careful observance and performance of any of the covenants or conditions of the deed or the bonds or coupons, and such default shall continue for three months after demand has been made for payment of such interest or principal, and in case default shall be made in such

payment, then and in either of said cases the trustees may enter in upon and take possession of all the property and operate it, and out of the proceeds pay the expenses, accrued interest, and the bonds.

In the second paragraph it is provided that in case of any default in entering into possession, as last mentioned, the trustees, if they deem best, may not operate the property for the payment of the bonds. They may only until a forced sale and disposition of all the property can be made. Then all the property, or any portion thereof which may be necessary, may be sold at public auction to the highest bidder. The property may be sold either in parcels or in lots, and may be in bulk as of the whole property, should such sale be deemed best for the interests of the bondholders, as well as of the grantor. From the proceeds there may be deducted the expenses of sale, applying the further proceeds to the payment of any amounts remaining due either as interest or principal of the said bonds; and if there remains a surplus after such payment, said surplus shall be paid over to the grantor.

Sec. 4. The power of sale hereinbefore set forth is in addition to the right of entry and foreclosure as now provided by law for mortgage foreclosure or for any rights of the authorities under proceedings in equity for such foreclosure, and nothing in this deed contained shall prevent the trustees from proceeding under the terms of the deed in the ordinary foreclosure proceedings as above mentioned.

Sec. 6. In case of default in the payment of interest on any of the bonds hereby secured, the coupons therefor having been presented and payment demanded, and should such default in payment continue for the period of three months after such demand, then and thereupon the principal of all of said bonds outstanding and unpaid shall at the option of the holders of a majority of the said bonds, signified in writing, become immediately due and payable: *Provided*, That nonaction of any of said bondholders, in case of any default, shall not extend to and shall not affect any subsequent default or any rights arising therefrom.

Sec. 7. In case of any such default as aforesaid, and the election on the part of the bondholders to consider all of said bonds as immediately due, a request in writing to be signed by the holders of such majority of said bonds may be made upon the trustees, their successors or successor, to enforce the rights of the bondholders under the deed by entry, sale, action at law, or a suit in equity, or any other course that may be deemed expedient and for the benefit of the bondholders; but said trustees, their successor or successors, shall not be bound to take such action until a proper indemnification has been executed to the said trustees, their successors or successor, and they shall stand responsible for all costs, charges, and expenses to be incurred by them in making such entry, sale, or other proceedings are requested. If such indemnification shall not be made and executed to the satisfaction of such trustees, their successors or successor, then they shall not be liable for any failure to comply with a request contained in such requisition shall not be taken to impair or effect any rights which may be acquired by reason of any subsequent default.

It appears to me that the sixth and seventh sections do not contain a power of sale, but a provision under which a majority of the bondholders can declare the bonds due on default in payment of the interest. The power of sale in default of payment is contained in the second section and is exercisable on a default of payment of interest for three months after demand.

The fourth section refers to the power of sale hereinbefore set forth and states that it is in addition to the right to enter and foreclose, as now provided by law for mortgage foreclosure.

It appears to me that the distinction between the two cases is this: Where, on default of payment of interest, the bondholders do not choose to declare the bonds due, the court would not decree a sale for nonpayment of interest (the payment of interest and costs were tendered before the decree was signed); where the bondholders choose to declare the bonds due, then time would be deemed to be the essence of

the contract and relief would not be granted. There can be no doubt that the exercise of the power of sale by the trustees, except where a majority of the bondholders act, is discretionary; but trustees for bondholders must act so as to protect their cestuis qui trust, and cases can be conceived as arising where action on the part of the trustees would be a duty and not an act of discretion.

It also appears to me that a court of equity, notwithstanding the provision in this deed of trust that a majority of the bondholders may, by signing in writing that the principal of all of said bonds shall become due and payable after default has been made in the payment of the interest upon any of the bonds for a period of three months after demand, would afford ample protection and relief to a minority of the holders of the bonds, or to a single bondholder.

The corporation may elect to pay some bondholders and to postpone others, and if they paid all the bondholders but one, could it be held that he is precluded from proceeding with whatever remedies the law would otherwise give him?

In a well-considered case the Supreme Court of the United States held that where the terms of the mortgage claimed that the conveyance was for the purpose of securing the payment of the interest as well as the principal of the bonds issued under it and claimed that the mortgagor's right of possession should terminate upon a default of the payment of the interest as well as the principal of any of the bonds, the court took the view that independent of the provisions of the other articles, the trustees of the mortgage, or on their failure so to do, any bondholder on the nonpayment of any installment of interest, or of any bond, might file a bill for the enforcement of the security by the foreclosure of the mortgage and sale of the mortgaged property. This right, says Justice Matthews, belongs to each bondholder separately, and its existence is not dependent upon the cooperation or consent of any others or of the trustees. It is properly and strictly enforceable by and in the name of the latter, but if necessary may be prosecuted without and even against them.

The first covenant contained in the deed of trust, providing a remedy in case of default in the payment of the interest upon the bonds, or the principal, brings the holder of a single bond and the minority under the rule laid down by the Supreme Court in the case of *Chicago Railroad Company v. Foskick* (106 U. S., 47.)

Having come to the conclusion that the rights of the minority of the bondholders are amply protected by the provisions of the trust deed, it seems useless to speculate upon the possibility of a failure of this corporation to pay the interest upon its first-mortgage bonds, because the security given under the deed of trust exceeds the amount of the face of the bonds four or five times; the form of the deed of trust under such circumstances is not material, but this deed of trust affords ample protection for the minority of the bondholders.

The Oahu Railway and Land Company last year paid the interest on its bonds and also 6 per cent on its capital stock of \$4,000,000, which is twice the amount of the bonds and equivalent to 18 per cent interest on the total amount of the bonds. The provision in the trust deed that a majority of the bondholders are to rule, is a wise provision, provided the rights of the minority, upon the failure to pay the interest or principal of these bonds, are protected. The investment of trust funds, therefore, in the bonds of the Oahu Railway and Land

Company, or of the McBryde Sugar Company, is a safe and prudent investment, and the trustees in exercising the discretion given to them under the will as set forth in this report was the exercise of a sound discretion, and I do not hesitate to recommend to your honorable approval of these investments for the reasons herein stated.

I have also made a thorough examination as to the value of several investments made by the trustees of the trust funds, other than those secured by bonds, and I find that the securities are ample to cover the investments, and that the trustees in making such investments exercised a wise and sound discretion. The evidence taken upon the hearings as to the value of these investments is attached to this report.

I have also made an examination and investigated as to the revenue derived from lands under lease and otherwise, and I find that the lands derived from the lands are all that can be reasonably obtained therefor; such land as is owned by the trustees and is not yielding revenue arises from the fact that such lands are not in a condition to be rented, some of it being swamp land which would cost a large sum of money to fill so that it could be made use of. The trustees have adopted a policy of keeping the land in and around Honolulu the most unfit to be leased at the present time so that they may be made available for manufactories. I think this policy has been justified and in the near future large rentals will be secured. It is only swamp land and lands of that character that is at the present time unleased.

During the year ending June 30, 1901, the trustees have expended about \$3,000 more than the net income derived from the estate. The net income amounting to \$110,268.53. I do not think it wise that the trustees should expend in any one year more than the net income derived from the estate in the support and maintenance of the Kamehameha schools, either in making improvements or additions thereto unless they are satisfied that anything taken from the corpus of the estate will be refunded during the succeeding year.

W. O. Smith, one of the trustees, said that he thought it desirable that the trustees should have in view and that end should be sought to wit, to keep the expenditure for these schools within the net income. He thought, however, that the trustees were not restricted to the net income in maintaining and establishing these schools.

It certainly appears to me that the schools are in an excellent condition at the present time, and while perhaps not fully established the trustees should endeavor as far as possible to keep the expenditure within the net income in supporting and maintaining and making improvements to these schools, and I so recommend to your honorable approval.

I am of opinion that the trustees have carefully and prudently managed the affairs committed to their charge, and that they deserve great credit for their untiring efforts and zeal in establishing and maintaining such excellent institutions of learning as the Kamehameha schools, and especially so in establishing manual schools where trades are taught, because it is of far greater importance that the pupils who attend these schools shall be able at the end of their course to go out into the world and be able to earn an honest livelihood and thus become useful members of society; but I am also of opinion that should any of the scholars who attend these schools show an inclination and ability to master the higher branches of education, they should, so far as there are funds, be enabled to pursue these studies so that when they leave the schools they may be able to enter the higher institutions

earning on the mainland. Such cases may be exceptional, but it was evidently the intention of the testatrix that such opportunities should be afforded to the studious and intellectual.

Exhibit A, attached to this report, is the eleventh annual report of the Oahu Railway and Land Company and a statement of its assets.

Exhibit B, attached to this report, contains testimony as to the financial standing of the McBryde Sugar Company.

Exhibit C contains a list of investments showing the rates of interest, amounts, and names of parties to whom made and securities up to June 30, 1901.

Exhibit D contains a statement of ranch rents for 1901 of the Oahu Railway and Land Company.

Exhibit E contains a list of the assets of the Oahu Railway and Land Company covered by a deed of trust.

Exhibit F contains the deed of trust from the McBryde Sugar Company, Limited, to the trustees.

Exhibit G contains the deed of trust from the Oahu Railway and Land Company to the trustees.

Exhibit H contains the evidence taken at the several hearings by me as master.

I recommend that the sum of \$255,907.48, as charged in Schedule C of the trustees' account, be allowed. The trustees having charged themselves with the sum of \$285,040.88, leaving a balance on hand on the 30th day of June, 1901, of \$29,133.40, is correct, and I report and recommend that the account as filed be passed and allowed.

Respectfully submitted.

GEO. A. DAVIS, *Master*.

In the circuit court of the first judicial circuit of the Territory of Hawaii. In re Estate of B. P. Bishop, deceased. Monday, April 14, 1902.

Miss Neumann, stenographer. Report of George A. Davis, master, on the annual accounts of trustees for the year ending June 30, 1901. Master appearing in person and Messrs. Holmes and Stanley for the trustees. Court orders the master's report approved and the master to be paid a fee of \$500.

TERRITORY OF HAWAII, *Island of Oahu, ss:*

I hereby certify that the foregoing is a full, true, and correct copy of the clerk's memorandum of the proceedings had in the above-entitled matter.

Witness my hand and the seal of the circuit court of the first circuit at Honolulu, Oahu, this 24th day of September, A. D. 1902.

[SEAL.]

J. A. THOMPSON,

Clerk Circuit Court of the First Circuit.

In the circuit court of the first judicial circuit, Territory of Hawaii, in the matter of the guardianship of Annie T. K. Parker, a minor.

CERTIFICATE.

TERRITORY OF HAWAII, *Honolulu, Oahu, ss:*

I hereby certify that the documents attached hereto are full, true, and faithful copies of the report and supplemental report of the master

on file in the clerk's office of the circuit court of the first judicial circuit, Territory of Hawaii, in the above-entitled matter.

Witness my hand and the seal of said court, at Honolulu, Oahu, 24th day of September, A. D. 1902.

[SEAL.]

J. A. THOMPSON,

Clerk of the Circuit Court, First Circuit

In the circuit court of the first circuit, Territory of Hawaii, in and to be reported to the court. In the matter of the guardianship of Annie T. K. Parker, minor. At chambers. Before Hon. A. S. Humphreys, first judge of said court.

MASTER'S REPORT.

On the second annual account of A. W. Carter, guardian of the estate of said minor, for the year ending November 15, 1901, December 5, 1901.

Said account comprises the usual schedules: (a) receipts, (b) expenditures, (c) balance sheet, showing unexpended balance. The guardian charges himself with total receipts of \$49,396.26, asks credit for expenditures of \$45,161.90, and shows an unexpended balance (as schedule c) of \$4,234.36.

In addition to said account, guardian files amended inventory of ward's estate, both real and personal, including a recapitulation of loans and investments. Also a report accompanies said annual account in which guardian asks that he may be hereafter allowed to file annual accounting of said ward's estate on the 31st day of December each year instead of the 15th day of November, in order that accounts of the Parker ranch (a one-half interest in which comprises the principal portion of said ward's estate), which are annually submitted on the 31st of December, may be filed with such annual account.

The master herein appointed recommends that it be so ordered by the court, and that said guardian be instructed to file the account of said Parker ranch for the present year, and from November 15, 1901, when his last account of said ranch was rendered on the 31st of December, 1901.

The master's summary of the guardian's receipts is as follows:

Cash on hand, as per first annual account.....	\$3.56
Collections on mortgages and notes.....	15.70
Items disallowed in first annual account.....	39
Net earning, Parker ranch.....	26.55
Interest on notes, mortgages, and investments.....	2.68
Refund first assessment Hawaiian Cattle Company, 10 per cent on 50 shares.....	50
Total receipts.....	49.39

With respect to the last item of \$500, refund first assessment on Hawaiian Cattle Company, the same being 10 per cent on 50 shares, master will state that in first annual account of guardian, filed December 4, 1900, an item of expenditure, \$510, appears, being first assessment on 50 shares of said stock. This investment was authorized by order of Judge Perry, of date October 27, 1899. Master is informed by guardian that the said company was now defunct, and that the \$500, as shown above, was refunded to him on first assessment.

Summary of expenditures as follows:

Allowance to minor's mother from October 25, 1900, to January 25, 1901, inclusive, at \$150 per month	\$450.00
Allowance to minor's mother from September 25, 1899, to January 25, 1901, at \$200 per month	\$3,200.00
Less previously paid	2,400.00
Balance from January 25, 1901, to October 25, 1901, at \$200 per month ..	800.00
Master's fee heretofore allowed and court costs	103.50
Guardian's commissions (first and second annual accounts)	3,826.19
Traveling expenses of ward	37.50
Income tax	521.09
Administration expenses	130.79
Investments	36,960.00
Earned interest on investments (\$40 being premium, and \$10 broker's commissions)	532.83
Total expenditures	45,161.90

The items of expenditure mentioned in said account are proved by duly authenticated vouchers, which are on file herein, except in the case of investments in bonds and notes. In these cases such bonds and notes have been inspected by the master and found to be in proper form.

Allowances as above to the mother (who is guardian of the person of said minor) were authorized by order of Judge Humphreys. (See order of 19th day of February, 1901, as of the 2d day of January, A. D. 1901.)

Master's fee of \$100 was also allowed by said order, as was guardian's commission under first annual accounting in the sum of \$2,258.49; guardian's commissions of \$1,567.70 under second annual account are correctly and legally computed.

Traveling expenses of said minor having been heretofore allowed, the master considers items above a proper charge.

Administration expenses of \$130.79, which sum includes retainer of \$100 to attorneys in re Parker will and \$28.79, minors' proportionate share (one-fourth) of expense of incorporating Hawaii Cattle Company, Limited, are in master's opinion necessary and proper charges, and I therefore recommend their allowance.

Following are investments made during the year:

Elizabeth J. Knight note	\$6,000
McBryde Sugar Company bonds, at 99	3,960
McBryde Sugar Company bonds, at 100	23,000
Waialua Agricultural Company bonds	4,000
Total	36,960

The Elizabeth J. Knight note of \$6,000, on which interest (at 8 per cent) is paid up to September 29, 1901, is secured by 25 Dowsett & Co. bonds of the par value of \$1,000 each. These bonds, as the master is informed on thorough investigation, are not on the market, but in the amount of \$25,000 are considered by bankers, who are thoroughly informed, as ample security for a loan of \$6,000, as above.

McBryde Sugar Company bonds (6 per cent), secured by a mortgage upon all of the property of the corporation, are now selling on the market for par value, or a fraction above, and are considered a good investment.

Waialua Agricultural Company bonds, on which a premium of 1 per cent was paid by guardian, are also quoted at par value.

The Parker and Davis mortgages, together with the Raymond note with interest, have all been paid in full since first annual account was filed.

In conclusion, I hereby respectfully call the attention of the court for its consideration, to the matter of guardian's bond, which, in the opinion of master, is not commensurate with the interests involved. When said guardian was appointed, under order of Judge Stanley, dated the 25th day of September, 1899, his bond as such guardian was fixed at \$25,000, and it has so remained until the present time. It will appear from the amended inventory filed herein by said guardian on November 15, 1901, the personal estate of said ward consists of loans and investments to the value of \$54,250, together with a one-half interest in 22,000 head of cattle, 2,060 horses, and all other live stock on the Parker ranch, and a one-half interest in certain leasehold interests, set out in full in said amended inventory. The annual revenue of said ward's estate, as shown by guardian's charge for commission due him for his services during the year beginning November 1, 1900, and ending November 15, 1901, is \$28,753.93.

From the above figures and from inquiry as to the value of the personal property of the ward not valued in said inventory, it is the master's opinion that the sum of the total value of the ward's personal property and her annual income is in the neighborhood of \$300,000. I therefore recommend that the amount of the guardian's bond be increased to the sum of \$500,000. I also recommend that the guardian's second annual account be approved as rendered.

Respectfully submitted.

F. J. RUSSEL, *Master*.

DECEMBER 12, 1901.

In the circuit court of the first circuit, Territory of Hawaii, in probate in the matter of the estate and guardianship of Annie T. K. Parker, a minor, at chambers, before Hon. A. S. Humphreys, first judge.

SUPPLEMENT OF MASTER'S REPORT ON GUARDIAN'S SECOND ANNUAL ACCOUNT.

The master's report filed herein on the 12th day of December, 1901, was referred back by the court for further investigation as to the quality of the security of the bonds of the Waialua Agricultural Company, Limited, in which the guardian has invested \$4,000, and the bonds of the McBryde Sugar Company, Limited, in which the guardian has invested \$27,000.

In conformity with the instructions of the court, the master has made inquiry and taken evidence, according to the custom and practice of this court in such matters, from the officers and employees of both companies and of others. The evidence taken at the hearings in connection herewith has been transcribed and the transcript is hereunto annexed and hereby made a part hereof.

The master finds:

1. As to the Waialua bonds: The capital stock of the corporation is \$4,500,000, all outstanding and all paid up. The stock is quoted on the market at Honolulu at 55 per cent of its par value. The total assessed value of the corporation's property last January was \$3,500,000 and a large amount of money has been expended upon permanent

improvements during the present year. The trust deed, which was given by the company on April 1 of this year to secure its bonded indebtedness, authorizes the sale of bonds in the amount of \$1,000,000, of which \$610,000 worth have been sold, and the balance of \$290,000 worth are still in the treasury of the company. Said trust deed contains the following clause:

In case of default in payment of interest on any of the bonds hereby secured, the coupons therefor having been presented and payment demanded, should such default of payment continue for the period of three months after such demand, then and thereupon the principal of all of said bonds outstanding and unpaid shall, at the option of the holders of a majority of said bonds, signified in writing, become immediately due and payable, provided that nonaction of any of said bondholders in case of any default shall not extend and shall not effect any subsequent default or any loss arising therefrom.

Said trust deed conveys all of the property of the corporation. Although the property is new, it is well developed and is expected to pay dividends in a few years.

2. As to the McBryde bonds: The capital stock of the corporation is \$1,500,000, of which \$3,313,880 is outstanding and paid up and \$6,120 is in the treasury of the company. The stock is now quoted in the Honolulu market at about 25 per cent of its par value. The assessed value of the entire property of the corporation last January was said to be \$1,242,815, and about \$792,500 has been expended since last assessment on permanent improvements to the property of the company. The trust deed given by the company conveys its entire property, authorizes an issue of \$750,000 in bonds, and contains practically the same clause as to the right to foreclose upon nonpayment of coupons as is quoted above. The entire issue of bonds has been sold. The company was organized in 1898, is being rapidly developed, and is expected to pay its first dividends in a few years.

The property of the Waialua plantation appears to be worth about \$2,000,000 and to be good security for a loan of \$1,000,000.

The property of the McBryde plantation appears to be worth not less than \$2,000,000 and to be good security for a loan of \$750,000.

The bonds in both cases are secured by first-mortgage deeds of trust. Respectfully submitted.

F. J. RUSSEL, *Master*.

Re the guardianship of Anna T. K. Parker. Appeal from circuit judge first circuit. Submitted June 27, 1902. Decided July 25, 1902. Galbraith and Perry, JJ., and W. Austin Whiting, esq., of the bar, in place of Frear, C. J., disqualified.

Guardians or trustees in this Territory are not restricted in the investment of trust funds to public securities or real estate mortgages.

Investment of trust funds in the bonds of private industrial corporations may be made where such bonds are amply secured by mortgage deed of trust on real estate and personal property and are regarded with favor by prudent men seeking investment of their own funds.

A provision in a trust deed securing bonds requiring the assent of a majority of the bondholders to compel the trustees to proceed to foreclose for default in the payment of interest on the bonds does not in the absence of express stipulation in the deed take from the minority or single bondholder the right to pursue the usual remedies in a court of equity.

A majority-consent clause is not a delegation of authority by a trustee who buys such bond.

A purchase of bonds by a guardian of a minor from a corporation of which he is the treasurer and a director is voidable at the election of the cestui que trust.

OPINION OF THE COURT BY GALBRAITH, J.

This appeal is from the decree of a circuit judge of the first circuit surcharging a guardian with the amount of certain investments of the ward's funds, as shown by his annual account.

It appears that the ward, Anna T. K. Parker, is now eight years old and that the value of her personal property and annual income was found by the master to be in the neighborhood of \$300,000; that the second annual account of her guardian, Alfred W. Carter, filed November 15, 1901, shows loans and investments in the sum of \$54,250; that this account discloses certain investments in the bonds of local industrial corporations as follows: 27 bonds of the McBryde Sugar Co., Ltd., \$26,960, and 4 bonds of Waialua Agricultural Co., Ltd., \$4,050, and 2 bonds of the Oahu Railroad and Land Co., Ltd., \$1,500 total of \$32,510; that the account was referred to a master who later reported recommending that the same be approved as filed; that the court referred the account back to the master with instructions to take testimony and to make further investigation into the character of the security for the several bonds in which the guardian had invested the funds; that after taking testimony the master filed a supplemental report in which he recites that "the property of the Waialua plantation appears to be worth about \$3,500,000 and to be good security for a loan of \$1,000,000," and that "the property of the McBryde plantation appears to be worth not less than \$2,000,000 and to be good security for a loan of \$750,000," and that the bonds in both cases are secured by first mortgage deeds of trust; that the issue of the bonds in the first company was for one million dollars and in the latter for seven hundred and fifty thousand dollars; that the court refused to approve the master's report and caused additional testimony to be adduced, whereupon the court found the accounts to be "correct and in order except in one particular, namely, in respect to the investment of the sum of \$27,000 in bonds of the McBryde Sugar Company, Limited," and approved the accounts in all respects except as to the bonds and investments; these were disapproved and the guardian was surcharged with the amount of the investment (\$32,510), also with interest thereon at the rate of six per centum per annum from the date of the respective investments; that neither before the master nor before the court was any testimony adduced as to the security for the Oahu Railroad and Land Company's bonds except the admission that they were secured by deed of trust in form similar to that securing the plantation bonds; that from this order the guardian appealed and to represent the ward pending the appeal the court appointed a guardian ad litem.

The decision of the court below was based upon two grounds, namely, (a) that the common-law rule forbidding the investment of trust funds in any securities except real-estate mortgages and public bonds was in force in this Territory, and (b) that on account of the form of the trust deed the guardian in making the investment violated the rule forbidding a trustee to delegate his authority; also the rule forbidding the mingling of trust funds.

Much was said at the argument and in the brief in this court on collateral subjects. We can not be expected to speculate or calculate the probabilities or chances, under certain supposed or fancied conditions of disaster or misfortune overtaking certain industrial enterprises

his community or to speculate on the motives that would prompt men to certain action under certain fancied conditions. All these might be interesting and instructive themes for the philosopher, publicist, or moralist, but they are not in issue on this appeal, and we do not care to announce a dictum upon any one of them. Is the common-law rule relied on by the court below in force in this Territory? It is admitted that there is no statute in this Territory restricting the investment of trust funds. The common law of England was not formally adopted in these islands until 1893 and then only so far as it was not contrary to "judicial precedents and Hawaiian national usage." Prior to that time the courts of these islands were free to adopt or reject the rules of the common law. (*Branca v. Makuakane*, 13 Haw., 499, 505.)

It does not appear from any of the reported decisions of this court that the rule of the common law relied on has ever been adopted in these islands. It does appear that the rule has been specifically denied and that in a contested case the court refused to adopt or follow the rule. In *re Estate of Banning* (9 Haw., 453, 461, 462), and announced the more liberal rule of a number of the States as follows: "No statutory provision limiting the investment of trust funds to specific securities existed in the Hawaiian Islands, and this court can not go further than to hold that the trustee must act with honesty, prudence, faithfulness, and exercise a sound discretion in placing trust funds for investment." (P. 462.)

It is contended that the decision in the *Banning* case is not binding authority for the reason that it was rendered prior to the annexation of the Hawaiian Islands to the United States and that none of the decisions of this court rendered before annexation are controlling except those construing statutes continued in force by the organic act or such as may have become rules of property.

This is not the view that this court as now constituted has taken of these decisions. Nor is it the view of the United States district court for the Territory or the United States circuit court of appeals for the ninth circuit. (See the *Schooner Robert Lewers Company v. Kamaka*, 114 Fed., 849.) It was held by the former court in the case last cited at nisi prius and by the latter court on appeal that a decision of the supreme court of the islands rendered in 1860 contrary to the common law (sustaining an action by the widow for damages for the death of her husband; no such action could be maintained at common law) was a part of the law of the Territory of Hawaii. What the court of appeal said in that case is pertinent here:

As will have been observed, the supreme court there expressly declared: "The principle which we now recognize will become, by judicial adoption, a valuable part of the common law of this Kingdom." Such judicial modification of the common law by the legislature of Hawaii has expressly sanctioned and ratified by section 1109 of the compilation of the laws of that country, which, as has been seen, was in turn sanctioned and ratified by section 1 of the act of Congress of April 30, 1900, above cited. There was, therefore, statutory authority for the right asserted and sustained by the court below. (*Id.*, p. 854.)

The rule in regard to the investment of trust funds as announced in the *Banning* case has been the law of this jurisdiction on that subject since the date of the decision (April 25, 1894), and will continue such until overruled by this court or until a different rule is made by legislative enactment.

Much unpleasant criticism has been made of the decision in the *Banning* case. We are inclined to think that the greater part at least of

this is unwarranted. The doctrine there announced is not new nor is it novel. It has been the law in some of the States for half a century and has been approved by the Supreme Court of the United States. Mr. Justice Gray, in speaking for that court, said:

The general rule is everywhere recognized that a guardian or trustee when investing property in his hands is bound to act honestly and faithfully, and to exercise sound discretion, such as men of ordinary prudence and intelligence use in their own affairs. In some jurisdictions no attempt has been made to establish a more definite rule; in others, the discretion has been confined by the legislature or the court within strict limits. (*Lamar v. Micou*, 112 U. S., 452, 465.)

In this opinion the decisions of the supreme courts of the several States and the rule announced therein up to that date (1884) are reviewed. From this it appears that the rule announced in the *Banning* case followed in Massachusetts, Rhode Island, New Hampshire, Vermont, Maryland, and Georgia.

We do not share the fear expressed by counsel for the dire disaster that are predicted to threaten wards and their estates unless the investment of their funds is restricted to public securities and real estate mortgages. The rule of the *Banning* case has been the law of this jurisdiction for at least eight years. The practical working of the rule for this period has not verified the predictions of evil made against its operation. If trust funds have been dissipated and lost by reason of this rule, our notice has not been called to specific instances.

In view of these facts and the absence of any Government securities in this jurisdiction for the investment of trust funds, and the general commercial, industrial, and agricultural conditions prevailing here, we do not realize that there is any pressing necessity for a change of the rule.

One of the investments approved in the *Banning* case was in bonds of the Kahuku plantation and another was in the bonds of the Oahu Railway and Land Company—the last being the same bonds that were disapproved by the court below in this case. The question was not raised in the *Banning* case as to the form of the trust deed, nor was it discussed by court or counsel. From the fact that it appears in this case that the trust deed securing the Oahu Railway and Land Company bonds contains the same provision as the plantation bonds, we assume that there was the same form of trust deed in that case as this. The McBryde bonds (and the others are in like form) recite that they are “first-mortgage coupon bonds, and are payable to bearer, in United States gold coin, at the office of the company, Honolulu, on July 1, 1910,” “and bear interest at the rate of 6 per cent, payable semiannually, and that they are secured by a mortgage deed of trust covering the property of the plantation, real and personal.” They are in the form of negotiable security, as are the coupons attached thereto. The trust deed recites the authority and purpose for its execution, the form and number of the bonds and coupons, the name of the three trustees and the certificate to be endorsed on the bonds by the trustees, and conveys to the trustees the property of the plantation set out in detail and recites the purpose of the conveyance to be “for the security and benefit of the holders of the bonds above mentioned and herein secured to be paid, and also for the like interest and benefit of all others interested in said bonds or the property to be hereby conveyed,” and that the grantor—the McBryde Sugar Company, Limited—is authorized to maintain possession of the property until after default in the payment

of the bonds or interest thereon or any part thereof. The first condition of the bond provides that if default shall be made in the payment of interest on the bonds after demand, or if there shall be a breach of any of the conditions of the bond and such breach shall continue for a period of three months, or interest remain unpaid after demand for said period, that the trustees or their successors or assigns may and, upon demand made against the grantor or its agents, shall be permitted to take charge of the property and operate the same for the purpose of paying the interest from the surplus after paying operating expenses.

The second condition is that if the trustees shall take possession under the first condition and they may deem it best not to operate the plantation, then they may sell the entire property at public auction and apply the proceeds of sale as directed in the trust.

The fourth condition provides that "the power of sale hereinbefore set forth is in addition to the right of entry and foreclosure as now provided by law for mortgage foreclosure, or for any rights or authorities under proceedings in equity for such foreclosure; and nothing in this deed contained shall prevent the trustees, their successors or successor from proceeding under the terms of this deed or the ordinary foreclosure proceedings as above mentioned."

The sixth condition is that—

In case of default in the payment of interest on any of the bonds hereby secured, coupons therefor having been presented and payment demanded, should such default in payment continue for the period of three months after such demand, then thereupon the principal of all of said bonds, outstanding and unpaid shall, at the option of the holders of a majority of the said bonds, signified in writing, become immediately due and payable, provided that nonaction of any of said bondholders in case of any default shall not extend to and shall not affect any subsequent default or any right arising therefrom.

This sixth condition it is claimed renders it impossible for the trustee (guardian) to foreclose or to collect the principal of the bond upon default of interest and that it is a delegation of his authority to the majority of the bondholders and places it beyond his power to act upon his own motion as he is required to do by the terms of the trust. Is this position correct?

Judge Gresham, speaking for the United States circuit court for the district of Indiana, in construing a similar provision in a trust deed, said:

The Chicago and Alton Company agreed to pay interest on each bond, and it conveyed its property to trustees for the "benefit, security, and protection of the persons and corporations, firms, and partnerships who should hold the bonds and trust warrants aforesaid, or any of them, for the purpose of enforcing payment thereof according to their tenor and effect." The power of a majority to control proceedings to foreclose for the payment of principal when it shall become due, at the election of a majority before maturity in 1920, is not exclusive of the right which every bondholder has to enforce the security for the nonpayment of any installment of interest on any bond. This right of a minority or even a single bondholder does not depend upon the consent of a majority. If it did, the company might be able to pay interest on the bonds held by a minority until maturity according to the terms, and even after that time, if some of counsel for defendant are correct in their position that neither before nor after maturity can the trust be enforced without the consent of at least a majority. The right which is asserted by the majority must be found in plain and explicit terms in the mortgage or it will not be recognized. It can not exist by mere implication. (*Farmers' Loan and Trust Co. v. Chicago and Alton Railway Co.*, 27 Fed., 146, 152, 153.)

The supreme court of Pennsylvania said on this question:

When default occurs the duties of the trustee become active and important; he represents all the bondholders, and is under obligation to protect them so far as property in his hands in trust for them will enable him to do so. If he neglects to move, any bondholder may proceed, by bill filed on behalf of himself and other members of the class of creditors to which he belongs, to compel a sale of the mortgaged premises, a removal of the trustee, or such other relief as may be appropriate. The bonds are not payable to the mortgagee, but to the bearer; they are not specialties, but negotiable instruments, passing from hand to hand by delivery and endorsement; they find a market in all parts of the civilized world and are held as an investment in moneyed institutions and by private persons. The mortgagee has no right to the custody of one of the bonds unless he buys it like any other in the market, and they furnish him no choice of remedies. He is shut up to the remedy provided by the mortgage and those which the courts of equity may afford him for the purpose of bringing the mortgaged property to sale. (*Commonwealth v. Susquehanna River R. Co.*, 122 Pa. St., 306, 319, 332.)

The trustee, as mortgagee [says the supreme court of Minnesota], represents the interest of all the bondholders as beneficiaries, is the proper party to institute foreclosure proceedings, but if he unreasonably neglects or refuses to discharge his duty in the premises, doubtless any bondholder may bring an action to enforce the duty for the common benefit. (*Seibert v. Minneapolis and St. L. Ry. Co.*, 52 Minn. 148, 156.)

It is plain that the principle which is gaining some ground, *that a majority of bondholders are to rule*, can not be applied in all cases. Each bond is a separate contract with the holder of the bond. The corporation may elect to pay some bondholders and to postpone others; and if they pay all of the bondholders but one, it is said that he is precluded from proceeding with whatever remedies the law would otherwise give him? In the Supreme Court of the United States, where the majority rule has been often applied, the doctrine of the right of the majority of the bondholders to rule has sprung up, the clearest and strongest expressions can be found in the rights of the single bondholder. In a well-considered case in that court, where the terms of the mortgage declared that the conveyance was for the purpose of securing the payment of the interest as well as the principal of the bonds issued under it, the court declared that a mortgagor's right of possession should terminate upon a default in the payment of the interest, as well as the principal of any of the bonds, the court took the view that, independently of the provisions of the other articles, the trust created by the mortgage, or, on their failure to do so, any bondholder, on the nonpayment of any installment of interest on any bond, might file a bill for the enforcement of the mortgage by the foreclosure of the mortgage and sale of the mortgaged property. "The right," said Justice Matthews, "belongs to each bondholder separately, and its exercise is not dependent upon the cooperation or consent of any others or of the trustees. It is properly and strictly enforceable by and in the name of the latter if necessary, may be prosecuted without and even against them. It follows from the nature of the security, and arises upon its face, unless restrained by its terms." (5 Thompson on Corporations, section 6122; *Chicago Railway Co. v. Fosdick*, 10 U. S., 47, 68; *Dupee v. Rose*, 10 Utah, 305, 309.)

It is true that there are statements made in the text-books of abstract principles, and the opinion in 39 L. R. Ch. Div., quoted in the deed of the court below, seems to support the contention of the grantor *ad litem*. However, no decision has been called to our attention, and the exhaustive research of counsel justify the inference that if there had been such decision it would have been cited, applying the rule contended for to a provision similar to the sixth condition of the McB Company trust deed above set out. The authorities above quoted demonstrate clearly that the rule contended for is not applicable to a trust deed in the form of that under consideration. The entire instrument must be considered in its construction. Thus considered it appears that the deed was intended to protect the interests of all the bondholders, not that of a majority only, but of the minority as well, and that it does not take away, or attempt to do so, from the bondholder the usual and ordinary remedies, available to all in such cases in a court of equity.

The trust deed is in the form demanded by commercial usage and persons who seek investments in such securities. To sustain the contention of the guardian ad litem would be to deny the right of guardians and trustee to invest in such securities although we might know them to be as safe as Government bonds. We are unwilling, even if it were admitted that there was in this case a technical delegation of authority by the guardian, to pursue a technicality to that extent. The rule requires that the trustee shall act honestly and discreetly and shall only invest in such securities as prudent men select when seeking investment of their own funds.

If the property covered by the trust deed is ample to secure the payment of the interest and principal of the bonds at maturity and is sufficient to commend them as safe investments to men of ordinary prudence and business judgment the guardian was justified in making the investment.

We do not understand that it makes any difference in the application of the rule relating to the investment of trust funds, in the absence of statute or rule of court, whether the trustee is testamentary or conventional except that in the former case the rule may be enlarged or restricted by the terms of the will.

If the bonds of industrial corporations are excluded, the field for the investment of trust funds in this jurisdiction is limited to real estate mortgages. There are no Government or municipal bonds available within this Territory. If the question presented was one of "first impressions" this reason would, perhaps, appeal more strongly to the legislature than to the courts, but the question in the case at bar is of changing a rule adopted after careful consideration and in operation many years without known disastrous effects and we consider this fact entitled to consideration.

On the question of the sufficiency of the security for the McBryde bonds. We will state without going into detail that we consider the evidence was ample to show that the property conveyed by the trust deed is sufficient security for the 750 bonds issued and the interest thereon.

As to the Waialua bonds the evidence was too meager to warrant a judgment, and we express none. The evidence taken in the Bishop estate matter and referred to in the decision of the court below was not made a part of the evidence in this case and was not considered. If there is any reasonable doubt in the mind of the court below as to the sufficiency of the security for those bonds that matter should be further investigated.

The objection to the investment in the Oahu Railway and Land Company bonds was based upon the form of the trust deed given to secure them. We have held that these objections were not well taken. The court below said relative to the value of the security for these bonds:

There is no evidence of witnesses before the court as to the financial standing of the company, but the court has had reference to newspaper and stock exchange reports covering a considerable period of time, as to the market value of its stock and bonds, from which it appears that its bonds have been for many months and are now selling above par and that its stock, while now selling at a little less than par, has recently sold above par. Both are held in high repute.

From this we infer that the court below would have approved this investment but for the form of the trust deed.

A further objection is urged that is fatal to a part of the investments.

It appears that the guardian purchased at private sale seventeen of the McBryde bonds of the American Sugar Company, a corporation of which he was, at the time, a director and treasurer.

The court below said on this point:

The rule is inflexibly established that where in the management and performance of the trust, trust property of any description, real or personal property, the trustee can not without the knowledge and consent of his principal directly or indirectly become the purchaser. Such a purchase is always voidable and will be set aside on behalf of the beneficiary, unless he has affirmed it after obtaining full knowledge of all the facts. It is entirely immaterial to the existence and operation of the trust that the sale is intrinsically a fair one, that no undue advantage was obtained, that a full consideration is paid, or even that the price is the highest which could be obtained. The policy of equity is to remove every possible temptation from the trustee. The rule applies just as forcibly where the trustee acts, as in this case, as the agent for another. (2 Pomeroy, 958.) As a director and as the trustee of the American Sugar Company, it was the duty of Carter to exercise an independent and unbiased judgment as to the wisdom of a sale of the McBryde bonds; as guardian of this minor it was also his duty to exercise a like impartial and unbiased judgment as to the wisdom of the purchase of the bonds by him as the trustee of the interests of his ward.

It is no defense to this act of the guardian to say that he acted in good faith and that the other directors concurred in the sale and that no injury resulted to the estate. This is admitted. The trustee cannot purchase property for his cestui que trust from himself. The purchase of these bonds from the American Sugar Company, of which the guardian was treasurer and a director, violated a settled rule of equity and the purchase can not be approved over the objection on behalf of the ward. "The general principle," says the supreme court of Wisconsin, "upon which this proposition must rest, is that no man can faithfully serve two masters, whose interests are in conflict. A man usually and naturally prefer their own interests to those of others, and where one attempts to act in a fiduciary capacity for another, the law will not allow him, while so acting, to deal with himself in his individual capacity." (Pickett v. School District, 25 Wis. 551.) "The general rule on this subject is, when a trustee of any description or a person acting as agent for others, sells a trust estate, and becomes himself interested, either directly or indirectly, in the purchase, the cestui que trust is entitled, as a matter of course, at his election to have the sale affirmed or set aside." (Borders v. Murphy, 125 Ill. 583; see also, Cumberland Coal Co. v. Sherman, 30 Barb., 553; Ives v. Field v. Cudworth, 15 Pick., 23, 31; Tomaine v. Hendricksen, 27 E., 162; 27 Am. & Eng. Encyc. Law, 195, 196, 202; Christley v. May, 13 Haw., 402; Hitchcock v. Hustace, 14 Id., 232.)

The decree appealed from is reversed except so far as it relates to the seventeen McBryde bonds purchased of the American Sugar Company and as to that it is affirmed and the cause remanded for further proceedings as may be necessary or proper, consistent with the foregoing opinion.

(Robertson & Wilder and Hatch & Silliman for the guardian. Dunne, guardian ad litem, in person.)

CONCURRING OPINION OF PERRY, J.

The English rule referred to in the foregoing opinion, that the funds may not be invested otherwise than in Government bonds or real estate mortgages, was not, as I understand it, a part of the

don law, but merely a rule adopted by the courts of chancery in the exercise of their discretion and in the enforcement of the fundamental principle that such investments should be only in the safest securities. (See 11 Am. & Eng. Encycl. Law, 815; Woerner on Guardianship, sec. 63, p. 211.) If this view is correct, section 5 of the judiciary act of 1892, which enacted the common law of England, with certain stated exceptions, as the common law of Hawaii, has no application in this matter, and the court was, in 1894, in the case of *In re Banning*, and is now in this case, in the consideration of the subject, unhampered by any statutory enactment. If, on the other hand, the rule first above referred to is to be regarded as a part of the common law of England, still the final result is the same. One of the exceptions named in the act of 1892 is, "except as otherwise * * * fixed by Hawaiian judicial precedent." Prior to the passage of that act, to wit, in February, 1890, and in September and again in October, 1892, this court, in the estate of W. C. Lunalilo (Probate Records No. 2414), permitted and approved the investment of trust funds in the bonds of at least two industrial corporations, the Wailuku Sugar Company and the Oahu Railway and Land Company, and in the stock of one mercantile corporation, C. Brewer & Company, Limited. Whether or not similar investments were approved in other cases, I am not prepared to say, but sufficient appears to show judicial precedents contrary to the alleged requirements of the common law. In the *Banning* case, closely contested by eminent counsel as it was, the point was not even suggested.

What the court said in the case last mentioned on the subject of the investment of trust funds was not obiter dictum; it was upon a point directly involved and elaborately argued. It is an insufficient answer to say that the trustee there was acting under a will, for the direction of the will was that investments were to be made "in good securities with lower rates of interest in preference to high rates with corresponding risks." The court did not hold, nor could it well have done so, that this furnished to the trustee greater freedom of action than, in the absence of a will, the law would have allowed.

While concurring in the view that the decisions of this court rendered prior to annexation are binding on the circuit courts of this Territory unless and until reversed or modified, I do not think that the decision of the United States circuit court of appeals for the ninth circuit in the case entitled the *Schooner Robert Lewers Company v. Kamaka Kekaoha* (114 Fed., —) is to any great extent an authority in support of that view. All that the court there decided was that a certain decision reported in 2 Haw., 209 (1860), was a "judicial modification" of the common law of England within the meaning of section 5 of the act of 1892, and that therefore the common-law rule under consideration in that case did not apply.

Except as modified by the foregoing, I concur in the opinion of the majority.

The foregoing is a true, full, and faithful copy of the original decision of the supreme court, now on file in the archives of said court, in the custody of the undersigned.

Witness my hand and seal of said supreme court at Honolulu, Territory of Hawaii.

[SEAL.]

HENRY SMITH,
Clerk Supreme Court, Territory of Hawaii.

EXHIBIT No. —.

HONOLULU, TERRITORY OF HAWAII,
September 29, 1902

UNITED STATES COMMISSIONERS

(Hon. J. H. MITCHELL, Chairman).

GENTLEMEN: By your request I submit the following report of bubonic plague as it has been in Hawaii since the first visitation of the disease, especially the number of cases and costs since the official plague epidemic, which occurred in December, 1899, and last until April 1, 1900.

The number of cases during the epidemic was 71, with 61 deaths. At the following cost:

Expenses bubonic plague.

Departments.	Building and equipment.	Pay rolls.	Provisions.	Dry goods.	Medicines and drugs.
Pesthouse.....	\$2,900.41	\$8,275.40	\$2,468.44	\$1,269.56	\$1,380.00

Since April 1, 1900, to the present date, September 29, 1902, there have been 57 cases of bubonic plague, 48 occurring in Honolulu, 8 in

island of Kauai, and 1 on the island of Maui. Fifty-one of these cases have occurred during the presidency of Dr. H. C. Sloggett as President of the Territorial board of health.

The total amount of money expended for the care of these 57 cases approximately \$5,000. Of this sum about \$3,500 has been used to purchase the necessary fumigating plants, also for fitting up the detention hospital, where a trained nurse is in constant attendance, and for the care and fumigating of 10 suspicious cases.

The only outstanding debt of the board of health is about \$400, which they are unable to pay until the necessary amount is given to the board by the next legislature. This money is to pay for feed destroyed where two or three cases of plague occurred.

The premises upon which cases have occurred have been most carefully fumigated and cleaned. At no instance has there been a recurrence of the diseases after the premises have been so thoroughly infected. I have personally seen the work done by the present board, and can say that it is thoroughly carried out.

I wish to attach the special report of the board of health upon the cholera epidemic which visited here during August and September, 1895. This cost the Government sixty-odd thousand dollars to thoroughly eradicate from our city.

As there have been several statements made in re Kalaupapa store the leper settlement, I would submit the last report of the board of health, which will certainly give the correct account. (See pp. —, —, —.)

Our Delegate, Hon. R. W. Wilcox, has made the statement that our children have been inoculated with leprosy, therefore I wish to inform you that such statements are probably based upon the old way of vaccinating, from arm to arm, long before our present method was in vogue. It is a very common belief not only among the Hawaiians, but among our own people, that leprosy has been spread by such means.

Before closing, I would like to inform your committee that personally I believe the leper settlement should be under the care of the Federal Government, as the leper question is entirely a national question, not a local one. Among our own people who become lepers they are allowed to leave, either to go to Japan or California, this depending upon their financial means. Therefore I believe this one is a question that the Federal Government should have complete charge of. It is a leprosy question, not that I would advise Molokai to be the one national leper settlement, but that there should be one on the mainland, one here, and one in our Philippine possessions.

Under this heading I would certainly advise the passing of Senate Bill No. 3094.

Very respectfully,

JAMES T. WAYSON, M. D.

REPORT OF THE PRESIDENT BOARD OF HEALTH, NOVEMBER 10, 1900,
TO FEBRUARY 1, 1901.

TO THE GOVERNOR OF THE TERRITORY OF HAWAII:

As Mr. E. C. Winston is absent from the Territory, in compliance with your request, I would respectfully report on the period from the time Dr. C. B. Wood resigned up to the election of Dr. J. H. Raymond.

Dr. C. B. Wood resigned as president of the board of health to effect November 10. From that date up to November 27 the board was without a president, and on that date Mr. E. C. Winston was elected. From November 27 to December 12 he performed the duties of president, when, on account of his leaving for San Francisco he resigned, and Dr. J. H. Raymond was elected.

The principal matters taken up during this period by the board were:

(1) The condemnation of the block in old Chinatown bounded by Beretania, Nuuanu, Kukui, and River streets, on account of it being low and at times covered or partially covered with water and improperly drained.

(2) The reduction of prices at the Kalaupapa and Kalawao stores on Molokai, so that simply the cost of the goods and expenses of the stores were covered.

(3) In the interest of pure foods it was voted by the board that whenever the food commissioner finds merchandise adulterated and injurious to health the name of the manufacturer and the local dealer should be published, and also that all adulterations of articles of food be prosecuted where a sale could be proved.

A number of routine matters were disposed of, but the work of the board was greatly hampered during this period on account of not having a full board, and also no president for over half the period.

Respectfully submitted.

J. S. B. PRATT,
Executive Officer

HONOLULU, H. T., *January 19, 1901.*

THE GOVERNOR OF THE TERRITORY OF HAWAII:

I have the honor to submit herewith the report of the board of health for the period since I was elected president of the board on December 12, 1900.

The time has been so short that I will only touch upon the principal matters the board has acted upon and accomplished; also make certain recommendations which I believe would improve the efficiency of the board.

Time has not allowed of getting any reports from the various officers of the board.

Meeting of the board.—The board held six regular and two special meetings.

The members have been faithful in their attendance and in the carrying out of the important matters with which they have had to deal.

Lepers settlement.—(1) Finding that the importation of firearms and intoxicating liquors was increasing greatly at the settlement on Molokai, the board deemed it advisable to pass the following resolution: "Lepers in charge of and supported by the board of health of the Territorial government in the leper settlement at Molokai shall be allowed the use of firearms, or the use of spirituous liquors, except as the same may be required for medical purposes."

(2) The superintendent of the leper settlement recommended the erection of a boarding house for lepers at Kalawao and submitted an estimate of \$1,700 as the cost of the building. The recommendation

was approved and he was directed to proceed with its construction. The building is now in process of erection.

(3) Outside of a number of malarial fever cases the general health of the settlement has been fair.

(4) Certain regulations relating to visits to the leper settlement have been drawn up by a committee and submitted to the board. These will be acted upon at the next meeting. The object of these regulations is to prevent personal contact between those who are afflicted with leprosy and those who visit the settlement and are free from the disease.

Condemnation of lands.—I examined certain localities in the new and old Chinatown, and found them so insanitary and such a menace to the public health that I recommended to the board that they be condemned, under act 61, session laws of 1896.

The board adopted the recommendation and the following blocks were condemned, and the secretary of the board was directed to notify the superintendent of public works of the condition of these blocks and parcels of land, together with the recommendation that the lands be filled up.

The blocks bounded by King, River, Hotel, and Kekaulike streets; Hotel, River, Pauahi, and Maunakea; Pauhai, River, Beretania, and Maunakea.

A stagnant pond makai of St. Louis College and mauka of Beretania street.

Another stagnant pond makai of property leased by Cross Bros. and adjoining the O. R. & L. Co's shops.

More radical action was deemed necessary on the property leased by Mr. Winam, on the mauka side of the extension of Beretania street and Ewa of Aala. In this case, besides the usual recommendation to the superintendent of public works, the board ordered the place put in a sanitary condition within forty-eight hours or else the premises vacated. At the end of the forty-eight hours after the service of notices the premises were vacated.

Relief camps No. 1 and No. 2.—Owing to the insanitary condition of these two camps it was deemed advisable to request the government to close them.

Commissions issued during the plague epidemic.—During the epidemic of 1899 and 1900 a number of commissions were issued to volunteers and others, and as the necessity for continuing these had passed, they have been all canceled and new commissions issued to only those working for the board of health at the present time.

Duties of government physicians.—The duties of government physicians were investigated and changed so that now they have to perform the duties of registrars of births, deaths, and marriages, and perform post mortems in all cases of unattended deaths where the cause of death is not clear, and without extra compensation except in such cases where the performing of a post mortem would work a hardship on them. This, when in full operation, will greatly improve the records of vital statistics, and without additional expense to the government.

Plumbing inspectors.—At a meeting held December 19, 1900, a new plumbing inspector was appointed, Mr. E. G. Keen, and at a later meeting Mr. J. F. Kiernan was appointed his assistant.

Neither of them are plumbers by trade, but both of them have had a good deal of experience in plumbing work, and the plumbing

inspector, Mr. Keen, has made a study of sanitary plumbing for over a year.

During the months of November and December there were 159 permits filed to do plumbing work and the same number of permits granted.

The number of inspections made were 446; final certificates given, 13.

The plumbing rules and regulations are being strictly enforced, and all defective work has to be made right before a final certificate can be obtained.

Plumbing regulations.—The plumbing regulations were investigated by a committee consisting of Mr. Edwards, sanitary engineer; Mr. E. G. Keen, plumbing inspector; Dr. J. S. B. Pratt, executive officer, and myself. A meeting with the master and journeymen plumbers was held and the rules gone over section by section and their views obtained. Afterwards the committee held meetings and the views of the various plumbers were reviewed and authorities on sanitary plumbing consulted. Amendments in a number of instances were made, and these amendments were adopted by the board.

Methylated spirits.—As a number of deaths had occurred from the drinking of methylated spirits, the board took up the matter and referred it to a committee to draft a report to submit to the legislature.

Reorganization of the offices of city physician, physician under the act to mitigate, veterinarians, and bacteriologist.—This subject was submitted to the board at a meeting held December 26, 1900, and I recommended that the positions be declared vacant on January 1, 1901, so as to give an opportunity for reorganization.

On January 4, 1901, two city physicians, at a salary of \$100 each, one to attend to the inside work and the work under the act to mitigate, and the other to attend to the outside work and the experimental work at Kalihi receiving station, were appointed, making a saving of \$500 a month.

One veterinary, at a salary of \$200 a month, was appointed to perform the duties formerly done by two, thereby saving the department \$65 a month.

The office of bacteriologist was left vacant for the present. The changes will save money to the department and at the same time will not impair the efficiency of the service.

Food commissioner.—The food commissioner, Dr. Shorey, has given his attention to adulterated milk, extracts, spices, coffee, and drugs.

Milk samples analyzed in November, 1901. Two cases of sales of adulterated milk were prosecuted.

In December 78 samples of milk were examined, and 13 were found below the standard, but bona fide sales could not be proven, so they could not be prosecuted. The names of the dairy and amount of adulteration were published.

Samples of extracts of lemon were examined, and one contained no oil of lemon.

Adulterated coffee was found; but in all cases except one it was properly labeled. This case was prosecuted and the party fined \$25 and costs.

The food commissioner has been faithful in his work, but has been greatly hampered by defects in the present law in regard to adulterated foods.

City physician.—During the months of November and December 412 outside patients were visited; 2,260 patients were treated at the dispensary; 9 patients sent to the hospital; 1,133 prescriptions filled.

Bacteriologist.—In November and December 172 microscopical examinations were made, also 42 cultures. Fifty-two visits were made to Kalihi receiving station.

Meat and fish inspectors.—Animals examined during November and December, 4,803, and 4 carcasses condemned; also 2 tubercular cattle destroyed. Number of fluke livers, 295.

Fish examined in the same period, 408,489, and 6,411 condemned.

Registration of vital statistics.—The reports of births, deaths, and marriages on the other islands have been of very little value from a statistical point of view, and this was particularly true of the deaths and causes of deaths.

The board therefore amended section 12 of the sanitary code so as to require on the islands of Hawaii, Maui, Kauai, and Oahu permission from an agent of the board of health before a body could be buried.

And also the change already referred to, of making the government physicians perform the duties of registrar.

Chinese eggs.—The danger from Chinese eggs imported in soil from plague-infected ports was brought to the attention of the board and referred to Dr. Carmichael, in charge of the United States Marine-Hospital Service, and a reply received from him stating the methods employed by that service to safeguard this community from infection from that source and other sources. I think that no danger may be feared from that source and that we may safely trust that service to protect the community from outside infection.

Notices to owners and inmates of lodging and tenement houses.—At my suggestion and by direction of the board, the executive officer drew up notices to be sent to every owner of a tenement and lodging house and hotel calling attention to sections 760 of chapter 55 of the penal laws, paragraphs 4, 5, and 6, and section 761 and that any violations would be prosecuted to the full extent of the law.

These are now printed and are being distributed by the different inspectors. Also a notice to be posted in every room in the language of the occupant of that room calling their attention to paragraph 4, section 760, and also section 942 of the penal laws, and the penalty for violating them. These are now being printed and will be put up in each room by the sanitary inspectors.

Interments of the dead in Honolulu.—This was referred to a committee, which reported in favor of the following amendment to a former resolution:

Resolved, That no permit for interments shall be granted within the city limits except to those already possessing burial plots, and not to the owners of such plots, to the jeopardy of the public health.

Sanitary inspectors.—Every morning from 8 to 8.30 the city sanitary officer and the inspectors meet to talk over and consult on the work of the preceding day. There are now 6 inspectors—1 inspector devotes his entire time to the new Chinatown, on the Ewa side of Nuuanu Stream and Liliha and Vineyard streets, the other inspectors cover the territory from the insane asylum road, on the Ewa side; Pensacola street, on the Waikiki side; Bates street, Pauoa road, and Punchbowl, on the mauka side, the sea on the makai.

Outside of this only special inspections are made as complaints are filed in the office or the city sanitary officer notices violations in his tours of inspection.

To give an idea of the work done by this branch of the service take the reports for two months, November and December of last year.

City sanitary officer.—Building permits investigated, 86; inspection made, 581; cesspools located, 31.

Sanitary inspectors.—Nuisances and violations of sanitary regulations reported, 2,148.

Nuisances and violations of sanitary regulations already abated 1,342, the balance are being abated but not entirely finished.

This branch is one of the most important in the work of the board of health, and it has been my endeavor to reorganize this department so that more efficient work can be done. It is only by thorough and constant daily inspection and the gradual education of the people to living in sanitary conditions and surroundings that the health of the community can be safeguarded and the dangers from epidemics reduced. Each inspector's work is watched, not only in the records he keeps of his work but also the work in his district is looked into.

Sewerage.—In December the superintendent of public works asked for the names of 30 places which ought to be connected with the sewer. These were furnished him and nearly all have already been connected with the sewer.

The necessity of more connections is very great and this is particularly true in the new Chinatown.

Owing to the very heavy rains the ground is so saturated with moisture that cesspools are overflowing that never gave trouble before and the excavator is taxed to the utmost.

The work of the sewer outfall should be pushed as rapidly as possible, so that it may be completed and more connections be allowed.

When the present system is all connected the sanitary condition of Honolulu will be greatly improved.

Excavator and garbage service.—In November and December 42 cesspools were pumped and 232 scow loads were taken to sea, and 1,139 loads of garbage were removed and burned. Notwithstanding this large amount that was removed the service was unable to keep ahead of the orders that came in and I therefore ordered the two extra carts put in service and an improvement can be noticed already.

Eleven excavator carts are now working. With the connection of more places with the sewer the carts will be able to keep up with the orders, and in time some can be laid off, but there will always be the need of some carts for the outside districts, where the sewer does not reach.

Sanitary regulations.—Regulations to improve the sanitary conditions of all villages and populous localities in the Territory of Hawaii outside of the sanitary district of Honolulu, have been acted upon by the board and have gone into effect.

I would make the following recommendations:

(1) *Garbage and excavator service.*—I believe that this service should be carried on by private parties under the supervision of the board of health.

A law should be passed compelling property owners, leaseholders and householders to provide proper containers with tight covers, each container to be not more than 18 cubic feet capacity, and a sufficient number of these containers furnished according to the number of persons occupying a house.

Then a contract should be made by the government with some com

to remove all garbage, and the terms of the contract should contain these essential conditions:

A certain amount to be charged per hour for the odorless excavator. The company contracting to either purchase outright or lease all property of the garbage and excavator service now in the possession of the board of health, together with the crematory.

That all garbage and contents of the odorless excavators be disposed to the satisfaction of the board of health. A bond to be given for faithful carrying out of the contract.

I have looked into the matter and the possibility of getting responsible parties to take over the work by contract, and in the course of forty days I shall have all the data and a concrete business proposition from one or more companies to submit.

The expenses incurred for maintaining the garbage and excavator service in Honolulu in the year 1900, together with the proposed appropriations for maintaining the service and a monthly estimate of the services, is:

Expenses 1900.

Moving garbage, pay roll.....	\$5,362.00
Tracing and excavator, pay roll.....	17,180.34
Moving garbage.....	7,762.97
New excavators and appliances.....	9,541.67
New garbage carts.....	870.00
Feed stock, 24 mules.....	3,815.00
Feed and grain.....	2,997.39
Feed stables.....	1,489.17
Tracing crematory.....	16,847.59
	<hr/>
	65,866.13

Proposed appropriations for maintenance of said service.

Moving garbage, pay roll.....	\$24,240.00
Tracing excavator, pay roll.....	45,000.00
Tracing and excavator service.....	24,000.00
Maintaining expenses garbage crematory.....	7,200.00
Completion garbage crematory.....	9,800.00
	<hr/>
	110,240.00

Monthly running expenses 8 garbage carts and present crematory.

Fireman.....	\$70.00
Fireman.....	60.00
Fireman.....	50.00
Rubbish cart men, at \$40.....	640.00
Rubbish burners, at \$40.....	320.00
Feeding 14 horses and mules.....	40.00
Feed for same.....	180.00
Repairs on carts, average.....	50.00
Repairs on harness, average.....	50.00
Salaries.....	40.00
	<hr/>
	\$1,500.00

Running expenses 12 excavators.

Superintendent.....	\$125.00
Fireman.....	70.00
Firemen, at \$60.....	120.00
Firemen, at \$40.....	1,200.00
Firemen, at \$50.....	300.00
Feeding 24 mules.....	70.00
Feed for 24 mules.....	315.00
Repairs to pumps and excavators.....	175.00
Repairs to harness.....	65.00
Salaries.....	50.00
	<hr/>
	2,490.00

Total.....	<hr/>	3,990.00
------------	-------	----------

The advantages of contracting for this service and not continuing heretofore are as follows:

1st. A much better service by reason of the responsibility resting with the contractors, who will be able to handle labor better than the government.

2d. Saving of money to the taxpayers.

3d. Divorcing the department from politics.

4th. The company handling the garbage will be able to meet any emergency and will provide amply for the rapid growth of the city. It will be to its advantage to get all the business it can.

While the sewerage system, when it is all completed, will reduce the work of the excavator service, yet it will be a long time before it will be done away with entirely.

(2) *Cubic air law*.—I would recommend the passage of a cubic air law that would cover all dwelling houses and buildings where a number of people live.

At present the only law covering this point is section 938 of the penal laws, and this should be changed so as to be more definite and cover every class of buildings where any number of people sleep.

There are a number of buildings in Honolulu where employed Chinese firms sleep that are not covered by this law, because they are not bona fide lodgers, for they do not pay rent for their rooms; they are given a place to sleep as part of their wages; nor are they considered laborers.

(3) *Registration of vital statistics*.—Although the board of health has regulations in regard to vital statistics, I believe there should be a law framed to compel the giving of information in the case of a death, birth, and marriage, with a heavy penalty attached for violation. It is only in this way that statistics can be obtained. There should also be a registrar of the Territory, with office in Honolulu, to have charge of the compiling of the statistics.

(4) *Filtration of water*.—As long as the reservoirs up Nuuanu are used to supply portions of the city with water, the necessity of the filtration of that water will remain. This is a matter which has been urged again and again, and the consensus of opinion among the physicians of Honolulu (if their opinions were asked) would be that there are times when the use of this water is productive of fevers and bowel complaints. This water comes from small streams and surface water, and anyone who has been over the new Pali road in a heavy rain storm and seen the materials washed from the roads and run directly into the reservoirs would be convinced of the necessity of filtration of the water of these reservoirs. With our growing population it is a matter that should be taken up at once and some method of filtration provided.

(5) *Home for nonleprovous children*.—Early in the summer, on account of typhoid fever breaking out among the children, it became necessary to remove all the children from their home at Kalihi, adjoining the Kalihi receiving station.

They were removed temporarily to what was the hospital at Kalaheo Camp during the plague epidemic.

These quarters are too small and only fit to be used temporarily.

The buildings they were removed from are in bad repair and I do not think it is proper to take them back to the surroundings where

subject is ever before them (as it is in an adjoining yard to the living station) even if new buildings are provided.

I would recommend that a new location be selected in a healthy part of the city on some government lot and that the legislature be asked appropriate sufficient money to put up suitable buildings.

Government laundry.—The present government laundry is in a very insanitary condition, and I would recommend that enough money be appropriated to raise the whole lot to a high enough grade so that the wash water could discharge in a pipe line far out into the bay, that a sewer line be put in, that sanitary closets be put in for the occupants of the laundry, that the side walls of the room be covered with water-proof material, and that the area where the clothes are dried be covered or cemented with a sufficient slope toward the bay to carry off the water, or else that the present location be abandoned and a more sanitary one selected.

Building laws.—That the building laws be changed so that the board of health will have power over building permits. At present there is simply an understanding between the superintendent of public works and the board of health, whereby the city sanitary officer has no opportunity of seeing the building permit. The law should be changed so that where a building does not comply with the sanitary regulations or the ground is in an insanitary condition the city sanitary officer should have the power of refusal and the parties have the right to appeal to the board from his decision.

Mithylated spirits.—This matter has been referred to a committee of the board consisting of Dr. C. B. Cooper and Mr. George W. Smith to make recommendations to the legislature.

Food law.—Amendments to the food law were submitted by the health commissioner and referred to the attorney-general to make a report upon, but this report has not been received as yet.

I would recommend that the position of police surgeon be turned over to the board of health and that the work be done in connection with the new government dispensary; also that the coroner in Honolulu be under the board of health and all post-mortems be held at the morgue connected with the dispensary.

Bacteriologist.—The new dispensary should have a laboratory connected with it, so that all microscopic examination of sputum, etc., made for the physicians of Honolulu, also the experimental work at the Kalihi receiving station, can be done by the same department. Another matter which is now under advisement by the superintendent of public instruction, and that is the instruction in schools on the subject of tuberculosis, would come under the same department of the dispensary. The last I consider is a matter of great importance, and I believe it is in our power, to a great extent, to mitigate the dissemination of tuberculosis. Our climatic conditions are especially attractive to the tuberculous subject, and as it is a well-known fact that the disease in question is highly contagious so long as the condition of persons with this disease is not known to those with whom they come in contact, and their surroundings looked out for so as to prevent contamination of others, they are certainly a menace to the public health.

By inaugurating an educational campaign in the schools and explaining to the pupils in simple language the conditions, symptoms, and

prophylactic or preventive measures to be taken, I believe much can be accomplished.

This can be done by this same department in connection with new dispensary without any additional cost to either the education or board of health departments.

(12) *Sanitary inspectors*.—I would recommend that the number of sanitary inspectors be increased from 6 to 10, so that more territory can be covered. The present inspectors are covering all the ground they can, and yet not much more than half the area of Honolulu is covered.

There are portions of the districts in Moiliili, Waikiki, and Kalaheo which should be inspected as often as the territory inspected now.

I would also recommend an appropriation for sanitary inspectors for the districts of Wailuku and Hana, on the island of Maui, also an inspector for each side of the island of Hawaii, and two for the island of Kauai.

Another matter which I plan to do is the giving of a series of about twelve lectures to the sanitary inspectors.

These will be upon hygiene, sanitation, disinfecting, tuberculosis, cubic air space, sanitary plumbing, etc., so that the efficiency of this branch of the board of health will be increased.

(13) *Purchasing agent*.—I would recommend that an appropriation be made for the salary of a purchasing agent. He should be carefully selected and paid a good salary, and everything purchased by the board be through him.

I fully believe that he would save the department many times the amount of his salary, and in case any epidemic should break out there would be a responsible head to purchase the supplies needed.

(14) *Sewerage system*.—The sewerage system should be extended as to take in all that territory that could not be completed on account of the appropriation becoming exhausted. This is particularly true of that portion of the city known as Punchbowl, and also King's Highway beyond Liliha and up the insane asylum road.

(15) *Act 60 of the laws of 1896 to regulate the practice of medicine*. Section 6 of this act should be amended so that when a license has been revoked in accordance with sections 7 and 8, and the party continues to practice, he would be subject to the same penalty as if he practiced without first obtaining a license.

(16) *Change in the laws constituting the board of health*.—My recommendation is that the laws be changed so that there shall be a superintendent of public health and a council of six that can be called together whenever the superintendent of public health may deem it necessary.

The law to be drafted on lines similar to those outlined by the attorney-general and which has already been submitted to you.

Respectfully submitted.

J. H. RAYMOND,
President Board of Health

HONOLULU, T. H., January 19, 1901.

His Excellency SANFORD B. DOLE,
Governor of the Territory of Hawaii.

SIR: Having had an opportunity to look into a number of matters since submitting my first report, I desire to make a supplementary report with certain recommendations.

Board of health office, dispensary, and emergency hospital.—It is important to have the various departments of the board of health centralized as much as possible, so that the president of the board can be in close touch with the various heads of departments and also the departments themselves be near each other. With this in view I have made a plan for such a building, which I submit with this report. The plan is so arranged that all the various branches of the service, which are now scattered about, will be under one roof, with an upper story for a good-sized emergency hospital, and the president of the board can thus very easily have a supervision over the whole service. I would recommend that the building be erected at the corner of Queen and Mililani streets, as this would be within easy reach of the various offices.

There can be no question as to the needs of an emergency hospital. Cases were received at the Queen's Hospital during the year 1898 143 cases of injuries, accidents, and poisonings, and during 1899 143 cases; and if the figures were at hand, no doubt 1900 would show a corresponding increase. With our increasing population and new methods of transportation there is bound to be an increase in the number of acts of violence and accidents. There should also be an ambulance in connection with the hospital. A separate building should be built near the main building to be used as a morgue and have also a room and yard in which to keep animals to be used in the experimental work of the bacteriological department. I would recommend that \$50,000 be appropriated for a building and \$25,000 for the equipment of the hospital, morgue, ambulance, etc.

In the former report I recommended a building for the non-leprous children of leprous parents (Recommendation No. 5).

There should be two of these buildings, each building large enough to accommodate 50 children.

One building for boys and another for the girls. At present the children remain at the settlement, unless a home is provided them by their relative. Plans will be submitted in a few days giving an idea of the buildings. The grounds should be large enough so that the children could have a playground and also each child have a plot of ground where they could cultivate flowers and vegetables, thus giving pleasant occupation out of school hours. I estimate that \$25,000 would be enough for these buildings.

Law relating to "keeping of births, deaths, and marriages."—This law was approved the 3d day of June, 1898, and went into effect the 1st of that year.

The dividing of the responsibility of reporting a birth between the father or mother and the physician has not made the law effective, the father thinking that the physician would report the birth and the physician thinking the father would, and the result is the birth is not reported.

I would recommend that the law be amended so that it shall be the duty of the physician to report the birth where a physician is in attendance at the birth, and where there is no physician attending, then it shall be the duty of the father, or if he is absent from the country, or is living, or if the child is illegitimate, then the mother.

Fire-proof vault for records.—I would recommend that sufficient money be appropriated by the legislature to build a fire proof vault in which to keep the records of the board of health.

 十、

There are many valuable records which, if destroyed by fire, involve a considerable monetary loss, as, for example, the province record a birth, death, or marriage.

(5) *Steamer*.—The council of state appropriated \$20,000 for a steamer and \$8,000 for running expenses of same. On investigating the matter, and taking into consideration the expenses of the year in carrying the freight of the board of health, the collection of lepers from the various islands, and the unsatisfactory service at times in the past, I am convinced that it would be better for the board to own its own steamer. They could then be independent and send a steamer to any island they desired to collect cattle, taro, leper suspects, and also carry all their freight from Honolulu. I would therefore recommend that the legislature be asked to appropriate the money for this purpose.

(6) *Food law*.—In my first report I stated that "amendments to the food law were submitted by the food commissioner and referred to the attorney-general to make a report upon, but that the report had not been received as yet."

This has since been received, and is as follows:

The committee appointed to report upon act 34 of the session laws of 1898, entitled "An act to provide against the adulteration of foods and drugs," submits the following suggestions:

(1) Substitute the word "Territory" for the word "republic" wherever it occurs in this act.

(2) Add the words "keep for sale," after the words "offer for sale" and before the words "or sell" in the second line of section 1 of said act.

(3) Strike out the word "sold" in the seventh line of the same section and substitute therefor "manufactured, sold, kept for sale, or offered for sale." Strike out the word "sold" in the twenty-second line of the same section and substitute therefor the words "manufactured, sold, kept for sale, or offered for sale."

(4) Repeal section 4 of said act and substitute therefor the following:

"If any person manufacturing, keeping for sale, offering for sale, or exhibiting for sale any drug or articles of food included in the provisions of this act shall refuse to furnish the duly appointed food commissioner, upon demand, either personally or by writing, a sample sufficient for the analysis of such drug or article of food which is in his possession, the food commissioner tendering the market price therefor, such refusal shall be prima facie evidence that such drug or article of food so manufactured, kept for sale, offered for sale, or exhibited for sale is adulterated within the meaning of this act."

(5) Add the words "keeping for sale" after the word "manufacturing" and before the word "offering" in the eighth line of section 5 of said act.

(6) Add the word "kept" after the word "or" and before the word "for" in the fourth line of section 7 of said act. Strike out the words "with the consent of the board of health" in the eleventh and twelfth lines of the same section.

(7) Strike out the words "with the consent and sanction of the board of health" in the first and second lines of section 8 of said act.

I would recommend that these amendments to the food law be submitted to the legislature for action; also that in section 7 the word "drugs" be inserted after the word "foods," so as to correspond with the former sections of the law.

(7) *Report of the superintendent of the insane asylum*.—The report of the medical superintendent of the insane asylum having been received, I submit it. You will see by the report that there are one or two recommendations, such as a change in the law in regard to the commitment of the insane; also on account of the crowded conditions some new buildings are required.

I think that these recommendations should be carried out.

(8) *General expenses.*—In the approximate estimate submitted to me with my former report this item was put down at \$10,000 for the biennial period. Upon a careful investigation of what has been expended and taking into consideration the contemplated improvements for the betterment of the service, which will require the printing of a great many new blanks and reports, I would recommend that the estimate be changed to \$20,000.

(9) *Methylated spirits.*—The following is a report of the committee on methylated spirits:

Your committee, to whom was referred the matter of the sale of methylated spirits, with instructions to frame a recommendation to the legislature from the board of health, beg to report as follows:

The sale of methylated and wood spirit has been repeatedly sanctioned by successive legislatures as a necessary article of commerce to take the place of pure alcohol. The original legislation had in view the prevention of the manufacture of factitious pure from pure alcohol.

At the present time, under United States laws, the importation into the Territory of anyone of pure alcohol is not and can not be prohibited, and it is now so imported for manufacturing purposes by others than those engaged in the drug business.

The prohibition at the present time of the sale of alcohol and the consequent sale of methylated spirits renders this article easy of acquirement, and, while properly a poison, yet when taken in quantity by those addicted to the use of it, becomes fatal, owing to its peculiarly irritating properties when introduced into the blood.

Pure alcohol is a necessity in medicine and a common domestic remedy for external application.

Methylated spirit can not be used in medicine or domestic practice owing to its irritating and offensive properties.

No restriction is placed on the sale of alcohol by druggists in the United States and no provision is made in the laws for the preparation or sale of methylated spirit or wood spirit.

Methylated or wood spirit would not be offered for sale in the Territory if the restriction on the sale of pure alcohol were removed.

At no time has the sale of pure alcohol been so large as to render it dangerous to public health or morals.

In view of the above facts your committee would recommend the following resolution:

Resolved, That the board of health respectfully requests the legislature to repeal that portion of act 27 (unrepealed by the organic act) of the legislature, special session, 1895, and all amendments thereto, entitled "An act to provide for the importation and sale of alcohol for medical purposes, and the manufacture and sale of methylated spirits, etc."

Resolved, That a copy of these resolutions and this report be sent to the president of the senate and the speaker of the house of representatives.

Respectfully submitted.

GEO. W. SMITH,
CHAS. B. COOPER, M. D.,
Committee.

(10) *Bubonic plague.*—Thinking perhaps that the legislature might be desirous of knowing the expenses incurred during the epidemic of bubonic plague, I have had drawn up a detailed statement of the cost of the various camps, which I submit with this report. While not at that time president of the board, I have been informed that no such statement has been submitted and therefore think it advisable to submit it.

I have the honor to be, your obedient servant,

J. H. RAYMOND,
President Board of Health.

HONOLULU, H. T., February 1, 1901.

REPORT OF THE MEDICAL SUPERINTENDENT OF THE INSANE ASYLUM

President and members of the board of health.

GENTLEMEN: I have the honor to submit to you a résumé of Oahu Asylum affairs, and have made an endeavor to explain in detail the entire working of the institution. One could continue with indefinitely on the various cases, but trust I have given you sufficient and that it will meet with your approbation.

Faithfully,

GEO. HERBERT,
Superintendent Oahu Insane Asylum

Expenses, tubercular plague.

History and statistics of insane of Hawaii Nei.—Embracing etiology and psychopathology as far as has been possible with proper means and facilities for investigation at our disposal and will be explained hereafter.

Foundation of the asylum and history.—Previous to the year

mentally afflicted were sent to jail to mingle with the felons and prisoners of all kinds. They were treated simply as dangerous characters, to be kept away from the public, and it was not until this date (1862) that the question was raised of setting aside a place for their care. Of course, at this time the ratio of insane to the population was small. In 1862, after some agitation, an act was passed by the legislature authorizing the minister of the interior to provide lands and buildings suitable for the care and management of the insane and to call for appropriations necessary for their construction and maintenance. However, time passed, and it was not till September, 1866, that the matter was accomplished, and then the few (6) insane were removed from the prison to the asylum and placed under the care of Dr. Ford, superintendent, and Mr. Davison, assistant superintendent. From now on it was a dark era, characterized by its want of systematic records, only a few notes being obtainable and these making but very listless reading, and it was not until Dr. Tucker took charge in 1887 that, with the assistance of Mr. L. A. Thurston, things shaped themselves into a better course. Then it followed the progressive steps of all similar institutions and advanced with the advancement in the treatment of these unfortunate sufferers, who from being treated like animals driven into a pen, where they could just take a limited amount of exercise and fresh air, and then being locked up in cells again for the rest of the twenty-four hours, have now as near a paradise as most of us will reach—bathing to absolute cleanliness and comfort, three good meals a day, and basking in the shade of the trees on the green lawns; supplied with comforts and cared for with gentleness, their general health tended to, and each individual case treated according to its form of mental disease in the effort to reestablish the balance of the mind and restore them to their homes, relatives, and friends.

Many of those now at the asylum have been there many years, and it is rarely after three years that recovery can take place, but until that time, in many cases, hope may be embraced and clung to. The spirit of evolution has entered here, as elsewhere in nature, and man has ascertained that a "lunatic is a sick man," to be cared for as such, not abused and battered about, but met with kindness, placed under the most improved hygienic and sanitary conditions; restrained with caution and gentleness only when it becomes absolutely a necessity to prevent them from injuring themselves and others; clothed and fed with the best that can be afforded. And what has been the result? From death and destruction of mind, which was regarded as inevitable, and invariably was so, the percentage of improvements and cures has increased so that lunacy, instead of being regarded as an offense or crime, is rightly added to our lists of ailments that human flesh is heir to, just as much as scarlet fever, Bright's disease, or others.

Etiology and psychological aspect.—The ratio of insanity to the population should be one of much satisfaction to the community, even though it is on the increase as it is the world over. Look at us, a cosmopolitan crowd gathered together from everywhere on the face of the earth; the intermingling of all races; in all stations in life, of all trades and occupations, from the grossly ignorant to the most intelligent. Take these factors, with the understanding also of the different ways of and reasons for their coming here, such as emigrants by the

hundreds to plantations, with the bright prospect held out to them making money in the new land; the crowding together on board ships and changes in manner of living; the excitement of individualism and their eager search for work and fortune, in the far away little groups of islands so far away from home; the political strife of late years with also war and rumors of war, not omitting the passage of transport ships bearing men to the front, a very few of whom (three or four) have been cared for at the asylum.

Also appreciate the fact that the excitement of the epidemics, like cholera and plague, are much more felt in a small community than this, and have been directly traceable as responsible for several cases of mental aberration.

Take these factors, and it is remarkable that our list is so small, it is recognized that just such conditions as these are prone to cause psychological disturbance associated with certain pathological states.

I must here mention one case of special psychological interest—a woman, case of recurrent mania with erotomaniacal tendency, progressive; her intermissions becoming shorter and her attacks more violent, with raving day and night (except when suppressed by drugs). This woman, when over an attack, is cognizant of everything she has said, or has done during the period, which may extend over several weeks; she will come out of it as from a trance, only with perfect recollection and shame, and can tell you every event that has transpired during the time, also the exact date, with every minute particular of her life from early childhood; her conversation can be clever and her arguments powerful—far beyond those of an educated woman. She is a typical demonstration that certain brilliant faculties may be advanced at the expense of nervous and mental poise, and the danger of allowing an over bright faculty to run rampant and increase in its development instead of restraining and thus protecting it. "*Medio tutissimus ibis.*"

The psycho-neuroses that have been observed are melancholia, acute and chronic mania, primary dementia.

The psychical degenerations, moral insanity, primary and recurrent mania (with erotic and religious signs), epileptic insanity.

Special diseases of brain with predominating physical disturbance—Paralysis of insane, cerebral syphilis, chronic alcoholism, and senile dementia.

Among the most common of the pathological states are the alcoholic habit and syphilitic lesions. Our institution is no exception from others in the world—where the blame from one-half to two-thirds of the diseased brain is laid at their door. Here I wish to mention the chief difficulties of obtaining and giving the scientific explanation that could be of so much value, and that is, in the entire absence of the family history, for how can we ascertain the antecedents of a solitary plantation Jap with no friends or relatives here; or who could extract anything of scientific interest in the life history of the Gilbert islander from his unintelligent friends or family.

Another obstacle to research has been, as all acquainted here know, the antipathy of all nationalities to the performance of autopsies on the remains of their friends and relatives, and until the last few years I was unable to make these examinations except in those cases where no one claimed the deceased.

Among these have been several cases of general paralysis of the

case with its chronically inflamed meninges with adhesions both to themselves and the dura mater, with and without effusion, adhesion of pia mater to surface of brain, the dilated vessels on the cortex and dura mater and pathognomonic meningeal thickening.

Two cases of acute encephalitis with large quantities of serum effused that had caused general cerebral compression producing convulsions and coma. In one of these, an epileptic of long standing, a section of the skull was made over the seat of an old fracture in an effort to save the patient, but he succumbed, and beyond the general encephalitis there was no sign of disease either of the cortical or medullary substance.

Several resection operations have been performed for the removal of old skull fractures. There have been but few cases of epilepsy; one, a case of a native Hawaiian, has been with us since 1891. His epileptic seizure, or seicle, is a painful one to witness. First, he becomes restless and irritable, then violent and abusive till the vessels in his neck stand out and throb visibly; his face changing color—darkening—he falls down, usually backward, with his eyes rolled upward, and after some seconds convulsive general movements appear both in shoulders and hips; then follows relaxation and restoration of color. He is a very violent and dangerous man, and we have to keep his hands in restraint nearly all the time. No remedy has done him any good. His skull, hard and rather small, presents no scar or fissure.

In three cases of puerperal mania I have found syphilitic manifestations, but regard them as accident rather than cause.

It is noticeable that acute mania has attacked Hawaiians, Chinese, and Japs chiefly, and that the Hawaiians have also a large number of chronic mania; for this they can thank the progress of civilization with its concomitant vices.

The acute form attacking the Asiatics has already been accounted for.

During the term of the past five years 13 cases were received that should not properly belong to the asylum. Three or four showed no signs of any form of insanity, and after different periods of time during which they were under observation were discharged. Several were cases of mania a potu that could have been withheld from the asylum records, and one a case of erotopathia. Again there were a few who were old, helpless, and infirm, with no home, no one willing to care for them, and who are still with us, contented and cared for, because there was no one who was willing or able to do so.

Commitment of the insane.—This draws attention to the subject of commitment of the insane, the responsibility of which should not be placed on the shoulders of one man, but be in the hands of a lunacy commission, and special attention paid to commitments from outlying districts, which should carry the indorsement and personal observations of at least two physicians before the magistrate of the district.

Detention house.—Many cases could do better and possibly many be saved were it feasible to have an intermediary station between the patient's home and asylum, where the freshly distorted brain, anxiously seeking for fuel to consume its substance, or avoiding with equal anxiety anything in the nature of excitement, might be kept away from the howls and awkward antics of those beyond redemption. These alone are enough to scatter the little sense left in a recent case of

mental affliction, and we have always endeavored as much as possible to avoid this contact and maintain separation.

We now come to statistics, which, owing to the lack of former records, that my able predecessor and friend, Dr. McWayne, hunted for, but without success—and I have been unable to find—must be to a certain extent limited.

OAHU INSANE ASYLUM AT THE PRESENT TIME, JANUARY 1, 1901.

Buildings.—There are at the present time six wards in the asylum, as follows:

No. 1 ward. A wooden building, size 28 feet 6 inches by 72 feet

6 inches, with accommodations or cells (8 by 10) for 18 patients. Each cell has one window and one door; the windows and upper panels of the doors are covered with strong wire netting on the inside and mosquito-proof netting on the outside. One extra large cell is set apart to be used as a hospital. There are at the present time 12 patients in this ward. Each patient is supplied with a mattress, pillow, mat, and double blanket. As nearly all the patients in this ward are violent or destructive, we do not supply them with bedsteads.

No. 2 ward. This is the original building, erected in 1866, and remodeled in 1887; size 40 feet by 100 feet. It consists of 1 large dormitory and 3 cells. At present there are 34 patients in this ward; of them sleep in the dormitory, and 2 others, who are not to be trusted, sleep in the cells. These patients are harmless old chronic cases, and, with the exception of the 2 in the cells, are all furnished with iron bedstead, mattress, pillow, blanket, and bed linen.

No. 3 ward is a wooden building, 64 feet 6 inches by 64 feet 6 inches, in which there are a good many old chronic cases whom we do not trust in No. 2 ward; at the same time there are no such violent or dangerous patients here as in No. 1. In this ward there are 32 cells, each with a ventilator let into the wall close up to the ceiling. Each cell is fitted with an electric light, which is put out by means of a switch outside the door of the cell. Each door is fitted with a small wicket, so that by turning on the light and opening the wicket the patient can be observed without opening the door. The ward at the present time is full. Each patient is supplied with mattress, mat, pillow, and blanket, except in the case of 4 of the most rational patients, who have in addition to the above an iron bedstead each and bed linen.

No. 4 ward. This is a wooden building, size 51 feet by 92 feet 6 inches, and is used exclusively for female patients. There are accommodations for 19 patients only, the rest of the building being taken up by a large dining room, a bathroom, water-closets, etc. The cells are fitted with electric lights, controlled by switches on the outside of the doors of the cells. Each cell is well ventilated by a ventilator let into the wall close to the ceiling. There is also a device to be used in case of fire, by which all the cell doors are unlocked simultaneously. There are at present 31 patients in this ward, who have to be quartered in the dining room, which follows, owing to dearth of accommodations. In the dining room, which we have been compelled to turn into a dormitory, there are 14 patients, and in two other cells there are 2 in each. The balance, 14, are in a separate cell. The majority of these patients we are able to furnish with iron bedstead, mattress, and bed linen. The remaining 10, either refuse to use a bedstead or are not to be trusted with one.

The crowding here is not proper and should be avoided by adding wings to the building.

No. 5 ward is a small cottage, 32 feet by 30 feet, which is used as a private ward or hospital. The cottage contains 2 bedrooms, a bathroom, and closet, and is kept furnished with 2 iron bedsteads, mattresses, pillows, and bed linen, 2 tables, and 2 chairs. The rooms are mosquito proof, the windows and doors being lined with heavy wire netting on the inside and mosquito netting on the outside. Each room is well ventilated through the ceiling, so that all the doors can be locked and there still remain abundance of fresh air inside.

No. 6 ward. This is a building which has been put in temporarily as a ward. I believe it was originally intended to be used as a post

rise from which to supply the asylum with electric light. Owing to the dearth of accommodations for the patients continually arriving, it has been turned into a ward, into which are promoted the best-behaved patients from No. 1 and No. 3. The size of the building is 30 feet by 60 feet, and contains accommodations for 20 patients. Each cell is thoroughly ventilated and mosquito proof, the upper panels of the doors being heavy wire netting on the inside and mosquito netting on the outside. Each cell is fitted with a mosquito-proof ventilator close to the ceiling and let into the wall of the building. Each patient in this ward is supplied with an iron bedstead, mattress, pillow, and bedding. At the present time there are 16 patients in this ward. In addition to the buildings mentioned above is the executive building, with assistant superintendent's room, office, dispensary, parlor, three bedrooms, dining room, pantry, and kitchen. At the opposite end of the grounds is a cottage, 20 feet by 28 feet, containing the female nurses' quarters; also a cottage, 16 feet by 24 feet, containing the captain's quarters; cottage, 18 feet by 50 feet, containing guards' quarters, male patients' bathrooms, with upright boiler, baths, etc.; patients' kitchen and dining room. The latter is an addition built onto and at the back of No. 2 ward, one part of which is the kitchen where the patients' meals are cooked and the other the dining room where the wards and trustworthy patients dine. The kitchen and dining room are divided by a partition in which there is a sliding window, the sashes of which are fitted with heavy wire netting. This is kept closed except at meal times, when the food is passed through from the kitchen.

Outbuildings.—Carpenter's shop, servants' quarters, stables, wash-house, and pothouse.

Attendants.—The force of attendants at present employed at the asylum are as follows: Two captains, 12 guards, 1 matron, 4 female nurses. They are divided into two watches of eight hours each. Their stations are, the captain of the watch upon the veranda of the assistant superintendent's house, close to the entrance gate to the asylum, and who has general supervision of all the attendance upon his watch and who are under his orders.

No. 1 ward. Two guards. In the daytime one is stationed on the veranda of the ward, the other on the lawn directly in front of the ward. At night both are stationed on the veranda of their ward.

No. 2 ward. One guard. In the daytime this guard is stationed on the lawn in the vicinity of the front veranda of his ward. This being the ward in which the good patients live, and there not being so much danger of them getting into trouble if left alone for a short time, this ward is generally called down to guard the gate if the captain should be called away to some other part of the institution. At night this guard is stationed inside the ward, and is never called away except as a last resource in case of serious trouble. If a guard should be needed for anything at night, one of those in No. 1 or No. 3 is called upon, there being 2 guards in each of these wards and the patients being locked in their cells.

No. 3 ward. Two guards. In the daytime one is stationed on the veranda of the ward and the other on the lawn with the patients. At night both are stationed on the veranda of the ward.

No. 4 ward. One matron and 2 nurses in the daytime. One nurse on the lawn in front of the ward, the other is on the lawn at the back of the ward. The matron has no particular station, going where she is most needed and having general supervision of the nurses. At

night both nurses are stationed in the ward, with their patients in the daytime.

No. 6 ward. One guard. This guard's station is on the lawn between No. 2 and No. 6. It is his duty when No. 2 guard is called to guard the gate, to move his position sufficiently so that he can observe the No. 2 patients without neglecting those belonging to his own ward. At night this man's station is on the veranda of his ward.

Each ward is in direct communication with the superintendent's office, where the captain is stationed, by means of a system of electric call bells. If any trouble arises during the night in any of the wards, the guard by pushing the electric call button the number of times corresponding to the number of his ward immediately notifies the captain and assistant superintendent of the particular ward where the trouble is. In this way no time is lost, and the captain or superintendent can promptly get to the scene of action. In the same way any particular guard can be called to the office if required.

The captain always makes a round of all the wards before going on watch, and if he observes anything wrong (such as some part of the ward left unclean, etc.) he reports it to the captain whom he is going to relieve, and that captain is required to rectify the omission before going off watch. All orders are then turned over to the captain going on watch by the one going off watch.

Each captain is required to keep a watch record, in which everything happening during his watch, no matter how trivial, is entered. In addition to this he must keep a bright lookout and see that the guards are attending strictly to their duty and report any dereliction of duty to the assistant superintendent as soon as possible. At night the captain is required to make the rounds of the asylum several times during his watch. No particular time is set for him to do so, as the guards are not so liable to sleep if they believe the captain may turn up at any time.

The guards and nurses upon coming on watch in the daytime are required to arrive half an hour before the proper time to go on watch so that they can have their meals before doing so. At eight bells (8 a. m. and 4 p. m.) (ship's bells are struck all through the twenty-four hours) they proceed to their respective wards and relieve the old guards who go to their meals, and then go home. At midnight the new guard is required to wait outside the entrance gate until the bells strike eight, when they come inside, report to their captain, and then proceed to their respective wards and relieve the old guard.

Guards and nurses after sundown are required to make the rounds of their respective wards every half hour.

Bathing.—All patients are bathed three times a week, Tuesdays and Thursdays cold bath and Saturdays hot bath. The general procedure is as follows: Tuesdays and Thursdays, 8 a. m., the captain calls No. 2 guard to the gate. He, the captain, then proceeds to the bath house and supervises the bathing of all the patients who are brought to the bath house, one ward at a time in charge of their respective guard. The same procedure is carried out in the female ward under the supervision of the matron. Saturdays the same as above except that on this day there is one guard detailed to fire the boiler and have charge of washing the dirty clothes, the same being done by a few of the trustworthy patients. As the patients get through bathing on that day a suit of clean clothes is issued to each of them. The dirty clothes after being washed are hung to dry and then sorted out. All clothes

that are damaged are repaired on the following Monday by patients under supervision of the guards of No. 1 ward.

Each ward is thoroughly cleansed and disinfected every morning before 8 a. m.

Ward.—All patients, with the exception of those in No. 2 and No. 6 wards, dine upon the lawns in front of their respective wards, a large dining table and benches being provided for each ward for this purpose. In case of rainy weather they dine on the verandas of their respective wards.

Breakfast (6.30 a. m.): Beef stew, rice, coffee, soft bread, crackers, and poi.

Dinner (11.30 a. m.): Soups, tomato, vermicelli, vegetable, and macaroni; boiled beef, taro, poi, rice; three times a week boiled mutton, once a week fresh fish; Sundays, pork and beans.

Supper (4.30 p. m.): Beef prepared in various ways, meat balls, rice, soft bread, bananas, tea.

In case of sickness, beef tea, tapioca, sago, cornstarch, eggs and milk, poi and milk, egg-nogs, etc.

Private patients get their meals directly from the assistant superintendent's house and are charged at the rate of 50 cents per diem.

Miscellaneous.—The guards and nurses are required to have their patients out of the wards and on the lawn of their respective wards by breakfast time in fine weather; in rainy weather they are out of the wards, but on the verandas. In no case is a patient allowed to occupy his cell during the day. If he or she should be ill, the hospital cell reserved for each ward would be used. No restraint is allowed to be put on any patient except it is absolutely necessary, then only at the direction of the physician in charge. The forms of restraint used are as follows: First. Heavy wood armchairs with a lapboard fastening across the backs of the chair and locked with a padlock.

Second. Iron in very extreme cases, a leather wristlet being put on not to avoid chafing of the skin.

Third. Leather wristlets lined with chamois leather. These wristlets are made so that a belt can be used with them, which being passed around the patient's wrist keeps him from raising his arm to strike, at the same time allowing him enough freedom to feed himself, etc.

Fourth. Gloves. These are used, as a general rule, to prevent a patient from removing bandages, etc., from his person.

When a patient is put in restraint, the same is entered in a book kept for that purpose in the superintendent's office) by the captain of the watch. In addition of the watch record, a restraint book kept by the captains, there is a monthly record kept of each individual patient. At the end of every month the captain's watch record is gone over, and everything that has happened during the month is entered in the superintendent's record book, which contains everything of note concerning the patient.

A monthly report of the inmates is made out at the end of each month, giving the number of inmates in the asylum at that time, the number admitted during the month, the number discharged, and the number who have died, with their nationalities, sex, age, asylum number, etc.

A patient upon being admitted to the asylum is immediately bathed and clothed in clean clothes, temperature and pulse taken, and the same entered in the records.

In addition to the regular attendants named above, there are employed

in the asylum 1 foreman, 1 taro man and helper, 2 cooks, 2 gardeners, 1 laundryman, and 1 hostler.

The foreman has general supervision of all the work around the asylum, such as taro planting and pulling, making poi, repairing buildings and fences, digging graves for deceased patients, etc.

The taro man is under the foreman and in direct charge of the patients who do any work. He has a man to help him in this work.

The two cooks are employed to cook for the patients and the work force.

The two gardeners are employed in keeping the grounds in order, planting flowers, cutting grass, etc.

The laundryman keeps all the bed linen, bedspreads, etc., in first class condition.

The grounds need to be seen to be appreciated. Plenty of green lawn adorned with colored shrubs and plants makes it one of the most beautiful gardens of Honolulu.

Photographs.—A complete record is kept of each patient for various reasons, viz:

First. Strangers unable to speak for themselves and who have come here from unknown parts may be identified at any time.

Second. If a patient escapes, he may be more easily recognized.

Third. The facial expression, attitude, and garb of the patient is of scientific interest.

These photographs are made on the place, as soon as possible after the reception of a patient, and the positive, with three negatives kept at the asylum, for which a charge is made of \$1.

Furlough and discharges.—Every patient who has sufficiently recovered his reason so as not to be dangerous to himself or a menace to the public is allowed on furlough—if in Honolulu he is kept under the surveillance of the assistant superintendent, reporting at stated intervals at his office. If on the other islands, the government physician or sheriff is notified and at the expiration of a certain time, which varies with the case from three months to a year, the patient's condition continues to improve or remains good, his discharge is granted, given by the president of the board of health and the superintendent.

In conclusion I wish to add my methods and treatment of those committed to my care.

Each and every one is treated as though he or she was a private patient and as irresponsible as a child would be. Therefore it behooves us to look for ailments and suffering and not to wait until the patient complains, but to observe them, and instruct those under our attendance to watch, and note every peculiarity or idiosyncrasy of those under their supervision. A physician, even though a resident, can not be always with each patient, and he has to depend on the watchfulness and intelligence of the attendants. Their physical condition is observed and each phase of mental disturbance noted.

The asylum is visited and the patients all seen daily by me, occasionally by one of my partners, and frequently by both of us. Whenever there is a case of special interest or difficulty I invariably call on one of them for counsel. In case of emergency there is always someone on duty in my office who is acquainted with my whereabouts, and a telephone message has always been immediately attended to. No case of urgency has ever been kept waiting, and when the danger of a serious illness demanded it as many as three or four visits have been paid in one day.

When you consider that 53 of the inmates are incurable and have been over three years in the asylum, and 40 more doubtful and practically incurable, having been in the asylum for over two years, and the most part showing no amelioration of symptoms, but in many cases remaining in statu quo or progressing, it leaves but about 30 to require very special attendance.

Finally, after considerable experience with the insane, I believe that you will find in no similar institution that the patients have been bettered for or better results have been obtained than in the Oahu Asylum.

HONOLULU, HAWAII, *January 30, 1901.*

Expenditures of the board of health from January 1, 1898, to December 31, 1899.

	Appropriation.	Expenditure.

Subsidy for steamship service between Honolulu, Molokai, Maui, etc ...		5,200.
Honolulu dispensary building		25,000.
	<hr/>	
Total current expense appropriations		382,000.
		<hr/>

Amount of government realizations for the biennial period ending December 31, 1899:

Kalaupapa store receipts	\$27,790.64	
Hides and tallow	5,702.78	
Excavator service receipts	5,524.50	
Malulani Hospital receipts	3,821.60	
Hilo Hospital receipts	3,123.36	
Rents Kakaako buildings	797.50	
Leper settlement receipts	394.10	
Insane asylum receipts	330.00	
Amounts refunded, twice paid bills	237.69	
Koloa Hospital receipts	98.00	
Vaccine virus sold	72.50	
Condemned carcasses sold for fertilizer	30.00	
Fees registration certificates	24.00	
		<hr/> \$47,946.67

Amount of government realizations for 1900:

Kalaupapa store receipts	12,511.45	
Excavator service receipts	6,502.50	
Sales pipe and merchandise by finance committee	6,625.30	
Fencing and merchandise sold at auction	7,694.05	
Prophylactic injections	3,013.00	
Hides and tallow	2,820.74	
Rents detention camps	743.00	
Leper settlement receipts	167.50	
Insane asylum receipts	187.00	
Registration certificates	10.00	
Sundry receipts	512.05	
		<hr/> 40,786.59
		<hr/> 88,733.26

Expenses incurred for maintenance of the garbage and excavator service for the city of Honolulu for the year 1900:

Removing garbage pay roll	\$5,362.00	
Garbage and excavator pay roll	17,180.34	
Removing garbage	7,762.97	
12 new excavators and appliances	9,541.67	
New garbage carts	870.00	
Live stock, 24 mules	3,815.00	
Hay and grain	2,997.39	
New stables	1,489.17	
Garbage crematory	16,847.59	
		<hr/> 65,866.13

Proposed appropriations for maintenance of said service:

Removing garbage pay roll	24,240.00	
Operating excavator pay roll	45,000.00	
Garbage and excavator service	24,000.00	
Running expenses garbage crematory	7,200.00	
Completion garbage crematory	9,800.00	
		<hr/> 110,240.00

Monthly running expenses, 8 garbage carts and present crematory:

1 foreman	\$70.00	
1 foreman	60.00	
1 foreman	50.00	
16 rubbish cart men, at \$40	640.00	
8 rubbish burners, at \$40	320.00	
Shoeing 14 horses and mules	40.00	
Feed for same	180.00	
Repairs on carts, average	50.00	
Repairs on harness, average	50.00	
Sundries	40.00	
		<hr/> 1,500.00

Running expenses, 12 excavators:

Superintendent.....	\$125. 00	
1 foreman	70. 00	
2 foremen, at \$60.....	120. 00	
6 men at \$50	300. 00	
30 men at \$40	1,200. 00	
Shoeing 24 mules.....	70. 00	
Feed for 24 mules	315. 00	
Repairs to pumps and excavators.....	175. 00	
Repairs to harness.....	65. 00	
Sundries.....	50. 00	
		\$2,490
		3,900

EXHIBIT No. —.

HONOLULU, T. H., *September 27, 1903*

To the honorable Subcommittee on Hawaiian Affairs of the Committee on Pacific Islands and Porto Rico of the United States Senate, (C)

GENTLEMEN: I have the honor to hand you herewith the following records of the house of representatives of the first legislature of Territory of Hawaii in relation to the leper settlement, taken from files as journal clerk and stenographer thereof:

- (1) Petition of the lepers' committee to the legislature.
- (2) Stenographic report of proceedings of joint committee appointed to visit the settlement.
- (3) Stenographic report of conference of said joint committee with the Territorial board of health in relation to leper settlement.

These, with the report of the joint committee, which will be found on pages 456 to 463 of the house journal, will, as I am reliably informed and believe, give you the most complete report of conditions existing at the settlement ever made by any legislature, although it has been the custom for each legislature to appoint a committee to visit the settlement and investigate affairs there.

Very respectfully,

J. D. AVERY,
*Stenographer and Journal Clerk, House of Representatives,
First Legislature of the Territory of Hawaii.*

Conference of the special committees of the senate and house of representatives of the first legislature of the Territory of Hawaii on the leper settlement at Kalanipapa and Kelawao, Molokai, with the Territorial board of health at the board rooms, Honolulu, March 20, 1903 at 3 p. m.

Present: A majority of the committee of both houses and Mr. F. Lowrey, president pro tem. of the board of health; Drs. N. B. Emerson and C. B. Cooper, Attorney-General Dole, and Messrs. Geo. W. Smith and E. C. Winston, members of the board, and the following officers of the board:

Mr. Chas. Wilcox, secretary; Dr. J. S. B. Pratt, executive officer and Mr. C. B. Reynolds, superintendent of the Molokai leper settlement.

Senator H. P. Baldwin acted as spokesman for the legislative committees.

Mr. BALDWIN. There has been a petition put in from the residents of the settlement asking for certain things. I will ask the questions as they appear in the petition, and then you can ask as many other questions as you wish.

The petition reads:

At a public meeting held in the Beretania Hall at Kalaupapa, at Molokai, February 20, 1901, it was resolved that the accompanying petition be placed in the hands of a committee of fifteen members, and praying:

1. That the local management of the settlement be given, by a law to be enacted hereafter, to the persons segregated here.
2. That a liberal appropriation be made to increase the water supply of the settlement.
3. That a steam vessel be purchased for the board of health to be used for the transportation of freight from the other islands to the settlement.

R. M. KAAOAO,
Chairman of the Committee.

Senator BALDWIN. This is one petition, and then there is another. It is our purpose to deal with the questions in order, and we would like the views of the members of the board of health on the question of local management at the settlement. The legislature has a provision for a county law; it provides for two counties on Hawaii, one county consisting of Maui, Molokai, Lanai, and Kahoolawe; one county for Oahu, and Kauai and Niihau form the fifth. I do not understand that the management of the settlement is to be a county proposition, but simply that a local management be given to the people there. A commission would be selected, as I understand it, to act as a governing board.

Senator RUSSEL. The proposition is to erect the settlement into a township.

Senator BALDWIN. That may be your idea and the idea of some members, but that is not the petition. They ask for local management.

Senator RUSSEL. I simply thought to explain the idea.

Senator BALDWIN. We would like to know the views of the board of health on that line.

Mr. LOWREY. It would perhaps be well to state that the president of the board of health has been compelled to go to Maui. One of the other members of the board has a case in court, but he will be here as soon as his case is over.

The question has occurred to me as to whether it would be better for individual members to express their opinions or if it would be better for the legislature to submit certain questions and for us to reply as a board. No one member of us can speak for the entire board.

Senator BALDWIN. The object of the meeting with the board is to go over the petition with the board of health, and also the complaints that have been made, but, of course, if the board of health do not care to give any views on the topic, I will pass over the question and will take up the next question.

2. That a liberal appropriation be made to increase the water supply of the settlement.

Mr. LOWREY. Oh, I don't mean that at all; it is simply a question as to whether it would be better to give individual answers or to make reply as a board.

Senator BALDWIN. I understood that we were to be here to lay out your views on the petition, and to get your side of the question.

They ask for an increase of the water supply. There has been a proposition to bring more water to the settlement, in fact to get water enough for the cultivation of taro in the settlement. Some of the people want that. We have got to consider whether it is the thing to do, or whether to confine taro raising to the localities where the taro now is. I notice that Father Dutton thinks it would make an unhealthy district if they raised taro right in the community, so close to many of the houses. It was his opinion that it would make an unhealthy district. The board of health certainly has views on the matter, and we would like to know their views.

In connection with that, it was stated that there is never enough water as it is to supply the houses right here in the settlement; that is, that the houses were not well supplied with water. There was a complaint that some houses are not supplied with water taps.

Mr. LOWREY. In regard to the first question, in regard to local government, I think, after reading the testimony expressed at the evening session at Molokai, that there was a statement made by some of the lepers that it seemed to them undesirable to have it. Other statements were put forth by many of the people there in a similar strain, and it is in view of such statements made at the settlement that I think it would not be desirable.

Dr. EMERSON. A form of self-government was in vogue there before when the settlement was first established. It was to a large extent self-governing. The result was the greatest confusion. The whole system of government has been a matter of growth; in fact, each error has been seen a long time before it has been corrected.

Senator BALDWIN. There should be an interpreter, so that the Hawaiian members of the legislature will understand the drift of the discussion.

Dr. EMERSON. If you will allow me, I will interpret my own remarks.

I noticed in the testimony given by a white man, I think his name was Way, a statement to the effect that there was no one strong enough there to attend to the government, as with any change of the weather they were liable to lose their health, and then there would be no one to carry on the government, that they were all practically sick now. I agree with his views. I think that they would labor under great difficulties.

Again, the question of finance is one of the great questions. There are great expenses to be met for these people. Are there men there of sufficient ability to solve these questions? Without casting reflections upon the mental capacity of the people there, for there are many very bright minds in the settlement, how would those things, such as the division of the money, be made, which are now done by men who have somewhat superior abilities to divide out and economize the means?

These people have always been regarded as wards of the nation. It is a form of quarantine; true, it is a great quarantine, but it really is a permanent quarantine. Taking that view of it, let me ask if it would do to give local government to the inmates of Mauiolua quarantine station here in the harbor, or how would it have worked to have given local government to those who were quarantined during the cholera epidemic? We would have thought it unprecedented. There are other arguments, but I think that the view is just.

Attorney-General DOLE. I think it is a good deal like self-government in a hospital. Sick people have not the use of their good judgment.

Mr. LOWREY. Shall Mr. Wilcox translate? or, if the legislature refer, let some one else translate.

Representative WILCOX. I beg to be excused. If my brother were he could translate for you, but I do not feel competent.

Mr. LOWREY. I meant Mr. Charles Wilcox, the secretary of the board.

Representative WILCOX. Oh, I misunderstood you.

Senator BALDWIN. I think Mr. Wilcox is the one to translate.

Mr. WINSTON. I think in some matters it would be economy for them to govern themselves, but in the matter of finance I think there is no one there accustomed to the disbursement of large sums. It is possible that there may be such persons there, and if there are, I should be in favor of it.

Dr. COOPER. I do not believe that local self-government could be successfully carried out. I think they should have a board of control of five members. I think that such a board should have the direction of affairs, and that the minor details they could settle among themselves. I believe in their having representation.

Senator BALDWIN. We have not a great deal of time. We propose to take up the next question—the question of the water supply. We ask the question because we understand that President Raymond has a bill to propose.

Mr. LOWREY. I would like to say that President Raymond was very sorry that he was compelled to go to Maui and could not be here to meet with the legislature. He has not consulted with the board, but understands that he has a plan to propose, and that he gave an outline of it to the executive officer, Dr. Pratt, before he left. I will ask Dr. Pratt to give it to you.

Executive Officer PRATT. Dr. Raymond told me before he left that he had a plan partially outlined, and that if the matter came up he would like me to give his views.

I believe he favored a commission of three or five residents of the settlement. If there were three, one was to be selected by the people up there, one by the board of health, and these two were to select the third. They were to have the management of all petitions and complaints, etc., that now generally come before the board here. There was to be a superintendent of the settlement located here, and he would work with this commission. He would make monthly or bimonthly trips to the settlement, and all complaints made by the residents there, either in regard to water supply or trouble among themselves, would be arbitrated by this board or commission, and would be finally submitted to the board of health if they were unable to agree. Of course the detail part of it he did not go into at all. The system will have to be perfected, but those are the main lines of his ideas.

Attorney-General DOLE. It occurs to me, Mr. Chairman, that Dr. Raymond's idea would be a good one.

Senator KALAUKALANI. Are those also Dr. Cooper's ideas?

Dr. COOPER. Yes; those are practically the same as my ideas.

Senator BALDWIN. Let us come to the water supply. They complain that some houses do not get water. I did not have time to look after the matter personally over there. We would like to know in

regard to this; perhaps Mr. Reynolds can say something in regard to this.

Superintendent REYNOLDS. As far as water for domestic purposes and for irrigating plants, we have twice as much as we can use. There is a water line connecting the settlement with the stream in Wai Valley, and the spring never fails. Should we go into taro planting at Kalawao and Kalaupapa, I don't know that there would be enough. It is my intention to put in a branch and go into taro planting in the settlement as far as possible, but there is the question of funds required and some other matters, so that I have not done it as yet.

Senator BALDWIN. How about the houses not being supplied with taps?

Superintendent REYNOLDS. They are all supplied; that is to say, sometimes three or four houses have taps together on account of the way the line runs, or on account of the houses being close together and doing their washing together. It was my intention to give them taps for planting as far as the appropriation would permit. I think most of them have taps close to their houses; some of them may have to go a few yards, but none have to go very far.

Senator BALDWIN. They stated that they had to pay for putting in the connections. Is that true?

Superintendent REYNOLDS. Some of them have water pipes laid in their grounds for irrigation purposes. In that case they usually pay for the pipes and the board of health put them in.

Senator BALDWIN. Where a man comes and wants his pipe laid in the house or the board of health to put in a tap between these houses, has the board of health in any cases compelled them to pay for putting them in?

Superintendent REYNOLDS. If it is within their grounds the owner has to ask the board of health.

Senator BALDWIN. Some say that they have been compelled to pay for the pipes.

Superintendent REYNOLDS. Sometimes they run into the house, sometimes on the far side. In order to save themselves trouble they sometimes put in pipes themselves.

Senator BALDWIN. If the settlement was fairly supplied with water for irrigation purposes, some of those that are a little off on the far side, would there be enough water left for taro planting?

Superintendent REYNOLDS. I hardly understand the question stated before that if it was intended to run the taro planting in Kalaupapa there would not be water enough with the present piping.

Senator BALDWIN. Without going into taro planting, could the houses be supplied with a tap for irrigating trees and plants and domestic purposes with the present supply?

Superintendent REYNOLDS. Oh, yes; for ordinary planting there would be sufficient.

Mr. LOWREY. Would you advise bringing water down for the purpose of planting taro at Kalaupapa, or confine the planting to the lands where it is now?

Superintendent REYNOLDS. Wailua Valley is the only one where you can get water down.

Senator BALDWIN. There is not water enough in the present line for the raising of taro in the settlement proper.

Superintendent REYNOLDS. No; I don't think so.

Senator BALDWIN. Would you advise it?

Superintendent REYNOLDS. I would advise it. As a matter of fact might say that I have spent considerable time in investigating other valley which had some water, but it was not sufficient during a dry weather.

Senator KALAUOKALANI. How many acres of taro would be sufficient to the needs of the settlement with the weather you are now having?

Senator KANUHA. How many acres are now given up to taro cultivation?

Superintendent REYNOLDS. I don't know exactly. I could only tell by going over the reports.

Attorney-General DOLE. I would like to ask Mr. Reynolds if any estimate has been made of the cost of putting in a water line; and if so, how much the line would cost sufficient to cultivate all the taro needed for the settlement? How much would it cost per acre?

Superintendent REYNOLDS. I believe another pipe line the same size as the one we have now would bring down abundant water to Kalauokalani.

Attorney-General DOLE. How much would that cost?

Superintendent REYNOLDS. Twenty thousand dollars.

Attorney-General DOLE. How many acres would it require?

Superintendent REYNOLDS. As far as the acreage is concerned I could not tell; 150 acres perhaps.

Attorney-General DOLE. That is to say, somewhere between \$100 and \$200 per acre would be the cost?

Senator BALDWIN. An 8-inch pipe would be sufficient for the taro? It does not seem to me to be large enough.

Superintendent REYNOLDS. It would be sufficient if the ground is well worked. The ground retains the water.

Senator BALDWIN. It depends of course upon the head. That would depend upon it to the ridge then, would it?

Superintendent REYNOLDS. Oh yes; you could plant on the ridge.

Mr. WINSTON. From what I know of taro planting, my impression is that it would not require 150 acres to supply the settlement.

Senator BALDWIN. How many acres are necessary?

Superintendent REYNOLDS. You must take into consideration that many patches are always standing idle.

Mr. LOWREY. How many acres are under cultivation now? About 60

Superintendent REYNOLDS. Going onto 100 acres altogether.

Mr. LOWREY. That is, half enough to supply the settlement?

Superintendent REYNOLDS. Yes.

Mr. LOWREY. That would mean 200 acres to supply the settlement?

Superintendent REYNOLDS. Yes; that is my opinion. I think 200 acres of taro patches would supply the settlement.

Mr. EMERSON. I think it is a wrong estimate to estimate the amount of taro planting so high. I do not wish to contradict Mr. Reynolds, but I think he is mistaken when he says there is 100 acres under cultivation now. I think it is below that.

Mr. LOWREY. Have you any further questions upon this subject?

Senator BALDWIN. If not, I will pass to the next point, and that is the matter of providing a steam vessel, to be owned by the board, for carrying freight and provisions to the settlement. As it is, the chartered steamer of the board of health sometimes does not land. They are on the board of health to own the vessel.

Mr. LOWREY. I think the board of health all agree with the that, that it would be better to have our own steamer.

Senator BALDWIN. Then there is no use in discussing that. I only suggest that the board of health get the vessel as soon as possible so that the poor people over there need not want or suffer any longer than is absolutely necessary.

Mr. LOWREY. We look to you gentlemen to supply the necessary funds.

Senator BALDWIN. That is the end of the first petition. Attention to it was another petition which begins as follows:

To the legislature of the Territory of Hawaii, greeting:

We, leprosy persons residing at Kalaupapa and Kalawao, island of Molokai, representative election district, precinct 1, through our committee, respectfully as follows:

1. That the board of health be prohibited from claiming any shares in the produce produced by the farmers at Waikolu.

Senator BALDWIN. There was considerable complaint on that. Perhaps Mr. Reynolds can explain. My conversations show, and testimony also shows, that out of the taro planted at Waikolu the board of health takes one-fourth. Why that was done they did not seem to agree.

Superintendent REYNOLDS. I would like to state that up to a recent time taro planting at Waikolu was tabu from the lepers. They used to plant a little at Wailua. That was four years ago, when Waikolu was used for keeping the stock of the board of health during the winter season. It was about four years ago that taro became a very scarce thing. I got the consent of the board of health to plant taro at Waikolu. When we did that we had to keep out the cattle, otherwise they would have gotten in and destroyed the patches. I also found that it was necessary to use considerable lumber for that purpose and for keeping out the wild pigs, as there is a considerable number of wild hogs up the valley, and we had to build fences out of 4-inch rail. Some few years ago, when Mr. Evans was there, they only got half the taro they raised for planting it. There was considerable planting about twelve years ago, but they did not get on with it very well. When Mr. Tillman was up there planting had been practically abandoned; that is to say, he allowed them to go into patches and beat themselves; carry away all they could. That is where that part of the complaint came from about their getting a forty or fifty pound ratio. They could go up and bring out as much as they could bring out in a bag, and that was about fifty pounds. When I started taro planting Mr. Hatch was assistant superintendent and Mr. Notley was my assistant. I called a meeting of the planters and they were all very well satisfied with the three-fourths. Hatch and Notley were so well satisfied that they made a grab out of the first lot.

Senator KALAUOKALANI. Was there a written statement made at that time—any written agreement?

Superintendent REYNOLDS. Oh, yes; it was signed by the board. (Copies of the terms of planting were handed round to the various members of the committee.)

Senator RUSSEL. On what grounds was the 25 per cent taken?

Superintendent REYNOLDS. As a consideration for keeping the cattle out of the valley and for finding lumber for fencing the patches.

Senator BALDWIN. Was each patch inclosed individually or as a whole?

Superintendent REYNOLDS. Each set of patches.

Senator RUSSEL. Are there any current expenses from keeping the away?

Superintendent REYNOLDS. It was in consideration of that, and that were to have the market price. We could just as well have had that the board would have paid them 40 cents for their paiai, we gave them the full market price.

Senator RUSSEL. What expenses do you refer to, Mr. Reynolds?

Superintendent REYNOLDS. Lumber, from time to time.

Senator RUSSEL. Is each patch fenced?

Superintendent REYNOLDS. The ground of two or three persons are fenced are together are for their protection.

Senator RUSSEL. What is the price of taro at the present time?

Superintendent REYNOLDS. Fifty-seven and one-half cents for a ton.

Senator RUSSEL. How do you get that price?

Superintendent REYNOLDS. From the last contract. Whatever price the board contracts at with outsiders is the price we pay to lepers in settlement.

Dr. EMERSON. I would like to ask Mr. Reynolds what is the supposition—how many pounds of taro are supposed to equal 21 pounds of paiai?

Superintendent REYNOLDS. It is supposed to be 30 pounds if it is ripe and ripe, but I am giving them 35 pounds because of some taro being large and some being small.

Dr. COOPER. How often is this given out to the lepers?

Superintendent REYNOLDS. Twenty-one pounds per week.

Dr. COOPER. Does it not sour in that time?

Superintendent REYNOLDS. I think not.

Senator BALDWIN. How many have gone into the taro planting? I notice that Notley had gone into it as a speculation. You spoke of much going into it. Have many gone into raising taro for their own families?

Superintendent REYNOLDS. Not in Waikolu, but in the other valleys to some extent.

Senator BALDWIN. Is it planted as a speculation?

Superintendent REYNOLDS. All that is planted in Waikolu.

Senator BALDWIN. They sell it to the board of health, I understand.

Superintendent REYNOLDS. That which is raised in any other place in Waikolu, such as Wailua, they can sell themselves, but all the Waikolu taro must be delivered to the board of health.

Senator BALDWIN. You don't deduct any part of it?

Superintendent REYNOLDS. Oh, no; only in Waikolu. There are taro planters here [exhibiting a list showing the names of the taro planters]. This is the production for the last year in this column.

Senator BALDWIN. Sixteen thousand dollars for the year?

Superintendent REYNOLDS. Yes. That gives the taro of the board the settlement; also that which is received from the outside.

Senator BALDWIN. Where was it raised?

Superintendent REYNOLDS. Up on the side of the valley, but they don't go into it with any vim at all.

Senator KAOHI. If the \$20,000 were given, would the board of health take care of the taro?

Superintendent REYNOLDS. Waikolu is the only place where it is grown.

Senator BALDWIN. He asked if you had a large pipe to bring down the water, would the board of health divide the shares? I should think that is a question for the future.

Senator BALDWIN. Now, Mr. President, we want to get along, we would like to have the board of health go over these other questions with us. Let us take up the second one.

2. That the board of health be made to pay for the carriage of freight for lepers sent from all the islands of the group.

Senator BALDWIN. The evidence was that the most of them wanted the board of health to do that. I remember there was one who said he thought it was not a good thing. I think he was a haole. The general feeling was that the board of health should bring their freight from the other islands. I don't know why they ask it; I don't know whether they have found any great trouble in getting things. They would like to know if that has ever been the cause of complaint, getting of their freight.

Mr. LOWREY. After the question is translated, I will ask Mr. Wilcox, the secretary of the board, what the custom is.

Secretary WILCOX. Whenever a friend of a leper has any freight that he wants to send to the settlement, he comes here to the office and we give him a permit. They take this permit to the purser on the boat and no freight is paid for the goods; that is to say, it is charged to the board of health. It has always been so.

Mr. LOWREY. The question is in regard to the freight from the other islands. No arrangement has been made for the other islands.

Senator BALDWIN. Would the board of health think that they could take freight from the other islands?

Secretary WILCOX. With regard to parcels, I might say that the weekly average is less than 20; sometimes it is 50 and more. It is especially large during the six weeks beginning with Thanksgiving and ending about New Years.

Senator BALDWIN. The average is 50 packages each week?

Secretary WILCOX. Yes.

Representative BECKLEY. How about freight that comes down from the other islands?

Secretary WILCOX. They have to pay the freight to Honolulu on goods that come down from the other islands.

Mr. LOWREY. It seems to me that it would be impracticable to make an arrangement by which they could be brought down here and then sent over to Molokai, as there would be no check whatever upon them and it would cost so much for the freight from the other islands here.

Senator BALDWIN. Could they not get a receipt and send it down with the articles?

Mr. LOWREY. That could be done, but my point was that the amount of stuff which would be sent down from the other islands would be an enormous amount. They would send down things utterly regardless of the value of them, and this stuff that was sent down, whether it was of any value or not, would sometimes make the freight more than the articles were worth.

Senator BALDWIN. Now, let us take up the next petition.

3. That the board of health paint and whitewash all the buildings occupied by lepers.

I think they claim that they are compelled to do the whitewashing. They want the board of health to do the whitewashing. Probably Mr. Reynolds can say something about that.

Superintendent REYNOLDS. Where the houses are occupied only by a man and they are able to do the work themselves they do it, but if they are occupied by a woman or by men who are unable to do the work themselves, the board of health always does the work, excepting for those who own their own houses. A good many people have their own houses. If a man is able to do his work we give him the materials, and if not the board of health does the whitewashing.

Senator BALDWIN. How large a proportion of the houses does the board of health whitewash? What would the difference amount to if the board of health did it all?

Superintendent REYNOLDS. It is simply a matter of time. I make it a rule that the houses be whitewashed at certain times.

Senator RUSSEL. How do you whitewash them, with a brush or with a spraying machine?

Superintendent REYNOLDS. With a brush.

Senator RUSSEL. Could it not be done much more expeditiously and thoroughly with a spraying machine?

Superintendent REYNOLDS. I think that would be a good thing.

Mr. LOWREY. I think that the board of health is willing to take that up without any further consideration.

Senator BALDWIN. The next item in the petition is:

4. That the children born of leprous women be given full food and fish allowance, as well as wearing supplies, not to exceed the value of \$10 a year.

Senator BALDWIN. I understand that children born of leprous parents only receive a half ration. They had a good deal to say about that.

Superintendent REYNOLDS. They are allowed a half ration.

Senator BALDWIN. They are asking up to the amount of \$10; is that a half ration for the year? Oh, I see; that refers to the clothing ration.

Dr. COOPER. Up to what age are they allowed a half ration?

Superintendent REYNOLDS. There is no age; some are 10 and some 12 years old.

Senator BALDWIN. What becomes of them after they get 15 years old?

Superintendent REYNOLDS. If they are not lepers they are supposed to work.

Senator BALDWIN. When they are able to work, but can't get it, how about it?

Superintendent REYNOLDS. They get a half ration and what they are able to do.

Senator BALDWIN. Suppose they get to be 30 years old?

Superintendent REYNOLDS. They are looked upon as kokuas then and the ration is dropped.

Attorney-General DOLE. But up to 10 or 11 years that is as much as they get?

Superintendent REYNOLDS. Yes.

Senator BALDWIN. I suppose we can find out how many nonleprous children there are?

Superintendent REYNOLDS. Yes; it is given in the biennial report of the board of health.

Dr. EMERSON. There has been an effort to bring about the removal

of nonleprous children. At one time it resulted in two men being killed. The board of health has tried many times to bring the children away, but there is no one outside to look out for them.

Senator BALDWIN. I see according to the report that there are nonleprous children. What would be the additional expense if they were put on full rations?

Superintendent REYNOLDS. Ten dollars per year each.

Senator BALDWIN. What will be the expense for food? We would like to know whether the board of health would recommend it or not.

Mr. LOWREY. The board of health does not care to hold out inducements for them to stay at the settlement. There would be \$870 per year for clothing rations alone.

Attorney-General DOLF. I suppose when these nonleprous children want to leave they can do so.

Senator BALDWIN. Do you compel them to stay there?

Mr. LOWREY. There are some of them taken away as infants.

Representative BECKLEY. Are there the same number of nonleprous children there now as there was in 1899?

Superintendent REYNOLDS. I don't suppose there is much change.

Representative BECKLEY. Are those who are still at the settlement there with the permission of the board of health?

Senator BALDWIN. I see that this petition makes no distinction between leprous and nonleprous children. It simply says children born of leprous women.

Superintendent REYNOLDS. If they are born there and are discovered to have leprosy they get full rations.

Mr. LOWREY. It has been recommended that a building be put down here for them.

Dr. EMERSON. I would like to call the attention of the members of the legislature to this fact: The board of health have tried to remove these people. It was done with the best of intentions by the board of health, but they found their hands in a large measure tied. The people up there simply refused to allow their children to leave them.

Mr. LOWREY. There was an appropriation in 1895 for such a building, I believe. I do not know why it was not built.

Senator BALDWIN. It has been up in the legislature before; I am sure of that.

Mr. KANUHA. Where were these children to be taken in the event made before?

Dr. EMERSON. I can state what arrangements were made of my knowledge.

Superintendent REYNOLDS. The female children have been brought down to the home.

Dr. EMERSON. We have had the Kapiolani Home for nonleprous female children for some time, and the board of health would like very much to have a similar place for boys.

Senator KANUHA. I think if they knew that their children would be given a suitable place and would be treated well they would have no objection to their leaving the settlement.

Senator BALDWIN. Let us take up the next item:

5. That the cloth allowance of the value of \$10 be made in coin.

Senator BALDWIN. The item of cloth allowance I am somewhat in doubt about. Some think it would go for liquor, etc., if given to the residents of the settlement in cash.

Now, in regard to item 6:

6. That the minister of the interior, with the approval of the board of health, permit the erection of stores other than that of the board of health.

Senator BALDWIN. They complain that the store charges them higher prices for goods than they can be bought here. They complain that the stores rob them on the stuff. They don't say what was the cause of it. Mr. Way, I believe, was one of the men that made some complaint. They seem to think that they can trade better and get better value for their money if they were allowed to have other stores in order to get the benefit of competition. They say that this store has too little in it, not enough variety. A ham, I believe, sells for \$2. It was stated that a bag of potatoes was gone a very few minutes after it had landed. Those who were left without could not get any more for two or three weeks.

Attorney-General DOLE. I would state that the store sold goods at a profit until two or three months ago, then a resolution was passed that the store should sell at the cost of goods. If the goods were sold at cost there could not be any competition. It is to be presumed that the store buys as cheap as others can, and if it sells at cost no store could run in competition with it.

Senator RUSSEL. The prices on goods put on by the board of health are higher than any other prices in the islands.

Senator BALDWIN. That was one complaint. Some goods were returned sometimes as not being good. They did not have a stock of goods; for instance, potatoes were in very small quantities. They claim that the flour was not fit to use, and that while the prices of goods were reasonable at times, at others they were higher than in Honolulu.

Attorney-General DOLE. Was it within the last two months?

Representative GILFILLAN. They said the prices had been reduced within the last two months.

Attorney-General DOLE. The prices have been reduced by a resolution of the board of health within the last few months.

Secretary WILCOX. Dr. Raymond says that in the statement I made up of the merchandise account that the expense of running the store should have been taken out of the profit. That was the way I did it before, but they objected to it in the legislature of 1898. They said what they wanted to find out was what it cost the board of health without respect to running expenses. Dr. Raymond objected to that.

Senator KALAUOKALANI. I took some memoranda there of the prices the store was said to be charging, and I found that shoes that could be bought in Honolulu for \$1.25 sold there for \$1.35, and that tin pans that sold for 50 cents in Honolulu cost 5 cents more there. I believe there were some other items. The board of health is still getting a profit.

Dr. COOPER. I would like to ask Dr. Russel if I understood him to say that the board of health was buying goods here at prices higher than those charged to the average purchaser.

Senator RUSSEL. I can show him the figures.

Representative BECKLEY. My own idea is that if there was a store there other than the one the board of health has now it would be better.

Senator BALDWIN. Are there people at the settlement who are able to take charge of a store? Has there ever been any prohibition of

anyone putting up a store? I would like to ask whether the board of health have made any rule in regard to it. I understood from testimony that only three coffee shops were allowed by rule of board of health.

Superintendent REYNOLDS. It has been understood that the board of health would allow three coffee shops. They were limited at that they thought it was not well to have too many there the way they are.

Senator BALDWIN. If another store was started, would the board of health stop it?

Mr. LOWREY. No such action has been asked for.

Senator BALDWIN. They stated that if the board of health would agree to it they would put a store up. Would the board of health object to other parties putting up stores?

Mr. LOWREY. That would be a matter for the board of health to consider. The question would come in as to the matter of payment for transportation of goods. Then, there are a number of other matters that would come up in connection with it.

Senator BALDWIN. That the minister of the interior permit the erection of other stores. Let us take up the next one.

7. That the letters of lepers be mailed free of postage.

Mr. LOWREY. That will have to go to Washington.

Senator BALDWIN. They seem to understand that.

8. That each leper be given once a month one-quarter of a cord of fuel.

Senator BALDWIN. I would like to ask what is the rule about that?

Mr. LOWREY. How much are you giving them now, Mr. Reynolds?

Superintendent REYNOLDS. None, unless they pay for it. Wood \$2 a cord.

Senator BALDWIN. How would the board of health consider a proposition to issue that to them?

Mr. LOWREY. It is all right if the legislature appropriates the money to do it with.

Attorney-General DOLE. That is to those who cook and need fuel but not to those who don't.

Senator BALDWIN:

9. That the importation of awa into the settlement be permitted, not to exceed stumps at a sending.

Senator BALDWIN. What is the rule now?

Superintendent REYNOLDS. Some time ago there was a license. Now, what comes in is not brought by the board of health and sold but comes in to private parties.

Senator BALDWIN:

10. That the board of health be made to pay the expenses of digging the graves of deceased lepers.

Senator BALDWIN. I would like to ask what is the rule?

Mr. LOWREY. The rule is the board of health digs the graves, unless they have friends to do it for them.

Superintendent REYNOLDS. Most of the natives belong to one or the other of the two societies, and they conduct the funerals, sometimes on a very elaborate scale.

Senator BALDWIN. How would it be—would it cost much if the board of health dug all the graves?

Superintendent REYNOLDS. Oh, no.

Senator BALDWIN. How many died during the year?

Mr. LOWREY. It costs \$2 a grave, I believe.

Executive Officer PRATT. Two hundred and eighteen have died within the last two years.

Senator BALDWIN. Would the board of health advise that? How is it—what is the proportion of those who die, and whose graves the board of health dig, to the whole number of graves dug?

Superintendent REYNOLDS. I think they have to dig very few. The societies do that.

Senator BALDWIN:

11. That an appropriation be made for the erection of a home for the sons of lepers.

Senator BALDWIN. We have already covered that in a previous discussion.

12. That the two planters of Waikolu be made to cook and make into poi'ai and deliver at the food dispensary at Kalaupapa.

Senator BALDWIN. We have already practically covered that point.

13. That a judge and sheriff be stationed permanently at Kalaupapa.

Senator BALDWIN. That has been practically covered also.

14. That a law be enacted providing for the examination of the clean lepers biennially.

Senator BALDWIN. How often are there examinations of those who claim to be free from disease?

Dr. COOPER. Whenever the board of health goes up for the examination of the settlement there is an opportunity for an examination.

Senator BALDWIN. How often is that?

Dr. EMERSON. It has generally been a great desire to become a leper.

Superintendent REYNOLDS. There are those who claim, from time to time, that they are not lepers, but when the opportunity comes for examination they do not come forward.

Senator BALDWIN. It does not seem as though they want to leave there?

Superintendent REYNOLDS. A great majority of them don't.

Representative BECKLEY. Has there been any effort on the part of the authorities there—that is, any report to the board of health—that any persons were suspected of not being lepers, accompanied by a request that they be examined?

Mr. LOWREY. Does the doctor report cases?

Superintendent REYNOLDS. Sometimes. Sometimes they have been sent down here for a further examination and didn't want to come down.

Representative BECKLEY. Has there been any effort to compel them to come down for examination—persons that were nonlepers and that the doctor reported for examination? Where a person has refused to come for examination, has the superintendent or the assistant superintendent made any effort to compel them to come?

Superintendent REYNOLDS. Usually when the time comes they can not be found. When the steamer is here to carry them they seem to suddenly disappear.

Representative BECKLEY. Was any force used, or are they left to their own volition?

Superintendent REYNOLDS. They are generally left to their own

volition, and, as I say, they generally can't be found when the board of health calls for an examination.

Representative BECKLEY. How often does the board of health go up? Superintendent REYNOLDS. They are supposed to go once every six months. Of late it has been very difficult landing them.

Representative BECKLEY. I remember there was some who wanted to leave—a man by the name of Kanani, I believe. He stated that the board of health kept him there. Kaaao spoke of several, naming his testimony J. K. Waimau (k), J. H. Imihia (k), Kapahu (k), McMillan (w), Kanani (k), also Annie Gaiser (w). He said that they were not lepers. I do not know, but he says that they wanted to go away.

Dr. COOPER. Has there been any examination by the physician of the settlement of these persons? If they are not lepers, they should report him, so that he could report here.

Senator BALDWIN. I remember Kanani spoke to us. He used to go on a water tender on the wharf and was discharged.

Representative BECKLEY. Kanani said he was not a leper.

Secretary WILCOX. His name is Kanani Makini, I believe.

Senator KANUHA. With regard to these persons whose names are given here and whom it has been stated are not lepers, does the board of health or Mr. Reynolds think it the proper thing for them to remain there, and should they not be examined?

Mr. WINSTON. Has a doctor ever made an examination upon them?

Senator KANUHA. The superintendent has already stated that they are some who are not lepers there and who do not want to go out.

Mr. LOWREY. The board of health certainly does not want to keep any one there and support them unless it is necessary.

Senator KANUHA. Then why are they allowed to remain there?

Dr. EMERSON. There are none except kokuas, only those who are helping the lepers. Some of those were thought not to be lepers an afterwards turned out to be lepers. In some instances a man might be found apparently not a leper, and then again the disease will come on again. Out of regard for the safety of the public, and only for that, it is done. Those who have been kept there, who were apparently lepers, have afterwards shown that the judgment of the physicians was correct. A person is examined sometimes and does not show any signs at all and after a long time it shows itself again.

Senator KANUHA. Have those persons in whom the board of health found no signs of leprosy been kept apart from the others?

Dr. EMERSON. It is a hard matter to decide whether a man has leprosy or not.

Dr. COOPER. I should consider that a person who had not had the disease for over fifteen years—I should consider such a person a non-leper.

Senator KANUHA. Where the disease disappears from a person before, the doctors would decide that he is clean?

Dr. EMERSON. That is an important question. It is not at all possible to know by any fixed or fast rule in advance. Each case must be taken by itself. Perhaps there will be two years that a person will have the leprosy, and then there will be a period of three months when he is apparently a nonleper. Then again there will be two or three years in which the leprosy is apparent. If it were possible to keep a record of a man's history, you might, perhaps, be able to know when

he was free from leprosy. It varies with each case. The course of the disease in one man is by no means necessarily followed in any other man. If you studied medicine, you would understand that it is impossible to fix any definite time in advance.

Senator KANUHA. Do these persons remain with the lepers? It was so reported at Kalaupapa.

Dr. EMERSON. Of course; it would not be advisable for the board of health to do otherwise. It would be impossible.

Senator KANUHA. Would they remain there possibly not be a source of their becoming reinfected and again getting the disease?

Dr. EMERSON. I suppose that is so. We don't know to what extent a person having had leprosy prevents his having it again. There is a great deal of ignorance in regard to this. We know that smallpox and some other diseases are a guard against a person having the same disease again, but we do not know exactly with regard to leprosy, and therefore can not say.

Senator KANUHA. If any physicians are in doubt on this point, why has not the board of health kept them separate?

Dr. EMERSON. We simply could not persuade them to go into it. They would not do it.

Senator KANUHA. Could they not be kept separate?

Dr. EMERSON. The board of health would be very glad if any would try that. They can go to Dr. Oliver, and if anyone is of the opinion that they have not got the disease, and the doctor thinks there are good reasons, he would report it, and they would be examined there by a board and brought down here.

Senator KAOHI. Does Dr. Oliver try to treat leprosy over there?

Dr. EMERSON. He does all he can. The fact is, no systematic treatment of leprosy has ever been popular. The fact is that it has not been possible to persuade anyone to take a systematic cure for leprosy.

Senator KAOHI. Does Dr. Oliver give any medicine?

Dr. EMERSON. Sometimes.

Mr. LOWREY. We want to get through, and let us go on.

Senator BALDWIN.

15. That an expert on leprosy be procured for this dread disease.

Senator BALDWIN. That is practically covered already.

16. That the weight of the pai'ai be increased from 21 pounds to 25 pounds.

Senator BALDWIN. What is the condition of the ends instead of 21 pounds. Notley was the only one who did not seem to agree with the statement, and he is raising taro in Waikolu. They want better flour and better salmon. There are some other items also that we spoke of. They wanted some sheep. I think it would be quite a good thing to get some sheep. Then about beef; they are kept in a pen for a month at a time.

Mr. LOWREY. Did you see them eat; did you see it butchered?

Representative GILFILLAN. We saw the cattle up to their belly in mud.

Senator BALDWIN. I thought that was cruelty to animals.

Superintendent REYNOLDS. We get our cattle bimonthly—I mean, some are monthly. We give them all we can get them to eat.

Senator BALDWIN. What is the condition of the cattle when they get there?

Superintendent REYNOLDS. Poor, miserably poor.

Representative GILFILLAN. I think there is only one way, and that is to land at Kawaihae and kill the cattle over there and take them down.

Superintendent REYNOLDS. That can not be done; we have tried that before. In regard to the poi, some think that 21 pounds is ample and some think that that is not enough. I do not eat poi myself, that I do not know. There is one thing—that is, that most of the natives have all the way from two to ten poodles, and they have to be fed.

Senator BALDWIN. I think a lot of good sheep would be a good thing to have.

Dr. EMERSON. In regard to the matter of sheep, when Mr. Gibson was president of the board of health he sent a lot of sheep up there but they were disgusted with it at that time. The Hawaiians, as a rule, do not like mutton.

Attorney-General DOLE. I would like to inquire if the contract for canned beef and mutton has gone into effect.

Executive Officer PRATT. A large consignment of the goods has already been sent up.

Superintendent REYNOLDS. A large consignment is there now. We have an order consigned from the Libby concern in Chicago, which came through direct. I think it is very nice goods as a rule, though there has been some complaint of the goods having a strong smell. However, I don't believe it. I have used some of the goods on my own table and found them nice.

Representative BECKLEY. In regard to a matter which came up yesterday in the examination of suspects at the Kalihi receiving station, there was a case there where a woman was ten years a leper and now a suspect. Are there any of the original members now present who were on that original board of health that declared her a leper?

Dr. EMERSON. I think I was then a member.

Representative BECKLEY. Was it the custom, or has it been the rule to have these examinations conducted by the same physicians who made the original examination? Dr. Emerson says that he was a member of the original board.

Dr. EMERSON. There has been no rule in relation to that.

Representative BECKLEY. We are given to understand that this person was ten years in the settlement, and then the board discovered her a suspect. Yesterday she was examined and declared a suspect. Has there been any other cases of suspect similar to this? According to the statement of the physicians two declared her a leper, while one declared her a suspect; she has not been treated fairly. Has there been any others kept in that way? Have there been any others found a suspect after they have been declared lepers?

Secretary WILCOX. There were some treated by Dr. Goto who have been brought down here.

Mr. LOWREY. Can you answer, Mr. Reynolds?

Superintendent REYNOLDS. No.

Mr. LOWREY. We will have to go into the records for that, Mr. Beckley.

(The following items were passed over only in a general way, as appears above.)

17. That the board of health permit helpers (persons who are not diseased) to visit their sick twice a year under their own expenses without hindrance.

18. That the appropriation for the settlement be increased.
19. That the words of the last portion of section 1002 of the penal laws as amended, relating to helpers, be repealed. Thus: "But such punishment shall not cover his expulsion from the premises of the board of health."
20. That the leper settlement be provided with No. 1 flour, rice No. 1, good salmon, and with fat beef.
21. That lepers be allowed to appeal from decisions rendered, and that such appeal be heard by the circuit judge at Kalaupapa.
22. That the settlement be provided with live sheep, delivered at the settlement every six months.
23. That each leper be supplied with one quart of oil once a month.
24. That each leper be allowed one pound of sugar and tea of good quality once a week.
25. That lepers who have no horses be allowed to import one horse each from anywhere outside.

Senator BALDWIN. I would like to say that the lepers seem to want horses. I don't know to what extent, but it seems to me that there should be some regulation. The pasturage around there is not abundant. Some have a good many horses and some have none. Notley stated that he had nine horses, but I presume he is using them in cultivating his taro. I think there should be some general regulation as to the number of horses. Is there any regulation now?

Superintendent REYNOLDS. There is a regulation against bringing fresh horses into the place.

Senator BALDWIN. I think there should be a regulation in regard to this. Notley is raising taro, but perhaps there are others who do not. Some would like to have a number of horses, and perhaps that could be regulated by the plan as outlined by Dr. Russel for a local government.

26. That helpers be permitted to accompany and reside with lepers when they are segregated.

Signed) R. M. Kaaoao, Thos. K. Nathaniel, Andrew Auld, W. K. Makakoa, W. K. Palamalelo, Kimo Kuale, J. H. Hulihia, Chas. M. N. Brewster, Geo. J. Kakaau, William Kapela, jr., J. M. Kailimai, Jas. Proesser, John Kaahiki, Wm. Kaahiki, Wm. Keaouli, J. Harvest.

The formal conference ended here.

Senator BALDWIN. Dr. Russel had some points he wanted to present to you, and Mr. Kanuha has one or two bills he would like to leave with you to look over. One is a senate bill and the other has been already passed by the house of representatives. Can you appoint some time in the afternoon?

Mr. SMITH. I have been looking back as far as 1866, and I find in a report to the legislature, made by the committee at that time, many of the questions submitted by you here. These people are all sick men. The majority of their complaints are frivolous. They have been kicking about them for the past twenty-one years. We can not ask to go into all of them.

Senator BALDWIN. We do not ask you to do that; only those which you may wish to answer. These two bills you can report upon to Mr. Kanuha and myself. The one from the house of representatives is in regard to vaccination. We would like to have your report upon them as soon as possible.

Mr. LOWREY. This will be taken up at our first meeting. Any report that we may make will be made to the senate committee.

Senator BALDWIN. Please make your report as soon as you can.

I hereby certify that the within foregoing thirty-three typewritten pages, numbered from 1 to 33, respectively, contains a faithful and correct transcript of the proceedings of the within-mentioned conference.

J. D. AVERY,

Stenographer, the House of Representatives

At a public meeting held in the Beretania Hall, at Kalaupapa, Molokai, February 20, A. D. 1901, it was resolved that the accompanying petition be placed in the hands of a committee of fifteen members, praying:

1. That the local management of the settlement be given by a board to be enacted therefor to the persons segregated here.
2. That a liberal appropriation be made to increase the water supply of the settlement.
3. That a steam vessel be purchased for the board of health to be used for the transportation of freight from the other islands to the settlement.

R. M. KAAOAO,

Chairman of the Committee

To the legislature of the Territory of Hawaii, greeting:

We, leprosy persons residing at Kalaupapa and Kalawao, islands of Molokai, Third representative election district, precinct one, through our committee, respectfully pray as follows:

1. That the board of health be prohibited from claiming any share in the taro produced by the farmers at Waikolu;
2. That the board of health be made to pay for the carriage of freight for the lepers sent from all the islands of the group;
3. That the board of health paint and whitewash all the buildings occupied by the lepers;
4. That the children born of leprosy women be given full food and fish allowance, as well as wearing supplies not to exceed the value of ten (\$10.00) dollars a year;
5. That the cloth allowance of the value of ten dollars be made in coin;
6. That the minister of the interior, with the approval of the board of health, permit the erection of stores other than that of the board of health;
7. That the letters of the lepers be mailed free of postage;
8. That each leper be given once a month one-quarter ($\frac{1}{4}$) of a cord of wood for fuel;
9. That the importation of awa into the settlement be permitted but not to exceed two stumps at each sending;
10. That the board of health be made to pay the expenses of digging the graves of deceased lepers;
11. That an appropriation be made for the erection of a home for the sons of lepers;
12. That the taro planters of Waikolu be made to cook and mail into "paiai" and deliver at the food dispensary at Kalaupapa;
13. That a judge and sheriff be stationed permanently at Kalaupapa;
14. That a law be enacted providing for the examination of clean lepers biennially;

15. That an expert on leprosy be procured for the cure of this dread disease;
16. That the weight of the paiai be increased from 21 lbs. to 25 lbs.
17. That the board of health permit helpers (persons who are not diseased) to visit their sick twice a year under their own expenses, without hindrances;
18. That the appropriation for the settlement be increased;
19. That the words of the last portion of section 1002 of the penal laws as compiled, relating to helpers, be repealed. Thus: "But such punishment shall not exceed his expulsion from the premises of the board of health;"
20. That the leper settlement be provided with No. 1 flour, rice No. 1, good salmon, and with fat beef;
21. That lepers be allowed to appeal from decisions rendered, and that such appeal be heard by the circuit judge at Kalaupapa;
22. That the settlement be provided with live sheep delivered at the settlement once every six months;
23. That each leper be supplied with one (1) quart of oil once a month;
24. That each leper be allowed one pound of sugar and tea of good quality once a week;
25. That lepers who have no horses be allowed to import one horse each from anywhere outside;
26. That helpers be permitted to accompany and reside with lepers when they are segregated.

EXHIBIT NO. —.—Memorial of O. T. Shipman.

To the Members of the Committee on Pacific Islands, etc.

GENTLEMEN: The undersigned respectfully shows that he is a citizen of the Territory of Hawaii, 45 years of age, born in the islands, whose parents were American missionaries, and whose whole life thus far, with the exception of some eight years while attending school in the United States, has been spent in the islands, and who intends to continue residing here.

In view of the foregoing I consider myself as one not only particularly interested in the future welfare of the Territory, but also as somewhat familiar with the conditions heretofore and now existing

here, and therefore in a position to call your attention to some of needs.

At the outset I should say that our greatest need is to have assistance of Congress in making this an American Territory in as well as in name (which is all that it is now), and as soon as possible and that we can reasonably expect Congress to do something for we are led to believe from President Roosevelt's message referred to Hawaii, in which he says:

In Hawaii our aim must be to develop the Territory on the traditional American lines. We do not wish a region of large estates tilled by cheap labor; we wish a healthy community of men who themselves till the farms they own. All our legislation for the islands should be shaped with this end in view; the well-being of the average home maker must afford the true test of the healthy development of the islands. The land policy should be as nearly as possible modeled on our home system.

In support of the statement that this is but an American Territory in name only, I would beg to refer you to the proceedings had in the last legislature and more particularly with reference to an act introduced "providing for and creating certain counties in the Territory of Hawaii, and providing a form of government for such counties."

This act was introduced by the "Home Rule" party; it was the wish of the majority of the voters that we should have county government; it was one of the principal planks in the platforms of all the parties, and as far as I can discover, it was a very good bill, at least it was a start in the right direction and along American lines. It was very strongly opposed and fought tooth and nail by the Republican so-called Republican members, evidently at the request of the planters who opposed it, the very persons who pretend to represent the wealth, respectability, and intelligence, as well as all progressive American ideas of government in the Territory. I give herewith the vote on the final passage of the county bill in the senate April 26, 1901:

Voting yes: J. Brown, H. R.; Crabbe, Rep.; Kapilina, H. R.; Kaiaukalani, H. R.; Kanuha, H. R.; Kaohi, H. R.; Nakapaahu, H. R.; Russel, H. R.; White, H. R. Total, 9; 8 H. R., 1 Rep.

Voting no: Baldwin, Rep.; C. Brown, Rep.; Carter, Rep.; Kai H. R.; Paris, Rep.. Total, 5; 4 Rep., 1 H. R.

Achi, Rep., not voting, answering "Doubtful" on call of his name.

This act was virtually vetoed, as will appear from the testimony given by Governor Dole before the Committee on Territories, United States Congress, April 18, 1902:

Mr. ROBINSON. The organic act, section 56, authorizes the legislature to create counties and towns and cities and municipalities within the Territory of Hawaii, and provides for the government thereof. I have read it all; which means local self-government. Has any effort been made to secure self-government warranted by that section?

Governor DOLE. Yes, sir.

Mr. ROBINSON. Has the legislature adopted that system, or any system under it?

Governor DOLE. No; I can not say they have. They made an attempt to do it.

Mr. ROBINSON. Are you favorable to granting municipal government to counties, cities, and towns in Hawaii?

Governor DOLE. I am favorable to it when it can be done on a system which will promise success. I recommended in my message to the legislature that they study the question, and recommended certain principles which seemed to me to be desirable in the matter. The legislature, I think, got down to work rather late, and they passed a bill, and it reached me about two hours before the legislature adjourned. It was a very large bill; it was fully an inch thick, with matter printed on one side and so it was impossible for me to look it over before the session adjourned. I have a résumé of it, and there were features of it which made it impracticable. If it had come to me earlier I should have vetoed it, I think.

Thus after having in his possession this bill for a twelvemonth, the governor thinks he would veto it. How long a time does he require which to make up his mind upon a measure so evidently demanded by a majority of the citizens of this Territory? In Governor Dole's message to the legislature of the Territory of Hawaii, session of 1901, on pages 14 and 15, with reference to counties, appears the following:

"Congress has conferred on the legislature authority to create counties and towns and city municipalities within the Territory and to provide for the government thereof. This is an enterprise requiring for its success a high degree of patriotism and civic intelligence. Careful study of local conditions and the experiences of other communities in the creation and administration of municipal corporations are necessary to safeguard the country against costly mistakes. Many problems will arise in the consideration of such legislation that are difficult of solution, calling for sincere deliberation. There are important questions to be weighed by you in the consideration of this subject. Should such local governments be established in communities that do not ask for them? Should the whole area of the Territory be occupied by such governments, or should experiments be made in one or two localities before going further? What will be the approximate burden of the aggregate taxation of the city or county and the Territory on the taxpayer? How will the small proprietor be affected by such combined taxation, and by the probable greater stringency of municipal regulations? These questions are better answered before than after the creation of such corporations is finally settled.

Probably the most satisfactory method of conferring such privileges is by means of general statute, stating the conditions precedent to the establishment of such governments, and the principles and limitations to be recognized in their organization, for which any community within the conditions may proceed to acquire corporate existence whenever it shall so desire. Should the legislature find itself unable, at this session, to agree upon satisfactory legislation in this matter, it would doubtless facilitate the progress of the work in the future if it should make provision for the appointment and adequate pay of a commission of several persons to prepare a general scheme for both county and city government, and report to the next regular session of the legislature.

From the foregoing one would be led to believe that the governor's reasons for vetoing this bill are:

First, a lack of "patriotism and civic intelligence" throughout the Territory.

Second. That we are not ready for county government yet.

Reading, however, between the lines and from a knowledge of actual facts, one can not escape the conclusion that the true reasons for his attitude are:

First. That it would be stripping the powers that be in Honolulu (in whom all power and authority is centralized), in a great measure, of the immense influence and control that they now exercise over affairs in general; and,

Second. That it is sought to perpetuate, for as long a time as possible, the principles of an odious oligarchy as contradistinguished from those of a government established along traditional American lines.

In order to make this in reality a prosperous American Territory, and to effectually combat existing influences and conditions, we need more people here; people of intelligence and independence; people thoroughly imbued with American principles of government, and who would not be afraid to do a little hard work to establish homes for themselves and families—e. g., practical farmers and laborers of the more intelligent class.

The only way, however, that I can see in which people of that class can be induced to come here would be by opening up the public lands to settlement in the same manner as obtains on the mainland, and at practically the same valuations.

The bill introduced in the Senate by Senator Mason (Senate bill No. 344) I have looked over carefully, and I think in the main that it is

just what we need; only recommending that the bill be amended regard to prohibiting anyone owning land from taking up government land by some limitations—say, that such applicant shall not own in own or in his wife's name more than 160 acres.

All juggling with the public lands should cease at once. The commissioner of public lands, by and with the consent of the executive council, an illegal body, should not be allowed to make laws relating to the sale and disposition of the public lands to suit themselves; no lease of public lands should be allowed whatsoever. Senate Bill No. 1344, above referred to, prevents all this, as it should. As matters now stand we don't know what the land law is, and we have no means of checking and contesting any irregularities in the method of disposing of the public lands, and the best way of avoiding all confusion and inducing a speedy settlement of the country would be extending to us the American homestead law, modified to suit the Territory and in accordance with President Roosevelt's message to Congress.

Another inducement to settlement here would be to discover as far as possible all of the miscellaneous kinds of crops that can be probably grown, thus avoiding delay and eliminating all element of risk to the farmer or person of limited means; and this work Congress could greatly facilitate by establishing branch experimental stations elsewhere than at Honolulu.

Sugar cane is a crop that thrives wonderfully in most localities throughout the Territory, the time required for its maturity varying from twelve to twenty-four months according to altitude. This, however, is an industry so controlled by the mill companies that if there would not be many independent parties who would care to take it up.

I submit herewith an exhibit showing the result of my efforts as a cane planter, also a blank planting contract. The experiment was tried in this immediate vicinity at an elevation of 1,600 feet, and represents actual results.

You will perceive by reference to the exhibit that, comparatively speaking, it has taken me, with all my hard work, risk, and capital, two and one-half years to do what it takes the sugar company a few minutes—and without any risk to itself—to accomplish, and that it takes the lion's share of the profits. The sugar company should be satisfied with one-third of the gross receipts.

The contention that it is a physical impossibility for the white man to labor in the cane fields of Hawaii, if ever honestly held, has been long since exploded—the falsity of which can be demonstrated at any time and in almost any locality.

Bananas and pineapples also thrive here, but the cost of transportation to market, with the exception of one or two specially favored localities, is so great as to render these industries unprofitable. We have but two steamship companies operating here, owned and controlled by the sugar companies, and from the manner in which they have divided up the business of the Territory between themselves, they virtually constitute but one company.

The small shipper pays a freight rate amounting to two, three, or sometimes four times as much as a sugar company or large shipping agency.

Any legislation by Congress along the lines I have stated, and me

particularly with reference to our land laws, with a view of encouraging the settlement here of a farming class, is what we principally need. Our local difficulties we hope to be able to adjust satisfactorily in time.

O. T. SHIPMAN.

MOUNTAIN VIEW, HAWAII, *September 20, 1902.*

EXHIBIT A.—*Cane-planters' exhibit.*

Thirty acres of cane planted by O. T. Shipman at Mountain View June 1, 1900, harvested and delivered to Oloa Sugar Company, August 5, 1902. Actual yield 1,107 tons cane, payment for same to be made by the company about November 15, 1902.

1,107 tons of cane, at \$3.80 per ton.....	\$4,206.60
Actual expenses incurred for seed, planting, cultivating, stripping, and caring for cane until maturity, not including original cost of clearing (\$3,030.50) the land, and no fertilizer used.....	2,395.00

Net profit two years and six months.....	<u>1,811.60</u>
------------------------------------------	-----------------

CONTRA.

1,107 tons cane = 138 tons sugar; 138 tons sugar at \$65 per ton	\$8,970.00
Cost to mill company of transporting cane to mill, grinding and manufacturing into sugar, bagging, and all expenses of shipping to market, \$14 per ton sugar:	
138 tons, at \$14.....	\$1,932.00
Paid for cane	<u>4,206.60</u>
	6,138.60

Net profit to mill company.....	2,831.40
---------------------------------	----------

EXHIBIT B.

This agreement, made this — day of —, 190—, by and between the Oloa Sugar Company, Limited, a Hawaiian corporation, hereinafter called the "Mill," party of the first part, and —, hereinafter called the "Planter," party of the second part, witnesseth:

1. That the mill, in consideration of the covenants and agreements of the planter hereinafter contained, doth hereby covenant and agree with the planter:

That it will buy from the planter all sound sugar cane (excluding all dry and sour cane) of the kind herein enumerated, grown and brought to maturity as hereinafter specified, during the term of — years from the date hereof, on that certain piece or those pieces of land situate at —, containing an area of — acres, and more particularly described as follows, viz: —.

2. That when ready for harvesting, subject to the harvesting of the cane of others as hereinafter set forth, it will cut, weigh, and transport said cane on and from said land to the flume or railroad leading to the mill, charging the planter for such transportation — cents for each ton of cane; the planter, at his option, doing such transportation himself, at his own expense, under the supervision of the mill, and with a sufficient force to keep the flume or railroad in operation.

3. That it will, after deducting from the purchase price of said cane all moneys then due or payable by the planter to the mill, within the months after such delivery, pay to the planter in United States gold coin the purchase price of said sugar cane at the following rates,

When the price received by the mill for sugar in San Francisco is	
2½ cents, and less than 2½ cents per pound, for each ton of cane.....	\$
2½ cents, and less than 3 cents per pound, for each ton of cane.....	
3 cents, and less than 3½ cents per pound, for each ton of cane.....	
3½ cents, and less than 3½ cents per pound, for each ton of cane.....	
3½ cents, and less than 3½ cents per pound, for each ton of cane.....	
3½ cents, and less than 4 cents per pound, for each ton of cane.....	
4 cents, and less than 4½ cents per pound, for each ton of cane.....	
4½ cents, and less than 4½ cents per pound, for each ton of cane.....	
4½ cents, and less than 4½ cents per pound, for each ton of cane.....	
4½ cents, and less than 5 cents per pound, for each ton of cane.....	
5 cents, and less than 5½ cents per pound, for each ton of cane.....	
5½ cents, and less than 5½ cents per pound, for each ton of cane.....	
5½ cents, and less than 5½ cents per pound, for each ton of cane.....	

and in like ratio for any increase in price over that last above named.

4. That the price of sugar upon which said price of cane shall be based shall be the price shown by the account sales of the sugar belonging to the mill sold in San Francisco last previous in date to respective deliveries of said cane. If there have been no previous sales in San Francisco of that crop, then the first account sales received thereafter shall be the basis of said price.

5. That the mill will furnish to the planter, at market rates, such fertilizer as may be required for use on said crops of cane.

6. That when the mill has seed cane to spare it will allow the planter to have the same with which to plant said land, charging thereon market rates.

If the mill has the teams to spare it will, at the request of the planter, transport the said seed to said land, or plow and harrow his said land, charging market rates therefor.

7. All material or labor furnished by the mill to the planter shall be paid for by the planter within thirty days after such furnishing, without interest. If not so paid such sum shall bear interest from the respective dates of furnishing, and shall be deducted, principal and interest, from the amount coming to the planter from his crop when thereafter harvested, interest to be at the rate of 8 per cent per annum.

8. That it will harvest said successive crop at the time and time nearest maturity at which it is able to do so, having due and equitable regard for the crops of the mill and other planters whose crops shall be mature at the same time.

9. In consideration of the foregoing covenants and agreements made the part of the mill, the planter doth hereby covenant and agree with the mill (and if the planter consists of more than one person the covenants are both joint and several):

That the planter will, immediately upon the execution of this agreement, proceed to diligently and properly clear and plant not less than _____ acres of said land with Lahaina, Yellow Bamboo, Rose Bamboo or Yellow Caledonia sugar cane, or such other kind as the mill may by writing consent to, and diligently and continuously, and in a good husband-like manner, cultivate the same until it arrives at maturity, stripping it as many times as may be necessary, but not less than three times, at appropriate intervals, so that the same shall be fit for harvesting by January 1, 190—.

10. That during each succeeding year for and during the term

this agreement the planter will, so far as the area of said land and the proper length of time for ratooning will allow, plant or ratoon, or both plant and ratoon, and cultivate and care for in manner as aforesaid not less than a like area of said land, so that there shall, during each year of said term following 190—, be matured and fit for harvesting, with the exceptions aforesaid, and delivered to the company as aforesaid, not less than ——— acres of cane on said land.

11. That so far as reasonably practicable the planter will cause the cane to be harvested each year to be in one compact area, to be located under the supervision of the mill.

12. That the planter will sell and deliver all cane raised on all of said land during the term of this agreement to the mill, at the time and times, place and places, in the manner, upon the conditions, and for the price and prices above set forth, and will not sell or otherwise dispose of any cane grown on said land during said term to any person or corporation other than the mill.

13. That the planter will allow and hereby grants to the mill for the term of this agreement a free right to enter said land, to examine, cut, and remove said crops, and a free right of way into and across said land and any other land owned, leased or controlled by the planter, and any part thereof, not interfering with the buildings of the planter, for flumes or railroads with which to remove the said crops, or other crops owned or controlled by the mill.

14. That if at any time during said term the planter shall fail to properly plant said land, or properly and in a good and husband-like manner cultivate or care for said cane as aforesaid, or shall otherwise violate or fail to observe and perform the terms of this agreement, the mill may at its option cancel this agreement, or it may at its option enter upon said land and plant, cultivate, and care for the successive crops of cane herein provided for, charging to the planter the full cost thereof, both for labor, superintendence, and material, together with interest thereon at the rate of 8 per cent per annum.

15. That all sums due or payable by the planter to the mill for advances of cash, material, or labor shall be a first charge and lien in favor of the mill on all of said crops and the money coming to the planter from the mill.

16. It is hereby mutually covenanted and agreed by and between the parties hereto that each and every of the covenants and agreements herein contained shall run with the land and be binding upon the successors and assigns of the mill, and upon the heirs, executors, administrators, and assigns of the planter.

17. And also that if, at the end of said term of this agreement, there shall be an unmatured crop on said land, then this agreement shall continue in force for such further length of time as may be necessary to mature and harvest said crop.

In witness whereof the said parties have hereunto set their hands and seals, in duplicate, the day and year first above written.

[Takes 8 tons cane to make 1 ton sugar.]

EXHIBIT C.— *With map attached.* (See end of volume.)

Herewith is attached a map of the district of Kau, in which I was born, have lived many years, and am still residing.

The colored portions represent public lands.

The rest of the district, with the exception of the land of Kahuku, owned in fee by Col. S. Norris, and the land of Keauhou, owned by the estate of B. P. Bishop and leased to myself, is almost exclusively owned and controlled by the two sugar companies of the district, the "Hutchinson Sugar Plantation Company" and the "Hawaiian Agricultural Company."

The report of J. F. Brown, commissioner of public lands, presented to the house of representatives March 30, 1901, shows the land transactions for the district of Kau up to January 1, 1900, as follows:

Land.	Lessee.	Area
		<i>Acres.</i>
Kapapala, expires July 1, 1907.....	Hawaiian Agricultural Co	172,740.0
Waiohinu, expires Apr. 1, 1914.....	Hutchinson Sugar Plantation Co	15,210.0
Moaula, expires June 15, 1906.....	Hawaiian Agricultural Co	
Kaalaiki, expires Sept. 8, 1906.....	Hutchinson Sugar Plantation Co	7,000.0
Kawela and five others, expires Oct. 22, 1906.....	do	2,840.0
Honua, expires Jan. 10, 1906.....	do	1,332.0
Ninole and Waiala, expires June 17, 1906.....	do	6,500.0
Mahokea (2), expires June 4, 1907.....	Hawaiian Agricultural Co	2,761.0
Kamoa and Punoa, expires Apr. 25, 1907.....	Waiohinu A. & G. Co., owned and controlled by Hutchinson Sugar Plantation Co.	12,500.0
Kaalaala and three others, expires Jan. 1, 1908.....	Hawaiian Agricultural Co	2,964.0
Lands between Moaula and Keaiwa, expires May 7, 1904.....	do	4,200.0
		228,126.0

A large portion of these lands are suitable for agricultural purpose and could be cut up into small farms, while the balance can be used for grazing purposes.

There are not six American or white people, outside of those directly connected and in the employ of the two sugar companies, including myself, living in the district, and but a very few Hawaiians.

If this is so, why so?

The average rainfall is about 35 inches annually.

There is no difficulty in raising crops the year through, except on the lowlands near the seacoast in an unusually dry year, and this represents but a very small portion of the area.

Are the Territorial authorities to be allowed to lease all of this area again to the two sugar companies for twenty-one years, more or less, thus continuing the district in its present state of benightedness?

EXHIBIT D.—*Substitute for house bill No. 48.*

Introduced April 4, 1901, by the special committee on county and municipal government. First reading in senate April 4, 1901. Legislature adjourned May 1, regular session.

AN ACT Providing for and creating certain counties in the Territory of Hawaii, and providing a form of government for such counties.

Be it enacted by the legislature of the Territory of Hawaii:

CHAPTER I.

SECTION 1. That the Territory of Hawaii be, and the same is hereby divided into six counties, the names and boundaries of which shall be as hereinafter set forth.

Sec. 2. That the islands of Kauai and Niihau and all other islands within a limit of three nautical miles from their shores shall comprise, constitute, and be known as the county of Kauai; and the county seat thereof shall be located in the town of Waimea.

Sec. 3. That all that portion of the island of Oahu lying in the district of Kona, and all small islands within the limit of three nautical miles from the shores of said district, together with all the other small lands belonging to the Territory of Hawaii which are not included in any other county by the provisions of this act, shall comprise, constitute, and be known as the county of Honolulu; and the county seat thereof shall be located in the city of Honolulu.

Sec. 4. That all the remainder of the island of Oahu and all small lands within the limit of three nautical miles from the shore thereof shall comprise, constitute, and be known as the county of Liliuokalani; and the county seat thereof shall be located in the town of Hauula.

Sec. 5. That the islands of Maui, Molokai, Lanai, and Kahoolawe and all the islands within the limit of three nautical miles from their shores shall comprise, constitute, and be known as the county of Piilani; and the county seat thereof shall be located in the town of Lahaina, on the island of Maui.

Sec. 6. That all that portion of the island of Hawaii lying in the districts known as Hilo, Puna, and Kau and all islands within the limit of three nautical miles from their shores shall comprise, constitute, and be known as the county of Kalauokalani; and the county seat thereof shall be located in the city of Hilo.

Sec. 7. That all that portion of the island of Hawaii lying in the districts known as Hamauka, North Kohala, South Kohala, North Kona, and South Kona and all islands within the limit of three nautical miles from their shores shall comprise, constitute, and be known as the county of Kamehameha; and the county seat thereof shall be located in the town of Waimea.

CHAPTER II.—*General provisions.*

Sec. 1. That each organized county within this Territory shall be a duly corporate politic and as such shall be empowered:

First. To sue and be sued.

Second. To acquire and hold real and personal estate for the use of the county, and lands sold for taxes as provided by law.

Third. To sell or convey any real or personal estate owned by the county, and make such order respecting same as may be deemed conducive to the interests of the inhabitants or this act provide.

Fourth. To make all contracts and do all other acts in relation to the property and concerns of the county necessary to the exercise of corporate or administrative power.

Fifth. To levy and collect such taxes for purposes under its exclusive jurisdiction as are authorized by law, or as the voters of the county, within the provisions of this act, may elect.

Seventh. To have a common seal.

Eighth. To have perpetual succession.

Sixth. To exercise such other and further powers as may be especially provided for by law.

Sec. 2. Any real or personal estate which may be conveyed to any county shall be deemed the property of such county.

SEC. 3. The powers of a county as a body politic and corporate shall be exercised by a board of three county commissioners.

SEC. 4. In all suits or proceedings by or against a county, the name in which a county shall sue or be sued shall be, "Board of commissioners of the county of ———," but this provision shall not prevent county officers, where authorized by law so to do, from suing in their official capacity for the benefit of the county.

SEC. 5. In all legal proceedings against the county process shall be served on the county clerk or his deputy as the clerk of the board of county commissioners, or upon any individual member of said board, and whenever suit or proceedings shall be commenced it shall be the duty of the person so served to forthwith notify the county attorney and lay before the board of county commissioners, at their next meeting, all the information he may have in regard to such suit or proceedings.

SEC. 6. On the trial of any suit in which a county may be interested the inhabitants of such county shall be competent witnesses and jurors if otherwise competent and qualified by law.

SEC. 7. When a judgment shall be rendered against the board of county commissioners of any county, or against any county officer in any action prosecuted by or against him in his official capacity, where the same should be paid by the county, no execution shall issue upon the said judgment, but the same shall be levied and collected by a tax as other county charges, and when so.

SEC. 8. There shall be and are hereby created the following offices: County surveyor, county treasurer, sheriff, county attorney, county clerk, register of deeds, coroner, county assessor, county road supervisor, and three county commissioners, and such offices shall be filled by election, as provided by law. The officers so elected shall hold their respective offices for two (2) years or until their successors are elected and qualified.

SEC. 9. Every person elected to any county office shall, before entering upon the discharge of the duties of his office, subscribe to an oath or affirmation that he will support the constitution of the United States and the organic act and laws of the Territory of Hawaii, and shall faithfully discharge the duties of his office according to law.

CHAPTER III.—*County treasurer.*

SEC. 1. The county treasurer shall receive all moneys belonging to the county from whatever source they may be derived, and other moneys which are directed by law to be paid to him, and all moneys received by him for the use of the county shall be paid out by him only on the warrants of the board of county commissioners, drawn according to law, and all other moneys shall be paid over by him as provided by law.

SEC. 2. He shall be the collector of taxes, and shall keep his office at the county seat. He shall be charged with the amount of all taxes lists in his hands for collection, and credited with the amount collected thereon, and the delinquent list, and shall keep a true and accurate current account of the moneys by him received, showing the amount thereof, the time when, from whom, and on what account received, cash, warrants, county or road orders; and if in warrants or orders their kind, number, or other designation, amounts for which they were

drawn, interest due thereon, and the amount of the receipts thereon indorsed, if any; also, of all disbursements by him made, showing the time when, to whom, on what account, and the amounts paid; and he shall so arrange his books that the amounts received and paid on account of each separate and distinct fund or appropriation shall be exhibited in separate and distinct columns or accounts, and so as to show whether the same was received or paid in cash or warrants or orders, and if either of the latter, their designation and other particulars, as above required; and the county treasurer shall at all times exhibit such accounts, when desired, to the Territorial, county, or school officers entitled to examine the same, and shall at any time pay over the balance in his hands to them, upon receiving proper vouchers therefor.

SEC. 3. The books, accounts, and vouchers of the county treasurer, and all moneys, warrants, or orders remaining in the treasury, shall at all times be subject to the inspection and examination of the board of county commissioners, or any member thereof, and at the regular meetings of the board in January and July of each year, and at such other times as they may direct, he shall settle with them his accounts as treasurer, and for that purpose he shall exhibit to them all his books, accounts, and money, and all the vouchers relating to the same, to be audited and allowed, which vouchers shall be retained by them for evidence of his settlement; and if found correct the accounts shall be so certified; if not he shall be liable on his bond.

SEC. 4. When directed by the board of county commissioners he shall cause to be insured, at the charge of the county, any or all of the public buildings and property belonging to the same, in the name of the county, and in case of the destruction or damage of the buildings or property so insured such treasurer shall demand, sue for, if necessary, and receive the moneys due on account of such insurance, and pay the same into the county treasury, and such moneys shall be applied to the fund for rebuilding or restoring such buildings or property under the direction of the county commissioners.

SEC. 5. It is hereby made the duty of each county treasurer of the county where the property is situated to attach his certificate to each and all abstracts of title to real estate that may be presented to him for that purpose, which certificate shall show the amount of due and unpaid taxes against, or tax title affecting the land described in such abstract, as the same shall appear from the records in his office, and for which he shall collect the sum of twenty-five cents for each abstract so certified, and for each failure or refusal to comply with the provisions of this act he shall be liable to a fine not to exceed the sum of fifty dollars.

SEC. 6. The county treasurer shall, before entering upon the duties of his office, take the usual oath of office, and shall enter into a bond with six (6) or more good and sufficient sureties, to be approved by the board of county commissioners, in the sum of two thousand (\$2,000.00) dollars for each one thousand (1,000) inhabitants of the county.

The conditions of such bond shall be as follows, in substance:

Whereas the above bounden _____ was elected to the office of county treasurer of the county of _____, on the _____ day of _____. Now, therefore, the condition of this obligation is such that if the said _____ or his deputy or deputies and all persons employed in his office shall faithfully and promptly perform the duties of his office,

and if the said ———— law all moneys which shall com render a just and true account th of county commissioners or by over to his successor in office. law to receive the same, all mo appertaining thereto or belong gation to be void, otherwise to

Said bond shall run to the cou in the name of the county for th sons injured by violation thereo increased at any time to an amo above specified by the board o shall be filed with the county cl

CHAPTER I

SEC. 1. The county clerk shal his office, execute and file with with two or more sufficient sure approved by the board of coun substance as follows, to wit:

Whereas the above bounden — of county clerk of the county o — shall faithfully pe shall pay over all moneys that sh as required by law, and shall de books, records, papers, and other the above obligation shall be void

SEC. 2. Every such clerk may, deputy, and said deputy shall hav and shall file such appointment in of a vacancy in the office of coun a county clerk shall be elected. shall be fixed by the board of cou

Provided. That during the tin making up the tax rolls he may, wit commissioners, employ such clerk enable him to complete said work i the expense of the same shall be a county commissioners.

Provided. That in counties of les deputy shall be employed for a perio in any one year.

SEC. 3. The county clerk shall kee attend the sessions of the board o person or by deputy; shall keep the board of county commissioners, and ceedings of the board of county comm the seal of the county.

SEC. 4. It shall be the duty of the

First. To record in a book to be p ceedings of the board.

and if the said ——— and his deputies shall pay according to law all moneys which shall come to his hand as treasurer, and to render a just and true account thereof whenever required by said board of county commissioners or by any provision of law, and shall deliver over to his successor in office, or to any other person authorized by law to receive the same, all moneys, books, papers, and other things appertaining thereto or belonging to said office, then the above obligation to be void, otherwise to be in full force and effect.

Said bond shall run to the county, and action may be brought thereon in the name of the county for the use and benefit of the person or persons injured by violation thereof. The amount of said bonds may be increased at any time to an amount not greater than treble the amount above specified by the board of county commissioners. Such bonds shall be filed with the county clerk.

CHAPTER IV.—*County clerk.*

SEC. 1. The county clerk shall, before he enters upon the duties of his office, execute and file with the treasurer of the county a bond with two or more sufficient sureties, in such sum as may be fixed and approved by the board of county commissioners, with conditions of substance as follows, to wit:

Whereas the above bounden ——— was elected to the office of county clerk of the county of ———: Now, therefore, if the said ——— shall faithfully perform all the duties of his office as such clerk, and shall pay over all moneys that shall come into his hands as such clerk as required by law, and shall deliver to his successor in office all the books, records, papers, and other things belonging to said office, then the above obligation shall be void, otherwise to remain in full force.

SEC. 2. Every such clerk may, by instrument of writing, appoint a deputy, and said deputy shall have the same authority as his principal, and shall file such appointment in his office; and such deputy, in case of a vacancy in the office of county clerk, shall fill such vacancy until a county clerk shall be elected. The compensation of such deputy shall be fixed by the board of county commissioners:

Provided, That during the time the county clerk is employed in making up the tax rolls he may, with the consent of the board of county commissioners, employ such clerk hire as may be actually necessary to enable him to complete said work in the time required by the law, and the expense of the same shall be audited and allowed by the board of county commissioners.

Provided, That in counties of less than five thousand inhabitants a deputy shall be employed for a period longer than thirty days altogether in any one year.

SEC. 3. The county clerk shall keep his office at the county seat; shall attend the sessions of the board of county commissioners, either personally or by deputy; shall keep the seals, records, and papers of said board of county commissioners, and shall sign the records of the proceedings of the board of county commissioners and attest the same with the seal of the county.

SEC. 4. It shall be the duty of the county clerk—

First. To record in a book to be provided for that purpose all the proceedings of the board.

Second. To make regular entries of their resolutions and decisions on all questions.

Third. To record the vote of each commissioner on any question submitted to the board.

Fourth. Attest all warrants under the seal of the county, issued by the board and signed by the chairman thereof, for the payment of moneys.

Fifth. To preserve and file all accounts acted upon by the board, with their action thereon, and he shall perform such special duties as are required of him by law.

SEC. 5. It shall be the duty of such clerk to designate upon every account which shall be audited and allowed by the board the amount so allowed, and he shall deliver to any person who shall demand it a certified copy of any record in his office, and any account on file thereon, on receiving from such person ten cents for every folio contained in such copy.

SEC. 6. Such clerk shall not attest any county warrant unless ordered by the board of commissioners authorizing the same, and signed by the chairman; and every such warrant shall be numbered, and the date, amount, and number of the same, and the name of the person to whom it is issued, the purpose for which and the fund against which the same is drawn, shall be entered in a book kept by him in his office for that purpose.

SEC. 7. No account against the county shall be allowed unless presented within two years after the same accrues:

Provided, That if any person having a claim against the county be (at the time the same accrued) under any legal disability, every such person shall be entitled to present the same within one year after such disability shall be removed.

SEC. 8. It shall be the duty of the county clerk to record in proper books, to be called "Road record," and to transmit from the commissioners' record into said book the record of all proceedings in regard to laying out, establishing, altering, or vacating roads in the county, which said records shall include the reports of the viewers and surveyors locating, altering, or vacating such roads, and maps thereof. and such records or duly certified copies thereof shall be received as prima facie evidence of the statements therein contained in the courts of this Territory.

SEC. 9. The county clerk of each county of this Territory shall keep a book in which he shall keep the receipts and expenditures of his county, and all accounts of his county with the different county, school, city, or town officers.

SEC. 10. The county clerk, in keeping the accounts of his county with the county treasurer, shall charge the county treasurer as follows: With the amount of taxes levied and assessed by the Territory and county, and each city, town, village, road, school district, or any other special tax levied for any purpose in his county in each year, and the same shall be kept in separate accounts; with the amount of any sinking funds in separate accounts, with the amount of money and with the amount of Territorial, county, road, school, road and city warrants, or orders, or other evidences of indebtedness which the county treasurer may be authorized by law to receive from his predecessor in office; with the amount of taxes on each tax roll made out and deliv-

ered to him during his term of office; with the amount of the addition assessments made after the tax roll is made out and delivered to the county treasurer; with the amount of penalty added to the taxes required by law; with the amount of redemption money on land and town lots sold to the county for delinquent taxes when the same are redeemed; with the amount of the Territorial school fund received from the Territorial treasurer; with the amount received from the sale of property belonging to the county; with the amount received from the sale of estrays; with the amount received as fines and forfeitures; and with the amount received from all other sources. And upon presentation of proper vouchers shall credit him as follows: With the amount of all county, city, town, village, school district, and other tax which has been paid over to the proper authority and receipted therefor; with the amount of county warrants received by the county treasurers and returned to the county board and canceled with the amount paid to the Territorial treasurer and city treasurer or other officers entitled by law to receive the same, with the amount of delinquent taxes and penalty thereon; on lands and town lots bought off for the county, which said taxes have been transferred from the tax roll to the book of tax sales; with the amount of double or erroneous assessments of property, except the assessment on lands and town lots which have been sold or entered on the book of tax sales for delinquent taxes; with the amount of fees collected as provided by law for collecting taxes; with the amount of money and the amount of warrants or orders, or other evidences of indebtedness, which the county treasurer is allowed by law to receive for taxes or which he pays over to his successor in office; with the amount of taxes uncollected on the tax roll delivered over to his successor in office.

SEC. 11. The county clerk in making the above charges, credits, and entries, shall state each different fund and each item of each different fund separately.

SEC. 12. It shall be the duty of the county clerk, acting with the county treasurer, to assess any sources of taxation coming to their knowledge after the assessor has made his returns and has been discharged from further duty concerning the assessment for any year, in cases where it is apparent that the assessor overlooked or omitted an assessment, and such officers shall have all the powers and may exercise all the duties conferred upon the assessor, as provided by law. Such assessment shall be extended upon the assessor's returns and upon the tax list, and shall be as valid and binding as if made by the assessor.

SEC. 13. In all cases when any person shall pay any money into the county treasury, said treasurer shall give a receipt therefor, but said receipt shall be of no validity until it is countersigned by the county clerk, except it be a tax receipt. And this requirement of law shall appear on all receipts issued by the treasurer.

SEC. 14. It shall be the duty of the county clerks of the several counties in this Territory, on or before the third Monday of February in each year, to make out and forward to the auditor of the Territory a financial exhibit of their respective counties for the preceding year ending December 31. The said exhibits shall comprise a clear and concise statement of the financial condition of each county, including the amounts expended for county purposes; the amount of county warrants outstanding; the aggregate indebtedness of the county; the total amount of taxable property; the rate of tax levied; the amount

of floating and bonded indebtedness, if any, of the county; the date of issue and date of maturity of all outstanding bonds, if any; the amount of sinking fund on hand, if any, for redeeming the same, and such other information as may be required by the auditor of the Territory concerning the financial condition of their respective counties.

SEC. 15. The county clerk, at the close of any person's term of office as county treasurer, whether by death, insanity, removal from office, resignation, or otherwise, and at the time or before said treasurer's successor's term of office shall commence shall, together with the county commissioners, examine all accounts of the county treasurer, carefully check over and examine all vouchers for each and every public fund presented by him, ascertain the cash said treasurer should have on hand belonging to the same, count the money, and if said report is found to be correct they shall endorse their approval upon the report, which the county treasurer is hereby required to make to them. And no county treasurer shall turn over to his successor any vouchers or moneys until such report shall have been approved and endorsed by them, and shall place on the tax roll of his county, in a separate column, opposite each (every) description of property upon which the taxes then remain unpaid, the aggregate amount of such unpaid taxes, and for such other purposes. Said tax roll shall be delivered to the county clerk, and no taxes shall be received in the meantime.

SEC. 16. Whenever any county warrant issued to any person remains in the office of the county clerk unclaimed for a period of three years from the date thereof, such warrant shall be returned by him to the board of county commissioners and cancelled.

SEC. 17. The county clerks of the several counties of this Territory shall annually, on or prior to the fourth Monday of January, prepare and file in the office of the secretary of the Territory a list of the officers of their respective counties elected at the last preceding general election, which lists shall contain the genuine signatures of all county officers; and the county clerk shall certify, under the seal of his office, that such signatures are the genuine signatures of the respective officers and that they were attached in his presence: *Provided*, That in case of any vacancy in any county office, the county clerk shall immediately transmit to the secretary of the Territory the genuine signature of the person elected to fill such vacancy: *And provided further*, That any county clerk failing or refusing to comply with the provisions of this act shall be deemed guilty of a misdemeanor and punished by a fine of not less than ten nor more than fifty dollars.

SEC. 18. The county clerks of their respective counties shall, at the expense of the county, furnish annually, on the — day of —, to the assessors of the county, suitable blank assessment rolls and books, prepared in accordance with the provisions of law, and necessary blanks to fill out and file with him for such different tax levies that may be required.

SEC. 19. The county clerk shall keep his office open from 8 o'clock a. m. to 5 o'clock p. m. of each day, except Sundays and legal holidays.

SEC. 20. In counties having a population not exceeding five thousand inhabitants, the county clerk shall be ex officio register of deeds.

CHAPTER V.—*Register of deeds.*

SEC. 1. The register of deeds shall hold his office at the county seat of his respective county, in an office to be provided by the county, and

he shall, before he enters up county, and file with the county a sum of five thousand dollars, to be approved by said duties, and other persons employed, and impartially perform all and shall deliver to his successor deeds, mortgages, papers, and to his office.

SEC. 2. The register of deeds, commissioner, appoint a deputy, at the pleasure of the register; such deputy, when filed in the office of said register, and his sureties, shall be responsible for his duties by such deputy. The deputy to enter into a bond conditioned that he will faithfully perform all duties of deeds, such bond to be filed in the office of the register.

SEC. 3. The register of deeds shall keep in his office, books, records, deeds, maps, and it shall be the duty of the register to protect the same against defacement, and he shall be furnished, by and at the expense of the county, with furniture to protect the same.

SEC. 4. The county commissioner shall keep in his office, all deeds, mortgages, maps, and instruments of writing subject to the register of deeds.

SEC. 5. Each register of deeds shall keep a direct and inverted index of deeds, mortgages, and leases, and an index of leases, direct and inverted, of leases, mortgages, and leases, with heads to the respective books, in the direct and inverted index of deeds, and the inverted index of deeds, and leases, mortgages, and leases, and whenever any mortgage, lease, or discharge from record, shall be made, the register shall immediately note in both indexes, and opposite to the appropriate book, the same. He shall also keep an index of the 1st and 2d part, respectively, in the same form as the index of deeds, and the board of county commissioners shall improve the form of index.

SEC. 6. The register shall also keep a plat book of any of the same, cemeteries, and other places, within his county, together with the writing thereon, and file the same in such plat book under appropriate number.

SEC. 7. The register shall keep a list of the names and columns for the names

he shall, before he enters upon the duties of his office, execute to the county, and file with the county clerk of his county, a bond in the penal sum of five thousand dollars, with two or more sufficient securities, to be approved by said clerk, with the provision that he, his duties, and other persons employed in his office will faithfully, correctly and impartially perform all the duties of said office according to law and shall deliver to his successors in office all books, records, maps, deeds, mortgages, papers, and property of every description belonging to his office.

SEC. 2. The register of deeds may, with the approval of the county commissioner, appoint a deputy, who shall hold his office during the pleasure of the register; such appointment shall be in writing and filed in the office of said register, and the register so appointing him and his sureties, shall be responsible for the faithful performance of his duties by such deputy. The register of deeds may require of such deputy to enter into a bond in the sum of two thousand dollars, conditioned that he will faithfully perform the duties as a deputy register of deeds, such bond to be filed with the county clerk.

SEC. 3. The register of deeds shall have the care and custody of all books, records, deeds, maps, papers, and fixtures deposited and kept in his office; and it shall be his duty to carefully preserve and guard the same against defacement, mutilation, change, or injury; and he shall be furnished, by and at the expense of the county, with suitable fixtures and furniture to protect the records and papers of his office.

SEC. 4. The county commissioners shall furnish, and the register of deeds shall keep in his office, suitable books for the proper recording of all deeds, mortgages, maps, plats, marriage certificates, and other instruments of writing subject by law to be recorded in his office.

SEC. 5. Each register of deeds shall keep an index of deeds direct and inverted, and an index of mortgages, direct and inverted, and an index, direct and inverted, of leases, in his office. The index, direct and inverted, of deeds, mortgages, and leases shall be divided into columns with heads to the respective columns, to wit: He shall enter in alphabetical order in the direct index of deeds, mortgages, and leases the names of the grantors, mortgagors, and lessors, respectively, and in the inverted index of deeds, mortgages, and leases the names of grantees, mortgagees, and lessees, respectively, in alphabetical order; and whenever any mortgage, bond, or other instrument has been released or discharged from record, according to law, the register shall immediately note in both indexes, under the columns headed "Remarks" and opposite to the appropriate entry, that such instrument has been satisfied. He shall also keep an index, direct and inverted, of parts of the 1st and 2d part, respectively, of the miscellaneous records in the same form as the index of deeds and mortgages: *Provided*, That the board of county commissioners may from time to time adopt an improved form of index.

SEC. 6. The register shall also keep a well-bound book in which shall be platted all maps of any cities, towns, villages, or additions to the same, cemeteries, and other plats required by law to be recorded within his county, together with description, acknowledgment, or other writing thereon, and file the original plat in his office. He shall use such plat book under appropriate headings in the plat book.

SEC. 7. The register shall keep a receiving book, with suitable headings and columns for the number of instruments, name of grantor

mortgagor, and lessor, and name of grantee, mortgagee, and lessee, nature of instrument, year, month, day, hour, and minute when the same shall be received, and the fee for recording the same, and to whom such instrument is delivered.

SEC. 8. He shall keep an index to chattel mortgages, bills of sale, and other instruments affecting title to or incumbering personal property, required by law to be filed or recorded, in which shall be entered in separate columns the number of the instrument, name of grantor alphabetically, and the name of the grantee, the year, month, day, hour, and minute of filing, the amount secured, a description of the property, and dates when and by whom cancelled; said chattel mortgage when so indexed to be numbered, filed, and kept in his office, and when said mortgage or bill of sale is released or cancelled, the register shall note the same on the back of the instrument and on the index, in the proper column, giving the date and by whom said instrument is cancelled.

SEC. 9. No register of deeds shall be required to perform any of the duties required by this act to be performed unless the fee as required by law for the same has been paid.

SEC. 10. The register of deeds shall, whenever an instrument shall be presented to him for record, immediately note on the instrument the year, month, day, hour, and minute of receiving the same, and the date of record of such instrument shall be from the date of filing; he shall then enter the same on the receiving book, making all the entries in the appropriate columns as herein provided, and shall, as soon thereafter as practicable, record said instrument in the proper record, enter it upon the proper indexes, and over his signature note on the instrument the book and page on which said instrument is recorded.

CHAPTER VI.—*County attorneys.*

SEC. 1. The county attorney shall execute a bond to his county in the penal sum of three thousand dollars, with two or more sureties to be approved by the board of county commissioners of such county, which bond shall be conditioned for the faithful performance of his duties as such county attorney, and that he will pay over to the treasurer of his county, in the manner prescribed by law, all moneys which come to his hand by virtue of his office, and shall deposit such oath and bond in the county clerk's office: *Provided*, That no person shall be eligible to the office of county attorney who is not duly admitted to practice as an attorney in courts of record in this Territory.

SEC. 2. The county attorney shall be a resident of the county in which he is elected.

SEC. 3. In case of vacancy in the office of county attorney from any cause, the board of county commissioners of the county where such vacancy occurs shall appoint a county attorney to fill such office until the next general election, who shall qualify under the provisions of this act.

SEC. 4. It shall be the duty of the county attorney of the several counties to appear in the circuit courts of their respective counties and prosecute and defend on behalf of the Territory, or his county, all actions or proceedings, civil or criminal, in which the Territory or county is interested or a party; and whenever the venue is changed in any criminal case, or in any civil action or proceeding in which his

county or the Territory is interested or a party, it shall be the duty of the county attorney of the county where such indictment is found, of the county interested in such civil action or proceeding, to appear and prosecute such indictment, and to prosecute or defend such civil action or proceeding in the county to which the same may be changed.

SEC. 5. Each county attorney shall, when requested by any magistrate of his county, appear on behalf of the Territory, before any such magistrate, other than those exercising police jurisdiction of incorporated cities and villages, and prosecute all complaints made on behalf of the Territory, except for common assault and battery, of which such magistrate shall have jurisdiction. And no sheriff, deputy sheriff or police officer shall prosecute any case in any court of this Territory.

SEC. 6. The county attorney shall, without fee, render a written opinion and advise the board of county commissioners and other chief officers of their respective counties, when requested by such board of officers, upon all matters in which the county is interested, or relative to the duties of such board or officers in which the Territory or county may have interest.

SEC. 7. The salary of the county attorney shall be fixed by the board of county commissioners at their first regular meeting, or as soon thereafter as possible, unless otherwise provided herein.

SEC. 8. Said county attorney shall not receive any fee or reward from or on behalf of any prosecutor or other individual for service or in any prosecution or business to which it shall be his official duty to attend, nor be concerned as attorney or counsel for either party other than for the Territory or county in any civil action depending on the same state of facts upon which any criminal prosecution commenced but undetermined shall depend; nor shall any county attorney while in office be eligible to or hold any judicial office whatever; but the county attorney of one county shall be requested to go to another county or from one part to another of his county to transact any business as county attorney, he shall be paid by his county the amount of his necessary expenses in transacting such business in addition to his salary. He may practice in any court in civil cases wherein the Territory or county is not a party in interest.

SEC. 9. Each of the circuit courts, whenever there shall be no county attorney for the county, or when the county attorney shall be absent from the court or unable to attend to his duties, may, if the court deem it necessary, appoint, by an order to be entered in the minutes of the court some suitable attorney to perform for the time being the duties required by law to be performed by the county attorney, and the attorney so appointed shall thereupon be vested with all the powers of such county attorney for that purpose.

SEC. 10. It shall be the duty of every county attorney, whenever he shall receive any money for fines, recognizances, penalties, or costs, to account for and pay the same to the county treasurer, taking his receipt therefor, within ten days after he receives it.

SEC. 11. Whenever such county attorney shall refuse or neglect to account for or pay over the moneys so received by him as required by the foregoing section, he shall be liable to a fine of not less than fifty dollars nor more than two hundred dollars; and it shall be the duty of the county treasurer, in his official name and capacity, to cause an action to be instituted upon the bond of such county attorney for the recovery of the moneys so received and unpaid by him. In such case

the county commissioners shall appoint other counsel on behalf of the county.

SEC. 12. Whenever required by the grand jury, it shall be the duty of the county attorney of the county to attend it for the purpose of examining witnesses in their presence, or of giving them any advice in any legal manner, or issue subpoenas and other process to enforce the attendance of witnesses, and to draw up bills of indictment when found by such grand jury.

CHAPTER VII.—*County surveyor.*

SEC. 1. The county surveyor shall make any survey that may be required by order of the court or county commissioners or upon application of any person, keep a fair and correct record of all surveys made by him, number them in the order, and preserve a copy of the field notes and calculations of each survey, and indorse thereon its proper number, a copy of the same, and a fair and accurate plat, together with a certificate of survey, which must upon application be furnished by him to any person upon payment of the fees allowed by law.

SEC. 2. Any person owning or claiming lands which are divided by county lines, and wishing to have the same surveyed, may apply to the surveyor of any county in which any part of such land is situated; and on such application being made, the surveyor must make the survey, which is as valid as though the lands were situated entirely within the county.

SEC. 3. When land the title to which is in dispute before any court is divided by a county line, the court making an order of survey may direct the order to the surveyor of any county in which any part of the land is situated. In all surveys the courses must be expressed according to the true meridian, and the variation of the magnetic meridian from the true meridian must be expressed on the plat with the date of the survey.

SEC. 4. When the county surveyor is interested in any land the title to which is in dispute, and a survey thereof is necessary, the court must direct the survey to be made by some disinterested person, and the person so appointed is for that purpose authorized to administer and certify oaths. He must return such survey, verified by his affidavit annexed thereto, and receive for his services the same fees as the county surveyor would be entitled to for similar service.

SEC. 5. The county surveyor shall copy, plat, or trace all maps filed for record in the office of register of deeds of the county for which he shall be elected and shall be ex officio deputy register of deeds for said county for such purpose, at the cost of the party filing the same for record: *Provided, however,* That all maps and plats filed by a licensed or graduated surveyor, and such other maps and plats as are filed, and are thereby made a record, are exempt from the provisions of this act.

SEC. 6. The county surveyor shall plat, trace, blue print, or otherwise make all county, road, district, and all other maps which shall show public and private lands and all assessors' blank books for the county of which he is surveyor. All such maps which are platted, traced, blue printed, or otherwise made as aforesaid shall be filed in the county surveyor's office, together with all data obtained by the county surveyor from other sources, and the same thereafter shall

become the property of the county and shall be open to inspection by any citizen of the county.

SEC. 7. The county surveyor shall make such surveys of county roads and perform such other engineering work as the county commissioners may direct. All such maps and field notes of surveys shall be filed in the office of the county surveyor, and the same shall thereafter be and remain the property of the county. It shall be the duty of the county surveyor to advise the county commissioners regarding any engineering work, and to perform such work for the county as may be required by the county commissioners.

SEC. 8. The county commissioners of each county shall provide for the use of the county surveyor a suitable office and appurtenances; office and record books, and all necessary materials; also transportation and expenses while in the field.

SEC. 9. The county surveyor shall receive such compensation as provided in this act, not to exceed ten dollars per day, for all field work performed for the county, and he shall retain all fees collected by him in addition to his salary as compensation for his services.

CHAPTER VIII.—*Sheriff.*

SEC. 1. The sheriff shall, before he enters upon the duties of his office, execute to the county a bond with at least three different sureties, in such penal sum, not less than three thousand dollars nor more than twenty thousand dollars, as the board of county commissioners shall specify and approve; said bond, when thus approved, to be filed in the office of the county clerk.

SEC. 2. The conditions of such bond shall be in substance as follows: Whereas, the above bounded _____ was elected to the office of sheriff of the county of _____, on the _____ day of _____: Now, the condition of this obligation is such that if the said _____ shall well and faithfully perform and execute the office of sheriff of said county of _____ during his continuance in office, by virtue of said election, without fraud, deceit, or oppression, and shall pay over all moneys that shall come into his hand as such sheriff, and shall deliver to his successor all writs, papers, and other things pertaining to his office, which may be so required by law, then the above obligation shall be void; otherwise to be and remain in full force and effect.

SEC. 3. The sheriff of each county may, after entering upon the duties of his office, with the approval of the board of county commissioners, appoint one or more deputies, to hold during the pleasure of the sheriff; and as often as a vacancy shall occur in the office of such under sheriff, or he become incapable of executing the same, another shall in like manner be appointed in his place.

SEC. 4. Whenever a vacancy occurs in the office of sheriff of any county, the coroner shall in all things execute the office of sheriff until a sheriff shall be appointed by the board of county commissioners, who shall hold his office until his successor is elected and qualified, and any default or misfeasance in office of such coroner in the meantime shall be deemed to be a breach of the condition of the bond given by the sheriff and also a breach of the condition of the bond of such coroner.

SEC. 5. First. The sheriff must preserve the peace.

Second. Arrest and take before the nearest magistrate for examina-

all persons who attempt to commit or who have committed a public offense.

Third. Prevent and suppress all affrays, breaches of the peace, riots, and insurrections which may come to his knowledge.

Fourth. Attend all superior courts held within his county and obey lawful orders and directions of all courts held within his county.

Fifth. Command the aid of as many male inhabitants of his county as he may think necessary in the execution of these duties.

Sixth. Take charge of and keep the county jail and the prisoners therein.

Seventh. Release in the records all attachments of real property when the attachments placed in his hand have been released or discharged.

Eighth. Endorse upon all process and notices the year, month, day, hour, and minute of reception, and issue therefor to the person delivering it, on payment of fees, a certificate showing the name of the rules, title of paper, and time when received.

Ninth. Serve all process and notices in the manner prescribed by law.

Tenth. Certify under his hand, upon process or notices, the manner and time of service, or if he fails to make service, the reason of his failure, and return the same without delay.

Sec. 6. When process or notices are returnable to another county may enclose and register such process or notice in an envelope addressed to the officer from whom the same emanated and deposit it at the post-office, prepaying postage.

Sec. 7. The return of the sheriff upon process or notices is prima facie evidence of the facts in such return stated.

Sec. 8. If a sheriff does not return a process or notice in his possession with the necessary endorsement thereon without delay he is liable to the party aggrieved in the sum of two hundred dollars and for all damage sustained by such party.

Sec. 9. If the sheriff to whom a writ of execution is delivered neglects or refuses after being required by the creditor or his attorney, the fees having first been paid or tendered, to levy upon or sell any property the party charged in the writ which is liable to be levied upon and sold he is liable to the creditor for the value of such property: *Provided, however*, That the sheriff may demand an indemnifying bond before levying a writ of attachment.

Sec. 10. If he neglects or refuses to pay over on demand to the person entitled thereto any money which may come into his hands by virtue of his office (after deducting all legal fees) the amount thereof, the twenty-five per cent damages and interest at the rate of ten per cent per month from the time of demand, may be recovered by such person.

Sec. 11. No sheriff shall, directly or indirectly, ask, demand, or receive for any service to be by him performed in the discharge of any of his official duties any greater fees than are allowed by law, on pain of forfeiting treble damages to the party aggrieved, and in being fined in a sum not less than twenty-five dollars nor more than two thousand dollars.

Sec. 12. The sheriff in attendance upon court must act as the chief clerk thereof, call the parties and witnesses and all other persons bound to appear at the court, and make proclamation of the opening and adjournment of the court, and of any other matter under his direction.

Sec. 13. Service of process other than process upon the sheriff may

be made by delivering it to him or to one of his deputies, or to a person in charge of the office during office hours, or, if no such person there, by leaving it in a conspicuous place in the office. When process remains with the sheriff unexecuted in whole or in part at the time of his death, resignation of office, or at the expiration of his term of office, said process shall be executed by his successor or successors in office, and when the sheriff sells real estate under and by virtue of an execution or order of court he or his successors in office shall execute and deliver to the purchaser or purchasers all such deeds and conveyances as are required by law and necessary for the purpose, such deeds and conveyances shall be as valid in law as if they had been executed by the sheriff who made the sale.

SEC. 14. Each sheriff may appoint, with the consent of the county commissioners, such number of deputies as the business of his office may require, but shall not appoint any number exceeding three, and no person or persons in excess thereof are approved by the board of county commissioners. The sheriff and his sureties shall be responsible on his official bond for the acts and omissions of each of his deputies.

SEC. 15. Every appointment of a deputy sheriff, and every revocation of such appointments, shall be in writing under the hand of the sheriff, and shall be filed in the office of the clerk of the county.

SEC. 16. Whenever a new sheriff shall be elected, and shall be qualified as required by law, the former sheriff, upon demand, shall deliver to him the jail and other property of the county and all prisoners in such jail, and all writs, process, orders, and other papers belonging to such office and in his possession or that of his deputy except as provided in the next succeeding section; and upon delivery thereof such new sheriff shall execute to the former sheriff his receipt therefor.

SEC. 17. Any default or misconduct in the office of deputy sheriff, jailor, after the death, resignation or removal of any sheriff by whom he was appointed, shall be adjudged a breach of the bond of such sheriff.

SEC. 18. No sheriff, or deputy sheriff, shall directly or indirectly by himself or through others, in any way suggest or indicate to or advise any person having any proceeding or about to have any proceeding in any court, or other matter, that any attorney or firm of attorneys are desirable, or successful practitioners, or in any way influence any act liable to influence or direct such person in his, her, or their choice of attorneys. Nor shall any such sheriff, or deputy sheriff appear or advise as an attorney or counsellor in any case whatever in any court. Nothing in this section shall be construed so as to prevent any sheriff or his deputy from being sworn and testifying in any case as a witness. Any sheriff or deputy sheriff who shall violate any of the provisions of this section shall be deemed guilty of a misdemeanor, and for the first offense shall be fined ten dollars, and for the second conviction he shall be fined not less than twenty dollars; and for the third offense he shall be removed from office. The sheriff shall keep posted in each cell of the jail a list of the attorneys practicing in his county.

CHAPTER IX.—Coroner.

SEC. 1. The county coroner shall, before entering upon the duties of his office, give bond to the county in the penal sum of five thousand dollars.

dollars, with two or more sufficient sureties, as the county commissioners shall direct and approve, the condition of which bond shall be in substance the same as that given by the sheriff, such bond to be filed with the county clerk of the county.

SEC. 2. The coroner shall be ex officio a conservator of the peace and perform like duties and possess the powers vested in the sheriff for keeping the peace and arresting offenders against the laws of the Territory and in suppressing affrays and breaches of the peace which may come under his personal observation, and not otherwise.

SEC. 3. When there shall be no sheriff in an organized county it shall be the duty of the coroner to exercise all the powers and duties of the sheriff of his county until a sheriff be elected and qualified.

SEC. 4. Every coroner shall serve and execute process of every kind and perform all other duties of the sheriff when the sheriff shall be a party to the case or action or otherwise disqualified from acting or when the affidavit shall be filed as prescribed in the next section.

SEC. 5. Whenever any party, his agent or attorney, shall make and file with the clerk of the proper court an affidavit stating that he has reason to believe and does believe that the sheriff of said county will not, by reason of either partiality, prejudice, consanguinity, or interest, faithfully perform his duties in any suit commenced or about to be commenced in said court, the clerk shall direct the original or other process in such suit to the coroner, who shall execute the same in like manner as the sheriff might or ought to have done.

SEC. 6. The coroner shall hold an inquest upon the dead bodies of such persons only as are supposed to have died by unlawful means or the cause of whose death is unknown. When he has notice of the dead body of a person supposed to have died by unlawful means, the cause of whose death is unknown, found or being in the county, it shall be his duty to summons forthwith six citizens of the county to appear before him, at a time and place named, to act as jurors.

SEC. 7. If any juror fails to appear, the coroner shall summons the proper number from bystanders immediately and proceed to impanel them and administer the following oath, in substance:

Oath: You do solemnly swear (or affirm) that you will diligently inquire and true verdict make, when, how, and by what means the person whose body lies here and came to his death, according to your knowledge and the evidence given before me, so help you God.

SEC. 8. Whoever being so summoned as a juror fails or refuses without good cause to attend at the time and place required, or, appearing, refuses to act as such juror, shall, upon the complaint of the coroner before any district magistrate in the county, be fined not to exceed twenty dollars, and in default of the payment of such fine be imprisoned for a period not exceeding ten days.

SEC. 9. The coroner may issue subpoenas within the county for witnesses, returnable forthwith or at such time and place as he shall therein direct. When a surgeon or physician is required to attend such inquest and make a post-mortem examination or to give expert testimony, the coroner may issue his subpoena for him the same as any other witness, and such surgeon or physician shall receive as compensation for his services \$10.00 per day and 10 cents per mile for each mile actually traveled in going to and from such inquest, and other witnesses shall be allowed the same fees as in cases before a district magistrate, and the coroner shall have the same authority to enforce

the attendance of witnesses and punish them for contempt in disobeying his process as a district magistrate when his process issues behalf of the Territory.

SEC. 10. An oath shall be administered to the witness in substance as follows:

You do solemnly swear that the testimony which you shall give to this inquest concerning the death of the person here lying dead shall be the truth, the whole truth, and nothing but the truth: so help you God.

SEC. 11. The testimony shall be reduced to writing under the coroner's order and subscribed by the witnesses, and the coroner shall have power to bind such witnesses by recognizance in a reasonable sum for their appearance at a hearing before some district magistrate at an examining trial to be holden within the same county, there to give evidence, and may commit to the jail of said county any witness who refuses to enter into such recognizance.

SEC. 12. The jurors, having inspected the body, heard testimony, and made all needful inquiries, shall return to the coroner their inquisition in writing under their hands, in substance as follows, and stating the matter in the following form suggested, as far as found:

TERRITORY OF HAWAII, ——— County:

An inquisition holden at ———, in ——— county, on the ——— day of ———, A. D. 19—, before me ———, coroner of said county, on the body of ———, a person unknown, there lying dead, by the jurors whose names are hereunto subscribed. The said jurors, upon their oaths, do say (here state when, how, by what person, means, weapon, or accident he came to his death, and whether feloniously).

In witness whereof the said jurors have hereunto set their hands the day and year aforesaid.

Said return shall be attested by the coroner.

SEC. 13. If the inquisition finds that a crime has been committed the findings of the coroner's jury shall not be made public until after the arrest directed in the next section, or reasonable time thereof shall have elapsed.

SEC. 14. If the person charged with or reasonably suspected of the crime be present, the coroner may order his arrest, by an officer or any other person, and shall then make a warrant, requiring the officer or other person to take the accused before a district magistrate within said county forthwith.

SEC. 15. If the person charged be not present the coroner may issue a warrant, to the sheriff or any constable of the county, requiring him to arrest the accused and take him before a district magistrate within said county.

SEC. 16. The warrant of the coroner shall be of equal authority with that of a district magistrate and when a person so charged is brought before the magistrate he shall be dealt with as a person held under a complaint in the usual form.

SEC. 17. The warrant of the coroner shall recite substantially the transactions before him and the verdict of the jury of inquest leading to the arrest, and such warrant shall be a sufficient foundation for the proceedings of the magistrate instead of a complaint.

SEC. 18. The coroner shall then return to the clerk of the court, in the county where the inquisition was holden, a list of the witnesses who testified to material matters, and the verdict of the jurors.

SEC. 19. The coroner shall receive the same fees for summoning jurors and subpoenaing witnesses as are allowed to the sheriff, and for

issuing warrants the same fees as are allowed to a district magistrate, and for holding each inquest he shall receive the sum of ten dollars, and shall retain all fees collected by him in full compensation of his services.

SEC. 20. The coroner shall cause the body of a deceased person, which he is called to view, to be delivered to the friends of the deceased, if any there be, but if not, he shall cause the body to be decently buried, the expense thereof to be paid from any property belonging to the deceased, or if there be none, from the county treasury by certifying in account of the expense, which being presented to the board of county commissioners shall be allowed by them, if deemed reasonable, and paid as any other claim against the county.

SEC. 21. The coroner shall make a report in writing, giving therein particular and minute description of the deceased person together with his name (if the same can be ascertained) and the amount of money and other valuables or effects found with the dead body. A copy of said report, in writing, with the verdict and list of witnesses, shall be by him filed in the office of the clerk of the court of the county in which said body is found.

SEC. 22. When any valuable personal property, money, or papers are found upon or belonging to the body upon which an inquest is held, if the personal property is in said county, the coroner shall take charge of and deliver the same to those entitled to its care or possession, but if not claimed, or if the same shall be necessary to defray the expenses of the burial, the coroner shall, after ten days' notice publicly posted in at least three different places of the town and place of sale, sell such property to the highest bidder, and after deducting all fees and funeral expenses deposit the balance of the proceeds with the county treasurer, taking his receipt therefor, there to remain subject to the order of the legal representative of the deceased, if claimed within two years thereafter, or if not claimed within that time to vest in the general fund of the county.

SEC. 23. The coroner during the holding of an inquest is hereby authorized to employ a clerk to reduce the testimony of the witnesses to writing, said clerk to receive as his compensation not to exceed three dollars per day.

SEC. 24. When there is no coroner, or in case of his absence or inability to act, any district magistrate of the same county is authorized to perform the duties of coroner in relation to dead bodies, and the magistrate so acting shall receive the same fee as the coroner.

SEC. 25. Whenever an inquest shall be held, and the coroner shall have good reason to believe that the deceased came to his death by poison administered by the hand of some other person than the deceased, he may at the request of the county attorney or jury cause a chemical analysis and microscopical examination of the body of the deceased, or any parts of it, to be made, and the testimony of medical and chemical experts may be introduced for the purpose of showing how and in what manner the deceased came to his death, and the coroner shall certify to the county commissioners of his county the fact of such analysis or examination, the testimony of such medical or chemical expert, and that the same was in his opinion necessary to an examination into the cause of the death of the deceased, and the commissioners shall allow such fees or compensation for such analysis, examination, or medical or chemical testimony of experts as shall be deemed by said county commissioners to be just and reasonable.

CHAPTER X.—*County road supervisor.*

SEC. 1. There shall be one "county road supervisor," who shall be a qualified elector of the county, to serve for the term of two years, and until his successor is elected and qualified.

SEC. 2. Under the direction of the board of county commissioners the county road supervisor shall have the entire charge and control of all the public labor on all roads, bridges, and public highways within the county for which he is elected to serve, and shall expend all road funds in exact accordance with the rules, regulations, and directions given to him by the board of county commissioners and as may be otherwise provided by law: *Provided, however,* That such control shall not include the highways, bridges, streets, alleys, parks, wharves, and other public thoroughfares included within the limits of any incorporated city or town within such county.

SEC. 3. The county road supervisor shall, upon the receipt of a certificate of his election, and before entering upon the discharge of the duties of his office, file in the office of the county auditor a bond, the penal sum of not less than one thousand dollars, and in such additional amount as may be from time to time fixed by the board of county commissioners, conditioned for the faithful disposition of and accounting for all road funds received or disbursed through him, and for the faithful performance of all duties required of him by law.

SEC. 4. The county road supervisor shall keep a full record of all business transacted, including an account of all moneys received and disbursed, showing from whence derived, the locality in which expended, whether for labor or material, and the persons to whom paid, and at the end of each month shall file in the office of the county clerk a written report of all business transacted, including an account of receipts and disbursements of public moneys, by him during the month. Such reports shall be open to inspection by any resident taxpayer at any time during office hours, under the care of the county clerk, but such report shall not be removed from the files except by order of the county commissioners issued at a regular meeting, or by order of the circuit court.

SEC. 5. At the end of each month the county road supervisor shall turn over to the county treasurer all road funds collected by him during the month, accompanied by a certificate from the county clerk showing to what account or accounts such moneys belong, and thereupon it shall be the duty of the county treasurer to receipt for such moneys, stating the fund or funds to which such amounts have been credited, and such receipt shall be retained by the county road supervisor as his voucher therefor. In the certificate from the county clerk all road moneys not specifically belonging to any other fund shall be designated as "General road fund." All road taxes and other road moneys shall be paid into the county treasury and shall only be paid out by county warrant duly ordered by the board of county commissioners, of which a record shall have been made in the journal of its proceedings. Such warrant shall be issued and signed in the same manner as other county warrants, and shall state the fund upon which it is drawn, payable to the party entitled thereto, or order, and the payee shall receipt to the county clerk for such warrant when delivered: *Provided,* That the county clerk may deliver any county warrant to the authorized agent or attorney of the payee, but such author-

shall be in writing and placed on file in his office. All appropriations made by the legislature for the construction, improving, or repairing of roads or bridges in any county shall be drawn by order of the board of county commissioners, and placed in the county treasury, and in no case shall the Territorial government appropriate or disburse any of the county road or bridge funds of the county: *Provided*, That the legislature may, at any time, appropriate Territorial funds for any specified road or bridge in any county, and specifically order that the work in that certain case shall be under supervision of a Territorial officer.

SEC. 6. For the construction of any county road or bridge work, should such course seem advisable, the board of county commissioners may draw plans and specifications, which shall be filed with the county clerk, and give notice for sealed tenders for such work or construction. Such notice shall be published and in all respects be the same as provided for the erection of county buildings. Upon opening such sealed tenders the board of county commissioners shall let the contract to the lowest responsible bidder: *Provided*, That the board may reject all bids and advertise anew for other bids as above provided.

CHAPTER XI.—*County commissioners.*

SEC. 1. There shall be a board of three county commissioners elected according to law, and no person holding any other Territorial, county, or city office shall be eligible to the office of county commissioner.

SEC. 2. Every county commissioner, before entering upon the duties of his office, shall execute a bond in the penal sum of not less than one thousand or more than five thousand dollars, the amount and sufficiency of such bond to be determined by the circuit judge having jurisdiction in the county, and said bond shall be filed and kept in the office of said court.

SEC. 3. The board of county commissioners shall procure and keep a seal with such emblems and devices as it may think proper, which shall be the seal of the county, and no other seal shall be used by the county clerk; and the impression of the seal hereby required to be kept by the stamp shall be sufficient sealing in all cases where sealing is required.

SEC. 4. The county commissioners shall meet and hold sessions for the transaction of business in the county clerk's office at the county seat in their respective counties, or at the usual place of holding its sessions, two days before the last day of every month of each year; and may if necessary continue in session not more than fifteen days in counties having more than two thousand five hundred voting population, one week in counties having more than one thousand and less than twenty-five hundred voting population, five days in counties having more than two hundred and fifty and less than one thousand voting population, to be determined by the vote cast at the last general election. The chairman of the board of county commissioners shall have power to call special sessions of the board to transact any business the same as at regular meetings, where the interest of the county may demand it, upon giving five days' notice of the time and object of calling the commissioners together by posting such notice in three public places in each precinct in the county, and by publication in one newspaper in the county at least five days before the time

specified for holding such meeting, in both the English and Hawaiian languages: *Provided*, That in case of a vacancy in the office of county clerk the chairman of the board shall have power to call a special session for the purpose of filling such vacancy for the unexpired term, unless otherwise provided by law.

SEC. 5. At the first meeting of the board of county commissioners they shall elect one of their number chairman, who shall act as chairman of the board of said commissioners during the term for which he is elected, or until his successor is elected; and in case of a vacancy from any cause whatever the board of county commissioners shall elect another chairman.

SEC. 6. No account shall be allowed by the board of county commissioners unless the same be made out in separate items and the nature of each item stated, and when no specific fees are allowed by law the time actually and necessarily devoted to the performance of any service charged in such accounts shall be specified, which account so made out shall be verified by affidavit setting forth that the same is just and correct and remains due and unpaid and that the party who rendered the service is not in any wise nor in any sum indebted to the county. *Provided*, That nothing in this section shall be construed to prevent any such board from disallowing any account in whole or in part when so rendered and verified nor from requiring any other or further evidences of the truth and propriety thereof, as it may think proper, and it shall be unlawful for any board of county commissioners to allow any claim or account against the county at any special or adjourned meeting of the board, except for election expenses and judicial fees, and all other claims or accounts against the county shall be allowed only at the regular meetings of the board.

SEC. 7. It shall be the duty of the chairman of the board of county commissioners to preside at the meetings of said board, and he shall have the power to administer oaths to any person concerning any matter submitted to the board or connected with its powers and duties, and all orders made by the board of county commissioners and all warrants drawn on the county treasurer shall be signed by the chairman and attested by the clerk.

SEC. 8. When the members of the board of county commissioners are equally divided on any question they shall defer a decision from time to time until the matter shall be decided by a majority of the board.

SEC. 9. Copies of the proceedings of the board of county commissioners, duly certified and attested by the county clerk under seal, shall be received as evidence in all the courts of this Territory of the fact therein stated.

SEC. 10. The board of county commissioners shall have power to preserve order when sitting as a board, and may punish contempts by fines not exceeding one hundred dollars or by imprisonment in the county jail not exceeding forty-eight hours; it may enforce obedience to all orders made by it, by attachment or other compulsory process, and when fines are assessed by it the same may be collected before any district magistrate having jurisdiction, and shall be paid over, as other fines, within ten days after they are collected.

SEC. 11. The said board of county commissioners shall keep a distinct account with the treasurer of the county in a book provided for that purpose, commencing from the day on which the treasurer became

qualified and continuing until the same or another person is qualified as treasurer, in which account it shall charge the treasurer with all sums paid to him and for all sums for which the treasurer is accountable to the county, and it shall credit him with all warrants returned and cancelled, with all moneys paid, and with all vouchers presented by him, and with all matters with which the treasurer is to be credited on account; and the said board in its settlement with the treasurer shall keep the general, special, and road tax separate, so that any citizen of the Territory may see how the same is expended.

SEC. 12. It shall keep a book in which all orders and decisions made by them shall be recorded, except those relating to roads and bridges; and all orders for the allowance of money from the county treasury shall state on what account and to whom the allowance is made, dating the same and numbering them consecutively as follows: From the 1st day of January to the 31st day of December, inclusive, in each year.

SEC. 13. It shall keep a book for the entry of all proceedings and adjudications relating to bridges, and the establishment, change, or discontinuance of roads.

SEC. 14. It shall keep a book for the entry of warrants on the county treasurer, showing number, date, amount, and name of the payee of each warrant drawn on the treasury, which book may be known as the "warrant book," and the warrants shall be numbered in relation to the order and decision allowing the amount for which the same was drawn.

SEC. 15. The board of commissioners of the several counties of this Territory are hereby authorized and required at each regular meeting to cancel and destroy all warrants drawn on any fund of the county that may have remained uncalled for and on file for a period of three years and upwards next preceding the regular meeting at which the cancellation takes place.

SEC. 16. Said board of county commissioners, before cancelling and destroying any such warrants, shall cause to be entered in the minutes of its proceedings a brief description thereof, containing the name of the payee, the number, date, and amount of each warrant destroyed.

SEC. 17. It shall have power to institute and prosecute civil actions in the name of the county for and on behalf of the county.

SEC. 18. First. It shall have power to make all orders respecting the property of the county, to sell the public grounds of the county, and to purchase other grounds in lieu thereof; and for the purpose of carrying out the provisions of this section it shall be sufficient to convey all the interest of the county in such grounds when an order made for the sale and a deed is executed in the name of the county by the chairman of the board by him for and on behalf of the county: *Provided, however,* That the question of the purchase, sale, or exchange of such public grounds or lands, if the value thereof exceed the sum of two hundred dollars, shall be first submitted to the voters of the county as hereinafter provided, and sanctioned by a majority of the voters of the county.

Second. To audit the accounts of all officers having the care, management, collection, or disbursement of any money belonging to the county or appropriated for its benefit.

Third. To contract for and repair bridges, and to open, lay out, locate, and change highways, to establish one or more election pre-

cincts in each municipal township in its county, and to equalize the assessment rolls of their county, in the manner provided by law.

Fourth. To furnish necessary blank books, plats, blanks, and stationery for all county officers of their respective counties, to be kept out of the county treasury; also a fireproof safe or vault when in the judgment the same shall be deemed advisable, in which to keep all the books, records, vouchers, and papers pertaining to the business of the county.

Fifth. To do and perform such other duties and acts as boards of county commissioners may hereafter be required by law to do and perform.

SEC. 19. It shall superintend the fiscal concerns of the county and secure the management thereof in the best manner; it shall keep account of the receipts and expenditures of the county, and on the first Monday on January, annually, it shall cause a full and accurate statement of the assessments, receipts, and expenditures of the preceding year to be made out in detail under separate heads, with an account of all the debts payable to and by the county treasurer, and it shall have the same printed in at least one newspaper in its county at least twice, and if there be no paper in the county the same shall be posted up at the usual place of holding its sessions, and at a public place in each precinct in the county.

SEC. 20. Said board is authorized to have made for its county from the field notes and surveys that it receives from the Territorial surveyor's office a map of its county on a scale of not less than 1 inch to 1,000 feet; and if the surveyor-general's notes are incomplete it shall direct that the work be continued till they have a complete map of the county, with the districts and all landholdings marked; also cities, towns, and such other divisions as shall from time to time be made, which map shall be kept in the county clerk's office, with the field notes thereof, and open to inspection during office hours by anyone.

SEC. 21. It shall submit to the people of the county at any regular or special election any question involving any outlay of money by the county, or any expenditure in an amount that would place such county in debt over one per centum of the total assessed valuation of the county in any one year, the total amount of all indebtedness at any time to be greater than seven per cent of the assessed valuation as shown by the assessment of the year before.

Second. It may submit to the people of the county at any regular or special election any question involving the increasing of the tax rate, and if so authorized it may do so and same must be paid. It shall under no circumstances levy a tax, issue bonds or warrants, or in any way whatsoever lend the credit of or bind the county to aid private enterprise of any kind or description: *Provided*, That this provision shall not be so construed as to prevent its issuing a franchise or license under conditions herein provided from which the county shall derive a revenue.

Third. A proposition to grant a franchise or special privilege shall before being acted on by the board of county commissioners, be submitted to a vote of the qualified electors of the county.

Such proposed franchise shall be published in a newspaper having general circulation in the county for sixty days prior to the vote being taken thereon, and shall be further published by posters placed in the various precincts of the county, in like manner and like place

proclamations for an election. The advertisement and poster shall be a true copy of the franchise or privilege to be voted on, and every franchise or privilege submitted shall contain provisions as follows:

1. For a sinking fund to meet the entire first cost of the plant or improvement required to successfully operate under such franchise within the time for which the same is granted.

2. For a percentage of receipts that shall be devoted to repairs on such plant.

3. For a percentage of receipts to be yielded the county for the right to operate under such franchise or privilege.

4. For the submission to and ratification by the board of county commissioners of the plans, specifications, and contracts relative to installation under the terms of the franchise or privilege.

5. For the acquiring of such plant by the county upon six months' notice of intention so to do, and the payment through its board of commissioners duly authorized thereto as provided herein of the lawful proportion of sinking fund still to be met for the unexpired term of the franchise or privilege.

Such franchise or privilege to be void if it contains any provisions other than in the advertised proposition, or if the latter should not contain the herein above-named requirements.

When a proposition to grant a franchise or privilege shall be duly published and submitted, as above provided, at any general or special election, and receives the affirmative vote of two-thirds of the registered voters of the county, the same shall be granted by the board of county commissioners.

Five per cent of the registered voters of the county may, by petition, in like manner as for nomination of candidates for office, lodged with the county clerk, initiate any legislation affecting only the county or its subdivisions, and in like manner twenty per cent of such registered voters may by petition demand a referendum to the voters of any legislation affecting the interests of the county or its residents.

Upon such petition being lodged with such clerk, the officers of the county shall proceed in like manner as provided for the election of county officers, the propositions being published, and in such publication given a number, which number, together with designation of choice, as "yes" or "no," or other designation, shall be placed on the ballot to be voted, and the elector shall indicate his choice by drawing a pencil mark through the designations other than his choice on such ballot.

Whenever herein a majority of votes or of voters is designated it shall mean a majority of all the registered voters of the county, and a like majority shall be required to make the vote on initiation or referendum carry.

SEC. 22. When county warrants are at a depreciated value, the said commissioners may in like manner submit the question whether a tax of a higher rate than that provided for shall be levied; and in all cases when an additional tax is laid in pursuance of a vote of the people of the county, or for constructing or ordering to be constructed any road or bridge.

SEC. 23. The mode of submitting questions to the people contemplated by the two preceding sections shall be the following: The whole question, including the sum desired to be raised, the amount of tax desired to be levied, the rate per annum, and the whole regulation,

including the time of its taking effect or having operation, if it be of a nature which can be set forth, and the penalty of its violation, if there be one, shall be published at least once a week for four consecutive weeks in some newspaper published in the county. If there be no newspaper, the publication shall be made in some newspaper published in an adjoining county, and by posting notices thereof in at least three of the most public places in each election precinct in the county; and in all cases the notices shall name the time when the question will be voted upon, and the form in which the question shall be submitted, and a copy of the question submitted shall be posted at each voting place during the day of election.

SEC. 24. When the question submitted involves the borrowing or expenditure of money, the proposition must be accompanied by a proposition to levy a tax for the payment thereof in addition to the usual taxes provided by law; and no vote adopting the question proposed shall be valid unless it likewise provides the amount of tax to be levied to meet the liability to be incurred.

SEC. 25. The rate of tax levied in pursuance of the last four sections shall in no case exceed one cent on the dollar of the county valuation in one year. When the object is to borrow money to aid in the erection of public buildings, the rates shall be such as to pay the debt in fifteen years. When the object is to construct or aid in constructing any road or bridge, the annual rate shall not exceed one cent on the dollar of the valuation; and any special tax or taxes levied in pursuance of this chapter becoming delinquent shall draw the same rate of interest as ordinary taxes levied in pursuance of the revenue laws of this Territory.

SEC. 26. The said board of commissioners being satisfied that the above requirements have been substantially complied with, and that a majority of votes were cast in favor of the proposition submitted, shall cause the same to be entered at large upon the book containing the record of its proceedings, and it shall then have power to levy and collect the special tax in the same manner that the other county taxes are collected. Propositions thus acted upon can not be rescinded by the board of county commissioners.

SEC. 27. Money raised by the board of county commissioners in pursuance of the five preceding sections is specially appropriated and constitutes a fund distinct from all others, in the hands of the county treasurer, until the obligations assumed are discharged.

SEC. 28. Whenever there remains in the treasury of any county an unexpended balance of any special fund, and all claims against such fund have been fully paid, and the purpose for which it was created has been fully performed and kept, and there remains no further use for such balance for the purpose for which it was created, it shall be lawful for the board of county commissioners of such county to transfer such balance to any other fund of the county or subdivisions in which such balance belongs.

SEC. 29. All warrants upon the county treasurer shall be issued upon the order of the board of county commissioners, signed by the chairman thereof, and attested by the signature of the county clerk, with the county seal attached, and shall designate the fund upon which they are drawn.

SEC. 30. The board of county commissioners shall hold their sessions with open doors, and transact all business of every kind in the

in public manner, and where the county has no court-house, or the court-house shall be in use by the court or unfit or inconvenient, it may hold its sessions for the transaction of business at any other suitable place at the county seat. All matters pertaining to the interest of the county shall be heard by the board of county commissioners in sessions as aforesaid, but it may continue any business from any regular session to an intermediate day.

SEC. 31. In any county where there is no court-house or jail erected in the county, or where those erected have not sufficient capacity, it shall be the duty of the board of county commissioners to provide for court room, jail, and offices for the following-named officers: Sheriff, assessor, register of deeds, county clerk, county attorney, county road supervisor, and county surveyor, in a suitable building or buildings, or the lowest rent to be obtained at the county seat, or to secure and occupy suitable rooms without rent, if such can be obtained, within the limits of the county seat or any of the additions thereto, until such county builds a court-house. They shall also provide the courts appointed to be held therein with attendants, lights, and stationery suitable and sufficient for the transaction of their business. If the commissioners neglect, the court may order the sheriff to do so, and the expense incurred by him in carrying the order into effect, when certified by the court, shall be a county charge.

SEC. 32. The power to rent court rooms shall only extend to such rooms as the courts using the same may approve.

SEC. 33. Said board shall have authority and power, under the provisions of this act, to provide for the erection and repairing of court-houses, jails, and other necessary buildings within and for the county, and to make contracts on behalf of the county for the building or repairing of the same, but no expenditure for the purpose herein named greater than can be paid out of the annual revenue of the county or the current year shall be made unless the question of such expenditure, together with the amount and rate of taxes necessary to meet the same, shall have first been submitted to a vote of the qualified voters of such county and shall have been approved by a majority of the voters.

SEC. 34. After a building fund has been accumulated, either from the proceeds of the sale of any lands owned by the county or from any other source, it shall be the duty of the board of county commissioners, within one year from the time such fund becomes available, to proceed to the erection of the necessary county buildings, including a jail, if such fund shall in the judgment of the board be sufficient for that purpose.

SEC. 35. The board shall cause an advertisement for bids for the erection of such buildings to be printed in some newspaper published in the county for at least two months prior to the opening of the bids, and in such other newspaper in the Territory and for such period as the board may deem advisable, but in no case less than two months. Such advertisement shall state where the plans and specifications may be examined, the time allowed for the completion of such buildings, and stating time and place for opening of bids, which must be at one of the regular sessions and must be public. The lowest responsible bid must in all cases be accepted, unless all bids are rejected, and the contracts for such buildings shall be so conditioned that payments on account shall not collectively exceed 75 per cent of the value of the

work accomplished on date of any payment. Final payment shall be made until the contract shall be executed and the buildings completed to the satisfaction and acceptance by the board. Said board shall further require a bond amounting to not less than ten per cent of the bid to accompany each bid, conditioned that the bidder will enter into a contract with, approved security, for the performance of the work in accordance with the plans and specifications in case his bid is accepted, such bond to be forfeited to the county as liquidated damages in case of failure by the bidder to proceed with the work under the terms of the contract.

Before signing agreements for any work submitted for tender, the party to whom the contract was awarded shall submit a bond, with one or more sureties, and for an amount equal to 25 per cent of the accepted bid. If the county commissioners approve such bond the same shall be signed and deposited with the county clerk.

In all contracts for county road and bridge work the following clause shall be inserted:

All parties to this contract and all workmen employed thereunder shall be citizens of the United States, as required by law. This contract shall not be subject to assignment to any other person, firm, company, or corporation, but may be assigned to any such party upon the approval of the chairman of the board of county commissioners. The filing of such approval with the county clerk. All the conditions in the original contract shall be binding upon such assignee. Eight hours' labor shall constitute a day's work, whether by contract or otherwise. Any violation of this section shall render the contract void.

SEC. 36. From all decisions of the board of county commissioners upon matter properly before them there shall be allowed an appeal to the circuit court by any person aggrieved, including the county by its county attorney, upon filing a bond with sufficient penalty and one or more sureties, to be approved by the chairman of the board, conditioned that the appellant will prosecute his appeal without delay, and pay all costs that he may be adjudged to pay in court; said bond shall be executed to the county, and may be sued in the name of the county upon breach of any condition therein:

Provided, That the county shall not be required to give such bond in any event:

Provided, That any county attorney, upon the written demand of at least five per cent of the taxpayers of the county who shall have voted at the preceding general election, as shown by the poll books, shall take an appeal from any action of the board of county commissioners or any other county officer within the county when said action relates to the interests or affairs of the county at large, or any portion thereof, in the name of the county, when he deems it to be in the interest of the county so to do; and in such case no bond shall be required to be given, and upon serving the notice provided for in the next section of this act the county clerk shall proceed the same as if a bond had been filed, and his fees for making the transcript shall be paid as other claims by the county.

SEC. 37. Said appeal shall be taken within twenty days after the decision of said board, by serving a written notice on one of the board of county commissioners, and the clerk shall, upon the filing of the bond as hereinabove provided, make out a complete transcript of the proceedings of said board relating to the matter of their decision thereon, and shall deliver the same to the clerk of the court to which said appeal is taken.

SEC. 38. Said appeal shall be filed by the first day of the term of court next after such appeal is taken, and said cause shall stand for trial at such term, unless continued by order of the court for cause.

SEC. 39. All appeals thus taken shall be docketed as other causes pending, and the same be heard and determined *de novo*.

SEC. 40. The said court may make a final judgment and cause the same to be executed, or may send the same back to the board with an order how to proceed, and require said board of county commissioners to comply therewith by a mandamus or attachment against the individual members thereof as for contempt.

SEC. 41. All treasurers, sheriffs, attorneys, clerks, coroners, and other officers chargeable with money belonging to the county shall render their accounts to and settle with the county commissioners at the time required by law, and pay into the county treasury any balance which may be due the county, taking duplicate receipts therefor, and depositing one of the same with the clerk of the county within five days thereafter.

SEC. 42. It shall be the duty of the board of county commissioners of the several counties in this Territory at each annual meeting of said board to examine the county treasurer's "tax-sale book and stub receipts," ascertain the amount of redemption money in the treasury, take an actual count thereof, and compel the said treasurer to account for the same.

SEC. 43. If any person thus chargeable shall neglect or refuse to render true accounts or settle as aforesaid, the board of county commissioners shall adjust the accounts of said delinquent according to the best information they can obtain, ascertain the balance due the county, and order suit to be brought in the name of the county therefor; and such delinquent shall not be entitled to any commission, and shall forfeit and pay to the county a penalty of twenty per cent additional on the amount of funds found due the county.

SEC. 44. It shall be the duty of the board of county commissioners of the several counties of this Territory to cause to be published in a newspaper printed in its respective county a full and complete report of all its official proceedings at each regular and special meeting, such proceedings to be so published as soon after any meeting of the commissioners as practicable, and the board of county commissioners shall pay for the same, as may be provided for. Where a county is without a newspaper the publication may be in a paper published in an adjoining county and having general circulation, or the same may be published by posters as conspicuously posted as required for election posters.

SEC. 45. It is hereby made the duty of the county clerk to make out a full and complete report of the proceedings of each regular and special meeting of the board, and to transmit the same to the publishers of the newspaper selected by such board to publish such proceedings, and reports to be made out and transmitted by such clerk within one week from the time such proceedings were had. Such clerk shall be allowed by the board a reasonable compensation for such services, the amount thereof to be determined solely by the board.

SEC. 46. It shall be the duty of the publisher of any newspaper selected to publish any proceedings of the board of county commissioners of the several counties to cause the same, when received by him

from any county clerk, to be published in the issue of his paper succeeding the time of their reception.

SEC. 47. The board of commissioners shall, at the expense of county, furnish, annually and in due season, to the assessors of county suitable blank assessment rolls, prepared in accordance with the provisions of law, and shall also provide suitable cases and furniture for the safe and convenient keeping of all the books, documents, and papers belonging to each county officer, and also of seals for each of said officers, where the same are required by law.

SEC. 48. Any person who is either elected or appointed to the office of county commissioner of any county in the Territory of Hawaii shall wilfully violate any provision of law, or fail to perform the duties required of him by law, shall be adjudged guilty of a misdemeanor, and upon conviction thereof shall be fined in a sum not less than one hundred nor more than one thousand dollars, or by imprisonment in the county jail not less than thirty days nor more than one year, or by both fine and imprisonment in the discretion of the court.

CHAPTER XXVI.

SEC. 1. The county officers, other than county commissioners and coroner, provided for in this act, shall receive such compensation for the services required of them by law, or by virtue of their offices, as the board of county commissioners may determine.

The coroner, for full compensation, shall retain all fees to be collected by him as provided by law.

Each member of the board of county commissioners shall receive seven and one-half dollars per diem while actually engaged in county business, and mileage at the rate of 10 cents per mile going to and from meetings of the board, or while out examining any county work, at ten cents per mile.

All salaries herein provided for shall be paid monthly, and county commissioners shall be paid immediately on the ending of the monthly session. All fees collected by county officers other than the clerk, recorder, surveyor and coroner shall be paid into the county treasurer for the use of the county.

CHAPTER XXVII.—*Fees.*

SEC. 1. That the officers and persons herein mentioned shall be entitled to collect only the fees and compensations herein allowed and other except as may be otherwise provided by law.

SEC. 2. The clerks of the circuit court of the counties in this Territory shall collect the following-named fees:

For filing each paper, five cents; for docketing each action on appearance docket, fifteen cents; each entry on appearance docket other than docketing action, five cents; docketing action on trial docket, each entry, ten cents; entering every order, motion, rule, plea, report, verdict, judgment, arraignment, ten cents; entering judgments not exceeding five folios, ten cents; each additional folio, ten cents; entering satisfaction judgment, twenty-five cents; indexing, five cents; issuing any writ except as otherwise provided, twenty-five cents; issuing subpoenas, the names contained in one precept to be contained in one subpoena, twenty-five cents; issuing an order of attachment, replevin, arre-

execution sale, or order to carry sentence of criminal execution, fifty cents; issuing commission to take depositions, fifty cents; administering oath in open court, five cents, impanelling and swearing in jury, five cents; taking and certifying affidavits, twenty-five cents; approving bond, including justification, fifty cents; docketing judgment, twenty-five cents; taxing costs and making fee bill, per folio, ten cents; making any record or copying any paper required to be copied, per folio, seven cents; certifying fees of jurors and witnesses to county clerk, each name, five cents; entering declaration of alien to become citizen and certified copy of same, one dollar; taking and entering recognizance, fifty cents; making fee bills in State cases, per folio, seven cents; entering indictment in indictment record, fifty cents; certificate and seal, twenty-five cents.

SEC. 3. The sheriff of each county shall collect for his services the following fees and none other: Serving and returning any writ, process, order, or notice, except as hereinafter provided, for the first person, fifty cents, for each additional person, twenty-five cents; serving warrant and making return thereof, seventy-five cents; making arrest as peace officer, fifty cents; serving order of attachment, arrest, or replevin, and returning the same, fifty cents; making levy under execution, fifty cents; appraisement of property, fifty cents; return "no property found," fifty cents; return of "not found," each person twenty-five cents; approving and returning undertaking bond or recognizance, fifty cents; advertizing property for sale, fifty cents; offering for sale or selling property, two dollars and fifty cents; taking inventory of personal property, each day, two dollars; sheriff's deed acknowledged to be paid out of the proceeds of the sale of real estate conveyed, one dollar and fifty cents; summoning talesmen, each, twenty-five cents; for every mile actually and necessarily traveled each way in serving or endeavoring to serve any writ, process or order, venire or notice, five cents: *Provided*, No mileage shall be charged where the distance does not exceed one mile.

SEC. 4. For attending jail when occupied by prisoner or prisoners, one dollar per day; for boarding and lodging each prisoner, seventy-five cents per day, exclusive of lights, furniture, and bedding where jail is provided, and one dollar per day where no jail is provided: *but provided further*, That no mileage covering the requirements of this section shall be taxed or allowed. No person shall be required to pay mileage unless at the time of making return the sheriff make and file with his return, or as a part thereof, statement showing the distance actually and necessarily traveled making service on the first person, who shall be named by him when the writ contains the name of more than one person, and the distance actually and necessarily traveled from the place of making the first service to the place of making service on the second person, who shall be named by him, and so on for each person served, and the distance actually and necessarily traveled in returning, so that the whole route traveled by the sheriff making service shall fully appear. For each mile actually and necessarily traveled in collecting or endeavoring to collect, or endeavoring to attach any property to satisfy personal taxes under warrants, ten cents, the said fees to be paid by the county in the event of a failure to find property with which to satisfy said tax warrants; attending any court of record, one dollar and fifty cents per day; executing writs of habeas corpus, one dollar; executing order of commitment,

twenty-five cents, ten cents per mile, and transportation and board prisoner under requisition, when made by the governor; commission for collecting money on sale, first one hundred dollars, five per cent, the next four hundred dollars, three per cent, the second five hundred dollars, two per cent, all over one thousand dollars, one per cent, half of the foregoing rates on collections without sale; for post each notice of election, twenty-five cents, and ten cents per mile each mile actually and necessarily traveled: *Provided*, That no mile shall be allowed where the distance traveled is less than one mile. Sheriffs may, where jails are insufficient for the safekeeping of prisoners, employ such guards as are actually necessary; for the service of such guard or guards the board of county commissioners shall order warrants to issue to such guard for reasonable compensation for actual service, to be paid out of the county treasury.

SEC. 5. District magistrates shall receive the following fees: Making entry upon magistrate's docket, required by law and not otherwise provided for, twenty-five cents; entering order of dismissal, or adjournment, or continuance of summons for jury, or other order of two folios or less, fifty cents; each additional folio, ten cents; all transcripts and copies, per folio, ten cents; certificates, twenty-five cents; acknowledgment of deed or other instrument, twenty-five cents; filing paper, ten cents; approving bond or undertaking, fifty cents; administering oath, ten cents; jury trial, each day or part thereof, one dollar; transmitting papers, fifty cents; entering any judgment or satisfaction, transfer of judgment, of two folios or less, fifty cents; issuing a writ, process or order, fifty cents; rendering judgment, twenty-five cents; all names included in one precept shall be in one subpoena, unless otherwise ordered; performing duties of coroner, same fees as coroner marrying and making returns, three dollars, to be paid by the party applying for such service: *Provided*, That in all cases where any person shall be arrested, charged with felony, and the court shall decide there were not reasonable grounds for such arrest, and when any person charged with an offense less than a felony shall be discharged for want of sufficient evidence to convict, or bind over, the prosecuting witness shall be liable for costs, unless the district magistrate is satisfied that the prosecution was malicious.

SEC. 6. The register of deeds shall collect the following fees:

For recording deeds, mortgages or other instruments of writing for the first folio, twenty-five cents.

Each additional folio, ten cents.

Certificate of filing and recording any instrument, twenty-five cents.

Each entry on index, including description of property, twenty-five cents.

For copy of each deed or other instrument recorded, per folio, ten cents.

For recording town plats of one hundred lots or less, ten dollars.

Each additional hundred lots, five dollars.

Filing each paper required to be filed, twenty-five cents.

SEC. 7. The county clerk in each county shall collect from the parties requiring his services, for the use of the county, the following fees:

For recording reports or papers other than such as pertain to or are required by law to be recorded by the county, or copies thereof, and for making copies of any such report or record, per folio, ten cents.

Countersigning and entering certificate of redemption, twenty-five cents.

Certificate and seal, when the same is required by law to be made by the county clerk, twenty-five cents.

Taking and certifying affidavit, except upon claims against the county, twenty-five cents.

Filing each paper, except such as pertain to county business, twenty-five cents.

For granting a certificate to purchasers of school lands, one dollar; each additional tract or lot, twenty-five cents.

Issuing license, to be paid by the person receiving the same, one dollar.

Assignment of tax-sale certificate, to be paid by the party purchasing, twenty-five cents.

For recording any mark or brand and giving certificate for same, one dollar.

For recording each certificate of strays and forwarding description of same as required by law, seventy-five cents.

SEC. 8. He shall keep an account of said fees in a book to be provided for that purpose, showing the amount charged and the amount received, from whom and for what purpose, and the date thereof.

The footings for each month shall, at the close thereof, be legibly and correctly entered in said book, opposite the month during which the same have been collected, showing the amount received.

SEC. 9. He shall, on the first Monday of January and the first Monday after the first Tuesday of April and the first Mondays of July and October of each year, make out and present to the board of county commissioners a detailed statement of the amount of fees by him received during the preceding quarter, which report shall be under oath, and the same shall be filed with the register of deeds, and the amount so collected shall be paid into the county treasury every quarter, or oftener, as the board of county commissioners may direct.

SEC. 10. If any county clerk shall fail to make to the county commissioners the quarterly report under oath as herein required, he shall forfeit ten dollars for each day he shall negligently fail to do so; and the board of county commissioners shall in no event audit or order to be paid any salary due him as herein provided until such report shall have been made by the county clerk as herein provided; and if any board of county commissioners shall audit and order to be paid any installment of such salary before the report be made and sworn to by the county clerk as herein provided, each member of said board shall be subject to a fine of one hundred dollars, to be recovered for the use of the general county fund, as in other cases.

SEC. 11. The county treasurer in each county shall collect from party requiring his services, for the use of the county, the following fees: For issuing warrants for the collection of taxes on personal property, one dollar; for certificate of sale of lands for taxes, fifty cents; for certificates of redemption, fifty cents; for making out list of land for the printer, or to be posted, twenty-five cents for each tract advertised.

SEC. 12. He shall keep an account of said fees in a book to be provided for that purpose, showing the amount charged and the amount received, from whom, for what purpose, and the date thereof. The footings for each month shall, at the close thereof, be legibly and cor-

rectly entered in said book, opposite the month during which the same shall have been collected, showing the amount received.

SEC. 13. He shall, on the first Monday of January and the first Monday after the first Tuesday of April and the first Mondays of July and October of each year, make out and present to the board of county commissioners a detailed statement of the amount of fees by him received during the preceding quarter, which report shall be under oath, and the same shall be filed with the county clerk and the amount so collected be charged to him as treasurer.

SEC. 14. If any county treasurer shall fail to make to the county commissioners a quarterly report under oath, as herein required, he shall forfeit ten dollars for each day he shall wilfully fail so to do, and the board of county commissioners shall in no event audit or order to be paid any installment of the salary as herein provided until such report shall have been made by the county treasurer as herein provided; and if any board of county commissioners shall audit or order to be paid any installment of such salary until the report be made and sworn to by the county treasurer as herein provided, each member of said board voting for such allowance shall be subject to a fine of one hundred dollars, to be covered for the support of common schools of the county, as in other cases.

SEC. 15. The county surveyor shall, in addition to his salary, receive five dollars per day for the time actually and necessarily employed in going to and making a survey and returning to his office. For copy of plat of land or certificate of survey, three dollars; making out complete report in all surveys made by authority for the county, two dollars; for recording surveys, per folio, twenty cents.

SEC. 16. Each commissioner for the partition of real estate shall receive for each day five dollars, traveling fees the same as are allowed to sheriffs; but this section shall not limit the right of parties to agree upon a higher rate of compensation for the commissioners in any case.

SEC. 17. Each appraiser in civil actions shall receive five dollars for first day's service and traveling fees the same as are allowed to sheriffs, and when required to serve more than one day in any case, three dollars for each day.

SEC. 18. Jurors shall be paid the following fees out of the county treasury: For attending before any court of record or coroner, for each day's attendance, two dollars; for each mile necessarily travelled in going to and returning from the place of attendance, ten cents; each witness sworn before any coroner or justice of the peace on any inquest taken by him, one dollar; each juror, for attending in any justice court, to be advanced by the party demanding the same and at the time of such demand, and taxed to the party adjudged to pay the costs, one dollar; and two dollars for each additional day they shall attend on the same.

SEC. 19. The clerk of the district court shall keep a record of the attendance of jurors at each term, and of the attendance and fees of witness when claimed during the term.

SEC. 20. Within ten days after the close of each term of a court of record, the clerk thereof shall return to the board of county commissioners a statement of the attendance of the jurors at such term and their mileage as taken by him, together with a statement of the attendance and mileage of witnesses in all criminal cases claimed and for which the county is liable.

SEC. 21. Each officer herein named shall cause a list of fees allowed by law to be charged by him to be posted in his office, in some conspicuous place, under penalty of three dollars for each day he shall neglect so to do.

SEC. 21a. No officer serving any process shall be entitled to any fees for the same unless he return, on such process, the amount of his fees and the items thereof.

SEC. 22. All fees and sums paid by either party for fees of witnesses and other necessary expenses, in any civil action or proceeding, shall be proved by the affidavit of the party, of some person knowing the same to have been paid; and all such fees shall be taxed and collected from the party ordered or adjudged to pay the costs.

SEC. 23. Any person liable for any costs or fees shall be entitled to receive on demand a certified bill of the same, in which the items of service, and the charge therefor shall be specifically stated.

SEC. 24. It shall be the duty of the sheriff or other officer collecting costs on execution in this Territory, after retaining his own fees, to pay the residue of such costs collected to the clerk of the court from which the execution issued, or to the justice, and take a receipt therefor.

SEC. 25. It shall be the duty of the clerk of the court or magistrate receiving any costs belonging to any other person, to hold the same, subject to the order of the person entitled thereto, and to pay the same over on request; and if such fees shall not be called for within one year after having been received, the officer shall pay the same into the county treasury and take a receipt therefor.

SEC. 26. No officer shall receive any fees for constructive services or mileage in any case: *Provided*, That any officer who shall charge or receive any greater fee than is herein provided for, shall be deemed guilty of a misdemeanor, and shall, upon conviction, be fined in any sum not to exceed twenty-five dollars for each offense.

SEC. 27. A folio shall consist of one hundred words, and figures shall be counted as one word.

SEC. 28. No fees allowed by this act shall be due or demanded until the services for which such fees are chargeable shall have been performed.

SEC. 29. That each county officer, before entering upon the discharge of the duties of the office to which he has been elected, shall enter into a bond payable to the board of county commissioners of the county for which he was elected, in such sum and with such sureties as may be prescribed by the board of county commissioners, where not otherwise provided by law. Said bond shall be conditioned for the prompt and faithful performance of the duties of the office and the surrender of the books, furniture, and other property connected with the office to his successor on the expiration of the term of the obligor.

SEC. 30. It is hereby made the duty of the governor of the Territory of Hawaii, on or before the first day of June, A. D. 1901, to issue and publish a proclamation transferring to each county of the Territory erected by this act all of the following public property located within the boundaries of each of said counties, to wit: The court-house and jail building, all furniture and fixtures of every kind and character situated therein, the enclosure surrounding said building, all tools, engines, and machinery used by the public works department within said county, and relinquishing any and all claim of the Territory of

Hawaii to each and every item of said property. Said proclama shall operate to pass the title to each item of said property from Territory of Hawaii unto each of said counties.

SEC. 31. All laws and parts of laws in conflict with this act hereby repealed.

SEC. 32. This act shall take effect from and after the first day of June, 1901.

EXHIBIT No. —.

MEMORIAL OF NICHOLAS RUSSELL.

OLAA, HAWAII, *September 20, 1901.*

To the chairman of the Subcommittee of the Insular Committee, United States Senate.

SIR: In reading the reports of the Philippine Commission^a I am struck by the analogy between the condition of the Philippine Islands under Spanish rule and that of the Hawaiian Islands under the rule of sugar corporations.

It is said in those reports that a parish friar priest in the Philippines—

at first actually, and afterwards by law, came to discharge many civil functions; to supervise, correct or veto everything which was done or thought to be done in the pueblo which was his parish.

That among many other duties—

he was inspector of primary schools; president of the health board and board of charities; president of the board of urban taxation; president of the board of public works; * * * president of the board of statistics; president of the census taking of the town; * * * censor of the municipal budgets; * * * president of the prison board; * * * member of the board of partitioning Crown lands; counselor for the municipal council; supervisor of the election of the police force; censor of the plays, comedies, dramas, etc.

By substituting "manager of a sugar plantation" for a friar priest we are landed straight on the Hawaiian Islands.

Taking as an example the district where I am living, we find that the manager of a sugar plantation, besides having under control the whole of the economical department; production of sugar cane; commerce (two plantation stores), besides being the principal and practically the only employer of labor (over 2,000 laborers, nearly all Japanese), and as such controlling consumption; besides being the local representative of the local railroad corporation, which practically is identical with the local sugar corporation; besides being the representative of the largest landholding in the district (14,000 acres in fee simple and considerably more in long leases); that besides all this directly or indirectly, through his clerks and employees, he is president of the local road board, agent of the board of health, school agent, postmaster of the two post-offices; that he is controlling local police by paying half of the salaries; that he is agent of the census taking, notary public, etc.

Such long titles as those of the Philippine friar and Hawaiian suga

^a Message of the President of the United States, 1901, page 25.

plantation manager can be found only with the crowned heads of kings and emperors in Europe.

In all three cases the reason is the same: All three are absolute sovereigns.

In passing from a district to the capital we find the same striking analogy. The above reports (pp. 26-27) say:

The archbishops and bishops formed part of what was known in Manila as the board of authorities. The duties of this board were principally to investigate the matters of urgent moment, and in times of crisis to advise the government generally. The archbishops and bishops constituted the section of the board on "government and patronage" (analogous to our Department of the Interior); the archbishops and bishops and provincials of the religious orders also formed a part of the council of administration, a body analogous to the council of state of Spain or France, charged with advising the government generally. Each order had a leading officer resident in Madrid, through whom the court of Spain could be easily and directly reached by order in the Philippines without the intervention of the civil or military authorities of the islands. * * *

The truth is [further says the same report] that the whole Government of Spain in these islands rests on the friars. To use the expression of the provincial of the Augustinians, the friars were the pedestal or foundation of the sovereignty of Spain in the islands, which being removed, the whole structure would topple over.

Returning to the Hawaiian Islands, we find that all economical and political power is in the hands of fifty-eight corporations, mostly sugar plantations, partly large cattle ranches, which plantations and ranches practically are owned by fourteen companies, these companies being composed of a score of the same individuals in various combinations. This score of sugar planters, holding controlling interests in all agricultural and manufacturing industries of the islands, are organized into the Hawaiian Sugar Planters' Association. The object of the association is to look after the common interest of sugar planters, importation and control of labor, relations to the continental sugar trust, lobbying in Congress, control of local legislation, and administration. It needs to make but one step further and obtain a legislative sanction to become a trust in full, legitimate control of the country, similar to the English East Indian Company before the Indian revolt.

Intending to make a general review of the situation, I can not quote statistical figures and individual facts, but if need be I shall not find much difficulty in corroborating the following statements:

First. That nearly all improvable land is owned in fee simple, or, remaining public, is held under long leases by this score of individuals.

Second. That it is the same with all manufactures, with the exception of some hand trades.

Third. That the same score of men own and control all the inter-island steamship lines and all railroads.

Fourth. That directly or indirectly they own and control nearly all wholesale and retail stores in the towns and in the country, as well as banks, hotels, telephones, light and power concerns, express, stage, and other paying establishments.

Fifth. That, as ought to be expected, this same score of individuals control the legislative, judiciary (except United States and circuit courts, Territorial), and overshadows the executive department of the government.

As a mass the natives are good children, very sympathetic, possessing many talents and virtues, and deserving a better future. They are peaceful, contented, honest, requiring but little in respect to material comforts, good, though not steady workers, very capable in mechanical

pursuits, but especially in music and arts. They are easily influenced, versatile, imaginative, with but small capacity for abstract thinking. Under certain favorable conditions they are capable of modern culture, civilization, and self-government, and are not, like many Indian tribes, doomed to disappearance. Were they a hundred times as numerous as they are, their fusion with the great American nation would be a contribution of a bright, cheery, poetical element not overabundant in American life. Their disappearance could and ought to be prevented. This can not be accomplished, however, under present conditions, based upon an implacable corporate selfishness. As it is now, the position of the natives in opposition to corporate monopoly, with all self-government granted to them and numerical preponderance at the ballot box, is untenable and hopeless.

However sympathetic a native may be in his natural surroundings in his little village on the sea beach, where he is fishing, planting taro, picking coconuts, raising pigs, singing, sunning, airing, and leading the life of a happy child, he becomes a different person when driven into the towns through dispossession of the little patch of ground which is needed for sugar cane. Those lands have become valuable for cane, and the native is too indolent and careless of the future to mortgage or alienate at any time when the opportunity presents itself for feasting a friend or relative. The temptation on both sides, viz, on the part of a neighboring sugar plantation and the native homesteader—is too strong to be resisted, and the alienation is going on systematically and rapidly. Once dispossessed of his patch of ground the native is driven into the city or town, where he has to become either a steady laborer or look for more congenial, easy odd jobs. For steady, patient, muscular work, day after day and month after month as I said, he is seldom capable. Manual trades he is taught only in a few schools and this but recently, and there is hardly a trade where he does not meet a stronger competition from white men. The education of the natives is most elementary. Intermediate schools are few and those are designed for and filled with the select few. Schools of high professional education do not exist. Those abroad are inaccessible to an average native. All the higher walks of life are closed to him. What remains? For the mass of this class, prostitution, either of the body for the female, or that of the soul for the male. This is the reason why native girls and women fill the ranks of prostitutes in towns, while the most ambitious, the least scrupulous, and perhaps the brightest males crowd the ranks of inferior officials, detectives, police court employees, and politicians. For commerce or any mercantile pursuits the natives are hopelessly incapable. Driven into towns, where nothing is prepared to receive them and make of them a useful class of citizens, they are demoralized not only morally but bodily as well. They quickly become victims of tuberculosis, syphilis, and leprosy—the three principal and immediate factors of speedy degeneration of the native race.

The parts of servants, petty lawyers, detectives, politicians, and go-betweens of every description are slippery and dangerous parts for any well-balanced white men, and infinitely more dangerous for the unbalanced, uneducated, unprepared native, emerging straight from the age of stone. What wonder that he is speedily demoralized to the core, if, in order to hold his own in the struggle for existence, he abandons the virtues of both whites and natives and adopts the prac-

the vices of both? The destiny of this class of people is very sad indeed already from a purely humanitarian point, but it becomes a social danger when they assume the leadership of the voting majority, and as such are called to make laws for the country, and that is exactly what takes place. Owing to their knowledge of the native language, of native psychology, of native prejudices; owing to the unscrupulousness and turpitude, to the lack of any moral, social, or political principles, peculiar to the above-enumerated trades and occupations everywhere, to the versatility of character and the glib tongue; owing to the ignorance and the corresponding self-conceit and impudence, they easily assert themselves as leaders of their credulous, over-confident people.

Racial jealousy, however bad, is the best of all the motives that animate them in their opposition to the government of the corporate monopoly, and this only as long as not appeased by personal favor and considerations. Without blushing they openly appeal to the principle that "to the victors belong the spoils," thinking it is an ethical axiom generally recognized and adopted all the world over. As little as the sugar planters do, they realize the natural consequences of annexation and the unavoidable necessity of reforms on American lines in their own interest. No social or political principles or ideals in regard to the welfare of the whole country underlie their opposition. If they could but succeed in placing a native in every office in the Territory, and through it partake of the crumbs falling from the tables of the sugar planters, they would be ready to leave things just as they are. The only political measure on which all of them unite is the local self-government, and this, I am sorry to say, not because of the principle itself and its value to the people or the community at large, but because it creates a large number of small offices which they rightly expect to fill with their native friends on account of the numerical preponderance of native voters in every part of the country. Sugar planters (in this case seconded by many white men) are naturally opposed to the measure, not only because it takes political power, which they have so much abused, out of their control, but also because it practically surrenders this power into the hands of the unprincipled, unscrupulous, and incapable class of natives above mentioned.

So much about the natives. Now let us look at the part played by a small, independent farmer, merchant, or manufacturer on these islands. To begin with, I quote from the report of the governor of the Territory for the last year:

Small holdings.—What can the man of small means do in the way of agriculture? No one seems to care to take the responsibility of saying that he will be successful. Experiments along these lines are being made, but no definite results have been reached. In former years most of the cereals were raised on the mountain lands of moderate elevation, but the industry was abandoned many years ago with the exception of corn and potatoes. These are still grown on the high lands of the Kula district, on the island of Maui, and to a very limited extent in Hilo and Hamakua districts, on the island of Hawaii, principally by the homesteaders.

The growing of the fruits of the temperate zone has never been systematically attempted. Citrus fruits do well in many of the districts, but no large tracts have been devoted to their culture, the main supply coming from the trees that grow at random. The culture of the pineapple is now receiving considerable attention, but the immense yields from the small acreage indicate that the industry may easily be overdone. Coffee seemed once to be the crop suitable for a man of small means, but unfortunately it has not proved so; low prices and high wages having rendered its cultivation unprofitable. The small farmer, as he is known throughout the Eastern and Pacific States, is unknown here. The man who desires to become a pioneer in this work is welcome, and he will find land at such prices as would seem to war.

rant his making the attempt; but he will find much to contend with and condition that are new and untried. This view may be discouraging, but I believe that it would be unfair to make rosy statements that could not be fulfilled. There are many conditions that enter into the subject that it is difficult to make a correct estimate of probable results. Transportation of products has an important bearing upon the question. Insect pests are numerous and seem to be on the increase. Soil vary so greatly in character that while several products may do well in a locality others are complete failures.

We acknowledge that as a statement of general facts these words of the governor are pretty correct, with the exception, perhaps, of cheap land and the true causes why the small farmer can not succeed. I regard to government land given to settlers, it is not cheap. In the district where I live lands whose clearing requires \$100 an acre are sold at the rate of \$6 to \$12 an acre, instead of \$1.25, as in the States. On this land the settler has to pay 8 per cent yearly interest from the first day until the purchase is effected. The law under purchase-lease contracts demands besides that the settler, whether it is necessary or not, has to maintain his residence on the premises from the end of the first to the end of the third year. It also demands that 25 per cent of the area should be planted, no matter whether any crops can or cannot be grown or sold profitably. The experience of coffee planters in this district was that after fulfillment of all these conditions an acre of land cost the planter \$72 and—at least in coffee—brings nothing.

As for the causes why the small farmer can not succeed, they are not clearly stated in the governor's report and convey the meaning that all mysterious forces have combined to make the small farmer unknown in Hawaii—transportation facilities, uncertainty of soils, and variety of pests—although the governor admits that in former times cereals and other crops have been, and still are, grown successfully on the islands, so far as natural conditions are concerned. The executive, overshadowed by the Hawaiian Sugar Planters' Association, could not have been more truthful. It behooves somebody else to tell the rest.

Residing continuously for ten years on these islands, of which eight years have been spent in small farming, I do not deny the existence of some of the natural difficulties mentioned in the report. I do not think, though, that those difficulties are any greater here than in any section of the American continent, where the small farmer is not a rare bird. The pests, uncertainty of the soil, and the rest can be, and to some extent are, overcome by proper measures. We may add to the list of these natural difficulties enumerated in the report one which is not mentioned therein, but which is always put forward by the sugar planters when the question of Asiatic or white labor arises. It is their assertion that the climate of Hawaii does not admit of white labor; that white men can not work in the open fields, at least. As a physician who has made this climate and its effects a study, I can say that the above assertion contains but a small amount of truth and that the problem, as usual, is more complicated than is generally supposed.

This small speck of a Territory is far from having any uniform climate, thanks to its mountains and its trade winds. These two elements are the causes why there are many different climates on these islands. The element of temperature provided by various elevations, from zero to 14,000 feet above the sea level, at the top of the highest mountains, is the cause why from tropical lowlands we pass, gradually ascending, to temperate, and further to really cold regions. The element of trade winds renders one side of the islands wet and the other

dry. Of course dryness and humidity also vary with temperature and with altitude. The result is that in this small country we have all possible combinations of dry, wet, hot, and cold climate. There are regions hot and dry, others cold and dry, others hot and wet, and still others wet and cold. This fact alone renders any universal assertion like the one above stated preposterous, even in regard to cane planting, which planting is made nowadays as high as 3,000 feet.

There is some truth in the assertion only in reference to the lowlands, mostly flat coral fields of the coast. It is true these are the most populated regions, on account of cane, rice, and taro planting, and fishing. Their unwholesome climate is due only and exclusively to malaria, which is the result of total lack of drainage of numerous swamps and marshes breeding mosquitoes. Still, even the malaria of these lowlands is of the same mild character as in any temperate country under the same conditions. Neither pernicious forms of malaria nor enlarged spleens are observed. It produces but a certain debility of the system with those whites who do not possess any natural immunity. Thanks to a remarkable porosity of volcanic soils, already at the elevation of 500 feet one is generally out of the reach of malaria. Since malaria affects men only between sunset and sunrise, the mischief could be easily avoided even on these lowlands by providing the white laborers with headquarters above 500 feet, which elevations are always at hand in the immediate vicinity.

As for altitudes over 500 feet, unless under exceptional circumstances of interference with the drainage, they are totally exempt from malaria, and the ability of white men to live and work there could not be questioned.

High temperatures do not cause any trouble, because there are none. In the hottest seacoast leeward sections it hardly ever reaches 90° F. in the shade. The surrounding ocean and mountain breezes and the trade winds moderate the temperature so that even continental summers of far more northern latitudes are hotter. In ten years of medical practice I have not met with a single case of sunstroke. At elevations of 1,000 to 1,500 feet the temperature on hottest summer afternoons never exceeds 84° F. The fact that from 200 to 300 Galicians from Austria, all white men, have been working in the fields by the side of Japanese for nearly five years, in all parts of the country, is sufficient illustration.

An endemic disease, a variety of typhoid fever (called, erroneously, typhoid-malaria), very prevalent in the country among Japanese, as well as natives and whites, is due to infection of drinking water with typhoid-fever germs. The infection takes place in the mountains, covered with cattle ranches where primitive methods of cattle raising are practiced. The mountain streams and rivers, practically the only sources of drinking water for the country below, are filled with the rotting carcasses of animals. The sanitary service, like nearly every other public service, being nominal, no attention has ever been paid to this, and typhoid fever continues to decimate the population.

A dangerous intestinal parasite, called *Anchylostomum duodenale*, is another local scourge totally ignored by the board of health.

I mention these diseases without any connection with the question of white labor, since they do not discriminate between Asiatics, whites, and natives; all nationalities and colors are equally likely to be affected.

All real reasons why small farming and diversified industries cannot take root on these islands may be traced to one source—the concentration of economical and political power in the hands of a few.

Neither small farming nor diversified industries are in the interest of those few. The sympathy of some of them with a system of small farming and diversified industries is very platonic. To admit such elements into this country in any degree worth speaking of would mean competition and curtailing of the supreme power of the Hawaiian Sugar Planters' Association on all sides—production, commerce, and politics.

The production in varied industries of small farmers would mean the offer on the local markets of great numbers of articles which at present fill the bottoms of returning sugar ships, which ships otherwise would return with ballast. It also means the curtailing of commissions realized in buying those goods on the coast and the curtailing of good profits to sugar-planting mercantile corporations, who at sale and retail, in selling them here to consumers.

Such small farming and varied industries would mean the creation of a class of independent small farmers, industrials, and merchants and the abolition of commercial monopoly. It would mean the establishment of new steamship lines of communication with the American coast and between the islands to compete with the monopolistic lines of sugar planters. It would mean competition in the employment of labor, which is not sufficient to cover the demand even of the sugar planters. It would mean a higher value on land in general and competition in public lands, which at present are under the control of plantations at nominal prices. The great majority of present so-called homesteaders are merely mediators in transferring public lands to sugar corporations, because those lands nowadays are good for nothing but sugar planting. But—what is most dangerous to the sugar planters' interests—such a system of small farming and varied industries would result in the creation of a numerous independent class of voters.

To sum up, the introduction of variegated industries and small farming would mean the establishment of an American system of free republican and democratic principles and the end of sugar planter supremacy.

Under present conditions the position of small farmers, both in cane growing for the corporations' mills and in other agricultural pursuits, is untenable, because the system of monopolistic large land holding and the system of small farming are incompatible. It is untenable in cane growing, because the Territory being divided into spheres of influence among various mills and corporations the cane grower finds only one corporation as customer, and that customer absorbs all the possible profits in raising cane, succeeding by various devices in reducing the farmer's part to that of an unsalaried help. It is untenable in any other agricultural pursuit, because after having succeeded in raising any produce, in spite of expensive credit (10 per cent), uncertainty of soil and climate, and the necessity of carrying on expensive work for himself and by himself,^a in spite of relative high price

^a So-called U. S. Experiment Station, as at present, is of no use whatever. Experiments, if any, are carried on in Honolulu, whose soil and climate not only are thoroughly known already, but who have nothing in common with the varied conditions of soil and climate of the most important sections of the Territory.

public lands, the high rate of interest charged until paid (8 per cent), of its requiring considerable capital for clearing and improving, in spite of expensiveness of living and of labor—after having succeeded in raising any produce in spite of all these adverse circumstances he (1) has no access to any market except in the immediate neighborhood on account of exorbitant charges by transportation companies, who are subsidiary to sugar corporations. These transportation companies having made contracts at very cheap rates (below cost) with sugar corporations for plantation freights, make up their losses, and very good dividends into the bargain, by charging excessive rates to everybody not connected with the sugar corporations. As an instance, I state that while sugar companies pay \$3 a ton for freight from Hilo to Honolulu, we pay for parchment coffee in bags \$8 a ton for the same distance, while the cost of a ton to San Francisco is but \$5; (2) he is unable to compete in the limited local market with goods imported by sugar planters and sold in their retail stores, they having the advantage of access to cheap market and cheap transportation facilities in the bottoms of returning sugar ships.

As a member of the last Territorial legislature I made an attempt to effect some of the immediate needed reforms. For this purpose the following bills were introduced, partly in the senate, partly in the house, directly or through other members:

1. House bill No. 75. An act providing a system of taxation for the Territory of Hawaii. (See Exhibit No. 1.) The principal object of the bill was a more just distribution of the burdens of taxation among various classes of taxpayers. Being practically the only beneficiaries in the Territory, holding the country under full control, under the old system of taxation sugar planters did not and do not pay one-third of what they ought to. They try to run the country on such resources as selling public domain, exorbitant registration fees, indirect taxation of the mass of the people by licenses, etc. While relieving the homesteader and artisan, this bill increased the taxes on manufacture of sugar and other profitable business. Another object was, through the introduction of an area tax, to put an end to the large holdings of unimproved land held for speculation, compelling such holders to settle the land with actual homesteaders and improve it or to surrender it to the Territory. It had a further object—to compel the cattle ranches to adopt a system of cattle industry more rational and less injurious to the interests of the country.

2. Senate bill No. 68. A public health act. (See Exhibit No. 2.) The object of this bill was reorganizing of the public health service on modern lines, creating a real sanitary service in lieu of a nominal one.

3. Senate bill No. 42. An act to control and regulate the manufacture, transportation, and sale of liquors, opium, awa, and other intoxicants within the Territory of Hawaii. (See Exhibit No. 3.) This bill being practically the introduction of the dispensary system of South Carolina in a modified form corresponding to local conditions. Its purpose was to reduce the evil effects of private traffic in liquors upon the health of the natives, doing away with private profits.

4. House bill No. 65. An act creating the office of transportation commissioner. (Exhibit No. 4.) The purpose of the act was to place under some degree of Territorial control the transportation companies practiced on the continent of the United States.

5. Senate bill No. 62. An act to create, establish, and locate an

agricultural college and model farm, providing for the management thereof, and appropriating money for its maintenance and development (Exhibit No. 5.)

6. Senate bill No. 31. An act to provide for a high school and conservatory of music, under the department of public instruction, Hilo, island of Hawaii. (Exhibit No. 6.)

7. House bill No. 44. An act to establish and maintain school libraries. (Exhibit No. 7.)

The object of these last three bills was to raise the educational standard of the natives and open to them some desirable trades and professions.

These seven bills, together with the substitute to House bill No. 4 creating counties and municipalities, in my opinion comprise the most urgently needed reforms in this Territory.

For the reasons formulated in my resignation of the office of president of the senate (Exhibit No. 8), and substantiated in these preceding pages, none of those bills have passed, the whole regular session, as well as an extra session, having been spent in lengthy, barren, "re-tape" debates and personal encounters with the members of the executive.

From all above stated it is clear that in annexing the Hawaiian Islands the United States has annexed a child, throttled by a wolf in a corporate monopoly, and that the policy of laissez faire, of let go however commendable on general principles, in this particular case is criminal—as criminal as leaving the Filipino people in the clutches of the Spanish friars.

Whatever steps the United States Government sees fit to take in this direction, one question demands immediate solution—whether this Territory is intended to remain as it is, a capitalistic colony, where a few American and foreign capitalists and the transient Asiatic labor are the only beneficiaries, or is it to become an integral part of the body of the great Republic? On this pivotal question rests the whole future practical policy in regard to these islands, which do and will continue to suffer as long as this question remains undecided.

NICHOLAS RUSSEL,

Senator of the Territory of Hawaii.

HILO, HAWAII, *September 20, 1902.*

EXHIBIT No. 1.—House bill No. 75.

Introduced 29th day of March, 1901, by W. B. Nailima. First reading in House, March 29, 1901.

AN ACT providing a system of taxation for the Territory of Hawaii, and repealing all laws heretofore passed and in force relating to taxation.

Be it enacted by the Legislature of the Territory of Hawaii:

SECTION 1. For the purpose of taxation, the Territory of Hawaii is hereby divided into as many taxation divisions as there shall be counties in the Territory. Each county shall constitute a taxation division.

SEC. 2. All property and other sources from which taxes are derived shall be determined and assessed as of the 1st day of January of each year, but shall be determined and calculated from the books and accounts of the previous year as shown at the close of business Decem-

Sec. 31st. Such assessment shall form the basis upon which public revenue shall be collected during the year in which the assessment is made, and taxes shall be due on the first day of November of each year and payable at the office of the county treasurer in each county. Upon the first day of January following each assessment, the taxes due by reason thereof shall become delinquent and a penalty of ten per centum shall be added. On the first day of each month thereafter an additional penalty of one per centum shall be added to the original tax until date of sale or payment.

Sec. 3. At each general election there shall be elected, in each county one county assessor, who shall qualify in the manner provided by law for the qualification of county officers and who shall hold his office for two years and until his successor is elected and qualified.

Sec. 4. Each assessor may appoint such a number of deputies as the board of county commissioners shall direct, and each deputy before entering upon the discharge of his duties, shall qualify in the same manner as is required of the assessor by law.

Sec. 5. Subject to the supervision and control of the assessor of each county, every deputy shall, within and for the county in which he was appointed, have all the power and authority and may do and perform all the duties of the assessor, except the appointment of deputies.

He shall also be subject to the same obligations and penalties to which the assessor is subject.

Sec. 6. Each assessor shall be responsible for the acts of his deputy or deputies, for the correct and full assessment of the taxes within his county, and making of returns to the county clerk. Each assessor shall receive such compensation as may be provided by law for compensation of county officers, and each deputy shall receive such compensation as may be fixed by the board of county commissioners in the county for which he was appointed.

Sec. 7. The county clerk shall furnish to the assessor all the necessary blanks, books, and stationery.

Sec. 8. For the purpose of assisting the assessor and his deputies in arriving at a correct assessment, the county clerk, county surveyor, and register of deeds within his county shall render the assessor and his deputies all assistance possible, and shall allow the assessor and his deputies free and full access to the records, maps, and files in their respective offices.

Sec. 9. On the first day of January, or as soon thereafter as possible, the Territorial treasurer shall transmit by mail to the county clerks in each county a statement showing the annual corporation exhibits of all corporations owning real or other property, or doing business within such county, for the use of the assessor and his deputies, and from year to year such additional corporations as may be formed or dissolved in such county.

Sec. 10. It shall be the duty of each assessor to gather and tabulate, under appropriate heads and in proper books, all information necessary and proper for the ascertaining of areas, names of owners, kind of title, and all other information concerning the basis upon which assessments are made for taxation purposes, and all such books shall belong to the county and shall be returned to the county clerk.

Sec. 11. In the discharge of his duty any assessor or deputy assessor shall have the power—

To inspect and examine the records of any public office with charge;

To inspect and examine the books and accounts of any partnership, or corporation during ordinary business hours;

To enter, after making known his intention to the owner or occupant thereof, any building, premises, or property whatever, except dwelling houses;

To examine under oath any person or persons as to their knowledge of any matter pertaining to assessment, and may reduce such evidence to writing if he deems it necessary;

To administer oaths in all matters relating to assessments, where oaths so administered shall have the same force and effect and shall subject the person making such oaths to the same pains and penalties as if administered by any other officer authorized by law to administer oaths;

To take depositions, under the rules of the court, of any nonresident of the county concerning any matter relative to assessment and taxation;

To apply to the court, in the name of the county, for any writ or order which may be necessary to obtain a perfect assessment, provided that such application to a court for any writ or order shall be approved by the county attorney.

SEC. 12. At the time of making any assessment, or within thirty days thereafter, the assessor may deliver to the person, partnership or corporation, either personally or by mail, postage prepaid, an abstract of assessment, showing all material data on which such assessment is based, and the total amount returned for assessment, showing the right of appeal to the circuit court.

SEC. 13. This act shall be sufficient notice of the time, manner of assessment, collection, and delinquency of taxes, and no further notice shall be required or given, except as hereinafter provided. The assessor and his deputies shall commence making assessments in each county on the first day of January of each year, or as soon thereafter as it is practicable, and continue without unavoidable delay until the assessment in the county is completed. The assessment in each county shall be completed and full returns thereof made to the county clerk on or before the first day of March in each year; but if, from an unavoidable cause, such assessment is not completed on the first day of March, the county commissioners may extend the time of completing such assessment not to exceed thirty days. And when such assessment is completed all books and papers connected therewith shall be filed with the county clerk.

SEC. 14. After the assessor shall have made complete returns, should any person or property or resource for taxation be discovered which the assessor omitted, the county clerk and the county treasurer, acting together, are hereby authorized and empowered, with all the prerogatives vested in the assessor, to make such omitted assessment and add it to the assessor's returns. And the county clerk shall notify any person so assessed by mail, enclosing an abstract of assessment, as provided in section 12 of this act.

SEC. 15. On or before the fifteenth day of December of each year every incorporated city or town within this Territory shall, by its governing board, furnish to the county in which it is located a written certified statement showing estimates and the total amount of money

ed by such municipality for public purposes for the following year, and decided upon and ordered to be levied and collected, and showing the estimated population of such incorporated city or town within the corporate limits. Such certified statement of estimates and order for levy of taxes shall be filed with the county clerk, who shall report it to the board of county commissioners at its regular December meeting, when said board of county commissioners shall fix the amount so reported upon all the sources of taxation within the incorporated limits of such city or town in addition to the amount levied for Territorial and county purposes.

Such municipal taxes so levied shall be assessed by the county assessor, extended upon the tax list by the county clerk, and collected by the county treasurer, the same as all other taxes, provided that all such municipal taxes shall be levied, assessed, and collected within the incorporated limits of such city or town, and when collected the county treasurer, at the end of each month, shall turn over to the proper officer of such incorporated city or town the amount of such municipal tax collected during the month, taking a receipt therefor.

All money for municipal purposes so levied, collected, and paid over shall be subject to the control of and appropriated by the governing board of such an incorporated city or town: *Provided*, That nothing in this section shall be construed so as to prevent the proper officer of such city or town from collecting fines, licenses, and other public monies belonging to such city or town derived from any of its ordinances not in conflict with this act.

SEC. 16. Any county in this Territory may levy an additional tax for general or special county purposes, for use of such county, in the following manner: At a regular meeting of the board of county commissioners, to commence on the fifteenth day of December of each year, or if the fifteenth fall on a Sunday or on a legal holiday, then on the day following, such board shall determine and decide upon the total amount of additional tax not otherwise provided for and make an estimate of the population of such county, including all incorporated cities and towns in such county, and shall thereupon order that such amount of additional tax, so fixed, be levied for the following year, and collected in addition to all other taxes for the use of such county. Such additional county tax so levied shall be assessed by the county assessor, extended upon the tax list by the county clerk, and collected by the county treasurer, the same as all other taxes. The money arising therefrom shall remain in the county treasury subject to the order of the county commissioners. Such estimates and order of the board in levying such tax shall be entered in full upon the records of such proceedings.

SEC. 17. From and after the first day of December of each year prior to assessment as in this act provided, the county clerk shall forward, by mail or otherwise, to every person, partnership, firm, corporation, and concern liable to taxation in their respective counties, the blank tax assessment list, which shall be prepared in advance and distributed to the several county clerks by the Territorial treasurer, such blanks to cover as nearly as possible all the information required under the provisions of this act for the purpose of ascertaining the character and amounts of assessment of all taxpayers within the county.

On the back of such blank shall be printed a digest of this act, as well as examples or exemplification of the methods of calculation to be

used in determining the amount of tax due from each taxpayer and such other data as may be necessary to fully explain the operation of taxation under this act.

The blank shall be filled out by the person, partnership, firm, corporation, or concern, and shall be sworn to and returned to the county clerk not later than the fifteenth day of January following.

The statements made therein may be sworn to before the assessor, any deputy assessor, county clerk, or any other officer authorized by law to administer oaths.

SEC. 18. Upon return of such statements the county clerk shall transmit them over to the assessor, who, with his deputies, shall proceed to compare the statements with the maps and charts in the office of the county surveyor and with the records in the office of register of deeds with such maps, charts, and other data as the assessor may have in possession or have access to, and if no deficiency is found between the written statements so returned on the part of the taxpayer and the evidence and finding of the assessor from public or private information then the statement sworn to and filed by the taxpayer shall be accepted subject to further investigation by the assessor and other persons authorized by this act provided.

Should, however, the findings of the assessor from charts, maps, records, or other information contradict the written statement of the taxpayer, the assessor or his deputy shall at once proceed to the place of business or residence of such taxpayer or of his representative and examine the books, accounts, securities, maps, charts, and all available documentary evidence which he may deem necessary and which the taxpayer shall produce in support of his written statement, and the assessor, upon full consideration, may either accept or reject such written statement and assess such taxpayer according to the findings of the assessor.

SEC. 19. With the exception of city, town, and village lots, all land of land within the county, its character, quality, value, and situation disregarded, shall be liable for and pay annually a tax of twenty cents per acre.

From this tax on rural areas there shall be exempt all areas the title of which is vested in the United States of America which are not leased or rented; all areas, if any, the title of which is vested in the Territory of Hawaii which are not leased or rented; all areas, if any, the title of which is vested in any county or municipality which are not leased or rented; all areas occupied by Federal, Territorial, county, or municipal buildings used for public purposes; all areas occupied by public schools, hospitals, libraries, public parks, highways, public grounds, public cemeteries, and all public grounds occupied by scientific, educational, charitable, undenominational, and unsectarian institutions; and there shall be exempt from this tax all areas exceeding one hundred acres in a contiguous form which is owned by fee, used, and occupied by the owner as a homestead and actual bona fide residence, to the exclusion of a house elsewhere; and all entries upon public lands with the right of acquiring title thereto and on which the entryman maintains his home to the exclusion of a home elsewhere and not exceeding one hundred acres, shall be exempt from the payment of this tax.

All lepers residing at Kalawao and Kalaupapa, on the island

Molokai, are exempt from the payment of any tax or taxes upon any property owned and kept by them in either of said settlements.

SEC. 20. Cities, towns, villages, suburbs, and lots and other similar aggregations of population, whether incorporated or not, each and every one separately shall be taxed for the amount corresponding to the proportion of their respective estimated population to the estimated population of the whole Territory, so that the respective share of taxation falling upon such city, town, village, or suburb shall represent the same fraction of the whole estimated amount of area tax due from the whole Territory as that fraction which its population bears to the whole estimated population of the Territory. Thus if the whole estimated population of the Territory is one hundred thousand and the whole Territorial area four million acres, the total amount of area tax to be raised in the territory one million dollars, and the population of a town or village one thousand, then such village as a whole shall be taxed one hundredth part of one million dollars, viz, ten thousand dollars, to be paid by the inhabitants of such town or village as hereinafter provided.

SEC. 21. In order to justly divide the said area tax on real estate falling upon the whole city, town, village, or suburb among the owners or lessees of such real estate, the assessor shall generally take the post-office site as a center of the highest improved value of land in such city, town, or village. Taking a map or plat of such city or town or village, he shall mark on it with a compass as many concentric circles as the sudden or gradual decrease of unimproved value in inverse ratio to the distance from the post-office or other center established by the assessor justifies.

This will give him a number of zones in which the unimproved value of the real estate is, for taxation purposes, practically about alike.

Every lot, parcel, or tract of real property within each zone shall be taxed in inverse ratio to the mean distance of such zone from the post-office or other center established by the assessor multiplied by the number of square feet contained in such lot, parcel, or tract.

SEC. 22. Should the site of the post-office not practically correspond with the center of the highest unimproved value of real estate in the city, town, or village, the assessor shall take for a center another point on the map, or divide the city, town, or village in two, three, or more taxation precincts, fixing the center of the highest unimproved value in every precinct separately, and taxing every precinct as if it stood alone.

In difficult cases, for instance, if the property lies between zones and in exceptional cases, the assessor may take for the basis of assessment the unimproved value of land in the block where the property is situated, and, considering such value, he shall refer such property to a zone where the unimproved value is the same and tax it as the property situated in such zone.

All rules in regard to assessment blanks and the control of assessment by the assessor over the statements returned provided for in sections 17 and 18 of this act shall be applied to the returns made for city, town, or village property.

The following city, town, or village property shall be exempt from the payment of this tax, outside of the business portion of the city or town, which shall be determined by the assessor, six thousand square

feet out of the total amount of real property owned in fee or held under lease or rented by a tenant and occupied by such owner, lessee, tenant for a house and bona fide residence to the exclusion of a house elsewhere; also all city or town property vested in the United States and all other property named, classified, and enumerated in section of this act.

SEC. 23. From all estates of deceased persons, which are destined to pass or bequeathed in direct line of relationship, whether decedent or ascendant, there shall be collected by the county treasurer in the county where the estate is probated, a tax of ten per cent on the actual value of the whole estate, as established by the probate or circuit court.

From all estates that are bequeathed or passing in any collateral line of relationship, in like manner there shall be collected a tax of twenty per cent.

From all estates bequeathed or passing to strangers, in like manner there shall be collected a tax of twenty-five per cent.

Estates bequeathed or passing to unsectarian and undenominational public institutions, such as schools, hospitals, libraries, museums, theaters, and other public educational, scientific, and charitable establishments, are exempt from the payment of this tax.

Ten thousand dollars out of the total value of the estate to whomsoever bequeathed and whatever be the amount of the estate is exempt from the payment of this tax.

SEC. 24. No tax shall be levied upon any raw agricultural, horticultural, or floricultural produce in whatever quantity produced; nor shall any simple mechanical procedure connected with its production such as presses, hullers, shellers, polishers, graders, and like simple machinery used on and about the premises where the produce is grown. The use of such simple machinery shall not be construed to class persons using them as manufacturers.

SEC. 25. Each manufacturing establishment, whether owned by individuals, partnerships, or corporations, shall pay in the county where such manufacturing establishment is located annually a tax of four per cent on its yearly gross receipts, to be collected by the county treasurer, and the words "manufacturing establishment" shall mean and cover all factories, mills, and work shops that by use of complex machinery and chemical process, or either or both, transform the raw material or produce into various classes of goods for the market. One thousand dollars out of the total amount of yearly proceeds of such manufacturing concern is exempt from the payment of this tax.

SEC. 26. All mercantile establishments and concerns, both wholesale and retail, whether owned by individuals, partnerships, or corporations, shall pay annually a tax of two and one-half per cent on the total amount of yearly sales or gross receipts, to be collected by the county treasurer.

The words "mercantile establishments or concerns" shall mean and cover all stores, wholesale and retail, shops, hotels, restaurants, fruit markets, meat markets, mercantile agencies, and other similar persons, partnerships, and corporations who buy and sell goods for profit. One thousand dollars out of the gross receipts of such mercantile establishments is exempt from the payment of this tax.

SEC. 27. All banks, loan and trust companies, brokers, commission merchants, and all other persons, firms, and corporations dealing in loans, exchange securities, commissions, interest, and like business

and profits shall each pay an annual tax of two per cent on its paid-up capital and surplus, except such portion of it which is invested in real estate securities within this Territory, on which portion no tax shall be levied.

SEC. 28. All life, fire, marine, and other insurance companies doing business within this Territory shall each pay an annual tax of two and one-half per cent on gross premiums on policies issued by such company within the county during the previous year, which tax shall be collected by the county treasurer, and such company shall be permitted to do business within the Territory unless it shall keep at least fifty thousand dollars invested within the Territory in real estate and other local securities to be deposited with the Territorial treasurer and to be approved by him: *Provided, however*, That such company may from time to time withdraw such securities by substituting other securities of equal value, to be approved by the Territorial treasurer.

SEC. 29. All the employers of male labor within this Territory shall pay an annual tax of five (5) dollars for three hundred and twelve working days of labor performed by male workmen, which tax shall be collected by the county treasurer.

Six hundred and twenty-four days performed by male labor out of the total number of days annually performed by all male workmen employed during the year by such employer shall be deducted as exempt, and all employment of female labor shall also be exempt from the payment of such tax.

SEC. 30. All common carriers doing business within the Territory, or upon the waters, seas, channels, and harbors thereof, and which are not engaged exclusively in interstate commerce, transporting freight or passengers, or either, from one place in the Territory to another place in the Territory, either by land or water, for profit—such as interisland steamships, sailing vessels, boats, tugs, railroads, electric, steam, and cable roads, tramways, street-car lines, stagecoaches, hacks, freight wagons, and all such conveyances doing business for profit—shall pay an annual tax of four per cent on the gross earnings or receipts of such person, persons, or concerns engaged in such transportation, to be collected by the county treasurer in the county where the principal place of business of such person or concern is located: *Provided*, That in all cases wherein the Territorial government shall regulate and control the freight and passenger rates of such common carriers only two per cent out of the gross earnings of such concern so regulated and controlled shall be collected: *And provided further*, That one thousand dollars out of the annual gross earnings or receipts of any common carrier shall be exempt from the payment of this tax.

SEC. 31. All waterworks, telegraph, telephone, gaslight, electric-light, and other lighting corporations and concerns shall pay an annual tax of four per cent on its gross earnings and receipts: *Provided, however*, That all such concerns wherein the Territorial government shall regulate and control the rates and charges of such concerns only two per cent of the annual gross earnings or receipts shall be collected by the county treasurer where the principal office or place of business is located.

SEC. 32. All rents collected by individuals, partnerships, or corporations on leased or rented real estate and personal property shall pay an annual tax of two per cent of the amount collected yearly from such sources: *Provided*, That yearly collections to the amount of three

hundred dollars shall be exempt from the payment of this tax; and interest collected by individuals, partnerships, and corporations, except as provided in section 27 of this act, shall pay an annual tax of ten per cent of the amount collected yearly: *Provided*, That three hundred dollars of interest collected shall be exempt from the payment of this tax: *And provided further*, That all interest collected from loans secured by real-estate mortgage within this Territory shall be exempt from the payment of this tax.

SEC. 33. All persons duly authorized by this act for the assessment, correction, investigation, or collection of any tax to be assessed, levied or due from any person, firm, company, corporation, or concern mentioned or otherwise included in the provisions of this act shall, at all times during business hours, be given full and free access to any and all of the books, accounts, records, and files of such person, partnership, corporation, or concern; and if such person so duly authorized for the public service is deterred, prevented, or refused, the assessor may fix such assessment from the best data obtainable and according to the best judgment, and the amount of tax so fixed shall be collected by the county treasurer.

In all cases excessive taxation can only be recovered by an action in the circuit court, and in such action the burden of proof shall rest upon the plaintiff to show that the assessment and taxation thereon was excessive, and the books and accounts of plaintiff must be produced in court as evidence of such fact.

SEC. 34. If any person, knowing himself to be liable to assessment and who is not listed by the assessor, and who was absent from the county, without design to avoid listing, or through sickness was unable to attend to his duties relative to the assessment at the time the assessor communicated with or visited him for that purpose, may on or before the first day of April file an affidavit with the county clerk setting forth the causes which prevented his being listed, and in that case the county clerk and county treasurer for such county shall list him and complete his assessment; but if such person shall neglect to have his name so listed for assessment within the time so mentioned he shall have no recourse before the circuit court, and the county treasurer and county clerk may assess him at any time prior to the first day of January following and extend the taxes due from him upon the tax list.

SEC. 35. The board of county commissioners shall constitute ex officio, a county board of tax control for the review and correction of the assessment, and for that purpose shall meet at the county seat in the usual place where the board of county commissioners meet for other purposes on the first Monday in April of each year, and the county clerk and county assessor shall sit with the county board of tax control, without vote, and the county clerk shall keep a record of the proceedings of the board in a separate record provided for that purpose.

Such board of tax control shall proceed to examine and compare the returns of assessment for the county; if such board shall discover any person, firm, corporation, or other source of taxation omitted on the assessment roll, the assessor shall be ordered to forthwith list and assess such person, partnership, firm, or corporation, and notify the party thus added to the assessment roll by registered mail.

When the assessment roll is fully revised and completed by adding

such persons, partnerships, firms, and corporations and all sources of taxation which were overlooked or omitted by the assessor, county clerk, and county treasurer, the county board of tax control shall order that the assessment roll be closed and that any person aggrieved by any assessment, as shown thereon, may appeal to the circuit judge at chambers, without jury, and that such appeal must be completed and the order of the court therein must be filed with the county clerk on or before the fifteenth day of June following, as hereinafter provided. This action of the board having been spread upon the records of its proceedings, the assessment roll, thus completed and closed, shall then be opened to the public for inspection under charge of the county clerk, and shall remain open to inspection thereafter, but no change shall be made therein, except by order of the court, except as hereinafter provided.

If the county board of tax control has reason to believe that any assessment as shown upon the assessment roll is too low, and that the interests of the county and other taxpayers are injured thereby, may order the county attorney to apply to the circuit judge at chambers, citing such persons, firms, partnerships, or corporations to appear and show cause why such assessments should not be raised to the amount stated in the application for citation, which amount shall be fixed by the board of tax control and entered in the record of its proceedings.

The service of any order of the court concerning tax appeals under this act upon the person in charge of any business or property of any person, partnership, firm, or corporation shall be complete and sufficient service thereof. The county attorney shall proceed with such cases till final order of court is obtained without further orders from the county board of tax control.

SEC. 36. If any person, partnership, firm, or corporation shall feel aggrieved by reason of any assessment when the assessment roll is completed by the county board of tax control, he may appeal to the circuit judge at chambers, without jury, within ten days by filing with the county clerk a notice of such appeal, and within ten days thereafter shall submit the matter in controversy to the circuit judge at chambers, without jury, after giving the county attorney five days' notice of the time and place of hearing and in like manner serving a copy of the complaint upon the county attorney. It shall then be the duty of the county attorney to attend such hearing and represent the county without further orders. In case the county board of tax control shall obtain an order citing any person, partnership, firm, or corporation to appear in such court at least five days' notice shall be given at the time and place of hearing and all papers therein by the opposing party shall be served on the county attorney.

In all cases the successful party shall file the order of court obtained finally fixing the amount of assessment in dispute with the county clerk on or before the fifteenth day of June, otherwise no change shall be made in the assessment roll, and the county clerk shall at once proceed to make a duplicate for the Territorial board of tax control. If the court orders any change and such order is filed as above provided, the county clerk shall cancel the original entry by drawing a line across the words and figures, and insert the words and figures ordered by court, adding the words "Changed by order of court," and if no change is ordered he shall add the words "Sustained by order of court." The circuit judge shall give preference to tax appeal cases

over other business and allow no further appeal. No costs shall be taxed to either party and the filing of the order with the county clerk shall be sufficient record.

SEC. 37. There shall be a Territorial board of tax control consisting of the Territorial auditor, treasurer, and attorney-general, of which the auditor shall be president and the attorney-general shall act as secretary.

The board may adjourn from day to day until its duties are completed and may employ such clerical assistance as may be deemed necessary to facilitate its labors, not exceeding sixty days. The board shall meet annually on the first Tuesday in July at the office of the Territorial auditor and proceed to examine and compare the returns of the assessment in the several counties of the Territory, but such board shall not change any returns without investigation being made in the county as to the correctness of the assessment.

If from such assessment returns, or upon complaint or otherwise, it shall appear that there were gross irregularities in the assessment, or fraud, or evasions, or collusions concerning the assessment in any county or counties of the Territory, it shall be the duty of such Territorial board to enter such finding on the record of its proceedings and at once employ as many expert accountants as may be necessary, at not to exceed ten dollars a day and mileage, as paid to the members of the legislature, one such expert to proceed forthwith to the county seat of such county to investigate such irregularities, fraud, evasions, or collusions, and a certificate from the State board of tax control signed by its president and secretary shall vest in such expert accountant all authority invested in an assessor as provided in section 11 of this act, and he shall also be entitled to receive from the county clerk certified copies of all or such parts of the assessor's returns as he may deem necessary for use in such investigation. He shall then proceed without delay to investigate in any part of the county: *Provided, however,* That he shall first commence on the books and accounts of manufacturers and the owners of real estate; second, on the books and accounts of banks, loan and trust and insurance agencies; third, on the books and accounts of common carriers, such as steamship, railroad and street-car companies; fourth, on the books and accounts of commercial sources of taxation; fifth, on the books and accounts of all other persons, partnerships, firms, or corporations doing business for profit and liable to taxation in such county where he shall have reason to believe that gross irregularity, fraud, evasion, or collusion exists: *And provided,* That such investigation shall not consume more than thirty days' from the date of commencement in the county. For the purpose of assisting such investigation, at the request of the accountant, the county clerk shall appoint one or more competent persons to be subject to the orders of such expert accountant, at not to exceed three dollars a day and mileage to be paid by the county, and such appointment shall not be for more than thirty days. When such investigation is complete such expert accountant shall make a written report to the Territorial board of tax control showing his findings.

SEC. 38. Upon return of reports by expert accountants, the Territorial board of tax control shall take immediate action, making complete record in their proceedings, and such findings of such experts shall be published in the annual report of the Territorial auditor.

If any such report develops the fact that there were gross irregularities, fraud, evasions, or collusions, and by reason thereof the amount

of assessment for such county shall be changed to conform to the findings reported, it shall be the duty of the board of control to make such changes and complete a correct assessment to conform to such report. The Territorial auditor shall then prepare and transmit to each county clerk a transcript of the proceedings of the board of control relative to the assessment of such county, showing such changes separately and the total change, all of which shall be completed and placed in the hands of the county clerk on or before the first day of September.

SEC. 39. On the first day of September of each year, or as soon thereafter as the report from the State board of tax control shall have been received, the county clerk of each county shall commence to prepare the tax list, which shall be compiled from the assessment as corrected by the State board of tax control, and shall use all diligence in completing such tax list, arranging the names of the taxpayers alphabetically, and carrying out in separate columns the value or basis, rate of taxation, and all the separate kinds of tax, if more than one kind; and in the total column to the right shall be placed the total tax to be paid by each taxpayer, leaving a space to the right of such total column about three inches wide to be used for remarks.

When such list is completed, he shall copy or duplicate the same in a well-bound book, and on or before the last day of October turn over to the county treasurer such book, on the first page of which he shall endorse a certificate, substantially in the following form:

TERRITORY OF HAWAII, *County of* ———:

I, ———, county clerk of ——— County, Territory of Hawaii, do hereby certify that the following is a correct list of the taxes levied under the act providing a system of taxation for the Territory of Hawaii, in the county aforesaid, for the year ———.

Witness my hand and official seal this ——— day of ———, 19—.

[SEAL.]

—————, *County Clerk.*

Which certificate shall be full authority for the county treasurer to proceed and collect all taxes as set forth in such "tax list."

Upon the delivery of such book said clerk shall take a receipt therefor showing the total amount of taxes due upon said list as obtained in such book and file such receipt in the county clerk's office.

SEC. 40. Upon receipt of the tax list from the county clerk the treasurer shall give notice by publication in some newspaper published in the county for three successive weeks and by posting notice in three public places in the county, but if there is no newspaper published in the county he shall post notices in six public places, showing that the tax list has been received by him, and that he is ready to receive taxes at the county treasurer's office. In such notice he shall designate other places through the county, stating the date on which he or his deputy will visit each place for the purpose of receiving taxes, and also stating that taxes not paid prior to the first day of January will be delinquent thereafter.

Upon order of the board of county commissioners the treasurer may appoint one or more deputies to assist him in the collection of taxes, and he may take such bond for security from the person so appointed as he deems necessary for his indemnity, and shall in all cases be liable for the proceedings and misconduct of his deputies.

SEC. 41. The county treasurer, upon payment of any tax, shall give to the person paying the same a receipt therefor, specifying therein the land, town or city lot, or other property or source of taxation on

which said tax was levied according to its description on the tax list or in some other sufficient manner, and the year or years for which the tax was levied.

The said receipt shall have a duplicate stub showing the same as the receipt delivered to the taxpayer. The receipt and stub shall bear the same number, and all receipts shall be numbered consecutively in the order of their issue.

Upon payment of any tax and the delivery of receipt the treasurer shall enter the number and date of receipt to the right of the total amount on the tax list.

SEC. 42. The county treasurer shall be receiver and collector of all the taxes extended upon the tax list of the county, whether levied for territorial, county, city, town, school, or other purpose, anything in the charter of any city or town or in any other act of the legislature notwithstanding, and he shall be the receiver of all fines, forfeitures or penalties received by any person or officer for the use of his county and he shall proceed to collect the same according to law and place the same when collected to the credit of the proper funds; but this provision shall not be so construed as to include any fines and penalties accruing to any municipal corporation for the violation of its ordinances and which were recovered before any city justice or mayor, nor fines to be collected by the manager of intoxicants.

The county treasurer shall pay no money unless upon written order from the county clerk bearing the county seal, except as otherwise specifically provided by law.

SEC. 43. It is hereby declared that any tax assessed under the provisions of this act shall be a first lien in favor of the Territory of Hawaii upon all the property, estate, and effects, real, personal, and mixed and the lien hereby secured to the Territory shall attach to such property on the date that the tax becomes due; that such lien shall be prior and superior to, and shall take precedence of all other liens, demands, decrees, judgments, mortgages, and transfers against the property and effects, either real, personal, or mixed, of the person, partnership, firm, or corporation against whom it was assessed or in whose possession it may be found; and that such lien for taxes shall be enforced by the county in which the assessment was made, and the county treasurer is hereby directed, authorized, and empowered to enforce or cause to be enforced such lien for taxes, penalty, and costs.

No exemptions shall be allowed, except such as are declared by law to be absolutely exempt from all process and sale.

SEC. 44. The county treasurer shall endeavor to collect all the taxes as shown upon the tax list by first subjecting all the personal property to sale that may be found in his county belonging to any taxpayer for any tax due from him after such tax becomes delinquent, whether such taxpayer shall own real estate within the county or not. The county treasurer is authorized and directed to seize, levy upon, and sell any personal property, not absolutely exempt from all process and execution sale as may be by law provided, to satisfy any tax due and delinquent, regardless of whether or not such personal property was subject to assessment and taxation. Personal property shall be sold in the following manner: The county treasurer or his deputy shall demand payment personally from the person, partnership, firm, or corporation from whom such tax is due and delinquent. In case of partnership, firm, or corporation, a demand made upon the person in charge shall

be sufficient. In all cases the demand shall be in writing, or partly printed and partly written, in substantially the following form:

TERRITORY OF HAWAII, *County of* _____:

Whereas taxes against _____ for the year 19— become due and payable at the county treasurer's office of such county in the sum of \$—, as appears by the tax list, and that said tax became delinquent on the first day of January, 19—, on which date ten per cent penalty was added, and one per cent per month additional thereafter, now amounting to the total sum of \$—, which remains unpaid. Therefore demand is hereby made upon _____, through you, for the immediate payment of said sum, \$—, to satisfy said tax and penalty; failing which, I will levy upon the personal property of _____, and sell the same at public auction, or so much thereof as may be necessary to satisfy said taxes, penalty, and accruing costs, as by law provided.

Dated this — day of —, A. D. 19—.

_____,
County Treasurer.

By _____, *Deputy.*

SEC. 45. At any time after making demand, if payment be neglected or refused, the county treasurer may levy upon and take into his possession, and keep at the expense of such taxpayer, any personal property of the taxpayer not absolutely exempt on whom such demand was made, by delivering to him or them a notice of levy and seizure, which notice shall be substantially in the following form:

TERRITORY OF HAWAII, *County of* _____ as:

To _____:

You are hereby notified that on the — day of —, 19—, I made a personal demand upon you in writing for the payment of taxes due and delinquent against _____ in the sum of \$—, as shown by the tax list in the office of the county treasurer of said county, together with penalty for the nonpayment thereof, in all now amounting to \$—, and that said tax and penalty still remains unpaid.

Now therefore, as by law provided, I have this day levied upon the following described personal property _____ of the said _____; that on the — day of —, A. D. —, I will sell the same at public auction to the highest bidder for cash, or so much thereof as may be necessary to pay and satisfy said taxes, penalty, and cost; that said sale will be made on the — day of —, 19—, at —, in said county and Territory, commencing at — o'clock —. m. of said day. Dated this — day of —, A. D. 19—.

_____,
County Treasurer.

By _____, *Deputy.*

When personal property is seized and levied upon it, shall be sold on not less than ten or more than twenty days' notice, and when the taxes for which such property is seized and the penalty and costs which have accrued thereon are not paid before the day appointed for such sale, the county treasurer or his deputy shall sell such property at public auction, or as much thereof as will be necessary to pay said taxes, penalty, and costs of sale, and shall give a bill of sale to the purchaser, returning any property not sold, together with any money arising from said sale over the amount of taxes due, with a written statement of all items constituting the amount retained for the payment of taxes, penalty, and costs.

SEC. 46. On the first Monday in July of each year the county treasurer is required to offer at public sale, at his office, all lands, town lots, or other real property, against which taxes of any description for the preceding year or years shall remain due and unpaid, and such sale shall be made for and in payment of the total amount of taxes, penalties and costs, due and unpaid, for which such real property is liable, which shall include all taxes due from the owner thereof.

The notice to be given of such sale shall state the time and place thereof and contain a description of the several parcels of property to be sold for the delinquent taxes of the preceding years, and such real property as has not been advertised for the taxes assessed against the owner thereof for previous years on which any amount of tax, penalty, and costs, remain unpaid.

Such notice shall show the name of the owner, if known, or person if any, to whom taxed.

SEC. 47. The county treasurer shall give such notice by causing the same to be published once in each week, for three successive weeks, the last publication to be at least one week before the day of sale, in a weekly paper printed or published in such county, if any there be; or if not, then in the nearest newspaper having general circulation in the county; and also by causing a copy of such notice to be posted on the front door of the court-house in the place where sheriff's sales are advertised, at least four weeks before the day of sale.

SEC. 48. The county treasurer shall charge and collect fifty cents in addition to the taxes and penalty on each tract of real estate advertised for sale, which sum shall be paid into the county treasury, and the county shall pay the costs of publication. If the cost of publication shall exceed the amount that would probably be derived from the additional charge of fifty cents on each tract, or for any good cause the treasurer may give notice of such tax sale by posting six copies thereof in conspicuous public places in the county. On the first day of such tax sale shall commence at one o'clock p. m. and may be adjourned from day to day and to any hour between nine o'clock a. m. to five o'clock p. m.

Before the day of sale the treasurer shall file in the office of the county clerk a copy of the notice given and a certificate duly signed by him showing the manner of service thereof.

In case the notice was given by publication, the treasurer shall require an affidavit of publication from the editor, manager, or foreman of the newspaper in which it was published, and shall keep the same on file in his office, and the returns thus filed shall be presumptive evidence of service of notice as required by law.

SEC. 49. The county treasurer shall, at one o'clock p. m. on the day of sale, offer for sale, separately, each parcel or tract of real estate advertised for sale on which the taxes, penalty, and costs shall not have been paid, and sell it to the highest bidder for cash. When tracts held in fee are subdivided by public survey, the treasurer shall first offer the lands for sale in tracts not exceeding one hundred acres, but if he shall receive no bids, he shall then offer it in tracts not to exceed one thousand acres; provided, that no person shall be permitted to purchase more than one thousand acres at any tax sale; but leases shall be sold as a whole, and no lease sold at tax sales shall hold good or remain in force after the fourteenth day of June, A. D. 1905, any written term in the original to the contrary notwithstanding, and all leases shall be sold as provided herein for sale of personal property.

SEC. 50. When lands are sold at tax sale an undivided interest shall be conveyed hereby, and no partnership, firm, or corporation shall be allowed to bid. The bidder must appear in person or his attorney duly authorized, and such attorney shall exhibit to the treasurer his duly executed power of attorney, otherwise the treasurer shall not receive bids such attorney. The sale shall be at auction or public sale.

err. and may be adjourned from day to day, but the hour to which adjournment is taken shall be publicly announced by the treasurer, and a notice thereof shall be posted in a conspicuous place in his office, and the treasurer shall continue the sale from day to day as long as there are bidders, or until all the taxes are paid.

SEC. 51. The person purchasing any parcel or tract of land at such sale shall forthwith pay to the treasurer the amount bid by him, and on failure to do so the said parcel shall at once, without further adjournment, again be offered as if no such sale had been made.

SEC. 52. Any person owning land or town lots advertised for sale as aforesaid may pay to the treasurer at any time before the sale thereof the taxes, penalty, and costs due thereon up to the time of payment.

SEC. 53. In all advertisements for the sale of real property for taxes the county clerk and treasurer or other officer may use abbreviations in common use describing such lands or town lots, and no irregularities or informality in the advertisement shall in any manner affect the legality of the sale or the title conveyed by treasurer's deed, but in all cases the provisions of this act shall be sufficient notice to the owners of the sale of their property if their taxes are not paid.

SEC. 54. The county clerk shall attend all sales of land for taxes in his county and make a record thereof in a book to be kept by him for that purpose, therein describing the several parcels of real property on which the taxes, penalty, and costs were paid by the purchaser as they are described in the list or advertisement, stating in separate columns the amount as obtained from the treasurer's tax list of each kind of tax, penalty, and costs for each tract or lot, how much and what part of each tract or lot was sold, to whom sold, and date of sale, and amount sold for.

The treasurer shall also keep a book of sales in which at the time of sale he shall make the same record. He shall also note in the tax list, opposite the name of owner and description of the property sold, the fact and date of sale. When any tract is offered and no person bids as high as the amount of tax, penalty and costs against it, the county clerk shall bid it off in the official name of chief Territorial officer of public instruction for the Territory, and if such land is not redeemed, as hereinafter provided, it shall be deeded by the county treasurer to the chief Territorial officer of public instruction in his official capacity, as school land, to be afterwards sold, in such manner as the legislature may direct, and the money arising therefrom shall be appropriated by the legislature for school purposes; and in case the land sold for taxes brings more than the amount of tax, penalty, and costs against it the surplus shall, for the time being, remain in the hands of county treasurer, and he shall within ten days after the sale notify the owner by registered letter that such money, naming the surplus amount, remains in the county treasury subject to his order.

SEC. 55. If any county treasurer or county clerk or their deputies be either directly or indirectly concerned or interested in the purchase of any land for his own use at tax sale, except as provided in the foregoing section or in the purchase of any property sold for taxes, he shall be liable to a fine of not less than one thousand dollars and not more than two thousand dollars, to be recovered in an action in the circuit court brought in the name of the county against such officer and his bondsmen, and all such sales in which they or either of them are proven

to have been interested shall be void. Any money collected from such fine shall be credited to the general county school fund.

SEC. 56. If from any neglect of officers to make returns, or from any other good cause, real property liable for the payment of taxes can not be duly advertised and offered for sale as above provided, then such sale shall be advertised to commence on the first Monday in August, allowing time for publication or posting notices as hereinbefore provided.

SEC. 57. Leaseholds shall be sold as personal property and in the same manner as personal property, and in case the land covered thereby is owned under fee-simple title such land shall be liable to sale and shall be sold to pay any balance of tax, penalty, and costs due to the county from the owner of such land, if any tax, penalty, and costs there be. If the lease is upon public or Government lands, the bill of sale shall provide that such lease shall be void from and after June 14th, 1905; and if such leasehold shall not bring the amount of tax, penalty, and costs due to the county from other bidders, then the treasurer or his deputy conducting the sale shall bid off the leasehold in the name of the county and report the case to the county clerk, who shall file such report in his office, which shall work a forfeiture of such lease, and the county attorney shall proceed to eject all persons from such landholding under such lease, and a certified copy of the report shall be competent evidence in any court of the superior right of possession on behalf of the county and Territory for the public welfare as against any person holding or claiming to hold under such lease the conditions of which are broken by nonpayment of taxes.

SEC. 58. The county treasurer shall, within thirty days after the land is sold at tax sale, make out, sign, and deliver to the purchaser of any real estate purchased at tax sale a certificate of purchase, describing the property on which the taxes, penalty, and costs were paid by the purchaser as the same were described in the record of sales, and also how much and what part of each tract or lot was sold, and stating the amount of each kind of tax, penalty, and costs for each tract or lot for which the same was sold as described in the record of sales, and that payment had been made by the purchaser therefor. If any person shall become the purchaser of more than one lot, parcel, or tract of real estate, he shall receive a separate certificate for each purchase. The certificate of purchase may be assignable by endorsement except in cases where the land was bought off by the county clerk for school fund, and an assignment shall vest in the assignee or his legal representative all the right and title of the original purchaser, and the statement in the treasurer's deed of the fact of the assignment shall be presumptive evidence of such assignment.

In case such certificate is assigned, then the assignment of said certificate shall be placed on the records of the county treasurer in the register of tax sales; but the ownership of such certificate shall not be sufficient grounds on which to base an action in ejectment, and shall not entitle the purchaser to possession until he has obtained a treasurer's deed as hereinafter provided.

SEC. 59. Real property sold under the provisions of this act may be redeemed at any time before the right of redemption is cut off by issuance of the tax deed as hereinafter provided, by payment to the county clerk, to be held by him subject to the order of the purchaser, of the amount for which the same was sold with ten per cent interest thereon.

from date of sale, and also the amount of taxes, penalty, and costs paid by the purchaser for any subsequent year with ten per cent interest on that amount paid from date of payment for such subsequent year, which may be ascertained by the treasurer's books.

SEC. 60. The county clerk shall, upon the application of any person to redeem any real property sold under the provisions of this act, and being satisfied that such person has a right to redeem the same, and upon payment of the proper amount, issue a certificate of redemption setting forth the facts of the sale, the date of the redemption, the amount paid, and by whom redeemed, and shall make the proper entries in the book of sales in his office, and shall immediately give notice of such redemption to the county treasurer. Such certificate of redemption shall then be presented to the treasurer, who shall countersign the same and make the proper entry in the books of his office, and no certificate of redemption shall be held as evidence of such redemption without such signature of the treasurer.

SEC. 61. If real property of any minor, lunatic, or prisoner, without the guardian duly and legally appointed and authorized to control other real-estate transactions of such ward, shall have been sold at any tax sale, the same may be redeemed at any time within one year after such disability is removed in the manner specified in the following section, or such redemption may be made by the guardian or legal representative at any time before the delivery of the treasurer's deed.

SEC. 62. Any person entitled to redeem lands sold for taxes after the delivery of the treasurer's deed shall redeem the same by an action in equity in a circuit court held in the county where the land was sold, in which all persons claiming an interest in the land derived from the tax sale as shown by the record shall be made defendants, and the court shall determine the rights, claims, and interests of the several parties, including the person claiming under the tax title. And no person shall be allowed to redeem land sold for taxes in any other manner after the service of the notice provided by the next section and the execution and delivery of the treasurer's deed.

SEC. 63. After the expiration of one year from the date of sale of the land for taxes, the lawful holder of the certificate of purchase may cause to be served upon the person in possession of such land or city or town lot, and on the owner thereof, if such owner resides in the county where the land is situated, in the manner provided by law for the service of original notice or summons in actions commencing in the circuit court, a notice, signed by him, his agent or attorney, stating the date of sale, the description of the land or lot sold, the name of the purchaser, and that the right of redemption will expire and a deed of said land will be made by the treasurer unless redemption from the sale be made within sixty days from the completed service thereof, stating the date on which the lawful holder of the certificate will apply to the treasurer for the execution of a tax deed for such property.

Service may be made upon nonresidents of the county by publishing the notice three times in a weekly newspaper published in the county where the land is situated and an affidavit of publication shall be filed with the treasurer. If no newspaper is published in such county, then in the nearest newspaper in an adjoining county; but any nonresident of the county may file with the treasurer of the county a written appointment of some resident of the county where his lands

or lots are situated as agents, upon whom service of notice shall be made. In such case it shall be the duty of the person giving notice to inquire from the treasurer whether or not such agency exists before giving notice by publication. If such an agent has been appointed for personal service of said notice shall be made upon such agent instead of by publication. Service shall be deemed completed when an affidavit of the service of such notice and the particular mode thereof is duly signed and verified by affidavit of the holder of the certificate of purchase, his agent, or attorney, shall have been filed by the treasurer.

Such affidavit shall be filed by the treasurer and entered upon the records of his office, and such record or affidavit shall be presumptive evidence of the completed service of notice herein required, and within sixty days after the filing of such returns of completed service of notice the right of redemption from such sale shall not expire.

Any person swearing falsely to any fact or statement contained in such affidavit shall be deemed guilty of perjury and shall be punished accordingly. The cost of serving such, whether by notice, publication or otherwise, together with the cost of affidavit, shall be paid by the holder of certificate and added to the amount necessary for redemption, and of which the county clerk shall be notified by the purchaser.

SEC. 64. Immediately after the expiration of sixty days from the date of filing completed service with the treasurer, which shall not include the day upon which such returns of service was filed, the treasurer then in office shall make out a deed for each lot, parcel, or tract of land sold or remaining unredeemed and deliver the same to the purchaser or assignee upon the return of the certificate of purchase. The treasurer shall receive fifty cents for each deed, to be paid by the purchaser.

SEC. 65. Deeds executed by the treasurer shall be substantially in the following form:

Know all men by these presents, that whereas the following-described real property, viz: _____, situated in the county of _____ and Territory of Hawaii was liable for the tax assessed in the year _____, against _____, who was then the lawful owner thereof, and that such tax becomes due and delinquent on the first day of January, _____, and thereafter remained unpaid at the date of the sale hereinafter named; and whereas the treasurer of said county did, on the _____ day of _____, A. D. 19____, by virtue of the authority in him vested by law, at _____, the sale begun and publicly held on the first Monday in July, A. D. 19____, exposed to public sale at the office of the county treasurer in the county aforesaid, in substantial conformity with all the requirements of the statutes in such case made and provided, the real property above described for the payment of the tax, penalty, and costs then due from _____, the owner thereof, and remaining unpaid; and whereas, at the time and place aforesaid, _____, of the county of _____ and Territory of Hawaii, having offered to pay the sum of _____ dollars and _____ cents from which the amount of taxes, penalty, and costs due to the said county of _____ then amounting to _____ dollars and _____ cents, were deducted, and the balance, _____ dollars and _____ cents, were returned to _____, the owner of the real estate hereinafter described, to wit, _____; and said sum being the highest amount bid at said sale the real property above described was then and there sold to _____ at that price; and whereas the said _____, on the _____ day of _____, A. D. 19____, did duly assign the certificate of sale of the property as aforesaid, and all his right, title and interest in and to said property to _____, of the county of _____, Territory of Hawaii; and whereas, by the affidavit of _____, filed in said treasurer's office on the _____ day of _____, A. D. 19____, it appears that due notice has been given more than sixty days before the execution of these presents to _____ of the expiration of the time of redemption allowed by law; and whereas one year has elapsed since the date of sale, and said property has not been redeemed therefrom as provided for by law:

Now, therefore, I, _____, treasurer of the county aforesaid, for and in con-

ation of the sum to the treasurer paid as aforesaid, and by virtue of the statute in such case made and provided, have granted, bargained, and sold, and by these presents do grant, bargain, and sell unto the said _____, his heirs and assigns, the real property last hereinbefore described, to have and to hold unto him the said _____, his heirs and assigns, forever; subject, however, to all the rights of redemption provided by law.

In witness whereof I, _____, treasurer as aforesaid, by virtue of the authority aforesaid, have hereunto subscribed my name this _____ day of _____, A. D. 19—.

_____,
County Treasurer.

TERRITORY OF HAWAII, County of _____, ss.

I hereby certify that, before me, _____, in and for said county, personally appeared _____, treasurer of said county, personally known to me to be the treasurer of said county at the date of the execution of the above conveyance, and to be the identical person whose name is affixed to and who executed the above conveyance as treasurer of said county, and acknowledged the execution of the same to be his voluntary act and deed as treasurer of said county, for the purpose therein expressed.

Given under my hand and seal this _____ day of _____, A. D. 19—.

Sec. 66. The deed shall be signed by the treasurer in his official capacity and acknowledged by him before some officer authorized to take acknowledgments of deeds; and when substantially thus executed and recorded in the proper record of titles to real estate and such deed shall vest in the purchaser and all persons holding under him all the right, title, interest, and estate of the former owner in and to the land conveyed; and also the right, title, interest, and claim of the Territory and county thereto; and shall be presumptive evidence in all suits in this Territory in all controversies and suits in relation to the rights of the purchaser, his heirs or assigns, to the land thereby conveyed of the following facts:

1. That the real property conveyed was liable for the taxation against the former owner for the year or years stated in the deed.
2. That the taxes were not paid at any time before the sale.
3. That the real property conveyed had not been redeemed from the sale at the date of the deed.
4. That the former owner of the property was listed and assessed.
5. That the taxes were levied according to law.
6. That the property was duly advertised for sale.
7. That the property was sold for taxes as stated in the deed.

And it shall be conclusive evidence of the following facts:

1. That the manner in which the listing, assessment, levy notice, and sale were conducted in all respects as by law directed.
2. That the grantee named in the deed was the purchaser or lawful assignee.
3. That all the prerequisites of the law were complied with by all the officers who had, or whose duty it was to have had, any part or action in any transaction relating to or affecting the title conveyed, or purporting to be conveyed, by the deed from the listing of the taxes for which it was sold up to the execution of the deed, both inclusive, and that all things whatever required by law to make a good and valid sale and to vest the title in the purchaser was done, except in regard to the points named in this section, wherein the deed shall be presumptive evidence only. In all controversies and suits involving the title to real property claimed and held under and by virtue of a deed executed substantially as aforesaid by the treasurer, the person claiming

title adverse to the title conveyed by such deed shall be required to prove, in order to defeat the said title so conveyed, either that the person against whom the tax was assessed was not the owner of the property as shown by the records of the county on the first day of November when the tax became due nor at any time thereafter and that the tax on the land was paid; that the tax named in the deed had been paid before the sale, that the property had been redeemed from the sale according to the provisions of this act, and that such redemption was had or made for the use and benefit of persons having the right of redemption under the laws of this Territory, or that there had been an entire omission to list or assess the owner or to levy the taxes, or to give notice of sale, or to sell the property; but no person shall be permitted to question the title acquired by a treasurer's deed without first showing that he or the person under whom he claims title had title to the property at the time of the sale, or that the title was obtained from the United States after the sale and that all the taxes due to the county from such person so claiming were paid prior to the sale or were paid by the person under whom he claims title as aforesaid: *Provided*, That in any case where a person had paid his taxes and through mistake or mistake in the entry made in the treasurer's books or in the receipt, the land upon which the taxes were paid was afterwards erroneously so the treasurer's deed shall not convey the title: *Provided further*, That in all cases where the owner of lands sold for taxes shall resist the validity of such tax title such owner may prove fraud committed by the officer selling the same or in the purchaser, and if fraud is so established such sale and title shall be void.

SEC. 67. When by mistake or wrongful act of the treasurer land has been sold against the owner of which no tax was due at the time or whenever land is sold in consequence of error in describing the land the county is to hold the purchaser harmless by paying him the amount of the principal, interest, and costs to which he would have been entitled had the land been rightly sold; such refunding shall be ordered by the board of county commissioners, and the treasurer and his bondsmen will be liable to the county to the amount of his official bond; or the purchaser or assignee may recover directly of the treasurer in an action brought to recover the same in any court having jurisdiction of the amount and judgment shall be against him and his bondsmen; but the treasurer shall only be liable for his own acts and the acts of his deputies.

SEC. 68. Whenever it shall be made to appear to the satisfaction of the county treasurer, either before the execution of a deed for property sold for taxes or if the deed be returned by the purchaser that any tract or lot was sold which was not subject to sale for taxes, or that the taxes against the owner thereof had been paid previous to the sale, he shall make an entry in his sale book opposite the description of such lot or tract that the same was erroneously so and notify the county clerk, and such entry shall be evidence of the fact therein stated, and in such case the purchase money shall be refunded to the purchaser upon order of the county commissioner.

SEC. 69. No action for the recovery of real property sold for nonpayment of taxes shall lie, unless the same be brought within five years after the treasurer's deed has been executed and recorded as above provided, except that when the owner of such real property sold as aforesaid shall, at the time of such sale, be a minor, or ins

or imprisoned, then five years after the removal of such disability shall be allowed to such person, his heirs or legal representatives to bring their action.

SEC. 70. In all suits and controversies involving the question of title to real property held under and by virtue of a treasurer's deed all acts of assessors, treasurers, county clerks, county commissioners, and other officers shall be deemed to be regular and in accordance with law, and the books and files belonging to the offices of county clerk and county treasurer or duly certified copies thereof shall be deemed sufficient to prove the sale of any real property for taxes, the redemption thereof, or the payment of taxes thereon.

SEC. 71. At the end of each month the county treasurer shall remit to the Territorial treasury one-half of the general taxes collected during the month, which shall thereafter become Territorial funds for the use of the Territory; and he shall retain one-half of the general taxes collected during the month in the county treasury credited to the county general fund subject to appropriation by the board of county commissioners for county purposes: *Provided*, That such county treasurer shall retain all of the taxes collected on account of levy made by any incorporated city or town within the county and pay over the same as hereinbefore specified: *And provided further*, That such county treasurer shall retain in the county treasury all the taxes arising from any special levy made on behalf of the county by the board of county commissioners.

SEC. 72. All laws and parts of laws relating to taxation, assessment, collection and disbursement of taxes heretofore in force in the Territory of Hawaii are hereby repealed, except the collection for the year 1901, which assessment and collection shall continue as heretofore provided by law until the thirty-first day of December, 1901, at which time the collection of unpaid taxes shall be turned over to the county treasurer of each county.

SEC. 73. This act shall take effect and be in force from and after its passage, approval, and publication.

EXHIBIT No. 2.—*Senate bill No. 68.*

Introduced 2d day of April, 1901, by Senator Russel. First reading in Senate April 2, 1901.

LET EN.—The public health act, repealing act 60 of 1896, also Chapter LXXXII of the Session Laws of 1892, and all laws and regulations inconsistent herewith.

Be it enacted by the legislature of the Territory of Hawaii:

SECTION 1. There shall be a board of health for the Territory of Hawaii, which board will consist (a) of as many members as there are counties, each county being represented by a sanitary officer in the employ of the Territory; (b) of the Territorial bacteriologist; (c) of the Territorial analyst; (d) of the Territorial veterinary surgeon; (e) of the United States Marine-Hospital officers in charge of local quarantine stations, as honorary members.

SEC. 2. The president of the board of health shall be the sanitary officer of the county of Oahu, and shall reside in the city of Honolulu. He shall be a duly licensed doctor of medicine, graduate of a recog-

nized university or medical college, having pursued not less than four years' course of regular medical studies after a full preliminary college education, possessing a degree of B. A., B. S., or both. He shall also furnish satisfactory proofs that he is a thorough specialist in sanitary science, public health, or State medicine. He shall be appointed by the governor, by and with the advice and consent of the senate except in the first instance, when, as provided in section 40 of this act, he shall be designated by the public health committee of the senate. All the duties enumerated as the duties of the board of health shall, besides those generally borne by such officer, be deemed the duties of the president of said board.

SEC. 3. Said board shall elect a vice-president and secretary, and may select and appoint such other officers as it may deem necessary for carrying out the object and purposes of this act. It may appoint a suitable person as executive officer of said board who, when appointed, shall have and exercise all the powers and authority of a deputy sheriff in all matters pertaining to public health, and for the enforcement of all rules and regulations of said board of health.

SEC. 4. The activity of said board of health shall be scientific, practical, and executive. Its duties shall be: (1) To cooperate with and assist the United States Marine-Hospital Service in charge of quarantine within the Territory, in preventing the importation of infectious and contagious diseases, both of human beings and animals, into the Territory, and should any germs of such disease be so imported, take proper and necessary measures to immediately locate, limit, and prevent the extension thereof; (2) to inaugurate a systematic and scientific study of the character, nature, and cause of all endemic prevalent diseases within the Territory, and to determine the most practical methods for the removal of such causes, and as far as it may be possible to limit or destroy the disease; (3) to inaugurate and carry on a systematic collection and recording of sanitary and vital statistics of nativity, mortality, and morbidity within the Territory; (4) to make and recommend to the governor such rules and regulations as it may deem essential for the public health and safety respecting the practice of medicine within the Territory; the control of prostitution, the sale of drugs, the adulteration of foods and liquors, sanitary buildings, the reorganization of the leper settlement on principles of self-government, and all such other rules in various branches of public hygiene which the said board may see fit to regulate and control in accordance with modern knowledge of public sanitation, which rules and regulations when so made and recommended, during an interim between sessions of the legislature, shall have the effect of law until the next legislative session; (5) to submit to the next session and subsequent sessions of the legislature such measures of general sanitation of the Territory the fulfillment of which either exceeds the appropriation of the board for any other reason requires legislation; (6) to control and administer the leper settlement, Kalihi Station, insane asylum, maternity home, bacteriological and analytical station; (7) to exercise proper sanitary control over laborers' quarters, mills, manufacturing and industrial establishments, coasting steamers and vessels which may be beyond the control of the United States Marine-Hospital Service, railroad public and private buildings, public and private schools and hospitals, prisons, water supplies, and markets; (8) to regulate and control the quality of alimentary products, liquors, drinks, drugs on sale; (9) to

regulate and control cemeteries, slaughterhouses, stables, and other places liable to affect public health; (10) to control and regulate the disinfection of lepers and vaccination.

SEC. 5. Said board shall keep records of all its acts, proceedings, and transactions, and shall present to the governor, for publication, a mailed annual report covering all branches of the sanitary service of the country, and shall contribute to a sanitary and hygienic education of the mass of the people by the publication of popular tracts, pamphlets, and articles in papers and magazines on such subjects as are closely connected with the most crying sanitary evils.

SEC. 6. To better enable the board of health to effectively carry out the duties of their service, they shall have power: (1) To enforce and execute sanitary laws and make sanitary rules and regulations within the limits of this Territory, for which purpose the duly authorized executive officer of the board of health shall be invested, in sanitary matters, with all the rights and prerogatives of a deputy sheriff, including the right to swear in and delegate his power to his deputies. In case of need, therefore, he shall be empowered to call to his aid the assistance of general police and administration authorities. (2) The board of health as a whole, and its individual members, officers, and agents, shall have the right to enter and inspect, between the hours of sunrise and sunset, any premises, public or private, and any opposition to such right shall constitute a misdemeanor and be punished by a fine of not less than five or more than one hundred dollars, or by imprisonment of less than five or more than one hundred days. (3) The right to disburse all the funds appropriated for general or specific sanitary purposes: *Provided*, That no moneys appropriated for a specific purpose shall be used for any other purpose. Members of the board of health and their executive officers shall be paid mileage in addition to their compensation herein provided at the rate of ten cents per mile for each mile actually traveled in the discharge of his duties: *Provided*, *however*, That no charge for mileage shall be made or allowed to any member or officer within the city or town limits of the city or town in which such officer or member resides.

SEC. 7. The sanitary officers for individual counties shall also be duly licensed doctors of medicine and possess all the other qualifications herein required of the president of the board of health, except that they shall not be required to be thorough specialists. The first complement of such officers shall be appointed by the governor, by and with the advice and consent of the senate: *Provided*, That if deemed necessary by the committee, as in the section 40 hereof, to be appointed by the governor, with the advice and consent of the senate, such committee may designate sanitary officers who shall serve as such until individual counties are created, or the legislature otherwise provides. All subsequent removals and appointments shall be made by the board of health with the approval of the governor.

SEC. 8. The Territorial bacteriologist in charge of the bacteriological branch of the bacteriological-analytical station, besides possessing all the educational qualifications required for appointment as a sanitary officer, shall also furnish satisfactory evidence that he is a specialist in bacteriology. He shall be appointed in the same manner as the president of the board of health.

The Territorial analytical chemist shall possess educational qualifications required for sanitary officers and must also furnish satisfactory

evidence of having made theoretically and practically the analytical branch of chemistry a special line of study. His appointment shall be in the same manner as that of county sanitary officers.

SEC. 9. The Territorial veterinary surgeon shall be a person possessing full and preliminary college education and have pursued regular course of studies in veterinary surgery and have had at least five years' actual practice. He shall be nominated by the board of health with the approval of the governor. He will be entitled to the same mileage fees as in section 6. The members of the board of health shall wear a concealed badge with the word "sanitary officer." The executive agent and his deputies that of "sanitary police."

SEC. 10. The resident physician in charge of the insane asylum shall possess all the educational qualifications required by this act for sanitary officers and furnish satisfactory evidence of his being an alien or a specialist in mental diseases. He shall be nominated by the board of health, or the committee created by section 40 of this act, and appointed by the governor.

SEC. 11. The resident physician in charge of the leper settlement shall have the same educational qualifications as are required of sanitary officers and his nomination shall be made in the same manner.

The officers of the board of health shall be subject to removal by the authority appointing them.

SEC. 12. The resident physician in charge of the maternity home shall have the same educational qualifications as are required by this act for sanitary officers. He shall be nominated by the board of health and appointed by the governor. He shall also take charge of registered women service.

All the provisions of chapter 2 regarding county and municipal hospitals, their resident physicians, and their rights and duties shall apply equally to the Territorial special hospitals, of the leper settlement, Kalihī Station, the insane asylum, and the maternity home.

SEC. 13. The duties of sanitary officers in their respective counties shall be the same as those of the board of health in relation to the whole Territory. They shall have their residence in the respective counties for which they are appointed. They shall make detailed reports to the board of health quarterly, which shall comprise both scientific, practical, and executive aspects of their work. As such sanitary officers shall be responsible to the board of health, and, as members of such board, share the responsibility of said board for the proper carrying out of the objects and purposes thereof. In case of geographical remoteness, or unavoidable temporary isolation of a county, the sanitary officer thereof shall have authority equal to that of the board. Each sanitary officer shall have at least one sanitary policeman, who shall be sworn in and deputized by the executive officer of the board, and shall be subject to the orders and directions of the sanitary officer nominating him.

The general police and administrative authorities shall render to sanitary officers and policemen all assistance which may at any time be necessary in enforcing the rules and regulations of said board of health, or otherwise in carrying out the law regarding sanitary matters. Sanitary officers shall devote all their time and attention to the duties of their office. They shall not be permitted to engage in the practice of medicine, but may, in cases of necessity, when no practi-

g physician or surgeon can be procured, give first medical assistance individuals without pay.

SEC. 14. The Territorial bacteriologist shall take charge of the bacteriological and analytical station, and carry on and conduct all bacteriological and allied work required by the board and sanitary officers, and shall present a quarterly report to the board of health.

SEC. 15. The Territorial analyst shall have charge of the analytical department of the Territorial bacteriological and analytical station, and shall do all the chemical analytical work, and perform other kindred duties connected with the service of the board of health and the territory.

SEC. 16. Any resident of this Territory, by delivering to the Territorial analyst a sealed sample or samples of food, liquor, drink, or drug offered for sale in this Territory which he has good reasons to believe, and does actually believe, to have been adulterated, or is of a quality inferior to the legal standard, shall be entitled, without charge, to an analysis and a certificate signed by the analyst, giving his opinion as to its liability to affect health.

SEC. 17. Whenever it is deemed essential or advisable by the board of health, any patented drugs or nostrums sold in public mart may be analyzed by the Territorial analyst, and if found injurious their qualitative and quantitative formulas and compositions may be published by said board.

SEC. 18. The analyst shall be responsible at all times to the board of health, and shall make quarterly reports to that body.

SEC. 19. The Territorial veterinary surgeon shall give his whole time and attention to that branch of public sanitary work and shall not be permitted to carry on any private practice for pay, but may, under the conditions prescribed for such practice by sanitary officers, render free assistance in cases of extreme necessity. He shall have his residence in Honolulu and shall be subject to the requirements of the board of health, and shall be specially charged with the prevention and suppression of diseases among animals, or the importation or spread thereof. It shall be his duty to study scientifically the nature and character of endemic diseases, and ascertain the causes and the most practical measures for the extermination thereof; to collect vital statistics in his department, and to report quarterly to the board of health.

The Territorial veterinary surgeon shall have at least one sanitary policeman under his direction, and shall, as chief humane officer, cause all laws and regulations for the protection of animals to be enforced, and for that purpose shall be vested with all necessary authority, and may delegate power to any private citizen or citizens to render such services as may at any time be necessarily required.

SEC. 20. Regular meetings of the board of health shall be held quarterly in Honolulu, during the third week in each quarter, and such meetings shall last so long as may be reasonably necessary. Other or special meetings may be called by the president whenever he deems necessary.

SEC. 21. In the event of the absence of any sanitary officer from his duty, or other disability, his routine and urgent work may be carried on and conducted by the county hospital physician, so far as the same may be without prejudice to the hospital service. In case of the

absence or other disability of the county hospital physician the salary officer may take charge of the hospital.

SEC. 22. Conditions unfavorably affecting, or liable to affect, public health, created artificially by individuals, corporations, or county, or Territorial authorities, shall be removed at the expense the party or parties causing the existence thereof. Conditions injurious to public health due to natural causes independent of human activity, neglect, ignorance, or ill-will, may be removed within the means afforded by general or special appropriations of the board of health at the expense of the Territory. Where both human and natural causes are involved, the expense of removal shall be justly divided between the Territory and the respective individuals or corporations.

SEC. 23. All fines imposed by the courts, or other competent authority, upon complaint of the board of health or its officers or agents upon individuals or corporations, shall be turned over to the Territorial treasurer and applied by him to the fund of the board of health.

SEC. 24. At each session of the legislature of the Territory the board of health, through the governor of the Territory, shall present an estimate of necessary appropriations for carrying out the objects of such board and department during the two years next to such session of the legislature, as also an estimate of the requirements of such board of health and department for such needed improvements, if any, as it shall deem important.

SEC. 25. The salaries of the several members, officers, and agents of the board of health shall be as follows:

President of the board of health	per annum, \$4,000
Bacteriologist	per annum, 3,500
Analytical chemist	per annum, 3,500
One assistant chemist	per annum, 2,500
Veterinary surgeon	per annum, \$2,500
Secretary	per annum, 2,500
Executive officer	per annum, 2,700
Sanitary officers, each	per annum, 3,500
Sanitary policemen, each	per annum, 900
Physician in charge of insane asylum	per annum, 3,500
Physician in charge of leper settlement	per annum, 3,500
Physician in charge of maternity home	per annum, 3,500

SEC. 26. The executive committee of the board of health shall be composed of all the members thereof having their permanent residence in Honolulu, and shall represent the board and carry out all its duties, routine, and administrative business thereof between the meetings of said board; but all the transactions of such executive committee shall be subject to the approval of the board at its next quarterly meeting.

The president of the board of health shall be ex officio chairman of such executive committee, and shall, in case of a division, have the casting vote. The secretary of the board of health shall be a secretary of such executive committee and perform all the duties incident thereunto.

CHAPTER II.—*County and municipal medical service.*

SEC. 27. Whereas public hygiene and sanitary control devolve upon the Territory as a whole, and is delegated to the board of health for the treatment of individuals, both rich and poor, rests entirely upon individual counties and municipalities, who are at liberty to organize such service as they may deem best, subject only to the general regulations of the Territory.

tions of the board of health, there shall be in every county seat in the Territory not less than one county hospital of such dimensions as shall correspond with the actual needs of the population for medical and surgical care and attention, and which shall be organized and constructed in accordance with the requirements of modern medicine and surgery, as the same shall be determined upon by the board of health of the Territory.

SEC. 28. Each county or municipal hospital shall have at least one hospital physician, who shall be a duly licensed practitioner possessing all the qualifications herein required of sanitary officers. Such physician shall have his permanent residence at such hospital during the time of his services thereat.

SEC. 29. Each county or municipal hospital shall have at least one professional nurse, one cook, and one servant.

SEC. 30. No person, resident in the county or municipality, shall be refused admission to such hospital because of his or her inability to pay therefor. A section or a portion of such hospital shall be devoted to such patients as are able to pay for care and treatment; and such patients shall be allowed to have the services of physicians other than the resident hospital physicians, if they so desire, and the rate of charge for their care and treatment shall be fixed by the board of county commissioners or other executive power of the county or municipality.

SEC. 31. The resident hospital physicians of all the county or municipal hospitals shall be and attend at his office at such hospital not less than two hours during each day for the care, attention, and supplying of outdoor patients with advice and medicines, and any person applying for advice or medicines who are unable to pay therefor shall be furnished therewith at the cost of the county or municipality.

SEC. 32. The appointment of all hospital physicians shall be made by the respective county or municipal authorities, and their salaries fixed and paid, and all expenses of such hospitals borne by such county or municipality. Such hospital physicians shall be charged with the care and conduct of such hospitals, and shall be responsible only to the authorities by whom they were appointed.

SEC. 33. The hospital physician shall not be allowed or required to attend or treat persons at private residences or places other than the hospital. He shall devote all his time and attention to the hospital, and the patients thereof, of whom he has charge. He shall not be permitted to carry on a private practice, but may in cases of extreme urgency respond to a call for consultation or assistance by a duly licensed practitioner of the immediate locality, unless urgently required at the time at the hospital.

SEC. 34. No lying-in, private, county, or municipal hospital, or sanitarium, or similar institution intended for the treatment of the sick or injured, whether charitable or for pay, shall be permitted by the board of health, unless such institution shall satisfy all the requirements of hospital hygiene as prescribed by such board.

SEC. 35. If any chartered municipality shall at any time desire to increase the number of sanitary officers or sanitary policemen within such municipality, the board of health may appoint such additional sanitary officers or policemen as it deems advisable, and, when duly appointed, they shall become members of the Territorial board of health, provided that the municipality for which additional sanitary officers are so requested shall first obtain the approval of the governor

of the Territory thereto, and shall, immediately upon such appointment, appropriate and pay to the Territorial treasurer a sum equal to the salaries of such additional sanitary officers, as fixed by this act, to be by such treasurer placed to the credit of the fund of the board of health of the Territory.

SEC. 36. Such additional sanitary officers, when so appointed, shall be responsible to the board of health in like manner as other sanitary officers, but make and render to the municipality such reports as may require.

CHAPTER III.—*Territorial bacteriological and analytical station.*

SEC. 37. There shall be a Territorial bacteriological and analytical station established in Honolulu consisting of two departments, to wit, bacteriological and analytical. The bacteriological department shall be in the charge and under the control of a Territorial bacteriologist, the analytical in charge of the Territorial analyst. Both the Territorial bacteriologist and the Territorial analyst shall be under the direction of and responsible to the board of health, and shall make quarterly reports to such board.

SEC. 38. The board of health shall properly organize, equip, and put into operation such bacteriological and analytical station and make and cause to be enforced such rules and regulations for the conduct thereof as such board shall deem necessary. All instruments, materials, and other property of the Territory relating or pertaining to those branches of science and now in the possession or under the control of the board of health heretofore existing, or any member thereof, or any other person or persons shall be delivered to the board of health hereby established for the use and benefit of such station.

SEC. 39. There is hereby appropriated from such moneys of the Territory not otherwise appropriated the sum of — dollars for a special fund to be known as "the board of health fund," to be used for the purpose of carrying out the provisions of this act.

SEC. 40. Immediately upon the passage and approval of this act there shall be appointed by the governor, with the advice and consent of the senate, a committee, consisting of three members of the legislature, who shall, for the purpose of organizing and putting into operation the health department and service according to the provisions of this act, take temporary charge of the health department and service and receive from the heretofore existing board of health of the Territory all the property, paraphernalia, books, records, medicines, instruments, and all other matters and things connected with the department of said board of health or under its control. Such committee shall proceed to organize the department of the board of health, designate the first president thereof and the sanitary officers and members of the board or a commissioner pro tem., and shall exercise all the duties and possess all the powers of such board until the same shall be duly organized in the manner herein provided. They shall have power to abrogate and annul any or all of the rules of the board of health in force at the time of the passage of this act, and, with the approval of the governor, to make, issue, and enforce such other rules and regulations as they may deem necessary.

SEC. 41 Act 60 of 1896, also Chapter LXXLI of the session laws,

and all acts or parts of acts inconsistent with this act are hereby repealed.

SEC. 42. This act shall take effect from and after the date of its approval.

EXHIBIT No. 3.—*Senate bill No. 42.*

Introduced 15th day of March, 1901, by Senator Kanuha. First reading in senate, March 15, 1901.

ACT 42.—An act to control and regulate the manufacture, transportation, and sale of liquors, opium, awa, and other intoxicants within the Territory of Hawaii.

Be it enacted by the legislature of the Territory of Hawaii:

SECTION 1. Any person or duly organized corporation within the Territory of Hawaii may grow, without any license or special permit, any raw primitive produce or material necessary for manufacturing wine, beer, or other liquors

Any person or duly organized corporation within this Territory may manufacture or ferment wine from grapes grown within this said Territory, and also brew beer from domestic or imported materials without any special permit or license.

Any person or duly organized corporation may distill strong liquors from any domestic or imported materials in quantities of not less than one thousand gallons a year: *Provided*, That such person or corporation shall furnish the board of control with all information in regard to place, time, amount, and method of production, the kind and quality of the produce, and any other information that the said board may require: *Provided further*, That such person or corporation shall deposit with the Territorial treasurer a bond, the amount of which shall be determined by the board of control, such bond being intended to cover the obligation on the part of the producer to abide by all the provisions of this act and by such special rules and regulations in regard to distilleries as the said board may issue in the future, and also all fines and liabilities which may arise from the infraction of this act and of the said rules and regulations: *Provided further*, That such person or corporation shall obtain from the board of control a special permit, which, upon the examination of all information, the board may issue or refuse at its discretion. A fee of one dollar shall be charged for each permit.

SEC. 2. It shall be unlawful for any person or corporation in any capacity whatsoever to sell, barter, exchange, part with, give away, or deliver, directly or indirectly, any spirituous, vinous, malt, or other intoxicating liquors, or opium or awa, or awa root within the limits of the Territory of Hawaii, or any county, or any municipal division thereof, to anyone except the manager of intoxicants, as provided in this act. It shall be equally unlawful to allow such liquors to leave the premises of their owner, or to transport them beyond such premises without a special written permit from a dispenser or manager. Such transportation on public roads without the said special permit of the manager or dispenser will constitute a prima facie evidence sufficient for conviction, unless the article is contained in the sealed package of the dispensary.

SEC. 3. The amounts of liquors manufactured within this Territory over and above the quantities intended for the home consumption the producer himself and his family, at the option of the producer may be either sold to the manager of intoxicants or exported beyond the limits of this Territory. If the producer intends to sell such liquor product to the manager of intoxicants, he shall send to the said manager a sealed sample or samples thereof, which samples shall be tested as to their quality and strength by the board of health, and, if approved the produce may be bought by the manager in accordance with the rules and regulations established by foreign and outside bidders. All things being equal, preference shall be given to liquors manufactured within this Territory.

SEC. 4. Liquors and samples over and above those quantities for home consumption which will be found not to the standard by the board of health, shall be conveyed and stored in the government storeroom house under the management of the administration of intoxicants, and kept there for exportation to the order of the producer, paying reasonable storage fees. All liquors and samples thereof addressed to the administration of intoxicants shall be accompanied by a written special transportation permit from the manager.

SEC. 5. Any person who shall barter, sell, or exchange at a profit or any person who shall aid, assist, or abet in bartering, selling, or exchanging at a profit, above the dispensary price any liquor or other intoxicant obtained by him or by any other person at a dispensary, or who shall violate sections 2, 3, or 4 of this act, or any provision against the sale of intoxicants at a profit, or who shall aid, assist, or abet in bartering, selling, or exchanging any intoxicant under this act at a profit, or who shall barter, sell, or exchange any intoxicant not obtained at a dispensary, at any price or consideration whatsoever, shall be guilty of a felony, and upon conviction thereof shall be imprisoned in the Territorial prison not less than one month or more than one year.

SEC. 6. There shall be a Territorial board of control, consisting of three qualified electors of the Territory, who shall be appointed by the governor, by and with the consent of the senate, whose term of office shall be for two years, and who shall each receive an annual salary of one dollar in full compensation for all services. The governor shall fill all vacancies by appointment. The members of such board of control shall meet quarterly and at such other times as they may deem expedient, and may adopt such rules and regulations, not in conflict with this act, governing all appointed officers under the provisions of this act, and shall cause the rules and regulations or revision thereof to be printed and circulated at the expense of the Territory. Each member of the board of control shall be deemed qualified when he shall have been duly appointed and shall have taken and filed the oath of office hereinafter prescribed, and no bond will be required.

SEC. 7. There shall be a manager, who shall be a citizen of the United States, and who will be appointed by the board of control removable by such board, and whose term of office shall be for two years from the date of his appointment, unless sooner removed, and who shall receive an annual salary of two thousand five hundred dollars except the first two years, when he will receive three thousand five hundred dollars, payable monthly out of any funds in the Territorial treasury not otherwise appropriated, and in addition to such annual salary he shall receive ten cents per mile for every mile actually trav-

led outside of the city limits of Honolulu, in the discharge of his official duties within the limits of the Territory of Hawaii, and he shall be deemed not to have any official duties elsewhere. He shall take the oath of office hereinafter prescribed and execute to the Territory of Hawaii good and sufficient bond, to be approved by the board of control and the attorney-general, in the sum of ten thousand dollars, conditioned for the faithful performance of his duties and the true accounting for all public monies received and collected by him and the payment of all such public money to the treasurer of the Territory, and at the expiration of his term of office the turning over to his successor all books, records, papers, and property of every description belonging to his office, together with all liquors, opium, awa, and stock on hand and in transit, of every description, accompanied by a true invoice thereof, and of all balances of public money remaining in his hands. Such bond shall cover all illegal or unlawful acts committed by any clerk or employee in the manager's office or in the discharge of any official duties connected therewith; but the manager may require an indemnifying bond from any clerk or employee in his office or under his supervision, in such sum and with such sureties as he may deem necessary. The manager shall not hold any other public office nor be engaged in any private business whatsoever during his term of office, but shall devote his whole time to the faithful carrying out of the provisions of this act. He shall be the active purchasing agent of the Territory in every transaction connected with the purchase, sale, and dispensation of all intoxicants to be legally sold, used, and stored within or imported to the Territory of Hawaii. Upon his request he shall be entitled to and receive, without charge therefor, the opinion and advice of the attorney-general, or of the county attorney in any county, concerning the discharge of his official duties; but such opinion or advice shall not relieve the manager of the responsibility of his official acts nor the liability under his bond if adjudged otherwise by any court of competent jurisdiction.

SEC. 8. The manager shall appoint and remove all dispensers. Whenever a dispensary is established he shall place such dispensary in charge of a competent dispenser, either male or female, who shall be a citizen of the United States, of good moral character, taking a special regard to the recommendation of citizens at special elections, and who shall take and file the official oath as hereinafter prescribed, and furnish an official bond to the Territory of Hawaii in a sum to be fixed by the manager, with good and sufficient sureties, and conditioned for the faithful performance of his duties as dispenser and the true accounting of all public monies received by him and payment thereof to the Territorial treasurer, and the turning over to his successor in office of all books, papers, and unsold stock of liquors, opium, and awa, accompanied by a true invoice thereof, together with all other property and fixtures belonging to said dispensary, and for the payment to his successor of all balances of money in his hands belonging to the Territory. Such bond shall be approved by the manager and the attorney-general, and shall be filed with the Territorial treasurer. Such bond shall cover all illegal or unlawful acts of clerks or employees at said dispensary who shall be under the supervision of the dispenser. All such clerks shall be appointed by the dispenser, with the approval of the manager, and may be dismissed in the same manner. The dispenser may require an indemnifying bond from the

clerks and employees appointed by him and under his charge. The manager shall keep the principal stocks of liquors under his charge wherever located, properly insured against loss by fire, and all such policies of insurance shall be in favor of the Territory of Hawaii. The manager and his deputies shall be ex officio deputy sheriffs, with jurisdiction throughout this Territory for all purposes under this act and may, at any place or time, swear in deputies to act under him when necessary, in any proceeding connected with the control, sale and dispensation of intoxicants and the detection and conviction of persons violating the provisions of this act. Upon the discharge of such special force the manager shall give to each person so employed a statement in writing, and officially signed by him, showing the length of service and, at the rate of twenty-five cents an hour, how much the person is entitled to, which shall be sufficient evidence for the Territorial auditor to draw a warrant in favor of the person named for the amount shown in such statement. The manager may also furnish his deputies and employees for the time of their service with a badge "Liquor police," which may be worn concealed and exhibited only in case of necessity. In each county there shall be a government warehouse, located at the county seat of such county, in charge of a deputy manager, who shall be appointed by the manager and shall be subject to his orders. The salary of such deputies shall be fixed by the board of control, to be paid monthly. Each dispenser in the county shall file orders for stock with such deputy. The manager shall keep a stock of intoxicants stored in such warehouse as will be necessary to supply all the dispensaries in the county, and store all manufactured liquors provided for under this act, and also store such intoxicants as may be seized when found unlawfully within the county, and for the storage of furniture and fixtures connected with establishment or removal of dispensaries, and for all other proper purposes under this act. The deputy in charge shall report as required by the manager who shall be responsible for his official acts and may require a bond from such deputy as provided for clerks under their charge.

SEC. 9. All invoices, bills, and other evidences of indebtedness against the Territory connected with the control, sale, and dispensation of intoxicants shall be filed with the manager, who shall examine them. If found correct, he shall endorse them "Approved" and sign such approval but if found incorrect, he shall endorse them "Rejected," and briefly note the reasons for rejection and sign the same. In either case he shall then turn such evidence of indebtedness over to the Territorial auditor for his consideration, and all payments of money under this act shall be paid by warrant as in other cases of claims against the Territory, with the exception that they must first be presented to the manager.

SEC. 10. Wherever the word "manager" appears in this act it shall mean the "manager of intoxicants," which shall be the official title of that office and officer. The manager shall draft forms of records and blanks for the entire service with a view to collecting reliable statistical information, which may be readily and accurately compiled from such records when complete. He shall then submit such drafts to the board of control, and when revised and approved by such board the manager shall advertise for sealed tenders and proceed with letting the contract as is provided by law for public printing. However, if all the bids submitted are exorbitant, the manager may proceed to let

the contract without further notice elsewhere if any considerable saving to the Territory can be made by so doing.

SEC. 11. The salaries and bonds of dispensers, clerks, and employees shall be fixed by the manager, with the advice and consent of the board of control, but in no case shall the salary of any dispenser be fixed in proportion to or be dependent upon the amount of sales made by him at the dispensary over which he has charge. All salaries shall be paid monthly, except to members of the board of control, who shall be paid annually; and the Territorial auditor may require vouchers returned, as in other cases of money paid by warrant.

SEC. 12. The Territorial treasurer shall keep a separate account of all money received and disbursed under this act, and all warrants for payment for liquors, salaries, and expenses connected with the control, sale, and dispensation of intoxicants shall be drawn on such account. All money remaining in or accumulating in the Territorial treasury derived from the sale and dispensation of intoxicants is hereby appropriated for the purpose of paying and redeeming such warrants, and such funds shall be turned in to the special "School extension fund."

SEC. 13. The sum of two hundred thousand dollars, for the biennial period, is hereby appropriated, out of any funds in the treasury not otherwise appropriated, for the purpose of purchasing a stock of intoxicants to be controlled, sold, and dispensed under the provisions of this act and for the establishment of such dispensaries within the Territory as may be decided upon by the board of control.

SEC. 14. The manager shall purchase and at all times keep, under supervision of the board of control, a stock of spirituous, vinous, and malt liquors, opium, awa root, and other intoxicants, as the board of control may direct and the board of health permit.

SEC. 15. Before purchasing any stock of intoxicants the manager shall submit a statement in writing to the board of control, in which he shall give estimates of the amount and kind of intoxicants that, in his judgment, shall be needed to supply the dispensaries throughout the Territory for one year. After revision of such estimates by the board of control, such written statement shall be submitted to the board of health or its executive committee. It shall be the duty of the board of health or its committee to fix the standard as to quality and strength, and said board may reject any intoxicant which may be peculiarly harmful to the public health. Such decision of the board shall be in writing, attached to the manager's statement of estimates, and shall be returned within ten days to the board of control.

SEC. 16. When the manager's statement of estimates shall have been revised by the board of control and approved by the board of health or its executive committee and returned to him, it shall then be the duty of the manager to advertise for sealed bids to furnish all or any part of the intoxicants, according to such revised estimates and in such manner as the board of control shall direct; but such advertisement shall refer to the law and conditions under which such stock shall be purchased and shipped, and contain a clause to the effect that samples in sealed packages must be submitted with the sealed proposal, showing the kind, strength, and quality of liquors and intoxicants. When received by the manager, all such samples shall be by him turned over to the board of health or its executive committee, whose duty it shall be to inspect and analyze such samples and keep a record of such analysis in a book for that purpose, and all such samples found to be

impure, adulterated, below standard, or in any manner different from the requirements previously described, as shown by the revised statements of estimates, shall be sealed and returned to the manager, accompanied by a written statement showing such defects; upon receipt which the manager shall return the sample to the owner marked "rejected," and a statement by mail showing why rejected. All samples which prove to be in conformity with the requirements previously reported to the manager shall be retained by the board of health until the stock purchased from the successful bidder shall have been received by the manager; whereupon it shall be the duty of the board of health to test such stock, and if it is up to the standard as to strength and purity as reported previously, then such purchase shall be approved by the board of health or its executive committee and the board of control, and thereafter such stock of intoxicants shall be deemed to be lawfully within the limits of the Territory and shall be distributed among warehouses and dispensaries for sale in such quantities as may be ordered by the several dispensaries or as the manager may deem best for the service. And the Territorial auditor shall draw and deliver warrants in payment therefor, but in case such stock so received and tested shall not compare with the sample or shall not fulfill the requirements as to standard, purity, strength and quality, then it shall be the duty of the board of health to reject all such stock or such part of which as fails to meet the requirements of the law, and so notify the manager in writing, showing the cause of such rejection. It shall then be the duty of the manager to notify the shipper of such rejection and the cause thereof, and further notify the shipper that the stock will be held for a reasonable time; and upon his order and payment of freight, cartage, and other expenses, which may be estimated by the manager, and required to be paid in advance, the stock so rejected shall be shipped out of this Territory of Hawaii and in shipping shall remain under the control of the manager until the limits of the Territory have been reached, when such control shall pass to the regular shipper. Any liquors or intoxicants shall be shipped at owner's risk in all cases. If any spirituous, vinous, or malt liquors or other intoxicants shall be rejected or condemned by the board of health as impure and unwholesome, such liquors or intoxicants shall not be sold within the limits of this Territory, and payment for the same shall be refused by the manager to the person, firm, or corporation from whom such liquor was purchased.

SEC. 17. Whenever a dispensary is established at any place within the Territory the manager shall select a suitable location and building for the same. He may rent or lease a building if there is none provided by the Territory, county, city, or town, and shall prescribe the general arrangements and necessary furniture which he shall purchase on behalf of the Territory, and the stock shall be so placed and guarded by rail or iron screen, so as not to admit of customers or others having access thereto, except the dispenser or clerks of such dispensary. He shall prohibit any display of attractions, such as expensive furniture, pictures, advertisements, and unnecessary display of stock. He shall cause the counter at which customers present applications to be located in such a manner as to only accommodate one applicant at a time, with a view to making the service similar to that in a post-office with little or no room for loafers, and no seats or other accommodations shall be furnished for customers or others not employed in the

dispensary. The manager shall issue certificates to the dispenser, showing the person appointed dispenser and the date of appointment, and a certificate showing the date that such dispensary shall be opened for the legal dispensation of intoxicants under this act, and such statements as he may deem necessary and not in conflict with this act. The dispenser shall keep such certificates posted in a conspicuous place in such dispensary, together with a printed copy of this act.

SEC. 18. Before selling or delivering any intoxicants to any person an application must be presented to the dispenser or his clerk or his assistant in charge of the dispensary upon a printed form furnished for that purpose, and the applicant shall fill the blanks, written in ink, stating the kind, quality, and price of the liquor or other intoxicant wanted, dated with the true date and with his or her name signed hereto, except as to physicians' prescriptions herein provided, in which case such prescription shall be taken by the dispenser, clerk, or assistant in lieu of such application, provided that the dispenser, clerk, or assistant knows such prescription to be genuine and not issued for the purpose of avoiding the provisions of the act. The dispenser shall keep a book in which he shall register the names of all applicants, including physicians' prescriptions, and shall number consecutively all applications and shall register the number in connection with the name of the applicant; that such book shall be opened only to the manager and the members of the board of control, attorney-general, county attorney or grand jury, and no part of such record shall be published. If any person shall make any false or fictitious signature, or sign any name other than his own to any application or prescription, or make any false statement on any request or application or prescription, he shall be guilty of a misdemeanor, and upon conviction thereof shall be fined for each offense not exceeding fifty dollars or imprisoned in the county jail not exceeding thirty days. No intoxicating liquor shall be sold or delivered to any minor, intoxicated person, or habitual drunkard, and dispenser may make rules and regulations not in conflict with the rules of the board of control or manager, and not inconsistent with this act, as may be proper for the management of the dispensary.

SEC. 19. All intoxicants shall be sold or delivered by the dispenser, clerk or assistant, in sealed packages only, and all sales shall be made for cash only.

SEC. 20. If the manager, dispenser, clerk, or assistant, or any employee in the service connected with the control, sale, and dispensation of intoxicants shall break seals, adulterate, or cause to be adulterated any liquors, wines, or other intoxicants which he or she or they may keep for sale under the act, by mixing with coloring, water, or any drug or ingredient whatever, or mix the same with other liquors of different kind or quality, he, she, or they shall be guilty of a misdemeanor, and upon conviction thereof shall be fined not less than one hundred or more than five hundred dollars, or imprisoned in the county jail not less than three months, or both such fine and imprisonment.

SEC. 21. All liquors for medicinal and sacramental purposes shall be purchased at a dispensary established under this act, and all intoxicants not purchased at such a dispensary or under the control of a manager shall be deemed to be unlawfully within the Territory of Hawaii, and shall be subject to seizure, and upon order of the circuit court, after due process of law, shall be destroyed except as hereinafter provided.

SEC. 22. The price and quantity of the intoxicant to be sold sealed packages shall be fixed by the manager, subject to revision any time by the board of control; provided that in the case of distilled liquors each package shall not contain less than one-half pint, or more than five gallons; in case of other intoxicants sealed packages shall contain such quantity as the board of control may from time to time direct, and it shall be the duty and exclusive privilege of the manager only to seal all such packages. All intoxicants shall be sold at a price not exceeding eighty per centum, except the first year, when they may be sold at cost.

SEC. 23. Each dispensary shall be opened at seven o'clock a. m. and closed at seven o'clock p. m., also closing between the hours of two o'clock m. and one o'clock p. m. and on Sundays and on election days. Only one application by the same person on the same day shall be accepted at any dispensary, but such application may call for a number of sealed packages of different qualities and sizes. The label on each sealed package shall name the quantity, quality, and kind, and the price of the liquor contained therein.

SEC. 24. No drinking of intoxicants shall be allowed in or about any dispensary or the premises upon which it is situated, nor shall any person not an employee be allowed to loiter about such premises; and if any such persons fail or refuse to comply with the provisions of this section when ordered so to do by the dispenser or the clerk or assistant in charge, such persons so neglecting or refusing shall be guilty of a misdemeanor, and upon conviction thereof shall be fined not exceeding ten dollars or three days in the county jail.

SEC. 25. No spirituous, vinous, or malt liquors or other intoxicants shall be sold at any dispensary to persons purchasing for the purpose of selling again, except as in this act provided, and the board of control and manager are required to make and promulgate such rules as require dispensers to make such investigations as will prevent persons from so purchasing; and if the dispenser becomes satisfied that a person or persons have purchased or in the habit of purchasing for the purpose of selling again, he or she may refuse to sell to such persons at all, or may sell them in such quantities as will practically prevent resale; provided that the keeper of any hotel or restaurant may purchase a sufficient quantity of malt liquors and wine only to supply his guests for table use, and such wines and malt liquors shall be delivered to such guests by him in the original sealed packages only for which such keeper of hotel or restaurant shall charge and collect the price indicated on the label of the package and actually paid for him at the dispensary, and no more; but no distilled liquors shall be sold to any keeper of any hotel or restaurant by any dispenser under this section of this act. If at any time the dispenser becomes satisfied that any keeper of hotel or restaurant is repeatedly violating the provisions of this section, he shall refuse to sell to him or any other person for the use of such hotel or restaurant any and all of the liquors in this section provided, and any keeper of any hotel or restaurant who shall violate any of the provisions of this section shall be guilty of a felony, and upon conviction thereof shall be punished for each offense as provided in section five of this act.

SEC. 26. Any dispenser shall sell distilled, malt, and fermented liquors upon the general prescription of a medical practitioner duly licensed by the board of health, which prescription shall be in writing

in the English language, signed by such physician, specifying the name of the person to be supplied and the quantity, quality, and kind of liquor to be supplied. Such prescriptions shall be received by the dispenser in lieu of the written application herein otherwise provided, and no physician shall give a prescription to any person except for bona fide medical purposes. Every dispenser shall keep on file every prescription upon which any such sale has been made, and shall number each prescription, and shall keep in a book prepared for that purpose a record of all prescriptions, which book shall be at all times open to the inspections of the public, and shall contain the name of the physician giving the prescription and the number of such prescriptions. Any dispenser who shall knowingly sell such liquors on a bogus prescription, and any physician or other person who shall give, procure, or aid in procuring any false or fraudulent prescription for any spirituous or fermented liquors in violation of the provisions of this act, shall be guilty of a misdemeanor, and on conviction thereof shall be fined or imprisoned at the discretion of the court.

SEC. 27. The manager shall make a quarterly report to the Territorial treasurer which shall include the last day of March, June, September, and December of each year, and therewith turn over all public money that may be in his hands, and on the thirty-first day of December of each year shall make an annual report to the governor, which shall comprise all available statistics compiled in compact form, with definite results shown and estimates made covering the entire service of the year. Such annual report shall be printed and circulated throughout the Territory.

SEC. 28. Each dispenser shall make a report to the Territorial treasurer on and including the last day of each month, in which he shall show the amount and kind of liquors or other intoxicants on hand on the first day of the month, the amount and kind of liquors or other intoxicants received during the month, and the amount of liquors and other intoxicants on the last day of the month. He shall also report the kind, quantity, and price of all liquors and other intoxicants sold during the month and shall transmit such report, together with a check or money order covering all public moneys in his hands arising from the sales of intoxicants during the month.

He shall make a duplicate of such report and mail it to the manager; and if such dispensary be located in an organized county, he shall prepare another copy and mail it to the county treasurer of such county.

Every dispenser shall keep an account of all petty expenses incurred by him incidental to the service in a separate book for that purpose, and quarterly, on the last day of March, June, September, and December, shall report the same separately to the manager; when approved by the manager this shall be submitted to the Territorial auditor, and when audited a warrant shall be drawn in the name of the dispenser and mailed to him.

SEC. 29. All members of the board of control, manager, dispensers, whether male or female, clerks, and employees connected with the control, sale, and dispensation of intoxicants shall be citizens of the United States, and, except the members of the board of control, hold no other public office, nor shall they, or any of them, engage in any private business whatever during the term of their appointment.

SEC. 30. All appointments under this act shall be for two years from

date of appointment unless sooner removed, and no minor shall either appointed or employed in any capacity under this act.

SEC. 31. All oaths of office and official bonds under this act shall be filed with the treasurer of the Territory.

SEC. 32. The following oath shall be required to be taken and filed with the Territorial treasurer by every member of the board of control and every officer, clerk, and employee appointed in the service connected with the control, sale, and dispensation of intoxicants within the limits of the Territory of Hawaii:

Having been appointed as _____ in the service of control, sale, and dispensation of intoxicants in the Territory of Hawaii, I do solemnly swear that I will, to the best of my knowledge and ability, discharge the duties of _____, for which I have been appointed; that I am not a minor and that I am not addicted to the use of intoxicants; that I will use my best efforts to carry out the provisions of this act and all other laws amendatory thereof and supplemental thereto; that I will refrain from active participation in politics or political parties, except to vote, during my appointment and strive to place the service under this act above political influence or party success; that I will use my best endeavor to make the service efficient; that I will strive to obtain the aim of this act intended to suppress the abuse of intoxicants, the evils resulting therefrom; that without fear, favor, reward, or hope of reward, I will faithfully serve the Territory of Hawaii and expose any and all violations of the laws governing the control, sale, and dispensation of intoxicants. So help me God.

SEC. 33. Every officer, clerk, or employee under this act who shall make any false entry upon any record or other book, paper, or written statement shall be guilty of perjury, and every officer, clerk, or employee who shall misappropriate any of the money arising from the sale of intoxicants under the provisions of this act shall be guilty of embezzlement and shall be punished as provided by law for such offenses.

SEC. 34. Any person not a Territorial, county, or municipal officer who shall voluntarily initiate proceedings in any court and secure a conviction of the guilty party or parties under this act, and who shall furnish the Territorial auditor with a certificate signed by the attorney general or county attorney, showing the conviction in such case as the sentence of fine or imprisonment or both, and that the person named in the certificate appeared and testified as a witness in such case, shall be entitled to receive a warrant drawn upon the fund appropriated under this act equal to one-half of the fine and one dollar for each day of imprisonment of the convicted party; but in case of acquittal the court may tax the costs against the complaining witness.

SEC. 35. Any person who shall directly or indirectly keep or maintain by himself, or by associating or combining with others, or who shall in any manner aid or assist in keeping or maintaining any club, room, or any like place under whatever name, where intoxicating liquors are sold, bartered, distributed, divided, or in any way disposed of for profit, shall be guilty of felony, and upon conviction thereof shall be punished for each offense as provided in section five of this act.

SEC. 36. No druggist, drug store, or any proprietor, partner, stockholder, or employee of any drug store or any other place of business in this Territory shall sell any spirituous, vinous, or malt liquors, or other intoxicants, except as in this section provided: Druggists shall purchase all the liquors and alcohol necessary for compounding mixtures from a government dispensary only, and no person or concern shall part with any such mixture or compound otherwise than on the prescription of a physician duly licensed by this Territory, which shall be prescribed, sold, and used as medicine only, and shall not be dru

upon the premises where sold and delivered. Such druggists may also, upon such prescription for medicinal purposes only, purchase a reasonable amount of spirituous liquors and dispense such liquors in the original sealed packages obtained from the government dispensary, provided that such sale is made at the same price paid for such liquor at the dispensary and no more, and that such sealed packages shall not be broken by the purchaser, or by any person for him, or drunk by him upon the premises where sold and delivered.

All patent medicines containing alcohol shall not be sold or kept for sale or otherwise by druggists unless such medicines shall have been first submitted to the board of health for analysis, and a certificate issued by such board authorizing the keeping and sale thereof. No fee or other charge shall be made or collected by the board of health for such analysis or certificate; that nothing in this section shall be construed to authorize the sale of any preparation or compound, under any name, form, or device whatever, which, containing alcohol, may be used as a beverage.

That whenever the board of control, manager, or dispenser, or either of them, may become satisfied that any druggist or drug store, or any proprietor or employee therein, is directly or indirectly selling, bartering, exchanging, or in any unlawful manner disposing of liquors for profit, or for any other purpose than that authorized by this section, the dispenser may refuse to sell any more liquor to such druggist or to any other person connected with such drug store, or to any person for them or either of them.

The manager of intoxicants shall cause to be printed, in clear, large type, all of this section, and mail a copy to each druggist and drug store doing business in this Territory; and it shall be the duty of each druggist or drug store, or person in charge thereof, to post and keep posted at all times in a conspicuous place in such drug store or place of business such copy of this section.

Any druggist, drug clerk, proprietor, partner, stockholder, or employee of any drug store who shall, directly or indirectly, violate any of the provisions of this section shall be guilty of felony, and upon conviction thereof shall be punished for each offense as provided in section five of this act, and upon such conviction of any person, in any capacity employed in and about any drug store doing business in this Territory, his license, together with all other licenses, certificates, permits, and other evidences of authority to do business, without further proceeding shall stand revoked and canceled, and thereafter shall be null and void; and any drug store, the owners or proprietors of which, through act, consent, or negligence, having permitted the unlawful sale or dispensation of intoxicants therein, is hereby declared a nuisance, and the attorney-general is hereby authorized, empowered, and directed to close such drug store.

SEC. 37. The sureties or any official bond of manager of intoxicants, or the official bond of any dispenser, shall be liable, jointly and severally, for all fines, penalties, damages, and costs that may be adjudged by court against any such officer or employees under him, and shall also be liable, jointly and severally, for all losses of monies or liquors and other intoxicants and other public property under his charge which may be sustained by the Territory of Hawaii; and for the faithful and correct accounting and remittance of all public monies coming into his hands by virtue of his office. Said official bonds shall be for the use of

the Territory of Hawaii, and in case any of the conditions shall be violated, the principal and sureties thereon shall be jointly and severally liable for all damages that may be obtained against the principal in any action under the provisions of this act.

All monies collected for the breaches of such bond shall be paid to the treasurer of the Territory and by him credited as other funds arising from the sale and dispensation of intoxicants under this act.

SEC. 38. Any officer or clerk may be removed from office or discharged by the same board or person appointing him, at any time, for cause of which he shall be notified, and cause of removal must be based upon the grounds of violating his oath of office or guilty of other misconduct in his office or of violating the provisions of this act in any manner.

SEC. 39. Whenever counties shall be duly organized, each county shall be entitled to one-half of the net profits resulting from the sale and dispensation of intoxicants and all fines collected within the limits of such county under the provisions of this act.

All fines collected and other money arising under the provisions of this act shall be forwarded to the Territorial treasurer, and annually on the first day of January such one-half of the net profits shall be credited to each county subject to the order of the county treasurer, which may be paid by Territorial warrant and upon receipt by the county treasurer shall be credited to the county general fund.

SEC. 40. The manufacture of opium for smoking within the limits of this Territory is hereby prohibited, and any person who shall violate the provision of this section shall be guilty of misdemeanor and shall be fined one hundred dollars for each offense.

SEC. 41. The sale, barter, exchange by and between private parties, as well as transportation, not accompanied by a special permit from the manager, of manufactured opium destined for smoking within this Territory, unless served from a dispensary and in sealed packages, shall be unlawful and subject to the same rules and penalties as provided under this act for liquors. Each dispensary shall be provided by the manager with a sufficient amount of manufactured opium in sealed packages for the use of incurable regular consumers thereof. It will be sold for cash only, and at a profit not exceeding eighty per centum, upon written applications to such applicants who shall once a year procure a certificate from a duly licensed physician testifying that such applicant is incurably addicted to the use of opium and stating the weekly ration consumed by him.

A separate register of such consumers shall be kept in each dispensary and the names of all habitual, incurable consumers, their age, weekly rations, dates and amounts of dispensed opium, names of physicians who have issued certificate, dates of each certificate, as well as such other details as the board of control may see fit to record, will be duly recorded by the dispenser.

Nothing in this section shall be construed so as to affect the sale, dispensation, and transportation of medicinal opium for medicinal purposes by the druggists.

SEC. 42. The sale, barter, exchange, as well as transportation, not accompanied by a special permit by the manager, by and between private parties of the awa root and its produce of every description, unless derived from the government dispensaries, shall be unlawful

within this Territory and subject to the same rules and penalties as those provided for liquors under this act.

Each dispensary shall be provided with sufficient stock of awa root to cover the needs of regular incurable consumers thereof; it will be sold and dispensed only to such regular incurable consumers for cash and not exceeding eighty per centum of its original cost, and upon application accompanied by certificates of duly licensed physicians as provided for opium. A special record as that provided for opium will be held in each dispensary. All details in regard to the control of the sale of awa root not inconsistent with this section will be determined by the board of control.

Nothing in this section will be construed so as to affect the sale, dispensation, manufacture, and transportation of awa root and its produce by the druggists for medicinal purposes.

The manager will keep in each dispensary sufficient stock of pure, ninety per cent strength alcohol for chemical and technical and industrial purposes, which alcohol will be dispensed in sealed packages of not less than one-half pint and not more than five gallons, and at a price either at cost or not exceeding ten per centum over and above its actual cost, as the board of control sees fit. It shall be dispensed like other liquors upon written application signed by the applicant himself and stating the specific purposes for which such alcohol is required and will be used. Should any dispenser have any grounds to believe that an applicant for alcohol is not a bona fide one and that he uses such alcohol for diluting and drinking he may refuse to fill such orders of such applicant.

Sec. 43. Upon the receipt of a petition signed by at least one-fourth of the qualified electors who voted at the last general election in any voting precinct, the board of control shall order a special election in such precinct to be held at the same place where the last general election was held, as nearly as may be, and shall name the date upon which such special election shall be held and appoint three qualified electors residing within such precinct as judges of election. The wife and daughters, of age, of each elector shall be qualified to vote and to act as judge or clerk at such election.

Upon receipt of such appointment the judges of election shall give at least thirty days' notice of the date and place where such election will be held, by publication of notice in a weekly or daily newspaper published in such precinct and by posting notices of such election in six conspicuous places in the precinct. If there should be no newspaper published in the precinct, then such publication shall be made in a newspaper published nearest to the place of holding such election.

The judges of election shall appoint two clerks, male or female, who shall record the names of the persons voting at such election. No registration prior to such election shall be required except that all persons who registered for the last general election, together with his wife and daughters, over twenty-one years of age only, shall be qualified to vote at such special election.

It shall be the duty of the judges of election to provide a ballot box and such other appurtenances as may be necessary, provided that no polling apartments shall be required, that no sheriff or his deputies or policemen shall be allowed to interfere with any voter nor be conspicuous as to number in or about such polling place, unless called upon to keep order by the judges of election.

The manager shall furnish records and ballots which shall be prepared and revised by the board of control. The ballots shall be in the following form and an X mark made in the column to the right of the proposition shall be an affirmative vote on the proposition and any names recommended for dispenser shall be considered by the manager in making an appointment, but he may appoint any other person.

[Form of ballot.]

1. No dispensaries.
2. Less dispensaries.
3. More dispensaries.
4. No change.

Name recommended for dispenser, ——— ———.

The judges and clerks, in holding such special election, shall be further governed by such rules and regulations as the board of control may prescribe as to the manner of conducting election and making the returns thereof. The board of control is hereby authorized and empowered to make rules and regulations for the holding, conducting and making returns of any special election not otherwise provided in this act, and all returns shall be made to the board of control and kept on file in the manager's office. If a majority of people entitled to vote at such special election shall vote "No dispensaries," then no dispensaries shall be established in such precinct until expressed otherwise at a subsequent election. And should any dispensary already exist, such dispensary shall be removed. If a majority of the persons entitled to vote shall vote "Less dispensaries," the board of control and manager shall proceed to remove one or more of the dispensaries previously established in such precinct. If the majority vote be for "More dispensaries," then the board of control and manager shall proceed to establish one or more dispensaries in such precinct. And if the majority should vote "No change," the board of control and manager shall make no change until otherwise recommended at a subsequent election.

SEC. 44. In the operation of the business management connected with the control, sale, and dispensation of intoxicants under the provisions of this act, where ambiguity appears in the statute or where there is doubt as to the meaning and intent of the law, such questions shall be referred to the board of control, and any rule of procedure promulgated by the board of control shall govern on such doubtful points until the meeting of the next legislature.

SEC. 45. No new liquor licenses of any kind, whether wholesale or retail, shall be issued from the date of the passage of this act. Nothing in the act shall be construed so as to affect in any way the rights of private dealers in liquors, granted to them by licenses already issued but none of such licenses shall be renewed upon the expiration of its term. On and from July first, nineteen hundred and one, the day when this act shall take effect, the board of control and the manager may, if they see fit, establish liquor dispensaries in any place, whether the local private license term is expired or not.

The manager may buy from licensed parties before the expiration of the term of license any stock that they may have on hand and willing to sell. Such sales will be subjected to the same provisions as enumerated in section fifteen of this act.

SEC. 46. The attorney-general shall at all times, when requested, furnish legal opinions and advice to the board of control or manager.

or any dispenser, concerning the control, management, and dispensation of intoxicants under the provisions of this act, without charge therefor, and shall prosecute all cases affecting the Territory. He may act with any county attorney and may authorize any county attorney to institute proceedings, either civil or criminal, on behalf of the Territory, provided that the county in which such county attorney resides is not a party in such proceedings.

SEC. 47. In all matters affecting the interests of any county the county attorney shall institute proceedings in court to protect the interests of such county and shall prosecute all violations of this act on behalf of the Territory. He shall render legal opinions and give legal advice to any officer under this act, upon application therefor, without charge, and the attorney-general and county attorney may act together or separately in all cases affecting either Territory or county arising under the provisions of this act.

SEC. 48. That all laws and parts or clauses of laws, together with pains and penalties thereunder, in conflict with this act are hereby repealed.

SEC. 49. That the sum of — dollars is hereby appropriated by the legislature for the biennial period, from any money in the public treasury not otherwise appropriated, for the pay roll of officers and other current expenses of the service under this act. This amount shall be credited to a fund for the general purpose of carrying out the provisions of this act as to the sale, control, and transportation of intoxicants under this act. Such fund shall be subject to the orders of the board of control. That the further sum of — dollars is hereby appropriated, out of any money in the public treasury not otherwise appropriated, to meet the expenses of organization and commencing the operation of the service under this act. This sum shall be a special fund of organization of the service relating to the sale, control, and transportation of intoxicants, and shall be subject to the orders of the board of control for the purposes of this act.

SEC. 50. This act shall take effect and be in force on and from July first, nineteen hundred and one.

EXHIBIT No. 4.—*House bill No. 65.*

Introduced March 21, 1901, by F. W. Beckley. First reading in house March 21, 1901.

AN ACT creating the office of transportation commissioner, fixing his salary and defining his duties, and duties of common carriers, and providing penalties for violation thereof, and repealing all laws in conflict herewith.

Be it enacted by the legislature of the Territory of Hawaii:

SECTION 1. That there is hereby created the office of transportation commissioner of the Territory of Hawaii.

SEC. 2. The transportation commissioner shall be elected at each general election in the same manner as members of the legislature, and shall hold his office for two years and until his successor is elected and qualified.

His term of office shall commence on the first day of January next after his election. The first transportation commissioner under this act shall be elected by the legislature, and shall hold office until the

thirty-first day of December, A. D. 1902, and until his successor elected and qualified, and he shall receive a salary of three thousand dollars per annum, payable monthly out of the Territorial treasury.

SEC. 3. Such commissioner, before entering upon the discharge of the duties of his office, shall take and subscribe the following oath, which shall be filed in the office of the secretary of the Territory, namely:

I do solemnly swear (or affirm) that I will support the Constitution of the United States and the organic act of the Territory of Hawaii, and that I will faithfully and impartially discharge the duties of transportation commissioner as provided by law to the best of my ability; that I am not in the employment of, and that I own no stock or bonds of, and am not otherwise pecuniarily interested directly or indirectly in any railroad, steamship, freight, or transportation company, or any other common carrier concern.

He shall give a bond in the sum of five thousand dollars, conditioned for the faithful and impartial discharge of his duties, to be approved by the governor and filed with the secretary of the Territory. The commissioner shall appoint two deputies, one of whom shall reside in Honolulu, and shall perform the clerical work in the main office, and another who shall reside at Hilo and perform the clerical work in the branch office to be established there by the commissioner, together with such other duties as the commissioner may impose on either deputy.

Each of said deputies shall receive a salary of one thousand dollars per annum, payable monthly out of the Territorial treasury, and in addition thereto the commissioner or his deputy shall receive ten cents per mile for each mile actually traveled, in excess of five miles at a time, in the discharge of his duties, which shall be paid out of the Territorial treasury.

The deputies so appointed shall have the same power and authority as the commissioner to act upon all matters connected with the duties of commissioner as provided by law, in the absence of the commissioner from either office. Such commissioner and deputies shall perform all the clerical labor of both offices, and shall be entitled to all other clerical assistance.

The commissioner may require a bond from his deputies, and the commissioner shall be responsible for the acts of his deputies.

SEC. 4. The commissioner of transportation shall have supervision over all persons, partnerships, and corporations, engaged as common carriers of passengers and freight within the Territory of Hawaii and upon the waters thereof, and over all charges made by any person, partnership, or corporation for the transportation of passengers, goods, merchandise, and other property from one place to another in the Territory, and shall inquire into any neglect or violation of the laws of this Territory on the part of any person, partnership, firm, corporation, or company engaged in transporting passengers, or freight for profit within this Territory or upon the waters thereof, or by the officers, agents, or employes of such persons, partnerships, firms, corporations, or companies. He shall inspect and examine the condition, equipment, and manner of management of any and each common carrier doing business exclusively within this Territory with relation to public safety and convenience.

He shall examine and ascertain the pecuniary condition and financial management of all common carriers. Whenever he shall receive complaint in writing, duly verified upon oath made by any person, firm,

corporation, or association, or any mercantile, agricultural, or manufacturing society, or association, or any body politic, or municipal organization, of any neglect or violation of law, specifying in particular and detailing the acts complained of, and naming the person or persons committing such violation of law, applicable to common carriers, the commissioner shall forthwith notify the person, persons, firm, corporation, or company complained of, in writing, specifying the charges set forth in such complaint and fixing in such notice a time and place at which he will investigate the same; and if, upon investigation, he shall find that the charges are well founded, he shall so decide, and the decision of the commissioner respecting such charges so investigated, shall be final and conclusive, unless appealed from within ten days from service of such decision, to the circuit court in the county where such investigation was made; unless due satisfaction be rendered to the complainant so aggrieved as decided by him, the commissioner shall, within twenty days from the expiration of the time for such appeal, report the facts of such investigation and his decision to the attorney-general of the Territory, who shall thereupon proceed at once to prosecute an action against such common carrier in the name and for the benefit of the complainant so aggrieved, at the expense of the Territory. Notice of appeal may be served upon the commissioner or either of his deputies, but after the attorney-general shall have commenced action, all papers thereafter shall be served upon him.

SEC. 5. During the month of February of each year the commissioner of transportation shall make a report to the Territorial treasurer as follows:

First. The actual cost of each railroad with all equipments, of each steamship, boat, or sailing vessel engaged exclusively in the transportation of freight and passengers, or either, from one place to another within the Territory.

Second. The actual gross receipts resulting from the operation of such railroad, steamship, boat, or sailing vessel during the next preceding year ending on the thirty-first day of December, inclusive.

Third. The total net earning resulting from the operation of any such railroad, steamship, boat, or sailing vessel during the next preceding year ending on the thirty-first day of December, inclusive.

Fourth. The total interest-bearing indebtedness of the person, partnership, or corporation owning or operating such railroad, steamship, boat, or sailing vessel; if more than one steamship, boat, or sailing vessel should be owned and operated under the same management, they may all be reported together, describing each and the amount of interest paid or dividends declared by such management during the next preceding year ending on the thirty-first day of December, inclusive.

The president or managing officer of every railroad or company owning and operating steamships, boats, or sailing vessels, and other persons, partnerships, or firms as common carriers, operating exclusively within this Territory or upon the waters thereof, including the channels and seas between the islands, shall, annually in the month of January of each year, make such report and returns to the commissioner of transportation, verified by the oath of such officer or person, or member of firm or partnership as shall afford the information aforesaid and such other information connected with such business of com-

mon carrier as the commissioner of transportation shall request, and at other times shall furnish within thirty days from the receipt of the commissioner's request such reports and returns as said commissioner shall require, which shall be duly verified under oath, and for such purpose he may prescribe blank forms, which shall be provided by the secretary of the Territory.

Sec. 6. Every person, partnership, firm, within this Territory as a common carrier v such report within the time prescribed the Territory one hundred dollars for each and be delayed.

All persons, firms, partnerships, or corporations taking effect of this act, be engaged in the business shall within twenty days give notice in writing transportation, stating the name or names of firm, or corporation, principal place of business, names of terminals, station names and residences of principal officers, such person, partnership, firm, or corporation ritory ten dollars for each and every day in d.

Sec. 7. Such commissioner of transportation his duties, shall have power to examine with send for persons, books, or papers, and at a business hours, from nine o'clock a. m. until have access to all books and papers of every su firm, or corporation doing business as a commu tory, and may copy or extract from the sam. may issue subpoenas requiring the attendance c duction of books and papers at such time as scribe. In case of disobedience of any subper nness to testify to any matter to which he may i it shall be the duty of the circuit court, in term the judicial district in which such investigation cation of the commissioner, to compel obedie proceedings for a contempt as in case of diso issued from such court, or a refusal to testify ish the offender accordingly.

Sec. 8. Such commissioner shall be provided at the capitol and a branch office at Hilo, and furniture, books, maps, supplies, stationery, and sary, at the expense of the Territory.

Sec. 9. No common carrier within the Territory demand, or receive from any person, company, or transportation of persons or property, either by a greater sum per mile or weight than shall be received from any other person, company, or services, or charge, demand, or receive from any corporation an unreasonable price for the transpor property, or for handling or storage of freight, or other carrying capacity, or for any privilege of such common carrier in the transaction of such bu common carrier refuse or neglect to convey perso one place to another, along their regular routes, capacity of such common carrier is exhausted; a

destination such freight shall be properly housed and protected and consignee promptly notified, by mail, of its arrival.

Any common carrier which shall violate any of the provisions of adding extortion or undue discrimination or any provision rates, shall be liable to the person aggrieved to three damages sustained as determined by the commissioner or by any circuit court, and for costs.

Any person, partnership, firm, or corporation owning or operating a road or steamship in this Territory or upon the waters thereof, shall collect, or receive a greater compensation for the transportation of persons than four cents per mile, and every such ship company shall sell at their ticket stations within their respective routes, tickets at a price not to exceed four cents per mile, but no railroad, steamship, or other common carrier shall be compelled to receive a single fare of less than five cents. Within six months after entering upon the discharge of duty, the commissioner of transportation shall fix a schedule of passenger rates for all common carriers in this Territory, whether operating upon land or water, and he shall cause the same to be published in circular or pamphlet form, which he shall distribute throughout the Territory.

The schedule shall be published two successive weeks in a weekly newspaper published in each county where a newspaper is published. Within ten days after the completion of such publication of rate schedule, any common carrier may cause said rates to be modified or complained of in circuit court, specially setting forth the grounds of complaint, and notice shall be served upon the transportation commissioner or deputy in the same manner as in civil cases. And the attorney-general shall attend in court and appoint a competent attorney to represent the Territory at

such hearing. When twenty days shall have expired after the last publication of the schedule relating to such rate schedule, all items in such schedule shall remain in force as provided in section 11 of this act and rates fixed therein shall be deemed reasonable rates, and no person, partnership, firm, or corporation doing business as a common carrier in this Territory who shall charge, demand, or receive any compensation or rate other than fixed in such rate schedule shall be liable therefor as provided in

section 11. The commissioner of transportation may from time to time change, amend, or add to such schedule of rates; but such changes, amendments, and additions shall be published in like manner and be subject to appeal and review in circuit court.

That if any person, firm, partnership, or corporation doing business in this Territory shall repeatedly violate the law and the provisions of this act, and shall neglect and refuse to conform to the orders of the transportation commissioner, if not appealed from, or if provided, the license, charter, or other evidence of right to operate as a common carrier in this Territory may be revoked upon application to the commissioner in any circuit court, upon proof of such violations of law or of refusal or neglect to conform to his orders, or if appealed from as by law provided, and such common carrier shall not be reinstated.

mon carrier as the commissioner of transportation shall request, and at other times shall furnish within thirty days from the receipt of the commissioner's request such reports and returns as said commissioner shall require, which shall be duly verified under oath, and for such purpose he may prescribe blank forms, which shall be provided by the secretary of the Territory.

SEC. 6. Every person, partnership, firm, or corporation operating within this Territory as a common carrier who shall fail to make any such report within the time prescribed therefor shall forfeit to the Territory one hundred dollars for each and every day the same shall be delayed.

All persons, firms, partnerships, or corporations who shall, after the taking effect of this act, be engaged in the business of common carrier, shall within twenty days give notice in writing to the commissioner of transportation, stating the name or names of such person, partnership, firm, or corporation, principal place of business, date of commencement of business, names of terminals, stations and routes, and the names and residences of principal officers, and for a failure thereof such person, partnership, firm, or corporation shall forfeit to the Territory ten dollars for each and every day in default of such report.

SEC. 7. Such commissioner of transportation, in the discharge of his duties, shall have power to examine witnesses, administer oaths, send for persons, books, or papers, and at any and all times during business hours, from nine o'clock a. m. until five o'clock p. m., shall have access to all books and papers of every such person, partnership, firm, or corporation doing business as a common carrier in this Territory, and may copy or extract from the same, and for that purpose may issue subpoenas requiring the attendance of witnesses and the production of books and papers at such time and place as he may prescribe. In case of disobedience of any subpoena or a refusal of a witness to testify to any matter to which he may be legally interrogated, it shall be the duty of the circuit court, in term or at chambers, within the judicial district in which such investigation is being held on application of the commissioner, to compel obedience by attachment and proceedings for a contempt as in case of disobedience of a subpoena issued from such court, or a refusal to testify therein, and shall punish the offender accordingly.

SEC. 8. Such commissioner shall be provided with a suitable office at the capitol and a branch office at Hilo, and with necessary office furniture, books, maps, supplies, stationery, and lights as are necessary, at the expense of the Territory.

SEC. 9. No common carrier within the Territory shall charge, demand, or receive from any person, company, or corporation, for the transportation of persons or property, either by carload or otherwise, a greater sum per mile or weight than shall be charged, demanded, or received from any other person, company, or corporation for like services, or charge, demand, or receive from any person, company, or corporation an unreasonable price for the transportation of persons or property, or for handling or storage of freight, or for use of its cars or other carrying capacity, or for any privilege or service afforded by such common carrier in the transaction of such business; nor shall any common carrier refuse or neglect to convey persons or property from one place to another, along their regular routes, unless the carrying capacity of such common carrier is exhausted; and at the end of its

destination such freight shall be properly housed and protected and the consignee promptly notified, by mail, of its arrival.

Any common carrier which shall violate any of the provisions of this act, forbidding extortion or undue discrimination or any provision of law establishing rates, shall be liable to the person aggrieved to three times the actual damages sustained as determined by the commissioner of transportation or by any circuit court, and for costs.

SEC. 10. No person, partnership, firm, or corporation owning or operating a railroad or steamship in this Territory or upon the waters thereof shall demand, collect, or receive a greater compensation for the transportation of persons than four cents per mile, and every such railroad or steamship company shall sell at their ticket stations within this Territory on their respective routes, tickets at a price not to exceed four cents per mile, but no railroad, steamship, or other common carrier shall be compelled to receive a single fare of less than five cents.

SEC. 11. Within six months after entering upon the discharge of his duties the commissioner of transportation shall fix a schedule of freight and passenger rates for all common carriers in this Territory, whether operating upon land or water, and he shall cause the same to be printed in circular or pamphlet form, which he shall distribute through the Territory.

Such schedule shall be published two successive weeks in a weekly newspaper published in each county where a newspaper is published. Within thirty days after the completion of such publication of rate schedule any common carrier may cause said rates to be modified or readjusted by complainant in circuit court, specially setting forth the items in such rate schedule complained of, and notice shall be served upon the transportation commissioner or deputy in the same manner as summons in civil cases. And the attorney-general shall attend in person or appoint a competent attorney to represent the Territory at such hearing.

SEC. 12. When twenty days shall have expired after the last publication of notice relating to such rate schedule, all items in such schedule not appealed from as provided in section 11 of this act and rates fixed on appeal shall be in force and shall be deemed reasonable rates, and thereafter any person, partnership, firm, or corporation doing business as a common carrier in this Territory who shall charge, demand, or receive a greater compensation or rate than fixed in such rate schedule shall be guilty of extortion and shall be liable therefor as provided in this act.

The commissioner of transportation may from time to time change, alter, or amend, or add to such schedule of rates; but such changes, alterations, amendments, and additions shall be published in like manner, subject to appeal and review in circuit court.

SEC. 13. That if any person, firm, partnership, or corporation doing business within this Territory shall repeatedly violate the law and the provisions of this act, and shall neglect and refuse to conform to the orders of the transportation commissioner, if not appealed from as by law provided, the license, charter, or other evidence of right to do business as a common carrier in this Territory may be revoked upon complaint by the commissioner in any circuit court, upon proof of such repeated violations of law or of refusal or neglect to conform to his orders, not appealed from as by law provided, and such common carrier shall not be reinstated.

SEC. 14. That the commissioner of transportation shall, whenever in his opinion it is by him deemed necessary for the public safety, commence proceedings on the behalf of the Territory for the condemnation of any railroad car, coach, or equipment, or for the removal of any apparent cause of danger to the traveling public connected with the management of any railroad, or about any wharf or landing, and shall make complaint to the proper Federal officer having charge of the inspection of steam or sailing vessels whenever he becomes satisfied that such steam or sailing vessel doing business upon the water of this Territory as a common carrier and not engaged exclusively in interstate commerce is defective, unseaworthy, or unsafe for the transportation of persons or property.

SEC. 15. That the sum of twelve thousand dollars is hereby appropriated for the purpose of carrying out the provisions of this act.

SEC. 16. That all laws and parts of laws in conflict with this act are hereby repealed.

SEC. 17. This act shall take effect and be in force from and after its approval and publication.

EXHIBIT No. 5.—*Senate bill No. 62.*

Introduced 28th day of March, 1901, by Senator John T. Brown
First reading in senate 28th March, 1901.

AN ACT to create, establish, and locate an agricultural college and model farm, providing for the management thereof, and appropriating money for its maintenance and development.

Be it enacted by the legislature of the Territory of Hawaii:

SECTION 1. There is hereby created and established an agricultural and model farm, to be connected with the entire agricultural and mechanical interests of the Territory of Hawaii; the said college and farm to be under the control and management of a board of regents consisting of five members, no more than two of whom shall be elected from the same county, and who shall hold office for four years and until their successors are elected and qualified, as hereinafter provided.

SEC. 2. The legislature, in regular session in the year 1901, shall by joint resolution, elect three regents to serve two years and two regents to serve four years. The legislature at each regular session thereafter shall elect such a number of regents as to keep the board complete. The board of regents, for good cause, may expel or remove any member from the board by giving notice and a hearing together with a written statement of the charges preferred. Any vacancy in said board caused by death, failure to qualify, removal, or any other cause, may be filled by the board until the next meeting of the legislature, provided that each member shall be given sixty days in which to qualify, and no officer or employe of the college and farm nor any member of the legislature or other person holding any office or shall not be a citizen of the United States, shall be eligible as such regent.

SEC. 3. The board of regents shall have power—

1. To elect a chairman from their own number a president of the college and farm, a secretary, a treasurer, professors and other teachers, superintendents of departments, a steward, a librarian, and suc

ber officers as may be required for the transaction of business connected with the college and farm; also to fix all salaries of officers and prescribe their duties, not inconsistent with this act; to appoint substitutes, who shall discharge the duties of such officers during their temporary absence.

2. To manage and control all the property of the college and farm, whether real or personal.

3. To make rules and regulations for the government of the college and farm.

4. To establish rules and regulations concerning the number of hours, which shall not be less than three each day, except Sundays and legal holidays, which shall be devoted to manual labor on the farm, and to fix the compensation therefor: *Provided*, That no student shall be exempt from labor except in case of sickness or other infirmity, or where students from the advanced classes may be employed as teachers.

5. To arrange courses of study and practice and to establish professorships as they may deem best to carry into effect the provisions of this law; also to prescribe conditions of admission to the college.

6. To grant diplomas, on the recommendation of the faculty, to any student who has completed either of the industrial courses prescribed by said board, or an equivalent thereof.

7. To remove any officer or member of the board by a majority vote of all the members to which the board is entitled.

8. To direct the expenditure of all appropriations which the legislature or congress shall make for the institution from time to time and all other income from all other sources.

9. To keep full and complete records of their proceedings and to do such other acts as may be found necessary to carry out the meaning and intent of this act.

SEC. 4. A majority of the regents shall be a quorum for the transaction of business.

SEC. 5. As compensation for their services the regents shall receive five dollars per day for each and every day actually employed in the discharge of their duties as members of such board and which shall appear upon the record as being under call of the president of the board: *Provided*, That such board may detail one or more members to perform committee work, and all such provisions for committee work shall be made at a regular or called meeting of the board, and the allowance for compensation for committees shall appear upon the record, and in no case shall such compensation exceed the rate provided herein for members of the board, nor shall the time in which any committee shall complete its labors be extended beyond ten days from the first day on which the committee begins its labors as such. Neither shall an amount in excess of five hundred dollars be expended for committee work in any year. In addition to the compensation in this section provided each member of the board of regents shall receive ten cents per mile for each and every mile actually traveled in the discharge of his duties: *Provided further*, That no member of the board of regents shall receive compensation for more than forty days in each year, including committee work.

SEC. 6. The annual meeting of the board of regents shall be held at the college on the second Wednesday of November in each year.

SEC. 7. The college year shall begin on Thursday after the second Wednesday in November each year, and end on the second Wednesday

in November of the following year. The board of regents shall make annual and biennial reports to the governor. The biennial report of the board of regents shall be filed with the governor not later than the fifteenth day of January preceding the regular meeting of the legislature, and the board of regents shall cause two thousand copies thereof to be printed and bound in paper to be distributed as follows: One thousand copies to the college for distribution by its officers and students under supervision of the college secretary, twenty-five copies to the county clerk of each county for distribution, and the remainder to the secretary of the Territory for use of the legislature and distribution otherwise.

SEC. 8. The president of the college and farm shall control, manage and direct the affairs of the college and farm subject to such rules as may be prescribed by the board of regents, and shall report to said board at its annual meeting and at such other times as may be directed by the board. The president's annual report shall be a showing of his acts as president, the condition of the several departments of the college and farm, together with his recommendations for the future management thereof.

SEC. 9. The secretary shall keep the documents and books of the college and record all the proceedings of the board of regents, attend all correspondence, and perform such other duties pertaining to his office as may be assigned by the president of the board of regents. All acts of the board of regents as to the management of the college, use of the lands, funds or other property of the institution shall be entered in the records of its proceedings, and such record shall show how each member voted on each proposition. The secretary shall prepare all reports after the subject-matter shall have been approved by the president or board of regents. Upon the election of any person to an office by and under said board, the secretary shall give notice to the secretary of the Territory. He shall also keep an account with the treasurer, charging him with all money paid to him and crediting him with the amounts paid out upon orders issued by direction of the board of audit, which account shall be balanced monthly.

SEC. 10. The president and secretary shall constitute a board of audit, who shall, under the rules of the board of regents, examine bills presented for payment, and no bill shall be paid without the joint approval endorsed thereon: *Provided*, That no bill shall be rejected which has been previously audited and allowed by the board of regents in session: *And provided further*, That no bill or account shall be audited or allowed, of any class or nature, for the payment of which the board of regents has not made appropriation. The board of audit shall examine the treasurer's books monthly, and at such other times and as often as said board of audit may deem advisable. All the proceedings as contemplated in this section shall be reported to the board of regents at each meeting. The board of audit shall tabulate all expenses of the institution and the results of experiments.

SEC. 11. The treasurer shall receive and keep all notes, contracts and evidence of indebtedness, and all moneys arising as income of the institution, such as sale of products of the farm, tuition of students and so much of appropriations made by Congress or the legislature may be drawn from time to time by order of the board of regents for use of the institution, and shall pay out money only upon orders drawn

by the secretary as above provided, and he shall pay no order against accounts for which no appropriation shall have been made by the board of regents. The treasurer shall keep an accurate account of all the receipts and expenditures of said college and farm arising from all sources and in such manner that the receipts and disbursements of each and every department shall be apparent at all times, and the gains and losses in each department shall be set forth in a report to the board of regents annually, and at such other times as said board may direct. He shall also execute duplicate receipts of all money received by him, specifying the source from which received and the fund to which it belongs and is credited, and such duplicate shall be filed with the secretary. No receipts for money paid to him shall be valid unless the duplicate is so filed. The treasurer shall be elected annually by the board of regents and shall give a bond with good and sufficient sureties in an amount fixed by the board of regents, and to be approved by the chairman thereof and filed with the secretary of the Territory.

SEC. 12. The president, secretary, and treasurer shall reside upon the college farm and shall take the official oath prescribed by law before entering upon the discharge of their duties, which oath shall be in writing and sworn to before any officer authorized to administer oaths, and shall be filed with the secretary of the Territory.

SEC. 13. Tuition in the college hereby established shall be forever free to pupils of this Territory over sixteen years of age who are citizens of the United States and who shall have resided in this Territory one year previous to their admission. Foreign pupils, or pupils from any other State or Territory of the United States, shall pay such tuition as the board of regents may prescribe, which shall be alike to all nonresident pupils.

SEC. 14. The course of instruction in said college shall include the following branches:

Natural philosophy, chemistry, botany, horticulture, forestry, floriculture, fruit growing, animal and vegetable anatomy, geology, mineralogy, meteorology, entomology, astronomy, zoology, veterinary surgery, plane mensuration, leveling, surveying, bookkeeping, and such mechanic arts as are directly connected with agriculture; also such other studies as the board of regents may from time to time prescribe not inconsistent with the purposes of this act.

The United States Government may at any time establish and operate an experimental station upon said farm and in connection with said college.

SEC. 15. No money shall be diverted from the fund to which it belongs or used for any other purpose than the purpose for which it was appropriated or provided by law. Any regent, officer, or employee of said institution who may by vote, direction, or other act violate the provisions of this section shall be deemed guilty of a misdemeanor, and upon conviction thereof shall be punished by a fine not exceeding one thousand dollars, or imprisonment in a county jail not exceeding six months, or by both such fine and imprisonment.

SEC. 16. The president shall provide for accommodations as to board and lodging for the board of regents during the terms of meeting and other visits free of expense to them, and any person who may wish to visit the institution shall be provided with like accommodations free of expense upon the following conditions: Such intending visitor shall apply to any member of the board of regents in writing, stating the purpose of his or her intended visit, and if such member of the board

may deem it advisable he may issue a written permit for such visit, but in no case shall such permit or visit exceed ten days at one time.

SEC. 17. That the site hereby selected for said agricultural college and model farm is upon the following-described land, to wit: Lots 137, 138, 139, 140, 141, 142, 143, and 144 of the "New Olaa tract," in the district of Puna and island of Hawaii, containing about five hundred acres, more or less. Such site, however, shall be subject to the approval of Congress.

SEC. 18. That the sum of twenty thousand dollars is hereby appropriated, out of any money in the Territorial treasury not otherwise appropriated, for the purposes of this act, which sum, or any part thereof, shall be subject to the order of the board of regents to be elected as in this act provided.

SEC. 19. This act shall take effect upon its passage and approval.

EXHIBIT No. 6.—*Senate bill No. 31.*

Introduced 11th day of March, 1901, by Senator Kanuha.

ACT 31.—An act to provide for a Territorial high school and a conservatory of music under the department of public instruction, in Hilo, island of Hawaii.

Be it enacted by the legislature of the Territory of Hawaii:

SECTION 1. It shall be the duty of the department of public instruction to establish as soon as practicable, in Hilo, Hawaii, a Territorial high school. The requirements for entrance and graduation and the course of study in said school shall be substantially the same as are now required in the Honolulu High School.

SEC. 2. It shall be the duty of the department of public instruction to establish and maintain, in connection with said high school, a special school of music to be known as the conservatory of music. The course of study in said conservatory, and the quality of the instruction given, shall conform as nearly as practicable to the standard required in similar institutions on the mainland.

SEC. 3. Students entering said conservatory may take any one or more of the special vocal or instrumental courses provided therein.

SEC. 4. The advantages of said conservatory shall not be confined to pupils of the Hilo High School, but shall be open to all persons who may desire to avail themselves thereof, and who may be able to conform to the requirements established for entering.

SEC. 5. Said conservatory shall be under the management and control of a director to be appointed by the department of public instruction. The director shall have under him such assistants as may be found to be necessary; such assistants to be appointed by the department of public instruction. The salaries of the director and the assistants shall be fixed by law.

SEC. 6. The rules and regulations for the conducting of said conservatory shall be made by the director, subject to the approval of the department of public instruction.

SEC. 7. Said high school and conservatory shall be regarded as a part of the public-school system of the Territory, and all instruction therein shall be free.

SEC. 8. This act shall take effect from and after the date of its publication.

EXHIBIT No. 7.—*House bill No. 44.*

Introduced 8th day of March, 1901, by Representative Sol. Kawaihoa.
First reading in house March 8, 1901.

AN ACT to establish and maintain school libraries.

Be it enacted by the legislature of the Territory of Hawaii:

SECTION 1. It shall be the duty of the department of public instruction to establish and maintain, in connection with the public schools of the Territory, a system of free school libraries.

SEC. 2. The amount allowed for each school library for the year 1901 shall be at the rate of one dollar for each pupil in said school as shown by the school register on the 31st day of December, 1900.

SEC. 3. The amount allowed for each school for each year thereafter shall be at the rate of fifty cents for each pupil in said school as shown by the school register on the 31st day of December in the year last preceding.

SEC. 4. The management and control of such school libraries shall be in the hands of library committees, to be constituted as follows: The school agent of the district, the principal of the school, and a third person selected by these two. In case the school agent and principal of the school shall be unable to agree upon the third member of the committee, said third member shall be appointed by the inspector of the island on which the school is situated. Said third member shall be a resident of the locality in which the school is situated.

SEC. 5. The books for the school libraries shall be purchased by the department of public instruction upon requisitions made by the various library committees. The department shall from time to time furnish to the library committees lists of books suitable for school library purposes. In making their requisitions the library committees shall not be absolutely bound to the lists furnished by the department, and the department shall have the power to strike off from any requisition any book or books not deemed suitable for school library purposes. No books of an immoral, sectarian, or denominational character shall be purchased.

SEC. 6. All books in the school libraries, except books of reference and sets of reading books, shall be available to the residents of the neighborhood as well as to the pupils in the schools, under such regulations as may be from time to time made by the department of public instruction.

SEC. 7. The principals of the schools shall act as librarians and shall be responsible for the care of the books.

SEC. 8. The necessary expense of fitting up cases or shelves for the accommodation of books, and any incidental expenses connected with carrying out the foregoing provisions, shall be paid from the appropriation for school libraries.

SEC. 9. For the purpose of carrying out the provision of this act for the years 1901 and 1902 there is hereby appropriated from the Treasury of the Territory the sum of twenty thousand dollars.

SEC. 10. This act shall take effect from the date of its publication.

EXHIBIT No. 8.

[Copied from page 238, senate journal, 1901, first legislative assembly, Hawaii.]

SENATE CHAMBER, *March 27, 1901.**To the Senate:*

Having repeatedly called the attention of this body to the fact that the short time accorded to the legislature is wasted in debate on trivial matters which are of no interest to the people of this Territory, while the passage of measures which were promised by all the political parties are delayed; that little or no work is being done by the several committees, as evidenced by failure to promptly report; that, as a whole, the senate is practically an inefficient body, and that the short time remaining in which to perform the responsible duties with which we are intrusted will prove utterly fruitless if present methods are continued:

In the name of all the people and of all the parties who have intrusted us with the high mission of state affairs, which involves life, justice, and property, and, in general, the good order of society and property of this young Territory, upon which the people of the whole union are looking with profound interest, I protest against such an order of things, and I appeal to the best elements of all parties and of all people to unite for the purpose of doing our plain duty to the people during the remaining half of the session. There is no time to waste.

Being unable to assume the heavy share of responsibility connected with my office under circumstances, and convinced that I can more fully perform my duty upon the floor of the senate, I therefore beg to tender my resignation as president.

N. RUSSEL.

EXHIBIT No. —.

ADDRESS OF T. J. RYAN ON BEHALF OF THE AMERICAN SETTLERS' ASSOCIATION OF HAWAII.

[In support of Senate bill No. 1344, introduced by Senator Mason in the first session of the Fifty-seventh Congress and now under consideration by the Senate Committee on Pacific Islands and Porto Rico, entitled "A bill to provide special laws for the Territory of Hawaii," also, incidentally touching upon labor and other conditions, chiefly relating to public lands, stock raising, farming, etc., from the standpoint of an individual citizen of the Territory.]

The Chairman of the Subcommittee on Pacific Islands and Porto Rico

SIR: In commencing this address I can use no words more fitting than the recommendation of President Roosevelt in his message to the Fifty-seventh Congress concerning Hawaii:

In Hawaii our aim must be to develop the Territory on the traditional American lines. We do not wish a region of large estates tilled by cheap labor; we wish a healthy American community of men who themselves till the farms they own. All our legislation for the islands should be shaped with this end in view; the well-being of the average home maker must afford the true test of the healthy development of the islands. The land policy should as nearly as possible be modeled on our homestead system.

Senate bill No. 1344 (Exhibit 19) is modeled along the lines of the homestead law of the United States modified so as to peculiarly suit

the public lands in Hawaii. This bill was prepared after long study of all the public land laws of the United States and of Hawaii. It is not a radical departure from those of the United States, which have stood the test for nearly half a century; neither is it a radical departure from the best features of the Hawaiian land law, as will appear upon careful consideration. I hold that section 73 of the organic act is merely a temporary provision and not the permanent "special laws" promised by the resolution of annexation. The lack of finish apparent in said section 73; in fact, the words "until Congress shall otherwise provide;" the unconstitutionality of its provisions (see *Gibson v. Choteau*, U. S. 13 Wall., p. 92) (Exhibit 14), together with the statement of Acting Secretary Ryan, "But it was the intention to continue those provisions in force for the present, at least" (see Exhibit 4, p. 19, hereto attached); also the statement of Judge Van Devanter, of the Interior Department, as follows: "Thus a system differing from that provided by the Revised Statutes is, for the present, provided for the Territory of Hawaii" (see Exhibit 4, p. 22)—this is further emphasized by the letter of Governor Dole to Secretary Hitchcock, dated Honolulu, November 9, 1900, in which he says:

Mr. J. F. Brown, commissioner of public lands, informs me that Mr. Baird, district attorney at the Federal court of the Territory of Hawaii, has recently told him that he has been instructed to inquire into the legality of Hawaiian land transactions since September, 1899, with authority to contest their validity, and that he is of the opinion that there is no authority in the Territorial government to sell public lands. (See Exhibit 4, pp. 36 and 37.)

This opinion by District Attorney Baird I have never had access to, and therefore can not set it out at length. No doubt it can be obtained by your committee from the Secretary of the Interior, and would undoubtedly throw much light upon this subject, as Mr. Baird was a competent attorney here on the ground, and thoroughly impartial. I am satisfied that his research and conclusions were of high value to this much complicated question.

It is true that Judge Van Devanter overruled District Attorney Baird, as will appear on page 39, Exhibit 4. But as the Interior Department can not pass upon the constitutionality of an act of Congress, but must interpret it as best it can, Judge Van Devanter's opinion by no means settles the matter. If at any time these transactions are taken before the United States Supreme Court—and no doubt some of them will—Judge Van Devanter's opinion would be of no avail.

It seems clear to me that Congress can not constitutionally delegate its own powers to a Territorial officer, and neither can it transfer the powers of the President to a Territorial officer in the matter of disposal of the public domain of the United States when the Constitution makes such clear provisions in reference thereto. (See Constitution, Article IV, section 3, paragraph 2; also see U. S. Wall., p. 92.) (Exhibit 14.)

Further delay in this matter is hazardous. No good can come of it. Land and labor are so closely related that one subject can scarcely be discussed without frequently mentioning the other. To procure profit from land labor must be employed, whether it be hired labor or labor performed by the owner. Cheap labor has a natural tendency to create high-priced land, and on the other hand high-priced labor has a tendency to create low-priced land. Heretofore cheap labor and high-priced land have prevailed in Hawaii, but fortunately conditions in this respect have reached high tide, if not slightly on the ebb.

There is, however, another peculiarly artificial cause which produces the effect of high land values in Hawaii, viz, overcapitalized corporations engaged exclusively in agriculture; in other words, sugar plantations. For instance, a syndicate purchases 10,000 acres of land at whatever price necessary to procure it, and at prices, sometimes, regardless of its actual value, from an individual American farmer's standpoint. Then this syndicate forms a joint-stock company, or corporation with a capital (on paper) about four times as great as the money actually invested. The land being the only visible and available asset, the price must necessarily be raised on the books of the company to offset the large amount of watered stock, which is a liability. In other words, every time the stock is watered the price of the land must be increased to make the books balance.

After all this is accomplished (principally on paper) this corporation proceeds to "till the farm it owns," not, however, with the end in view of creating "a healthy American community of men," but on the other hand to endeavor to earn dividends on this watered stock by the employment of cooly labor. Bad as this is, it is by no means the end of it. Everything must be done to "whitewash" this un-American business. I do not contend that the watered-stock operations are un-American. It is only too true that the American people and American statesman were slow to discover that it was a crime of great magnitude and far-reaching effect. It reached the individual American farmer through the railroads and other transportation companies indirectly, while in Hawaii it reaches him directly and lifts his scalp with as much neatness and dispatch as would do honor to an Indian warrior. It used to be slow death for the farmer on the mainland, while in Hawaii he was exterminated, practically electrocuted.

But the employment of Asiatics is un-American. If the so-called "captains of industry" can make slaves of American citizens they are welcome to try, but at opening the gates of the Orient we draw the line—a dead line, too. To continue this state of affairs in Hawaii under the American flag, political action must be cornered, the public press must be muzzled, the pulpit must be persuaded (in Hawaii cash procures the grace of God), public opinion must be molded, public officials must be bribed (which can easily be accomplished by letting such investors in stock in "on the ground floor")—in short, every avenue must be closed which does not lead to a sugar plantation. Can any sensible man believe that all this cuts no figure with the public lands? If so, let him scrutinize the record. Can he be persuaded that this state of affairs is conducive of producing the truth at Washington? If so, let him scrutinize the official and semiofficial reports; let him examine the testimony offered before the committees of Congress by officials and corporation lobbyists. In doing so he will find this artificial monstrosity politely named "existing conditions."

Cause and effect is the proper rule by which Hawaiian conditions should be measured, or if you please to call them "existing conditions." Corruption by any other name would smell as strong.

We not only ask Congress to pause and briefly consider official action, but we also ask that it lead up to the source where the waters are poisoned. Corporations must say that the soil is rich for the same reason that they say the land is valuable, when in truth and in fact the soil is poor and unproductive. In evidence as to the quality of the soil, I need only produce the testimony of Dr. Walter Maxwell, a

scientist of recognized ability. (See pp. 23, 24, and 25, Bulletin No. 95, issued by the U. S. Department of Agriculture, 1901, entitled "Agricultural Resources and Capabilities of Hawaii.") To this we can add the testimony of numberless competent witnesses, if this commission can spare time to hear them. Clearing forest land at a cost of about \$125 per acre is no small item to the farmer and settler. Markets, so much complained of, seem to be scarcely within the control of Congress. It is a much-disputed question. There are those who claim Congress should be a market maker, while others claim Congress should keep its hands off. In the meantime, "while the doctors dispute the patient dies."

Again, density of population in Hawaii is offered as an excuse for the high price at which land, both public and private, is held. When examined, this excuse is as false as all others. At the last general election (1900) only 11,218 voters registered, while at the same election in Porto Rico, which is only about half the size of this Territory, 58,515 votes were cast. That this was a hotly contested election in Hawaii goes without saying. Thousands of Asiatics in Hawaii are calculated in support of the "density of population" argument.

At the general election in 1900 in this Territory there were registered 11,218 voters and 10,163 votes were cast. This was a hotly contested election and a very large percentage of the total vote was cast.

The public-land laws and the public-land administration was an important issue in the election, and to my mind was the issue which decided the election against the local administration. This goes to prove that the arguments of the planters, through their lobbyists at Washington, during the Fifty-sixth Congress, such as "Existing conditions do not warrant any change," "Dense population in Hawaii," "Valuable land," and "The local land laws are satisfactory to the people," were wholly false.

In Porto Rico, at the same election, the World Almanac gives the total vote of that island, which is only about half the size of this Territory, as 58,515, and states in a footnote: "The Federals (who indorsed Mr. Bryan for President), just prior to the election, decided to make no contest." Therefore it would appear that there was not a full vote cast.

Hawaii has an area of 6,740 square miles while Porto Rico has an area of only 3,600 square miles—practically half the area of Hawaii. As to Porto Rico, the argument of "dense population" would be of some consequence, while in Hawaii it has no foundation in fact. (See Exhibit 20.) In this connection it will be interesting to go back and see how the Hawaiian oligarchy (under the name Republic), by property qualifications for voters and other means no less infamous, destroyed the voice of the people in public affairs, at which the land act of 1895 was passed and every public privilege and utility was divided among the manipulators as best suited their purposes.

The last vote cast under the Monarchy was	14, 217
First vote under the oligarchy in 1894	3, 052
Last vote under the oligarchy in 1897	1, 917
First vote, Territory of Hawaii, 1900	10, 163

I think these figures speak more eloquently than any words I could add as to whether or not the large masses of the people, either white or native, received much consideration at the hands of the oligarchy.

The legislature elected in 1894 passed the land act of 1895, as well

as passing the infamous "thumb-mark law," which brought forth such a storm of indignation from the independent and loyal Americans in these islands that the same legislature before adjournment repealed it, although when passed it was provided to take effect upon its passage and approval, and registration thereunder was commenced at Hilo and other places.

We now invite your attention to the report of the governor of the Territory of Hawaii (1901), pages 63 and 64.

From the table under the head "Number and nationality of unskilled plantation laborers" we take the following figures:

Years 1900 and 1901:

Japanese	27,537
Chinese	4,976

Total number of Asiatics so employed	32,513
--------------------------------------------	--------

Now turn to page 5, of the same report, and from the table showing the total number of Asiatics in the Territory we take the following:

Japanese	61,122
Chinese	25,742

Total Asiatics in the Territory	86,864
---------------------------------------	--------

From this it will clearly appear that there are 54,351 Asiatics in the Territory who are not employed on the plantations. Naturally the question arises, What are they doing? The answer is self-evident: They are in open competition with the white man, with the native Hawaiian, with every citizen in every walk of life. If in competition with any one class more than another, that is with the incoming farmer, for it must be admitted that heretofore there were practically no farmers in Hawaii. In addition to the sugar corporations on the lower lands, controlling practically all the land, both public and private, we wish to call your attention to the cattle barons on the highlands, who control practically all the lands, both public and private. (See Bulletin No. 95, issued by the U. S. Department of Agriculture, 1901, pp. 66, 67, and 68; also, see governor's report under the head "Small holdings," pp. 68-69; also under the head "Stock raising and dairying," pp. 69, 70, and 71; also Exhibit 33.)

It does not seem to be known in Hawaii that farming consists of a combination of raising crops, cattle, horses, mules, sheep, hogs, poultry, and more or less dairying. The local idea of a farmer undoubtedly is "the man with the hoe." Among those who are now improperly called farmers in Hawaii it is almost impossible to find a farm team of horses, mules, or oxen; an ordinary stubble plow is a curiosity outside of the sugar plantations; a harrow or cultivator is none the less so. The more modern farm machinery has never been seen or heard of, and a farmer with a mower and horse hayrake could charge admission to large audiences at such an exhibition. California straw in bales retails at \$30 per ton. An opportunity could be opened for farmers if the public land was surveyed and a uniform homestead law passed by Congress under the jurisdiction of the United States Land Department. In Hawaii there is no contest law allowing the contest of illegal or abandoned entries, and no law requiring the publication of final proof notice. It is needless to say that all kinds of public-land fraud is practiced. There is no appeal allowed.

The decisions of the United States Supreme Court in the insular

cases bear out the settlers who settled in the New Olaa tract prior to April 30, 1900, in the contention that the Constitution of the United States has at all times and under all circumstances governed the public domain of the United States in the Hawaiian Islands from and after the 7th day of July, 1898, and that all laws enacted and other official acts concerning such public domain is subject to the constitutional limitations, and that all laws and official acts contrary thereto are void.

The status of Hawaii is clearly defined, although the Constitution had to be woefully stretched to cover other insular acquisitions. The court decides that after acquisition the provisions of the Constitution immediately extend to the acquired territory until such time as Congress organizes it under a civil law, and that Congress can then extend the Constitution to such Territory at its pleasure; but, "that where the Constitution has been once formally extended by Congress to the Territories, neither Congress nor the Territorial legislature can enact laws inconsistent therewith."

Section 5 of the organic act reads as follows:

That the Constitution, and, except as herein otherwise provided, all the laws of the United States which are not locally inapplicable, shall have the same force and effect within the said Territory as elsewhere in the United States: *Provided*, That sections eighteen hundred and fifty and eighteen hundred and ninety of the Revised Statutes of the United States shall not apply to the Territory of Hawaii.

One of these sections so excepted relates to religious and charitable institutions and the other to approval of the laws passed by the Territorial legislature. Thus the Constitution and all the laws of the United States, with the two exceptions above named, were extended to Hawaii, and Congress and all courts and all officers are bound to govern themselves accordingly. In the Foraker Act the Constitution was not extended to Porto Rico, and experiments will be tried there, but not in Hawaii. The decisions plainly show the United States can not carry out any provision of the annexation resolution which conflicts with the Constitution, and wipes out a whole paragraph of the resolution relating to the collection of customs. We will now see what a former Supreme Court says about the public domain. (See Exhibit 14, hereto attached.)

How will some of our local land deals "on the side" fit up to these requirements? They don't gibe. It is evident that the first public-land case taken to the United States Supreme Court from Hawaii will cause some consternation among the land speculators in this Territory, and it is equally evident that every land transaction, especially after the 28th day of September, 1899, will be totally wiped out.

The Territorial land department claims to be authorized under section 73 of the organic act. Let us see if it is true. I quote from pages 28 and 29 of report of the commissioner of public lands for the year ending December 31, 1900, submitted to the legislature. (Exhibit 4, pp. 28 and 29.)

PUBLIC LANDS NOTICE, Olaa tract, Puna, Hawaii:

On Thursday, September 20, at the office of E. D. Baldwin, Hilo, Hawaii, will be sold at public auction about 200 lots of 50 acres each at upset prices of from \$1 to \$12 per acre on following terms and conditions:

Purchaser may not acquire more than one lot. The purchase price of the land to be paid within ten years, either in full at any time within said period of ten years or in installments of one or more tenths of the purchase price on any interest date.

Interest at the rate of 6 per cent per annum from date of agreement on unpaid balance of purchase price, payable semiannually, in advance. Purchaser shall substan-

tially improve his holding, within one year from date of agreement and shall from the end of the second year have under cultivation at all times not less than 10 per cent of the premises. To entitle him to patent grant, giving fee simple title, he shall continuously maintain his home upon the premises for a term of six years and have at the end of such term 25 per cent of the premises under bona fide cultivation, and shall have maintained his home continuously upon the premises for four years and have under cultivation at the end of such period 50 per cent of the premises, such maintaining of a home to begin at any time before the end of the fourth year from date of agreement. He shall plant, if not already growing, and maintain in good growing condition from end of second year until termination of agreement an average of not less than 10 timber, shade, or fruit trees per acre. He shall allow the agent of the government at all times to enter and examine the premises and shall pay all taxes that may become due on the same.

At the end of the tenth year, or earlier if all conditions necessary thereto have been substantially complied with, the purchaser shall be entitled to a land patent conveying in fee simple title to the land described in agreement of sale. In case of default or failure to perform the required conditions the commissioner may take possession of the premises and may sell the same at auction, either as a whole or in parcels, for cash or on terms of time payments; and if such sale results in advance on the original price, the original purchaser to receive therefrom the amount of his payments to the government on account of purchase without interest and a pro rata share in such advance in proportion to the amounts of his payments. If such sale shall result, however, in a less price than the original, the amount returned to him shall be charged with a pro rata amount of such decrease proportioned to the amount of his payments.

An agreement of sale covering such conditions shall be made with the government, and no assignment of interest under such agreement shall be made without the written consent of the commissioner of public lands.

J. F. BROWN,
Commissioner of Public Lands.

AUGUST 1, 1900.

Now, I challenge anyone to find these terms and conditions in any land law, either of the United States or of Hawaii. Yet the Supreme Court, in the above-mentioned case, says:

Congress has the absolute right to prescribe the times, the conditions, and the mode of transferring this property, or any part of it, and to designate the persons to whom the transfer shall be made.

Did Congress do that? No; J. F. Brown did it. He was the law unto himself. Congress could not legally and constitutionally delegate to J. F. Brown any such power, if it intended to do so, and Congress never intended to do so. Congress has not done so, either by section 7 of the organic act or in any other way.

The deal lately made with the Oahu Railway Company is on a par with the above, and the transaction should be set aside in the courts before the people's money is squandered on a wharf of which, no doubt, the railway company will be the chief beneficiary after it is constructed, and the title will not be worth the paper it is written on (See Exhibit 22.)

By section 7 of the organic act (on page 3) sections 1828 to 1832 relating to water rights, were repealed by Congress, yet that does not dismay Territorial officials. To avoid any conflict with this law of Congress, they lease the whole watershed when they find a man who will pay for it. Instead of retailing water rights, which was estopped by the organic act, they now enter into the wholesale business on a large scale, as shown by the public press.

[From Hawaii Herald, Hilo, March 13, 1902.]

Mr. H. P. Baldwin purchased the leases of the large Maui tracts offered for sale in the Koolau district. For the 12,500 acres at Koolau he paid \$1,100 per year for a term of twenty-one years, being \$100 in excess of the upset price. For the second tract in the Koolau district Mr. Baldwin bid the upset price, \$4,000 per annum, for a term of twenty-one years.

In connection with the above we wish to call the attention to the evidence given by Governor Dole before the House Committee on Territories of the United States Congress, April 18, 1902. It is entitled: "Statement of Hon. Sanford B. Dole, governor of the Territory of Hawaii." (Copied from page 8.)

Mr. ROBINSON. Now, there were leases recently granted of considerable lands by the government of Hawaii?

Governor DOLE. Yes, sir.

Mr. ROBINSON. How many thousands or hundreds of thousands of acres within the last few times of bidding?

Governor DOLE. I do not know; I do not carry these things in my head.

Mr. ROBINSON. The public press says that 12,000 acres was granted to one.

Governor DOLE. I can tell you all about that; that is a very recent thing—those leases.

Mr. ROBINSON. It is not a search as to particulars, unless you care to make it; it is only to ascertain the facts if these leases are granted.

Mr. FLYNN. Let him explain.

Mr. ROBINSON. If he desires to do so.

Governor DOLE. That is a lease of forest lands without any privilege of cultivation, to protect the forest, with only the privilege of taking the water. Those two leases made an aggregate of 12,000 acres. It was put up at auction with the conditions in regard to the water and forest and was bought by Mr. Baldwin at the upset price. There was no competition.

Mr. ROBINSON. You do not interpret that to be agricultural lands?

Governor DOLE. No.

Mr. ROBINSON. If it were agricultural lands, you could not grant a lease for the term that was granted for this forest land?

Governor DOLE. Yes; we could.

Mr. ROBINSON. What is the limitation upon the granting of leases for agricultural lands?

Governor DOLE. None whatever—yes. You mean in regard to the time; that is five years.

Mr. ROBINSON. For what length of time did you grant this lease?

Governor DOLE. Twenty-one years.

Mr. ROBINSON. Could this land in any sense be agricultural land within that time?

Governor DOLE. There may be places picked out here and there, but by the conditions no part can be used for agricultural lands. It is a forest reserve.

In conclusion, allow me to say: If Congress and the Administration at Washington are going to let the present state of public affairs in Hawaii continue as it now is; if there is going to be no change made in the public land laws of this Territory; if we are to have no right of contest and appeal as in other Territories; if the islands are to be given over entirely to corporate control and occupation; if final proof upon public lands are to be smuggled through without publication of notice; if exorbitant prices for poor land are to be extorted from the poor settlers, with usurious rates of interest, viz, 8 per cent semiannually in advance, and—

In case of default in the payment of any of the said installments for thirty days after the same are due, respectively, or failure of performance of any of the said conditions, the commissioners (now commissioner), with the approval of the cabinet (now governor), may take possession of such premises without notice, demand, or previous entry, and with or without legal process, and thereby determine the estate created by such freehold agreement. (See civil laws, sec. 253, same as land act, sec. 69, Exhibit 1, p. 34.)

Did Shylock ever draw a bond more binding? Shall Shylock take his bond without the admonition that he "shed not one drop of blood?" If ye be Christians, representing a great Christian nation, can you not understand that one tear drop of undeserved poverty will weigh more

in the sight of God than all the sugar raised and gold gathered on these islands in a thousand years?

After four years since annexation, show me a perceptible advance in the standard of citizenship in this Territory. Do you not see on every hand the evidence of cringing servility such as you would scarcely expect to find in the most tyrant-ridden monarchies of Europe? Why this official intimidating contingent that dogs at your heels? Too well they know their evil power. Shall officers in high positions appointed by the President, who shamelessly solicit cool labor for greedy corporations, while the country is groaning under that incubus go unrebuked, while American citizens starve for want of employment? I say to you, Senators, representing a great nation of free men, a grave responsibility rests upon you in making your report to the American Congress of your investigations in Hawaii. Let the words of Goldsmith ring in your ears:

But a bold yeomanry, their country's pride,
When once destroyed can never be supplied.

If, however, on the other hand, "you wish a healthy community of men, who themselves till the farms they own;" if you regard "the well being of the average home maker as the true test of the healthy development of the islands," then "shape your public-land policy as nearly as possible on your homestead system." Regard those who say you nay as enemies of our common country. Plant in these fair isles that "bold yeomanry" which has borne our beloved flag of freedom so nobly and so honorably, on land and on sea, at home and abroad. If you do, the present and the coming generation will bless you. Should you return four years hence, you may sing with Whittier, as Cobbler Keezar's vision appears:

He held up the mystic lapstone,
He held it up like a lens,
And he counted the long years coming
By twenties and by tens.

"One hundred years," quoth Keezar,
"And fifty have I told;
Now open the new before me
And shut me out the old!"

Like a cloud of mist the blackness
Rolled from the magic stone;
A marvelous picture mingled—
The unknown and the known.

Still ran the stream to the river,
The river and ocean joined,
And there were the bluffs and the blue sea line,
And the cold north hills behind.

But the mighty forest was broken
By many a steepled town,
By many a white-walled farmhouse,
And many a garner brown.

Turning a score of mill wheels,
The stream no more ran free;
White sails on the winding river,
White sails on the far-off sea.

Below in the noisy village
 The flags were floating gay,
 And shone on a thousand faces
 The light of a holiday.

Swiftly the rival plowmen
 Turned the brown earth from their shares;
 Here were the farmers' treasures,
 There the craftsman's wares.

Golden the goodwife's butter,
 Ruby the currant wine;
 Grand were the strutting turkeys,
 Fat were the beeves and swine.

Yellow and red were the apples,
 And the ripe pears russet brown,
 And the peaches had stolen blushes
 From the girls who shook them down.

And with bloom of hill and wildwood,
 That shame the toil of art,
 Mingled the gorgeous blossoms
 Of the garden's tropic heart.

T. J. RYAN.

MOUNTAIN VIEW, HAWAII, *September 20, 1902.*

EXHIBIT 1.

LAND ACT, 1895.

ACT 35.—An act relating to public lands, and amending sections 36, 39, and 40 of the Civil Code, relating to the care of Government lands; section 42 of the Civil Code, chapter 44 of the Laws of 1876, chapter 5 of the Laws of 1878, and act 48 of the Laws of the provisional government of the Hawaiian Islands, relating to the disposition of Government lands; sections 43 and 44 of the Civil Code, relating to the conveyances of Government lands; section 45 of Civil Code, relating to the surveys and maps of Government lands; sections 46 and 47 of the Civil Code, relating to land agents, and chapter 87 of the Laws of 1892, relating to homesteads, and repealing an act entitled "An act to create a sinking fund," approved December 31, 1864, and an act entitled "An act to relieve the royal domain of encumbrances and to render the same inalienable," approved January 3, 1865.

Be it enacted by the Legislature of the Republic of Hawaii:

SECTION 1. The short title of this act is "Land act, 1895."

PART I.—*Interpretation.*

SEC. 2. In this act, if not inconsistent with the context, "public lands" means all lands heretofore classed as government lands, all lands heretofore classed as crown lands, and all lands that may hereafter come into the control of the government by purchase, exchange, escheat, or by the exercise of the right of eminent domain or otherwise, except as below set forth.

"Commissioners" means commissioners of public lands.

"Subagent" means the subagent of the public lands of the district where the land under consideration is situated. "District" means the land district as constituted under this act where the land under consideration is situated.

"Land patent" means a government grant of real estate in fee simple.

A "general lease" means any lease made by the commissioners except those made under the provisions of parts 6 and 7 of this act, and all outstanding leases of government and crown lands.

A "land license" means a privilege granted by the government for the occupation of land for certain special purposes, such as the cutting and removal of timber, the removal of soil, sand, gravel, or stone.

"Homestead lease" means a lease of land made under the provision of this act for a term of nine hundred and ninety-nine years which is inalienable and not subject to attachment.

"Certificate of occupation" means an instrument preliminary to homestead lease, giving the applicant possession of land.

"Occupier" means a person entitled to the possession of land under a certificate of occupation.

"Right of purchase lease" means a lease with a right of purchase as provided by this act.

"Cash freehold" means a right of possession to land under an agreement called a freehold agreement under the provisions of this act.

"Freeholder" means a person holding land under a freehold agreement.

"Permanent improvements" means houses, fences, roads, reclamation of swamp land, the planting of trees, coffee and other perennial crops, and the clearing of land from forest growth, brush, or stone preliminary to the cultivation of the same.

Provided, however, That this act shall not apply to the following classes and descriptions of land, the property of the government, all of which shall remain under the control and management of the minister of the interior:

Town lots, sites of public buildings, land used for public purposes, roads, streets, landings, nurseries, tracts reserved for forest growth and conservation of water supply, parks, and all lands which may hereafter be used for public purposes. All land hereafter reserved by the commissioners for public purposes shall thereupon at once pass under the control and management of the minister of the interior.

The minister of the interior, with the consent of the executive council, shall have the authority at any time to turn over to the commissioners for the purposes of this act any lands or parts of lands reserved for public uses.

PART II.—*General provisions.*

SEC. 3. Public lands for the purpose of this act are hereby classified as follows:

1. *Agricultural lands.*—First class: Land suitable for the cultivation of fruit, coffee, sugar, or other perennial crops, with or without irrigation.

Second class: Land suitable for the cultivation of annual crops only.

Third class: Wet lands, such as kalo and rice lands.

2. *Pastoral land.*—First class: Land not in the description of agricultural land but capable of carrying live stock the year through.

Second class: Land capable of carrying live stock only part of the year, or otherwise inferior to first-class pastoral land.

3. *Pastoral agricultural land.*—Land adapted in part for pasturage and in part for cultivation.

4. *Forest land.*—Land producing forest trees but unsuitable for cultivation.

5. *Waste land.*—Land not included in the other classes.

[This classification was provided for in 1895—seven years ago. It was never right, much less so now.]

SEC. 4. All future leases of public lands in the classes of agricultural, pastoral, and pastoral-agricultural lands, except leases executed under the provisions of parts 6 and 7 of this act, may contain a proviso that the government may at any time, with reasonable notice and without compensation, except for improvements taken, take possession of any part of the premises covered by such leases which may be required for laying out and constructing new roads or improving or changing the line or grade of old roads, and taken from such premises soil, rock, and gravel as may be necessary for the construction or improvement of such roads: *Provided*, That such privilege of taking without compensation shall not extend to such parts of such premises as are under cultivation with annual crops or sugar until such crops shall be harvested, nor to such parts of such premises as are planted and cultivated with coffee, fruit trees, or other perennial crops, or occupied or improved with permanent improvements, except fences.

[Section 4 does not provide for nor authorize the local government to take land out of leases which the governor and commissioner talk so glibly about.]

SEC. 5. The commissioners of public lands may from time to time by public notice proclaim as a road or street any portion of the public lands not occupied under the provisions of parts 6 and 7 of this act.

PART III.—*General administration.*

SEC. 6. There shall be a board of three commissioners, composed of the minister of the interior and two persons appointed and removable by the president, with the approval of the cabinet, one of whom shall be designated the agent of public lands. Such board shall be designated the commissioners of public lands, and shall have the control and management thereof under the provisions of this act. The appointed members of the commission may be removed by the president with the approval of the cabinet.

SEC. 7. For the purposes of this act the republic is divided into the following land districts:

First district. That portion of the island of Hawaii known as Hilo and Puna.

Second district. That portion of the island of Hawaii known as Hamakua and Kohala.

Third district. That portion of the island of Hawaii known as Kona and Kau.

Fourth district. The islands of Maui, Molokai, Lanai, and Kaoolawe.

Fifth district. The island of Oahu.

Sixth district. The islands of Kauai and Niihau.

[So many land districts and so many officers are a nuisance and extraordinary expense. Two public land offices are sufficient.]

SEC. 8. The commissioners shall be represented in each district by an officer who shall be designated the subagent of public lands, who shall be appointed by the commissioners and be removable at their discretion.

SEC. 9. The commissioners shall have power from time to time to establish forms of all instruments necessary for carrying out this act, and not herein expressly provided for, and to make, alter, and revoke rules and regulations for surveying public lands, for the protection of

forests and reservations for forest growth, for the granting of licenses, for the management of all public reserves and unoccupied public lands, and for more fully carrying out the objects and purpose and guarding against evasions and violations of this act.

SEC. 10. The commissioners, with the approval of the cabinet, shall have power to purchase lands for homestead purposes with any fund that may be appropriated therefor.

[Provisions of section 10 could not stand.]

SEC. 11. The commissioners may from time to time appoint one or more persons in each district to be rangers of public lands, whose duties shall be to observe and see that the provisions of this act are complied with in their respective districts in relation to the obligation of tenants and grantees of public lands, and report to the subagent and otherwise to discharge such duties in relation to the public lands of the district as the subagent shall require.

[In place of section 11 we should have the contest law of the United States. See act of May 4, 1880.]

SEC. 12. The commissioners shall have authority to employ the necessary clerks and surveyors for carrying on the work of the commission and to fix their pay. They shall also fix the pay of subagents and rangers. The pay of the commissioners shall be fixed by the legislature.

SEC. 13. The agent of public lands shall be the active business representative of the commissioners, and shall, under their direction and through the subagents or otherwise, administer the affairs of the public lands under the provisions of this act, and shall have authority to administer oaths in all matters relating to the administration of the public lands.

SEC. 14. The powers and duties of subagents within their respective districts shall, subject to the control of the commissioners, and in addition to those otherwise provided in this act, be as follows:

1. To prevent unlawful occupation of or trespassing on public lands.
2. To cause all trespassers and persons unlawfully occupying public lands, and their effects, and all animals trespassing on such lands, to be removed therefrom, and such animals to impound according to law.
3. In the name of the government to enter on any public lands in order to take possession thereof, and to resume possession of public lands in case of surrender, forfeiture, or escheat.
4. To enforce contracts respecting sales, leases, licenses, or other disposition of public lands.
5. To recover rents, purchase moneys, and other moneys due the government in respect of any sales, leases, licenses, or other disposition of public lands, or for use and occupation thereof.
6. To recover money due the government for injury or damage done to any public lands by wrongful entry and occupation, or by wrongful removal therefrom, or destruction of any property of the government.
7. To bring such actions and proceedings as may be necessary to carry out the foregoing powers and duties in the name of the government, and to defend such actions brought against the government, and may be authorized in the courts of the district in relation to the public lands thereof.
8. To keep a record of all his official transactions, including all contracts made by him with individuals and between individuals in relation

public lands within his jurisdiction, and all surrenders, forfeitures, and escheats of such lands, and facts of the decease of any occupier, leasee, or freeholder, and names of the successors to their rights as such.

9. To administer oaths in all matters appertaining to the administration of the public lands.

[The laws of the United States provide that the Secretary of the Interior and Attorney-General shall do all these things.]

SEC. 15. All disputes, disagreements, or misunderstandings between the parties to any certificate of occupation, homestead lease, right-of-purchase lease, or freehold agreement, touching the construction of such instruments or in anywise relating thereto, which can not be amicably settled, shall be referred to the circuit judge in whose jurisdiction the premises in question are situated; and such circuit judge shall have full and exclusive authority in chambers without the intervention of a jury for adjudicating such matters, subject only to appeal to the supreme court.

[The only section in the whole land law on the question of appeal. Note well what it says.]

PART IV.—*Land patents.*

SEC. 16. Land patents shall be signed by the president and countersigned by the minister of the interior, and shall be stamped according to law, which stamp shall be paid by the purchaser.

[Unconstitutional.]

[Note well this infamous section 17. It has been locally dubbed "the charity section," for—like charity—"it covers a multitude of sins."]

SEC. 17. The commissioners may, with the consent of the executive council, sell public lands under lease, in parcels of [behold this and then see section 28, where 8-acre lots are provided for homesteads] *not over one thousand acres*, at public auction for cash. Upon any such sale and the payment of the full consideration therefor, a land patent shall be issued to the purchaser.

And they may, with such consent, sell public lands not under lease in parcels of not over six hundred acres at public auction, upon part credit and part cash, and deliver possession under an agreement of sale containing conditions of residence on or improvements of the premises sold, or of payment by installments or otherwise of the purchase price, or all or any of such conditions.

Which agreement shall entitle the purchaser to a land patent of the premises upon the due performance of its conditions.

The commissioners shall have authority to fix any upset price for all such sales for cash or part credit and part cash.

All such sales shall be held in Honolulu or in the district where the land to be sold is situated. Any person designated by the commissioners may act as auctioneer at such sales without taking out an auctioneer's license:

Provided, however, That land patents may be issued in exchange for deeds of private lands or by way of compromise upon the recommendation of the commissioners and with the approval of the executive council without an auction sale: *And further provided,* That the president

may, in his discretion, upon such recommendation and approval, execute quitclaim deeds for perfecting the titles of private lands where such titles are purely equitable or where such lands are suffering under defective titles, or in cases of claims to use of lands upon legal or equitable grounds.

SEC. 18. All proceeds of sales of public lands shall be set apart as special fund for the payment of the bonded indebtedness of the government or for the purchase of other lands, as provided by section 10 of this act.

[See resolution of annexation.]

PART V.—*General leases.*

SEC. 19. The commissioners may, at their discretion, make general leases of public lands for any number of years, not to exceed twenty one, at public auction, but no such lease shall contain a privilege of renewal nor be made for any land already under a lease which has more than two years to run. In no case shall it be lawful to collect rents on any such lease for more than one year in advance or to receive anything in the nature of a bonus for executing the same. Any such payment and receipt of rents for more than one year in advance or of such bonus shall render void the lease on account of which such advance rent or bonus is paid, upon proof thereof before any court having jurisdiction in such a case.

[NOTE.—There is not a word in the law allowing the Territorial commissioners to take out land from a lease for homestead or settlement purposes. Governor Dole is therefore “off” when he says so before the House Committee on Territories, United States Congress. (See printed report, page 9.)]

SEC. 20. Previous to the last two years of the term of any general lease the commissioners shall, with the approval of the cabinet, decide in regard to the premises covered by such lease whether the same shall be demised under a new lease or be reserved by the government for other disposition thereof under this act, or for forest improvements, or for the development of water supply, or other public uses or otherwise, or whether a part should be so reserved and a part demised under a new lease, and shall promptly notify the lessee of such lease of the nature of such decision.

SEC. 21. All general leases shall require the payment of rent in advance quarterly, semiannually, or annually.

SEC. 22. Any general lease may require the lessee to fence off his live stock from any government forest reservation or reservation for development of water supply lying adjacent to the leased premises.

SEC. 23. The commissioners may in their discretion allow any lessee of a general lease to hold the leased premises after the expiration of the term of such lease upon the conditions set forth in the lease, in case such premises are not disposed of at the expiration of the term of the old lease, but such holding over shall not in any case be allowed for a period longer than one year.

[Section 24 is manifestly wrong, as it allows a private trade between the commissioners and the lessee, with no notice to the public.]

SEC. 24. Any person or persons having at the date of the approval of this act the right of possession to any public land except wet land under any lease may, with the consent of the commissioners and the

approval of the executive council, obtain a land patent for the whole or any part thereof, not to exceed in any case one hundred acres in area each, in one parcel, upon complying with the following conditions:

1. The bona fide cultivation of not less than twenty per cent of the land to be patented, to the satisfaction of the commissioners.
2. The payment to the commissioners of the unimproved value of the premises to be patented, as appraised by the commissioners.
3. The substantial performance of all the conditions of such lease to be performed by the lessee up to the time of making application.
4. The surrender of the remainder of the premises described in such lease, which may be accepted by the commissioners at their option.

[There is no legal executive council now, the governor is "the whole thing." See section 68, organic act.]

Applications for land patents under this section must be made to the commissioners within six months from the date of the approval of this act, and if the application is successful the applicant shall have three years from the date thereof in which to comply with condition 1. In case the surrender of the remainder of the premises, as provided in condition 4, is not accepted by the commissioners the lease shall remain in full force as to such remainder.

Provided, That no person shall obtain more than one land patent under this section.

Payment of the purchase price of lands patented under this section shall be made as follows: One-fourth immediately upon a successful application for the right to purchase the land specified, and the balance in equal installments in two, four, and six years, respectively, from the date of such application, with interest annually at the rate of six per cent, provided that the applicant may pay any such installment before it is due, and thereby stop the corresponding interest.

[From page 9. Governor Dole's testimony before the House Committee on Territories, United States Congress, April 18, 1902.]

MR. ROBINSON. This is in excess of the time described by the organic law for leasing agricultural lands?

GOVERNOR DOLE. The government reserves the privilege to take out any lands that might be considered agricultural lands at any time during the lease for settlement purposes.

[Now, I say to the Senate commission that there is not a word of law authorizing the Territorial government or anyone else "to take out any lands that might be considered agricultural lands." Section 26 of the land act (Civil Laws, section 210) does not warrant it, neither does section 4, or Civil Laws, section 188. It is possible that the local officers may or do insert such a provision in the instrument conveying the lease, but inserting such a clause would amount to nothing with no law to that effect on the statutes. It could not be enforced, it has never been enforced, and it never will be enforced by the local officials. This whole story told at Washington, D. C., by Governor Dole, by J. F. Brown, former land commissioner, and by Boyd, present land commissioner, is all rot. It is practically false. It is told for the purpose of beguiling Congress into the belief that the governor or any land commissioner appointed by him would take land away from a corporation and give it to a settler. That kind of thing may go at Washington, but such a fool as to believe such a thing can not be found in the Hawaiian Islands.]

T. J. RYAN.!

receipt of such certificate by the occupier shall be an acceptance and affirmation of the stipulations and conditions therein set forth.

[No one takes land under the 999-year lease. Even Kanakas will not take land that way.]

CONDITIONS OF OCCUPATION.

SEC. 33. The right of possession of the occupier shall, in addition to the conditions set forth in section 41, be subject to the following special conditions:

1. He shall, before the end of two years from the date of the certificate of occupation, build a dwelling house on the said premises, unless a suitable dwelling house is already a part of the same.

2. He shall, before the end of two years from the date of the certificate of occupation, begin to reside on the said premises.

3. He shall continuously maintain his home on the said premises from and after the end of two years from the date of the certificate of occupation.

4. He shall, before the end of six years from the date of the certificate of occupation, reduce to cultivation and have in cultivation at one time not less than ten per cent of the said land, or reduce to cultivation and have in cultivation at one time not less than five per cent of the said land, and plant and keep in good growing condition on the said premises an average of not less than ten timber, shade, or fruit trees per acre thereof, if the same is classed as agricultural land;

Or if the same is classed as pastoral land, he shall, before the end of six years from the date of the certificate of occupation, fence in the same.

SEC. 34. If at the end of two years from the date of the certificate of occupation, it shall appear that the occupier has failed in performing either the first or second condition set forth in the last preceding section, or if at the end of six years from such date it shall appear that he has failed to perform either the third or fourth condition set forth in the last preceding section, the commissioners may take possession of such premises with or without legal process, and without notice, demand, or previous entry, and thereby determine the estate created by such certificate of occupation.

CONDITIONS OF LEASE.

SEC. 35. If at the end of the said six years it shall appear that the occupier has performed all of the said special conditions set forth in section 33 and also the conditions set forth in section 41, the agent of public lands shall certify to the president the performance thereof, who shall thereupon execute a lease in three parts in favor of the occupier for the term of nine hundred and ninety-nine years, which lease shall be countersigned by the minister of the interior. The occupier upon receiving such lease shall thereafter designate the lessee, which shall also be the designation of any successors to his rights under the same.

[This law is obsolete. Nine hundred and ninety-nine year leases are not wanted by anyone. Americans despise the idea.]

[No man with sense would take a 999-year lease.]

SEC. 36. One part of the said lease shall be filed in the office of the agent of public lands, another part filed in the office of the subagent, and the third delivered to the lessee upon his payment of a fee of five

ollars, the receipt of which shall be endorsed upon the said third part by the subagent. And no interest shall be conferred by such lease except upon delivery thereof as aforesaid and the payment of such fee, and the receipt of such lease by the lessee shall be an acceptance and affirmation of the stipulations and conditions therein set forth.

SEC. 37. If the person named as a lessee in any such lease shall fail to attend in person or through his agent duly authorized in writing at the office of the subagent and to pay such fee and to receive such lease, for six months after the expiration of six years from the date of his certificate of occupation the right of such person to such lease and to the land therein demised shall cease, and the said lease and the certificate of occupation relating thereto shall be void.

SEC. 38. Neither such certificate or lease or the interest of the occupier or lessee in the premises named in the same shall be assignable, either by way of mortgage or otherwise, except as below provided; neither shall such certificate or lease or the interest of the occupier or lessee therein, nor the buildings, improvements, or crops at any time placed or growing upon such premises be subject to attachment, levy, or sale upon execution, or upon any process in bankruptcy, nor upon any process issuing from any court of this country; neither shall the premises named in such certificate or lease or any part thereof be sublet.

Any occupier or occupiers, or lessee or lessees, holding the whole interest in a certificate of occupation of homestead lease, may at any time surrender such interest to the government by delivery of the certificate of occupation or lease to the subagent with the intention to surrender such interest properly endorsed thereon and signed by him or them in the presence of the subagent and duly acknowledged. Any such surrender shall release the occupiers or lessees from all further duty of performance of the conditions of the document surrendered. No surrender by a minor under eighteen years of age shall be valid except through a statutory guardian. Any two holders of such certificates or of such leases in any one district who are not in default in the performance of any of the conditions of their respective certificates of occupation or lease may, with the consent of the subagent and upon the payment to him of a fee of one dollar each, exchange their certificates of occupation or leases with each other, with or without any additional consideration therefor. In case of such exchange the fact of the exchange shall be endorsed by the subagent upon the said two certificates of occupation or leases and recorded in his book of records, and the occupiers or lessees, respectively, shall be liable for the performance of all unperformed conditions of the certificates of occupation or leases received by them in such exchange, and shall be relieved of the performance of all conditions in the leases given up by them. An occupier and a lessee may not exchange with each other.

[There is no use in discussing this proposition.]

SEC. 39. The right of possession of a lessee shall, in addition to the condition set forth in section 41, be subject to the following special condition:

He or his successors shall continuously maintain his home upon the leased premises.

SEC. 40. If it shall appear at any time that the lessee has failed in the performance of the said condition, or has done such acts or permitted such circumstances to exist as constitute a virtual abandonment

of the said premises as a home, the commissioners may, with or without legal process and without notice, demand, or previous entry, take possession of the demised premises and thereby determine the estate created by such lease.

SEC. 41. The right of possession of an occupier or lessee to the premises held by them, respectively, under a certificate of occupation or a homestead lease shall, in addition to the special conditions set forth in sections 33 and 39, be subject to the following conditions:

1. He shall pay the taxes assessed upon said premises within sixty days after the same are delinquent.

2. He shall perform any condition in such certificate of occupation or lease for the planting of trees, the protection of trees growing or to be planted on such premises, and any condition of such certificate of occupation or lease for the destruction of vegetable pests that may be on such premises, or for the prevention of the future introduction of such pests thereon.

[It is foolish and anyone is foolish to give it even passing attention.]

SEC. 42. The violation of any of the foregoing conditions shall be sufficient cause for the commissioners to take possession of the demised premises with or without legal process and without notice, demand, or previous entry and thereby determine the estate created by such lease.

SEC. 43. In case of the death of any occupier or lessee, all the interest of such occupier or lessee, any conveyance, devise, or bequest to the contrary notwithstanding, in land held by such decedent by virtue of a certificate of occupation or homestead lease shall vest in the relations of the decedent as follows:

1. In the widow or widower.

2. If there is no widow or widower, then in the children.

3. If there are no children, then in the widows or widowers of the children.

4. If there are no such widows or widowers, then in the grandchildren.

5. If there are no grandchildren, then in the fathers.

6. If there is no father, then in the mother.

7. If there is no mother, then in the brothers and sisters.

8. If there are no brothers and sisters, then in the widows or widowers of the brothers and sisters.

9. If there are no such widows or widowers, then in the nephews and nieces.

10. If there are no nephews or nieces, then in the widows or widowers of the nephews and nieces.

11. If there are no such widows or widowers, then in the grandchildren of the brothers and sisters.

12. If there are no grandchildren of any brother or sister, then in the Republic of Hawaii.

And all such successors, except the Republic of Hawaii, shall be subject to the performance of the unperformed conditions of such certificate of occupation or lease in like manner as the decedent would have been subject to such performance if he had continued alive.

[It was a fool law to start with and is doubly foolish now.]

Provided, however, That if a widow or widower in whom such interest shall have vested, as aforesaid, shall thereafter marry again and decease leaving a widower or widow and a child or children of such first marriage surviving, the interest of the deceased shall in-
vest in the child or children.

in such child or children: *And further provided*, That in case two or more persons succeed together to the interests of any occupier or lessee, according to the foregoing provisions, they shall hold the same by joint tenancy so long as two or more shall survive, but upon the death of the last survivor the estate shall descend according to the provisions of the first part of this section. And in case of such joint tenancy the continuous residence of any such tenants upon the premises shall be sufficient performance of the conditions of residence set forth in sections 33 and 39.

SEC. 44. In case of the death of an occupier or lessee the interest of the successors shall not be liable to forfeiture during a period of six months from such death. If no successors to the deceased tenant take possession of the premises within a year from the death of such tenant, the premises shall thereupon vest in the government.

[Evidently the work of some theorist.]

SEC. 45. In case two or more persons succeed together to the interest of an occupier or lessee, any one or more of such persons less than the whole number may file in the office of the subagent an offer to the remainder of such persons to buy their interest in the premises or to sell to them their own interest therein at a stated price according to the proportion of the respective interest in question, and may deposit with the subagent the amount of such offered price in money, with a fee of ten dollars. The subagent shall thereupon notify the parties to whom such offer is made of the nature of the offer and order them to file with him their answer within sixty days, whether they will buy or sell according to such offer. If the parties to whom such offer is made file with the subagent within sixty days of the time of their receiving such notification of their answer stating that they will sell their interest according to the terms of the offer, the subagent shall endorse the fact of such sale with the amount of the consideration on the certificate of occupation or the lease, as the case may be, and pay to such parties the amount of such consideration deposited with him according to their individual interest; and the interest of such parties shall thereupon vest in the parties making the said offer. The fact of such transfer shall be properly recorded in the official records of the subagent and endorsed upon the certificate of occupation or lease held by the occupier or lessee. If, however, the parties to whom such offer is made fail to answer within sixty days from the time of their being notified of such offer or within sixty days from the time the notice of such offer is mailed to their last known place or places of abode, or shall answer within sixty days that they will buy the interest of the parties making such offer on the terms offered, but fail within sixty days after such notification to deposit the amount representing the value of such interest according to the terms offered, their interest shall vest in the parties making the offer, and the amount of such consideration shall be paid by the subagent to them individually or their respective representatives upon application. In such case the fact of such transfer shall be recorded and endorsed as above provided.

[It don't work.]

But if the parties to whom such offer is made shall, within sixty days from the time of such notification, make answer to the subagent that they will buy the interest of the offering parties and shall deposit within sixty days with him the amount required for such purpose according to the terms of the offer, the subagent shall endorse and

of the said premises as a home, the commissioners may, with or without legal process and without notice, demand, or previous entry, take possession of the demised premises and thereby determine the estate created by such lease.

SEC. 41. The right of possession of an occupier or lessee to the premises held by them, respectively, under a certificate of occupation or a homestead lease shall, in addition to the special conditions set forth in sections 33 and 39, be subject to the following conditions:

1. He shall pay the taxes assessed upon said premises within sixty days after the same are delinquent.

2. He shall perform any condition in such certificate of occupation or lease for the planting of trees, the protection of trees growing or to be planted on such premises, and any condition of such certificate of occupation or lease for the destruction of vegetable pests that may be on such premises, or for the prevention of the future introduction of such pests thereon.

[It is foolish and anyone is foolish to give it even passing attention.]

SEC. 42. The violation of any of the foregoing conditions shall be sufficient cause for the commissioners to take possession of the demised premises with or without legal process and without notice, demand, or previous entry and thereby determine the estate created by such lease.

SEC. 43. In case of the death of any occupier or lessee, all the interest of such occupier or lessee, any conveyance, devise, or bequest to the contrary notwithstanding, in land held by such decedent by virtue of a certificate of occupation or homestead lease shall vest in the relations of the decedent as follows:

1. In the widow or widower.

2. If there is no widow or widower, then in the children.

3. If there are no children, then in the widows or widowers of the children.

4. If there are no such widows or widowers, then in the grandchildren.

5. If there are no grandchildren, then in the fathers.

6. If there is no father, then in the mother.

7. If there is no mother, then in the brothers and sisters.

8. If there are no brothers and sisters, then in the widows or widowers of the brothers and sisters.

9. If there are no such widows or widowers, then in the nephews and nieces.

10. If there are no nephews or nieces, then in the widows or widowers of the nephews and nieces.

11. If there are no such widows or widowers, then in the grandchildren of the brothers and sisters.

12. If there are no grandchildren of any brother or sister, then in the Republic of Hawaii.

And all such successors, except the Republic of Hawaii, shall be subject to the performance of the unperformed conditions of such certificate of occupation or lease in like manner as the decedent would have been subject to such performance if he had continued alive.

[It was a fool law to start with and is doubly foolish now.]

Provided, however, That if a widow or widower in whom such interest shall have vested, as aforesaid, shall thereafter marry again and decease leaving a widower or widow and a child or children of such first marriage surviving, the interest of the deceased shall invest

In case of the surrender, forfeiture, or escheat to the government of a homestead lease, the land held thereunder may be sold or otherwise disposed of, and the proceeds of such sale or disposal, charged with the value of the permanent improvements thereon, as a homestead lease, a right of purchase shall be granted, or may be reserved for public use of the United States. If such premises are homesteaded by the United States, the unimproved value thereof and the value of the improvements thereon shall be appraised by the General Land Office, and shall be made by a board consisting of three members, one of whom shall not be a person holding a general land office position. The appraisement shall be subject to review by the General Land Office. The appraisement adopted by them shall be conclusive. If the premises may be appraised and sold, the proceeds of such sale may be disposed of under the provisions of the Act of March 3, 1879, in right of purchase lease, and the proceeds of such sale, less the cost of improvement, it may be used for the purpose of purchasing a new lease. But if such premises are not sold, the proceeds of such sale shall be offered at public sale, and the proceeds of such sale, less the value of the permanent improvements thereon, shall be paid to the United States, and the balance thereof shall be paid to the lessee.

record the fact of such sale as above provided, and pay to the offering parties the said amount according to their individual interests; and the interest of the offering parties shall thereupon vest in the answering parties. In such case the consideration money deposited by the offering parties shall be returned to them.

SEC. 46. The limit of sixty days above provided in which parties shall answer shall date from the time the last person entitled to notification is notified, in the manner above set forth. No transfer of interests in a certificate of occupation or a lease owned by two or more persons, as provided in section 45, shall be valid if any of the said persons are minors under the age of eighteen years unless such minor are represented by statutory guardians.

SEC. 47. Land held by two or more persons under a homestead lease shall not be subject to partition.

SEC. 48. In case the interest in any such certificate of occupation or lease should vest solely in a married woman or a minor under the age of eighteen years under the provisions of section 43, the conditions of residence set forth in sections 33 and 39 shall be satisfied, respectively during coverture of such married woman, or during the time such minor is under eighteen years of age, by the residence of an agent.

SEC. 49. In case two occupiers or one occupier and one lessee should intermarry not less than twelve months after the date of the most recent certificate of occupation taken out by either of them, the said conditions of residence shall be satisfied by their residence on either of their holdings.

[It won't work.]

SEC. 50. Land held either under a certificate of occupation or under a homestead lease shall be liable to taxation as estates held in fee.

SEC. 51. Certificates of occupation and homestead leases shall not require to be stamped.

SEC. 52. In case of a surrender by occupiers or lessees of their interest to the government, as provided in section 38, if all the conditions of the surrendered certificate of occupation or lease to be performed by the occupier or lessee up to the time of such surrender shall have been substantially performed, the persons so surrendering such interest shall be entitled to receive from the government the value of the permanent improvements on the premises surrendered whenever such value shall be received by the government from a new tenant, according to the provisions of section 54, and the minister of finance is hereby authorized to pay the amount of such valuation upon the requisition of the commissioners out of any funds available for such purpose.

SEC. 53. In case the interest of a married woman, or a minor under the age of eighteen years, being the sole owner of a homestead lease under the provisions of section 43, shall be forfeited for nonperformance of condition of the certificate of occupation or lease when such forfeiture is due to such coverture or infancy, such owner shall be entitled to receive from the government the value of the permanent improvements on the forfeited premises whenever such value shall be received by the government from a new tenant according to the provisions of section 54, and the minister of finance is hereby authorized to pay the amount of such valuation upon the requisition of the commissioners out of any funds available for such purpose.

[It's no good.]

SEC. 54. In case of the surrender, forfeiture, or escheat to the government of a homestead lease, the land held thereunder may be held open for settlement, charged with the value of the permanent improvements thereon, as a homestead lease, a right of purchase lease, or a cash freehold, or may be reserved for public uses in the discretion of the commissioners. If such premises are held open for settlement as aforesaid the unimproved value thereof and the value of the permanent improvements thereon shall be appraised separately. The appraisement shall be made by a board consisting of the subagent and another person to be appointed by the commissioners. Such appointed appraiser shall not be a person holding a government office. Said appraisement shall be subject to review by the commissioners, and the appraisement adopted by them shall be good for one year, after which time the premises may be appraised anew as aforesaid. If the premises shall be disposed of under the provisions relating to homestead leases or right of purchase leases, the new tenant shall pay for such permanent improvements in cash upon receiving his certificate of occupation or lease. But if such premises are held for settlement as a cash freehold they shall be offered at auction at the aggregate sum of the appraised value of the permanent improvements and the unimproved value thereof as an upset price.

[Relinquishment back to the Government or cancellation by contest is the proper and just way, as per act of May 14, 1880.]

PART VII.—*Right of purchase leases and cash freeholds.*

SEC. 55. The commissioners of public lands, with the approval of the cabinet, are hereby authorized and instructed to cause to be surveyed and set apart from time to time suitable portions of public lands for the occupation of such persons as may desire to obtain holdings under this part of this act. Such lands shall be selected only from agricultural and pastoral lands, and shall be laid out in lots of not over one hundred acres in first-class agricultural land, not over two hundred acres in second-class agricultural land, not over two acres in wet land, not over six hundred acres in first-class pastoral land, not over twelve hundred acres in second-class pastoral land, and not over four hundred acres in mixed agricultural and pastoral land. Convenient roads as to grade and direction shall be surveyed connecting such lots with a public road.

[Cash freeholds should not be allowed. The man with ready money can buy, while the poor man who could and would work the land is shut out.]

[Strike it out.]

APPRAISEMENT.

SEC. 56. Upon the completion of any such survey a board of appraisers, consisting of the subagent and another person appointed by the commissioners, shall appraise the same at a reasonable market rate and report such appraisement to the commissioners by a written statement clearly referring to the lots by number as laid out in the chart of the survey. Such appointed appraiser shall not be a person holding any other government office. And the surveyor shall furnish the commissioners with a copy of such chart, upon which is clearly marked in figures, within the lines defining each lot, the amount of the

appraisement thereof in dollars and cents, and a similar copy to the subagent, provided that such appraisement may be altered by the commissioners. Such charts of survey shall be open to public inspection during business hours, without charge.

[Instead of section 56 a standard price should be set on all of each class of lands. This manner of appraisement works great injustice.]

SEC. 57. The agent of public lands shall thereupon give public notice, in the English and Hawaiian languages, through newspapers and posters, and, if he deem it advisable, in any other language which newspapers in the Republic are published, and shall post such notice at the post-office and court-house of the district, declaring such lots to be open for settlement according to the provisions thereof this part of this act.

[There is no time stated in the law, and the commissioner only gives 30 days' notice. No one can reach Hawaii in 30 days from the mainland.]

QUALIFICATIONS OF APPLICANTS.

SEC. 58. Any person who is over eighteen years of age who is citizen by birth or naturalization, or who has letters of denization, who has received special rights of citizenship, who is under no civil disability for any offense, who is not delinquent in payment of taxes, who has not made a false declaration in applying for land under this act, who does not own any agricultural land not classed as wet land, nor any pastoral land in the Hawaiian Islands, and who is not an applicant for any other interest in land under the provisions of this act, may apply for one of the said lots for his own sole use and benefit, either as a right of purchase lease or as a cash freehold.

Provided, however, That any qualified person may apply for one lot of wet land in addition to land of any other description already applied for or acquired by him under this part of this act, where such wet land is in the neighborhood of such other land; and

Further provided, That any qualified person who owns less than one hundred acres of first-class agricultural land, or less than two hundred acres of second-class agricultural land, or less than six hundred acres of first-class pastoral land, or less than twelve hundred acres of second-class pastoral land, which is not subject to a condition of residence, and who owns in fee no other agricultural nor pastoral land except wet land, shall be competent to acquire under the provisions of this part of this act so much additional land of the class already held by him as together with such land shall not exceed in the aggregate the above-mentioned maximum quantity for such class, or shall be competent to acquire additional land of some other description, except wet land, in the ratio of twelve parts of second-class pastoral land, six parts of first-class pastoral land, or two parts of second-class agricultural land to one part of first-class agricultural land, sufficient to take up such maximum quantity relatively, according to the class of the new land applied for: *And further provided,* That both husband and wife may not be applicants for holdings under this part of this act unless their marriage status has been affected by a decree of annulment, separation, or divorce.

[These amounts as to acreage are all wrong.]

RIGHT-OF-PURCHASE LEASES.

SEC. 59. All applications for right-of-purchase leases shall be made in person by the applicant at the office of the subagent during office hours, and shall include a sworn declaration substantially according to the form Schedule A. The applicant shall pay to the subagent a fee corresponding in amount to six months' rent of the premises applied for, which fee shall be credited to him on account of rent if his application is successful, and if unsuccessful shall be returned to him. Upon receiving such application and such fee, the subagent shall endorse upon the application the day and hour of receiving the same and the receipt of said fee. In case two or more persons apply for the same lot, the one whose application is first received shall have the preference. No application not including a declaration of qualifications as above required and not accompanied with the said fee shall be received or considered.

[Right-of-purchase lease is the only part of the Hawaiian land law which approaches anywhere nearly what the land laws ought to be. However, there are many defects, and important defects.]

SEC. 60. If the qualifications of the applicant are satisfactory according to the foregoing requirements, the subagent, with the approval of the agent of public lands, shall execute a lease in three parts in favor of the applicant for the lot applied for, and shall deliver to the applicant one part of such lease; another part shall be filed with the agent of public lands, and the subagent shall keep the third on file in his office. The applicant on receiving such lease shall be designated the lessee, which shall also be the designation of any successors to his rights under the same. The receipt of such lease by the lessee shall be an acceptance and affirmation of the stipulations and conditions therein set forth.

CONDITIONS OF RIGHT-OF-PURCHASE LEASES.

SEC. 61. Such lease shall be made for a term of twenty-one years, to be reckoned from the next first day of April or October following the date thereof, and shall also include and require rent for the period between the date of the lease and such day, and shall be subject to the following conditions:

1. A yearly rental of eight per centum on the appraised value of the land, payable in equal parts half-yearly in advance on the first day of April and the first day of October of each year to the subagent.
2. The lessee shall from the end of the first year of the said term to the end of the fifth year thereof continuously maintain his home on such premises.
3. He shall, before the end of the third year of the said term, reduce to cultivation and have under cultivation not less than five per centum of such premises, and at the end of the fifth year of the said term reduce to cultivation and have under cultivation at one time not less than ten per centum of such premises, and plant and keep in good growing condition on the said premises an average of not less than ten timber, shade, or fruit trees per acre of the whole area if the same is classed as agricultural land; or if the same is classed as pastoral land he shall fence in the same. If the premises are classed as pastoral-agricultural land the foregoing alternative conditions shall apply respectively to the two kinds of lands.

4. He shall not assign his said interest under the said lease or any part thereof without the written consent of the commissioners: *Provided*, That a lessee or lessees holding the whole interest in a right-of-purchase lease, may at any time when all the conditions of the lease to be performed by the lessee up to such time shall have been substantially performed, surrender such interest to the Government by delivery of such lease to the subagent with the intention of the holders to surrender the same clearly endorsed thereon and signed by them in the presence of the subagent. Any such surrender shall release the lessee from all further duty of performance of the conditions of the document surrendered, but no surrender shall be valid if one of the lessees is a minor under eighteen years of age unless such minor is represented by a statutory guardian: *And further provided*, That an such lessee over the age of eighteen years of age may assign his interest to his cotenant.

SEC. 62. The violation of any of the foregoing conditions shall be sufficient cause for the commissioners, with the approval of the cabinet, to take possession of the demised premises without notice, demand or previous entry, and with or without legal process, and thereby determine the estate created by such lease.

SEC. 63. In case two or more persons become cotenants under any such lease by inheritance or otherwise, any of them may compel the remainder to buy or sell according to the provisions of section 45.

SEC. 64. At any time after the third year of the said term, the lessee shall be entitled to a land patent from the Government conveying him in fee simple the land described in his lease, upon his paying to the Government the appraised value of the premises as set forth in such lease, if he has reduced to cultivation twenty-five per cent of said premises and has resided thereon not less than two years, and has substantially performed all other conditions of his lease.

CASH FREEHOLDS.

SEC. 65. All applications for cash freeholds shall be made in writing, or partly in writing and partly in print, at the office of the subagent and shall include a sworn declaration substantially according to the form of Schedule A, and shall be accompanied with a fee amounting to ten per centum of the appraised value of the lot applied for which fee shall be forfeited in case the applicant should fail to take the premises at the upset price in case there should be no higher bid therefor, and if the applicant should be successful such fee shall be credited to him on account of his first installment; but if there is higher bid than the upset price and the applicant fails to obtain the premises the said fee shall be returned to him.

No such application, not including such declaration or not accompanied by such fee, shall be considered. Upon receiving any such application and the said fee, the subagent shall endorse upon the application the day and hour of receiving the same and the receipt of the said fee.

SEC. 66. Upon applications for cash freeholds the commissioner shall give notice through newspapers or posters, or both, in the English and Hawaiian languages, and, if they deem it advisable, in any other language in which newspapers in the Republic are published, of auction sales thereof, at such times and places in the district as they shall

decide, or at the executive building in Honolulu. Such notice shall specify the lot to be offered for sale and the appraised value thereof as the upset price.

SEC. 67. If there are two or more applications and there is no bid above the upset price, the one whose application is first received shall have the preference. The subagent or any other person authorized by the commissioners may act as auctioneer at such sales without taking out an auction license.

SEC. 68. A purchaser at any such sale shall immediately pay one-fourth of the purchase price and shall thereupon be entitled to receive a certificate, which shall be termed a freehold agreement, and shall be executed in three parts, one of which parts shall be filed with the subagent, one part shall be delivered to the applicant, and the third filed with the agent of public lands. In case of a failure of such purchaser to immediately pay such one-fourth of such purchase price, the person acting as auctioneer shall declare the sale off and shall either knock down the premises to the next highest bidder, or shall put them up again forthwith, or shall withdraw them from the auction for the time being. The purchaser upon receiving such freehold agreement shall be designated the freeholder, which shall also be the designation of any successors to his rights under the same. Such receipt of freehold agreement shall be an acceptance and affirmation of the stipulations and conditions therein contained. Such freehold agreement shall authorize the freeholder to occupy and use the premises therein described, and shall entitle him to a land patent for such premises at the end of three years from the date of the payment of such first installment, which shall be the date of the freehold agreement if the following conditions shall then have been substantially performed:

1. Payment of the balance of the purchase price in equal installments, in one, two, and three years, respectively, from the date of the freehold agreement, with interest annually at the rate of six per centum, provided that the freeholder may pay such installments before it is due, and thereby stop the corresponding interest.

2. Cultivation of not less than twenty-five per centum of the area of the said premises, and the planting and care of not less than an average of ten timber, shade, or fruit trees per acre, if agricultural land, at any one time before the end of the third year of fencing in the same if pastoral land within such time: *Provided*, That if the premises are classed as pastoral-agricultural land, the foregoing alternative conditions shall apply respectively to the two kinds of land.

3. Maintenance by the freeholder of his home on such premises from the end of the first to the end of the third year.

4. He shall not assign or sublet, conditionally or otherwise, his interest or any part thereof, under the freehold agreement, without the written consent of the agent of public lands endorsed on such agreement; and

Further provided, That freeholders having the whole interest in a freehold agreement may at any time when all the conditions thereof to be performed by the freeholder up to such time shall have been substantially performed, surrender to the government such interest by delivery of the freehold agreement to the subagent with the intention to surrender the same clearly endorsed thereon, and signed by them and duly attested. Such surrender shall release the freeholders from all further duty or performance of the conditions of the instrument

surrendered. But no such surrender shall be permitted if any such freeholders are under the age of eighteen years unless such minors are represented by statutory guardians; and

Further provided, That any freeholder over the age of eighteen may assign his interest to his cotenants.

5. Conditions for the prevention of waste, the planting of trees or the protection of trees growing or to be planted on such premises, or for the destruction of vegetable pests may be on such premises, or the prevention of the future introduction of such pests thereon.

6. He shall allow the agents of the Government at all times to enter and examine the premises.

7. Payment of all taxes that may be due on account of the said premises.

SEC. 69. In case of default in the payment of any of the said instalments for thirty days after the same are due, respectively, or failure of performance of any other of the said conditions, the commissioner with the approval of the cabinet, may take possession of such premises without notice, demand, or previous entry and with or without legal process, and thereby determine the estate created by such freehold agreement.

LAPSES, FORFEITURES, AND SURRENDERS.

SEC. 70. Upon the determination of a right of purchase lease or lapse of time, or upon the forfeiture or surrender of such lease or freehold agreement, the commissioners may, in their discretion, and within the limit of their authority, open the premises or any part thereof for settlement or reserve or dispose of the same in any manner or for any of the objects provided in this act. And if the same are disposed of under the provisions of part 7, they shall be reappraised provided that in case of premises surrendered under a right of purchase lease or a cash freehold, if disposed of either under the provisions of parts 6 or 7, the value of the permanent improvements and the unimproved value of the premises shall be appraised separately, as provided in section 54, and the incoming tenant shall pay for such improvements as therein provided; and the value of such permanent improvements shall, when received by the government as aforesaid, be paid to the surrendering lessees or freeholders, and the minister of finance is hereby authorized to pay the amount of such valuation upon the requisition of the commissioners out of any funds available for such purpose.

PART VIII.—*Settlement associations.*

SEC. 71. In case six or more persons who are qualified to apply for cash freeholds under this act shall form themselves into a settlement association, and apply for holdings in one block of land, the commissioners may, with the approval of the cabinet, cause to be surveyed for in one block corresponding in number to the number of persons forming such association in agricultural or pastoral land or both, according to the provisions of this act.

SEC. 72. The provisions of this act relative to cash freeholds shall be followed in the settlement of such block of land and shall apply to all matters relating to the occupation thereof and the rights and obligations of the Government and freeholders under such occupation: *Pro-*

And, That the notice by the agent of public lands declaring such land open for settlement shall be directed to such settlement association and shall be in one language only: *And provided further*, That in case of the surrender or forfeiture of the holding of any member of such association, such holding if declared open for settlement shall be open to any applicant under the provisions of this part of this act.

SEC. 73. If any lot of such block of land shall be left for three months after such block is declared open for settlement without being taken up by any member of such settlement association, the same may be declared open for settlement by any applicant under the provisions of this act, relative to cash freeholds or may be disposed of in any other manner provided in this act or may be reserved for public uses or otherwise at the discretion of the commissioners.

[This settlement association law is an open door to fraud, and fraud has been freely practiced under it. It should be repealed at once.]

SEC. 74. In case of a vacancy occurring in the membership of a settlement association by the death, resignation, or expulsion of a member who has not acquired a holding in such block, such vacancy may be filled by the association with the approval of the commissioners. But in no case shall any member of such association be allowed to take up any more than one lot.

SEC. 75. An application of a settlement association for a block of land shall contain a list of the names, age, nationality, and occupations of the members, whether married or unmarried, and the area which each member desires to acquire.

PART IX.—*Olaa Reservation.*

SEC. 76. Any person holding land individually or in conjunction with others situate in the Ahupuaa of Olaa, district of Puna, on the Island of Hawaii, under a lease from the commissioners of Crown lands (not reserving rent for the first three or five years of such lease), shall at any time after the first payment of rent, which is hereby reduced for such leases to one dollar per acre annually in the case of all leases reserving a large amount, upon the improvement of not less than fifteen per cent of the area of the land to be patented, to the satisfaction of the commissioner, which improvements shall include the bona fide cultivation of coffee or fruit, field or garden crops, or all or any of such crops, and payment to the commissioners of the unimproved value of the premises to be patented according to the appraisement stated in section 79, be entitled to receive from the Government a land patent for any portion of his leased premises in one parcel within two hundred acres in extent and including such improved portion, if all the conditions of such lease to be performed by such lessee up to such time, shall have been substantially performed.

Provided, however, That condition five of such lease for the purpose of making such lease good shall be deemed to have been substantially performed when improvements or cultivation shall have been made on such premises to the aggregate value of two hundred dollars. No land patent, however, shall be issued for any portion of said premises until improvements or cultivation to the extent of two hundred dollars in addition to the fifteen per cent above named shall have been shown to have been made.

Any such person as aforesaid whose lease covers less than two

hundred acres of land and who has improved not less than thirty acres thereof shall, upon fulfilling the above-mentioned requirement have the privilege of purchasing an additional area according to the appraisalment stated in section 79, provided the aggregate acreage of his holding shall not exceed two hundred acres. No land patent shall be issued under the provisions of this section for any portion of such leased premises lying within one hundred and fifty feet from the volcano road, nor for premises under any one lease with a front toward the volcano road, if contiguous thereto, longer than the frontage of two fifty-acre lots as laid out by the Olaa survey:

Provided, however, That every land patent under the provisions of this section for premises contiguous to and fronting toward the volcano road shall include a strip or strips connecting such premises with the volcano road and approximately at right angles thereto, which shall be located as the applicant shall desire and the aggregate width of which shall not be over four hundred feet.

SEC. 77. Any corporation having, at the date of the approval of this act, the right of possession to land in said Ahupuaa of Olaa under a lease from the commissioners of Crown lands, at any time after the first payment of rent, which is hereby reduced for such leases to one dollar annually per acre in the case of all leases reserving a large amount, upon the improvement of fifteen per cent of the area of the premises to be patented, to the satisfaction of the commissioners, which improvements shall include the bona fide cultivation of coffee, fruit, field or garden crops, and payment to the commissioners of the unimproved value of the premises to be patented according to the appraisalment stated in section 79, shall be entitled to receive from the Government land patents for the whole or any portion of such premises respectively in one parcel, if all the conditions of such lease to be performed by the respective lessees up to such time shall have been substantially performed: *Provided, however,* That no land patent shall be issued under the provisions of this section for any portion of such leased premises lying within one hundred and fifty feet from the volcano road:

Provided further, That every land patent issued under the provisions of this section for premises contiguous to and fronting toward the volcano road shall include a strip or strips connecting such premises with the volcano road and approximately at right angles thereto, which shall be located as the applicant shall desire, the aggregate width of which shall not be over four hundred feet: *And provided further,* That the provisions of this section shall apply only to those of such corporations as are or may hereafter be incorporated under the laws of the Republic of Hawaii.

SEC. 78. Payment of the purchase price of lands patented under sections 76 and 77 shall be made as follows: One-fourth immediately upon a successful application for the right to purchase the land specified, and the balance in equal installments in two, four, and eight years respectively from the date of such application, with interest at the rate of seven per centum, provided that the applicant may pay any such installment before it is due, and thereby stop the corresponding interest. The premises thus sought to be patented shall from the date of such application accompanied by one-fourth of the purchase price, be free from the stipulations of such Crown lease which shall, however, remain in full force as to the remainder of

premises described therein: *Provided, however,* That the remainder of the premises held under such lease may with the approval of the commissioners be surrendered: *And provided further,* That the provisions of this section shall apply only to those of such corporations here or may hereafter be incorporated under the laws of the Republic of Hawaii.

SEC. 79. The land covered by the Crown leases above referred to is hereby appraised as follows:

The first line of fifty-acre lots nearest the volcano road, according to the Olaa survey, six dollars per acre; the second line of fifty-acre lots, four dollars per acre; all other lots, three dollars per acre.

SEC. 80. The land exempted from sale along the volcano road by sections 76 and 77 is hereby reserved as a permanent park to be devoted to forest growth and other features of park improvement, and no part of the same shall be sold or leased by the commissioners without the consent of the executive council, nor without first offering the same to the owner of the land immediately in the rear upon the terms specified in sections 78 and 79.

PART X.—*Puukapu, Maimu, and Waiakolea reservations and native reservations of Olaa.*

SEC. 81. Any person holding land situate in said Ahupuaa of Olaa under a lease from the commissioners of Crown lands not reserving rent for the first five years of such lease, or situate in the Ahupuaas of Maimu and Waiakolea in said district of Puna, or in the Ahupuaa of Puukapu in the district of South Kohala, on said island of Hawaii, under a lease from the Crown commissioners for a term of thirty years, may at any time after the first payment of rent, when all the conditions of such lease to be performed by the lessee previous to such time shall have been substantially performed, receive from the subagent, upon applying therefor and paying to him the requisite deposit money, a certificate of occupation, a right of purchase lease, or a freehold agreement, at the option of the applicant, for the premises described in such Crown lease. Upon receipt of such certificate of occupation, right of purchase lease, or freehold agreement by such person, the said Crown lease shall be void.

SEC. 82. Under the provisions of section 81 the deposit money upon application for a certificate of occupation shall equal twenty-five cents for each acre of the premises under consideration; upon application for a right of purchase lease the deposit money shall equal six months' rent of the premises under consideration, which shall be credited to the applicant on account of rent if the application is successful; upon application for a freehold agreement the deposit shall correspond to one-fourth of the purchase price of the premises under consideration and shall be credited on account of the purchase if the application is successful. If any of such applications are unsuccessful, the deposit money shall be returned to the applicant.

SEC. 83. The land covered by the said Crown leases in said Olaa, Maimu, Waiakolea, and Puukapu is hereby appraised at two dollars for half an acre for the purpose of the foregoing provisions for furnishing the lessees thereof right of purchase leases and freehold agreements. Such appraisement shall fix the value of land taken under freehold agreements without an auction sale.

SEC. 84. Except as above provided, the general provisions relating to the homestead leases, right of purchase leases, and cash freehold shall apply to the status of the said parties securing such holding respectively, provided that any continuous residence performed by such parties under the said crown leases shall be credited to them in like manner as if the same had been performed under the certificate of occupation; right of purchase leases or freehold agreement so obtained by them respectively as performance or part performance of the residence condition of such instruments.

PART XI.

SEC. 85. From and after the publication of this act no land shall be opened for settlement under the provisions of chapter 87 of the Session Laws of 1892, entitled "An act to consolidate and amend the laws entitled 'An act to facilitate the acquiring and settlement of homesteads,' otherwise known as the homestead act," which act shall, however, remain in force in relation to such lands as have been already taken up by settlers.

SEC. 86. An act entitled "An act to create a sinking fund," approved December 31st, 1864, and an act entitled "An act to relieve the royal domain from encumbrances and to render the same inalienable," approved January 3, 1865, are hereby repealed. Sections 36, 39, 42, 43, 44, 45, 46, and 47 of the Civil Code, chapter 44 of the Laws of 1876, chapter 5 of the Laws of 1878, chapter 87 of the Laws of 1892, and act No. 48 of the Laws of the Provisional Government of the Hawaiian Islands are hereby amended to conform to the provisions of this act.

SEC. 87. This act shall take effect from and after the date of its publication.

NEWLANDS RESOLUTION.

JOINT RESOLUTION OF ANNEXATION—CONGRESSIONAL DECREE UNDER WHICH CHANGE WAS MADE.

[This is the "Newlands resolution," by which annexation was directly brought about.]

Whereas the government of the republic of Hawaii having in due form signified its consent, in the manner provided by its constitution, to cede absolutely and without reserve to the United States of America all the rights of sovereignty of whatever kind in and over the Hawaiian Islands and their dependencies, and also to cede and transfer to the United States the absolute fee and ownership of all public, government, or crown lands, public buildings or edifices, ports, harbors, military equipment, and all other public property of every kind and description belonging to the government of the Hawaiian Islands together with every right and appurtenance thereunto appertaining, therefore, be it

Resolved, That said cession is accepted, ratified, and confirmed, and that the said Hawaiian Islands and their dependencies be, and they are hereby, annexed as a part of the territory of the United States and subject to the sovereign dominion thereof, and that all and singular the property and rights hereinbefore mentioned are vested in the United States of America.

The existing laws of the United States relative to public lands shall not apply to such lands in the Hawaiian Islands, but the Congress

the United States shall enact special laws for their management and disposition: *Provided*, That all revenue from or proceeds of the same, except as regards such part thereof as may be used or occupied for the civil, military, or naval purposes of the United States, or may be assigned for use of the local government, shall be used solely for the benefit of the inhabitants of the Hawaiian Islands for educational and other public purposes.

Until Congress shall provide for the government of such islands all the civil, judicial, and military powers exercised by the officers of the existing Government in said islands shall be vested in such person or persons as the President of the United States shall direct; and the President shall have power to remove the said officers and to fill the vacancies so occasioned.

The existing treaties of the Hawaiian Islands with foreign nations shall forthwith cease and determine, being replaced by such treaties as may exist, or as hereafter may be concluded, between the United States and such foreign nations.

The municipal legislation of the Hawaiian Islands not enacted for the fulfillment of the treaties so extinguished, and not inconsistent with this joint resolution nor contrary to the Constitution of the United States, shall remain in force until the Congress of the United States shall otherwise determine.

Until legislation shall be enacted extending the United States customs laws and regulations to the Hawaiian Islands the existing customs regulations of the Hawaiian Islands with the United States and other countries shall remain unchanged.

The public debt of the Republic of Hawaii, lawfully existing at the date of the passage of this joint resolution, including the amounts due to depositors in the Hawaiian Postal Savings Bank, is hereby assumed by the Government of the United States, but the liability of the United States in this regard shall in no case exceed \$4,000,000.

So long, however, as the existing Government and the present commercial relations of the Hawaiian Islands are continued as hereinbefore provided, said Government shall continue to pay the interest on said debt.

There shall be no further immigration of Chinese into the Hawaiian Islands, except upon such conditions as are now or may hereafter be allowed by the laws of the United States, and no Chinese, by reason of anything herein contained, shall be allowed to enter the United States from the Hawaiian Islands.

The President shall appoint five commissioners, at least two of whom shall be residents of the Hawaiian Islands, who shall, as soon as reasonably practicable, recommend to Congress such legislation concerning the Hawaiian Islands as they shall deem necessary or proper.

Sec. 2. That the commissioners hereinbefore provided for shall be appointed by the President, by and with the consent and advice of the Senate.

Sec. 3. That the sum of \$100,000, or so much thereof as may be necessary, is hereby appropriated out of any money in the Treasury not otherwise appropriated, and to be immediately available, to be expended at the discretion of the President of the United States of America, for the purpose of carrying this joint resolution into effect.

PRESIDENT McKINLEY'S PROCLAMATION.

The proclamation read by Mr. Sewall was:

"To the government and people of the Hawaiian Islands:

"By the terms of the joint resolution by which the cession of the Hawaiian Islands and their dependencies to the United States is concluded, it is provided that until Congress shall provide for the government of Hawaii all the civil, judicial, and military powers exercised by the officers of the existing government are to be vested in such person or persons and to be exercised in such manner as the President of the United States shall direct.

"In the exercise of the power thus conferred upon him by the joint resolution the President hereby directs that the civil, judicial, and military powers in question shall be exercised by the officers of the republic of Hawaii as it existed just prior to the transfer of sovereignty, subject to his power to remove such officers and to fill vacancies.

"All such officers will be required at once to take an oath of allegiance to the United States, and all the military forces will be required to take a similar oath, and all bonded officers will be required to renew their bonds to the Government of the United States.

"The powers of the minister of foreign affairs will, upon the transfer of the sovereignty and property of Hawaii to the United States necessarily cease so far as they relate to the conduct of diplomatic intercourse between Hawaii and foreign powers.

"The municipal legislation of Hawaii, except such as was enacted for the fulfillment of the treaties between that country and foreign nations, and except such as is consistent, with the joint resolution, contrary to the Constitution of the United States, or to any existing treaty of the United States, is to remain in full force till the Congress of the United States shall otherwise determine.

"The existing customs relations of Hawaii with the United States and with other countries are to remain unchanged till Congress shall have extended the customs laws and regulations of the United States to the islands.

"Under these various provisions the government of the islands will proceed without interruption."

HAROLD M. SEWALL,
*Envoy Extraordinary and Minister Plenipotentiary
of the United States of America.*

HONOLULU, HAWAII, August 12, 1898.

TREATY OF ANNEXATION OF HAWAII.

[Negotiated in 1897, under President McKinley, Secretary of State Sherman.]

The United States and the Republic of Hawaii, in view of the natural dependence of the Hawaiian Islands upon the United States, of their geographical proximity thereto, of the preponderant share acquired by the United States and its citizens in the industries and trade of said islands, and of the expressed desire of the Government of the Republic of Hawaii that those islands should be incorporated into the United States as an integral part thereof and under its sovereignty, have determined to accomplish by treaty an object so important to their mutual and permanent welfare.

To this end the high contracting parties have conferred full power and authority upon their respectively appointed plenipotentiaries, to wit:

The President of the United States, John Sherman, Secretary of State of the United States.

The President of the Republic of Hawaii, Francis March Hatch, Lorrin A. Thurston, and William A. Kinney.

ARTICLE I.

The Republic of Hawaii hereby cedes absolutely and without reserve to the United States of America all rights of sovereignty of whatever kind in and over the Hawaiian Islands and their dependencies; and it is agreed that all territory of and appertaining to the Republic of Hawaii is hereby annexed to the United States of America under the name of the Territory of Hawaii.

ARTICLE II.

The Republic of Hawaii also cedes and hereby transfers to the United States the absolute free and ownership of all public, Government, or Crown lands, public buildings, or edifices, ports, harbors, military equipments, and all other public property of every kind and description belonging to the Government of the Hawaiian Islands, together with every right and appurtenance thereunto appertaining.

The existing laws of the United States relative to public lands shall not apply to such lands in the Hawaiian Islands, but the Congress of the United States shall enact special laws for their management and disposition: *Provided*, That all revenues from or proceeds of the same, except as regards such part thereof as may be used or occupied for the civil, military, or naval purposes of the United States, or may be assigned for the use of the local government, shall be used solely for the benefit of the inhabitants of the Hawaiian Islands for educational and other public purposes.

ARTICLE III.

Until Congress shall provide for the government of such islands all the civil, judicial, and military powers exercised by the officers of the existing Government in said islands shall be vested in such person or persons, and shall be exercised in such manner as the President of the United States shall direct; and the President shall have power to remove said officers and fill the vacancies so occasioned.

The existing treaties of the Hawaiian Islands with foreign nations shall forthwith cease and determine, being replaced by such treaties as may exist, or as may be hereafter concluded between the United States and such foreign nations. The municipal legislation of the Hawaiian Islands, not enacted for the fulfillment of the treaties so extinguished, and not inconsistent with this treaty nor contrary to the Constitution of the United States, shall remain in force until the Congress of the United States shall otherwise determine.

Until legislation shall be enacted extending the United States customs laws and regulations to the Hawaiian Islands the existing customs relations of the Hawaiian Islands with the United States and other countries shall remain unchanged.

ARTICLE IV.

The public debt of the Republic of Hawaii lawfully existing at the date of the exchange of the ratifications of the treaty, including the amounts due to depositors in the Hawaiian Postal Savings Bank, hereby assumed by the Government of the United States, but the liability of the United States in this regard shall in no case exceed \$4,000,000. So long, however, as the existing Government and the present commercial relations of the Hawaiian Islands are continued as hereinbefore provided, said Government shall continue to pay the interest on said debt.

ARTICLE V.

There shall be no further immigration of Chinese into the Hawaiian Islands, except upon such conditions as are now or may hereafter be allowed by the laws of the United States, and no Chinese by reason of anything herein contained shall be allowed to enter the United States from the Hawaiian Islands.

ARTICLE VI.

The President shall appoint five commissioners, at least two of whom shall be residents of the Hawaiian Islands, who shall, as soon as reasonable and practicable, recommend to Congress such legislation for the Territory of Hawaii as they shall deem necessary or proper.

ARTICLE VII.

This treaty shall be ratified by the President of the United States by and with the advice and consent of the Senate, on the one part, and by the President of the Republic of Hawaii, by and with the advice and consent of the senate in accordance with the constitution of said Republic, on the other; and the ratifications hereof shall be exchanged at Washington as soon as possible.

In witness whereof the respective plenipotentiaries have signed the above articles and have hereunto affixed their seals

Done in duplicate at the city of Washington, this sixteenth day of June, one thousand eight hundred and ninety-seven.

JOHN SHEERMAN.	[SEAL.]
FRANCIS MARCH HATCH.	[SEAL.]
LORRIN A. THURSTON.	[SEAL.]
WILLIAM A. KINNEY.	[SEAL.]

EXHIBIT 2.

DIGEST OF THE LAND ACT, 1895, OF THE TERRITORY OF HAWAII,

is continued in force by an act entitled "An act to provide a government for the Territory of Hawaii," passed by the Fifty-sixth Congress of the United States of America on the 27th day of April and approved on the 30th day of April A. D. 1900.

[This is as the Hawaiian officials see it after passage of organic act, April 14, 1900.]

(With reference to unoccupied lands.)

The land act of 1895 as aforesaid, having for its special object the settlement and cultivation of the Government agricultural and pastoral land, vested the control and management of public lands in a commissioner; but excepting from the control of the commissioner town lots, landings, tracts reserved for public purposes, etc., which remain under the control of the superintendent of public works.

For the purposes of the act the Territory of Hawaii is divided into six land districts, as follows:

- 1st. Hilo and Puna on the island of Hawaii.
- 2nd. Hamakua and Kohala on the island of Hawaii.
- 3rd. Kona and Kau on the island of Hawaii.
- 4th. The islands of Maui, Molokai, Lanai, and Kahoolawe.
- 5th. The island of Oahu.
- 6th. The island of Kauai.

The commissioner is represented by a subagent in each district.

Public lands for the purposes of this act are classified as follows:

I. *Agricultural land*.—First class: Land suitable for the cultivation of fruit, coffee, sugar, or other perennial crops, with or without irrigation.

Second class: Land suitable for the cultivation of annual crops only.

Third class: Wet lands, such as kalo and rice lands.

II. *Pastoral land*.—First class: Land not in the description of agricultural land, but capable of carrying live stock the year through

Second class: Land capable of carrying live stock only part of the year, or otherwise inferior to first-class pastoral land.

III. *Pastoral-agricultural land*.—Land adapted in part for pasturage and in part for cultivation.

IV. *Forest land*.—Land producing forest trees, but unsuitable for cultivation.

V. *Waste land*.—Land not included in the other classes.

The act provides three principal methods for the acquirement of public lands under systems known as (1) homestead lease, (2) right-of-purchase lease, (3) cash freehold.

GENERAL QUALIFICATION OF APPLICANTS.

Applicants for land under systems named above must be over eighteen years of age, must be citizens by birth or naturalization or have received a certificate of declaration of intention to become a citizen, be under no civil disability for any offense, nor delinquent in the payment of taxes. Special qualifications are named under the respective systems.

HOMESTEAD LEASE SYSTEM.

The homestead lease system permits the acquirement of public land by qualified persons without other payments than a fee of two dollars upon application and a fee of five dollars upon issuance of homestead lease.

The limit of area in the different classes of land which may be acquired under homestead lease is: Eight acres first-class agricultural land; 16 acres second-class agricultural land; 1 acre wet (rice or taro) land; 30 acres first-class pastoral land; 60 acres second-class pastoral land, and 45 acres pastoral-agricultural land.

SPECIAL QUALIFICATIONS OF APPLICANTS FOR HOMESTEAD LEASE.

Any person having the general qualifications (as to citizenship, etc.) who is not the owner in his own right of any land in the Territory of Hawaii other than "wet land" (rice, taro, etc.), and who is not an applicant for other land under the act, may apply under this part of the act, and such application may cover one lot of wet land in addition to other land if reasonably near. Husband and wife may not both be applicants.

Applications must be made in person at the office of subagent of the district, accompanied by sworn declaration of qualifications and a fee of \$2.

CERTIFICATE OF OCCUPATION.

The successful applicant receives a certificate of occupation, which entitles him to occupy the described premises and to receive a homestead lease for nine hundred and ninety-nine years if conditions of certificate of occupation have been fulfilled, the conditions being:

That the occupier shall, before the end of two years, build a dwelling house and reside on the premises. He shall maintain his home on the premises from and after the end of two years from date of certificate. He shall, before the end of six years from date of certificate, have in cultivation not less than 10 per cent of the land, or have in cultivation 5 per cent of the land, and in good growing condition not less than ten timber, shade, or fruit trees per acre on agricultural land, or if pastoral land, fence the same within six years.

He shall pay the taxes assessed upon the premises within sixty days after the same are delinquent.

He shall perform any conditions of the certificates for the planting or protection of trees or prevention or destruction of vegetable pests that may be on the premises.

CONDITIONS OF HOMESTEAD LEASE.

The lessee, or his successors, must maintain his home on the lease premises; must pay the taxes assessed upon the premises within sixty days after the same are delinquent, and perform any conditions of the lease relating to protection or planting of trees or destruction and prevention of vegetable pests.

Lands held under a certificate of occupation or homestead lease are liable to taxation as estates in fee.

In case of the death of an occupier or lessee his interests, notwithstanding any devise or bequest, shall vest in his relations, in the order

prescribed in the act, the widow or widower being first in order, then the children, etc.

Certificates of occupation or homestead lease, or any interest thereunder, is not assignable by way of mortgage, nor is the same subject to attachment, levy or sale on any process issuing from the courts of the country. Neither the whole nor any portion of the premises may be sublet.

Surrender may be made to the government by an occupier or lessee having the whole interest if all conditions to date of surrender have been fulfilled, and the person so surrendering is entitled to receive from the government the value of permanent improvement whenever the same is received by the government from a new tenant.

RIGHT OF PURCHASE LEASES.

Right of purchase leases for the term of twenty-one years may be issued to qualified applicants, with the privilege to the lessee of purchasing at the end of three years and upon fulfillment of special conditions.

QUALIFICATIONS OF APPLICANTS.

Any person who is over eighteen years of age, who is a citizen by birth or naturalization of the United States, or who has received a certificate of declaration of intention to become a citizen, who is under no civil disability for any offense, who is not delinquent in the payment of taxes, and who does not own any agricultural or pastoral land in the Territory of Hawaii, may apply for right of purchase lease, the limit of areas which may be acquired being 100 acres first-class agricultural land, 200 acres second-class agricultural land, 2 acres wet (rice or taro) land, 600 acres first-class pastoral land, 1,200 acres second-class pastoral land, and 400 acres mixed agricultural and pastoral land.

Any qualified person, owning less than the respective amounts stated in foregoing list, and which is not subject to residence condition, may acquire additional land of the classes already held by him but so that his aggregate holding shall not be in excess of the limit named; or if desiring additional land of another class, may acquire the same according to ratio established between the various classes.

Husband and wife may not both be applicants for right of purchase leases.

Application must be made in person at the office of subagent of the district, and must be accompanied by a fee equal to six months' rent of premises, fee to be credited on account of rent, if application is successful, and to be returned if application is unsuccessful. In case of more than one application for same lot, the first application takes precedence.

CONDITIONS OF RIGHTS OF PURCHASE LEASE.

Term, twenty-one years.

Rental, eight per cent on the appraised value given in lease, payable semiannually.

The lessee must, from the end of the first to the end of the fifth year, continuously maintain his home on the leased premises.

The lessee must have in cultivation at the end of three years five

per cent and at the end of five years ten per cent of his holding, and maintain on agricultural land an average of ten trees to the acre.

Pastoral land must be fenced.

Interest in right of purchase lease is not assignable without written consent of the commissioner of public lands, but the lease may be surrendered to the government.

In case of forfeiture or surrender of right of purchase lease, reappraisement is made of the land and of permanent improvement thereon, and if the land is again disposed of, the incoming tenant shall pay for such permanent improvements, and the amount, when so received by the government, shall be paid to the surrendering lessee.

CONDITIONS UNDER WHICH PURCHASE MAY BE MADE.

At any time after third year of leasehold term the lessee is entitled to a land patent, giving fee simple title, upon his payment of the appraised value set forth in lease, if he has reduced to cultivation twenty-five per cent of his leased premises and has substantially performed all other conditions of his lease.

CASH FREEHOLDS.

Cash freehold lots are sold at auction to the highest qualified bidder at appraised value as upset price.

The qualification of applicants for cash freeholds and the areas of land which may be required are the same as those under right of purchase lease system.

APPLICATIONS.

Applications must be made to subagent of district in writing, with sworn declaration as to qualifications, and a fee of ten per cent of appraised value of lot, which fee is forfeited if applicant declines to take the premises at the appraised value, and is credited to him if he becomes the purchaser of the lot. If such applicant, however, is outbid, his fee is returned to him.

If two or more applications are made and there is no bid above the upset price the first application takes precedence.

The purchaser at auction sale must pay immediately thereafter one-fourth of purchase price and thereupon receive a "freehold agreement."

CONDITIONS OF FREEHOLD AGREEMENT.

The freeholder shall pay the balance of purchase price in equal installments in one, two, and three years, with interest at 6 per cent but may pay any installment before it is due and stop corresponding interest.

Twenty-five per cent of agricultural land must be cultivated, and pastoral land fenced before the end of third year.

Freeholder must maintain his home on the premises from end of first to end of third year.

He may not assign or sublet without consent of the commissioner of public lands.

He must allow agents of the Territory of Hawaii and the United States to enter and examine the premises.

He must pay all taxes that may be due upon the premises.

If all conditions are fulfilled he is entitled, at end of three years, to patent giving fee-simple title.

In case of forfeiture or surrender the land and permanent improvements are reappraised separately, and the value of such improvements, when received by government from new tenant or freeholder, will be paid to surrendering freeholder.

SETTLEMENT ASSOCIATIONS.

Six or more qualified persons may form a "settlement association" and apply for holdings in one block.

The provisions for cash freehold and right-of-purchase leases apply to the settlement of such blocks.

Any lot in such block which may be forfeited or surrendered, or which is not taken up by any member of the settlement association within three months, shall be open to any qualified applicants.

Disputes, disagreements, or misunderstandings between the parties to certificate of occupation, homestead lease, right-of-purchase lease, or cash freehold, and relating thereto, which can not be amicably settled, shall be submitted to the circuit judge in whose jurisdiction the premises are situated, and his decision shall be final, subject only to appeal to supreme court.

CASH SALES AND SPECIAL AGREEMENTS.

With consent of the governor, public lands not under lease may be sold in parcels of not over one thousand acres at public auction for cash, and upon such sale and payment of full consideration a land patent will issue.

Parcels of land of not over six hundred acres may, with consent of governor, be sold at public auction upon part credit and part cash, and upon such terms and conditions of improvement, residence, etc., as may be imposed.

Upon fulfillment of all conditions a land patent will issue.

GENERAL LEASES.

General leases of public lands may be made for a term not exceeding five years for agricultural land and twenty-one years for pastoral land.

Such leases are sold at public auction, and require rent in advance quarterly, semiannually, or annually.

The conditions of general leases are made at discretion of the commissioner, and may be made for any class of public lands.

EXHIBIT 3.

RELATING TO RESOLUTION NO. 11.

COMMISSION OF PUBLIC LANDS, TERRITORY OF HAWAII,
Honolulu, March 26, 1901.

To the Speaker of the House of Representatives.

SIR: I beg leave to acknowledge receipt of a communication from your honorable body dated March 8, 1901, submitting, for the consid-

eration of the "agent of public lands," and answer, a resolution unanimously passed by the house of representatives, to wit:

Be it resolved, That the clerk of the house be instructed to forward the requisite communication to the agent of public lands whereby the said agent of public land may furnish this house all land transactions made by him from 1890 to present date and to furnish the names of all persons who are connected with such transactions,

and to say in reply:

That this office was not in existence until the latter part of 1895 prior to which time Government and Crown lands were under the control and management of the "minister of interior" and "commissioner of Crown lands," respectively. This office has consequently to rely for its knowledge of transactions prior to November, 1895, on the published reports of the minister of the interior and of the commissioners of Crown lands, copies of which are herewith forwarded under separate covers, to wit:

Minister of interior's report of 1890, pages 204 to 232, inclusive, and page 286.

Minister of interior's report of 1892, pages 260 and 262.

Minister of interior's report of 1894, pages 20 to 46, inclusive, 170 and 180.

Report of minister of interior for nine months 1894 ending December 31, pages 90 and 96, respectively.

Report of minister of interior for 1895, pages 11, 14, and 16 respectively.

Report of commissioners of Crown lands 1894, pages 41 to 88 inclusive.

The transactions of this office are submitted, as follows:

Tabulated statement from organization of this office to July 7, 1898

Printed statement of land transactions July 7, 1898, to September 30, 1899.

Printed report of the commissioner of public lands for year ending December 31, 1900, since which date no new transactions have been made.

Respectfully submitted.

J. F. BROWN,
Commissioner of Public Lands.

MARCH 30, 1901.

Cash sales between July 7, 1898, and September 30, 1899, can be seen on pages 7 and 8, published list of land transactions, Republic of Hawaii.

Cash sales since the passage of the organic act are as follows: Date of sale at auction, October 22, 1900; purchaser, Mrs. S. C. Allen; location, Pouhala, Oahu; area, 0.50 acre; price, \$315.

EXHIBIT 4.

REPORT OF THE COMMISSION OF PUBLIC LANDS FOR THE YEAR
ENDING DECEMBER 31, 1900.

PUBLIC LAND OFFICE,
January 1, 1901.

SANFORD B. DOLE, Esq.,
Governor Territory of Hawaii.

SIR: On behalf of the commissioner of public lands I have the honor to submit the following report on the transactions of this office for the year ending December 31, 1900:

During the intervening dates between January 1, 1900, to June 14,

1900, the following gentlemen were commissioners of public lands, to wit: Alexander Young, esq., ex officio; William R. Castle; J. F. Brown, agent of public lands.

No new business of any kind was transacted during this period, as the Executive order of President McKinley was then still in force.

Under section 73 of "An act to provide government for the Territory of Hawaii," which took effect on June 14, 1900, commissioner of public lands was substituted for commissioners of public lands. Since which time Mr. J. F. Brown, as commissioner of public lands (commissioned as such under date of June 14, 1900), has been performing the duties that were heretofore required of three commissioners.

This commission is represented in the various land districts by the following subagents: E. D. Baldwin, first land district; Charles Williams, second land district; J. Kaelemakule, third land district; W. O. Aiken, fourth land district; E. S. Boyd, fifth land district, the latter being also secretary and chief clerk of the general office.

SURVEY WORK.

This work is still being performed by the government survey office. I would beg to state that very little survey work was done during the year. Subdivision of public lands was practically suspended from January 1 to June 14, 1900. This was occasioned by the existing uncertainty at that time of what provisions Congress would make for their disposition. Since June 14, however, steps have been taken to continue this very important work, as numerous petitions have been received from applicants for lands in different localities. The lack of competent surveyors for such work is a source of considerable embarrassment at this time, as private work, which is plentiful, absorbs most of the surveyors. Progress, however, will shortly be made in the surveys of lands in Waialua, Maui; in Kaauhuhu, Kohala; in North Hilo, Hawaii, and many other different localities desired by numerous applicants.

The survey of the lower portion of Hauula, containing an area of about 159 acres on this island, was commenced on August 28, 1900, and completed September 5, 1900. This tract has been subdivided into 32 lots, averaging 2 to 3 acres of kula land and a little less than an acre of wet land, for the purpose of homestead leases to natives who have long been residents of the land, and will be opened up at an early date.

There are about 2,000 acres in Hamakua, Hawaii, already surveyed into lots, which will also be opened up at an early date. An equal area of about 2,000 acres in North Kona awaits decision as to road location and will, as soon as possible thereafter, be opened up.

The lands that have already been surveyed and opened during the year (including one lot remaining from a former period) under the land act is shown in the following table:

showing lands taken up under general provisions of land act (other than cash sales and Olaa purchases under special conditions of Part IX).

Land district.	Right of purchase lease.			Cash freehold.			Special agreement.			Homestead.	
	No.	Acres.	Value.	No.	Acres.	Value.	No.	Acres.	Value.	No.	Acres.
Hilo and Puna							87	4,304.15	\$79,045.26		
Hamakua and Kohala											
Kona and Kauai											
Maua, Molokai											
Oahu							1	61	4,000.00		
Kaui											
Total							88	4,365.15	\$83,045.26		

SUMMARY OF ABOVE.

	No.	Acres.	Value.
Right of purchase leases

Special agreements	88	4,365.15	\$83,045.26
Homestead leases			
Total	88	4,365.15	\$83,045.26

OLAA LAND PURCHASED UNDER PART IX, LAND ACT, DURING YEAR
ENDING DECEMBER 31, 1900.

[Value appraised in land act.]

Land, Olaa, Puna, Hawaii; number of patents, 10; acres, 825.75; value, \$3,152.27.

The above table shows that hardly any new business was transacted during the year. In consequence of President McKinley's order of September 11, 1899, discontinuing the further disposition of public lands, other than routine office work was suspended during the first six months of 1900.

After the passage and final taking effect of our organic act, questions again arose as to our authority to dispose of any of the public domain under the right of purchase lease and homestead lease system of the land act, which respectively are for twenty-one years and nine hundred and ninety-nine years, for under the provisions of section 73 of said act no lease on any agricultural lands shall be made for a longer period than five years; consequently the commissioner of public lands deemed it advisable to obtain a ruling in the matter before proceeding to open up public lands under these systems, which were subsequently submitted under date June 30, 1900. A ruling on these questions has since been received sustaining our views in the matter. To obtain this, however, took some little time; consequently, as shown in the above table, no right of purchase leases or homestead leases were issued during the year.

Of the 88 special agreements 87 were for the Olaa lots, and were advertised for sale under special conditions August 1, 1900, to be sold in the town of Hilo, September 20, 1900.

The special conditions under which they were sold provided for a term of residence and for a series of easy payments, extending, at option of purchasers, over a period of 10 years, and were specially

intended to provide easy terms for bona fide settlers, while it discouraged as far as possible the mere speculator.

Before proceeding further it might be well to mention that some of the so-called "Olaa squatters," to which much reference was made in our 1898-'99 report, were still occupying some of these lots; endeavoring to stop its sale, substantiated by a protest being filed by them and received by the commissioner of public lands under date of September 3, 1900, disputing his authority to make any disposition of the public domain of the Territory of Hawaii. Their claims being irrelevant, it was not considered or recognized, as his authority in the matter was explicitly set forth in section 73 of the organic act.

The realization from this sale far exceeded our most sanguine expectations, some of the lots bringing \$30 to \$50 per acre, being nearly in every instance four times the appraised value thereof, which fact alone demonstrates that desirable homesteads are in demand.

Lot at Wahiawa, Waialua, Oahu, containing 61 acres, was sold at auction under special conditions of residence and cultivation, and sold for the unusual price of \$4,000 from an upset price of \$300. This is owing to special location on this island.

CASH SALES DURING THE YEAR ENDING DECEMBER 31, 1900.

Pouhala, Ewa, Oahu; acres, 50; purchase price, \$315.

This land is a portion of the old Pouhala fish pond, fronting the Oahu Railway and Land Company track.

NEW LEASES MADE DURING YEAR ENDING DECEMBER 31, 1900.

Kahikinui, Maui; term, five years; acres, 25,000; annual rental \$3,010.

The lease was sold at auction and covered the arid, waterless land of Kahikinui, of which a large amount is represented by barren lava flows. Although such reservation seems superfluous, a condition of the lease reserves the right of the commissioner to take over any portion if same should be found suitable for settlement purposes.

LICENSES ISSUED DURING YEAR ENDING DECEMBER 31, 1900.

Licensee, Theo. F. Lansing; locality, Waiahole, Oahu; term, thirty years; annual rental, \$10.

This license was issued to T. F. Lansing for a right of way for a pipe line for conveyance of water across certain public lands in Waiahole, Koolaupoko, Oahu, and upon condition that construction of pipe line shall be such as not to interfere with or impair the value of said lands, or to create obstructions in the present course of the Waiahole stream; and also not to be held to convey any water rights or to prejudice any existing rights in said stream.

RECEIPTS COMMISSION OF PUBLIC LANDS FOR YEAR ENDING DECEMBER 31, 1900.

Land sales:

Right of purchase leases	\$38.99
Special agreements	3,846.10
Homesteads	1,496.60
Cash freehold	350.77
Olaa lots	445.80
	<hr/>
	\$8,178.26

Land revenue:

Rents—

General leases	\$90,180.79
Right of purchase leases	5,407.73
Olaa leases	511.83
Punkapu leases	26.75
Kaimu leases	124.30
Miscellaneous	1,277.50

Interest—

Homesteads	455.10
Special agreements	681.57
Cash freehold	31.45
Olaa agreements	97.85

Office fees	59.00
-------------------	-------

\$98,853.87

Total receipts for the year 105,032.13

The total receipts above show a decrease of \$52,948.32 from that of the preceding year (1899). This was occasioned by the Executive order of President McKinley, which was still in force during the first six months of the year, and also under the provisions of section 73 of the organic act, "confirming all agreements between July 7, 1898, and September 28, 1899, subject to the President's approval." This clause again tied our hands as to the collection of rents, interest, and purchase prices on those agreements until the receipt of such approval; even collections of purchase prices on agreements prior to July 7, 1898, were also suspended. Under these circumstances, and the precautionary steps taken, I consider the above to be a very creditable showing. In land revenue a decrease of \$10,826.73 and in land sales \$42,121.59 is shown.

The above agreements have been approved by the President under date of November 30, 1900. In consequence whereof the receipts for the coming year will more than offset the decrease.

Statement of expenditures for the year ending December 31, 1900.

Items.	Appropriation.	Drawn.	Total drawn.	Balance.
Salary land agent	\$6,000.00	\$3,000.00	\$3,000.00	\$3,000.00
Salary secretary and subagent, fifth district	4,200.00	2,100.00	2,100.00	2,100.00

Total	38,880.00	14,408.85	24,471.15

LAND PATENTS.

Under section 73 of the organic act the duties of issuing land patents, patents on land commission award, and the custody of all original documents in connection therewith have been transferred to this commission. Previous to June 14, 1900, it was under the control of the minister of the interior; consequently this office has no knowledge what business was done during the first six months of the year. But it is safe to say that, from appearances of the records when they were finally passed over to this office, no new land patents were issued during that period.

Land patents issued since June 14, 1900, are as shown in the following statement:

Statement of land grants issued during the year ending December 31, 1900.

No. of patent.	Grantee.	Date.	Area.	Location.	District.	Island.	Consideration.	Fees.
		1900.	Acres.					
a 4385	C. W. Hill	Aug. 2	47.25	Olaa	Puna	Hawaii	\$283.50	\$5.00
a 4386	do	do	150.00	do	do	do	450.00	5.00
a 4387	Isabella Renwick and Jessie R. Brockie.	do	97.25	do	do	do	483.50	5.00

c 4393	Eleanor M. Wilcox	Dec. 10	.63	Punch bowl slope.	Honolulu	Oahu	750.00	5.00
c 4394	H. Willgeroth	do	43.80	Walaha II	North Kona	Hawaii	570.00	5.00
a 4395	A. W. Richardson	do	29.70	Olaa	Puna	do	89.10	5.00
a 4396	do	do	25.40	do	do	do	76.20	5.00
a 4397	do	do	144.90	do	do	do	691.72	5.00
c 4398	C. E. Moore	Dec. 28	96.50	Awini	North Kohala.	do	482.50	5.00
c 4399	A. V. Callaghan	do	89.50	Kamali	Puna	do	492.25	5.00
c 4400	D. H. Davis	do	82.50	Pauilo	Hamakua	do	332.87	5.00
c 4401	Geo. R. Carter	do	66.50	Kamali	Puna	do	332.00	5.00
c 4402	J. N. Bell	do	104.20	Awini	North Kohala.	do	669.00	5.00
	Total (18)		1,327.03				7,459.14	\$0.00

a Olaa reservation.

b Homestead.

c Time payment.

From present indications the number of land patents that will be issued during the coming year will far exceed those that have been issued in any previous year.

ROADS AND TRAILS.

As shown in above statement of expenditures, a very small amount has been expended during the year, and the amount so expended has been for trails through the upper Maulua tract and in Olaa.

The matter of roads to and through public lands opened for settlement, and the difficulty with which this office meets in dealing with the question, was dwelt upon at some length in the report of this office for 1899, and the difficulties quoted in that report have equal force to-day.

ESTIMATED RECEIPTS.

Land revenue:	
General leases	\$100,000
Olaa (Crown leases)	500
Rents right of purchase leases	12,000
Interest	15,000
Miscellaneous (this includes office and patent fees)	1,000
	<hr/> \$128,500

Land sales:

On time payments.....	\$35,000	
Purchase of right of purchase leasehold.....	35,000	
On old homestead accounts.....	2,500	
Class sale under Part IX land act.....	4,000	
Cash sale.....	2,500	
		<hr/>
		\$79,000
Total.....		207,500

The foregoing is considered to be a very conservative estimate.
Respectfully submitted.

EDWARD S. BOYD,
Secretary Commission of Public Lands.

APPENDIX.

In relation to questions that were raised by the United States district attorney as to the legality of Hawaiian land transactions since September, 1899, I would beg to submit copies of correspondence and statements that actually took place in regard to the matter, as an appendix to the foregoing report, as follows:

SCHEDULE A.

DEPARTMENT OF JUSTICE,
OFFICE OF UNITED STATES ATTORNEY, DISTRICT OF HAWAII,
Honolulu, November 5, 1900.

EARL JACOB F. BROWN,
Land Commissioner of Hawaii, City.

DEAR SIR: I have the honor to respectfully apply for information from your office concerning the following matters of business relating to public property in the Territory of Hawaii, and originating on and after September 23, 1899, to wit:

Leases of public lands: The names of the lessees and their assignees, if any; descriptions of lands and acreage leased, and termination of leases, also the dates of the same.

Sales of public lands: The names of the purchasers and their assignees, if any; description of the lands and acreage sold, and dates of deeds or patents.

Contracts for sales of public lands: The names of the purchasers and their assignees, if any; descriptions of the lands and acreage contracted for, and dates of contracts.

Sales or contracts for sale of, or leases of, water rights: The names of purchasers and their assignees, if any; description of water rights, including the name and location of the stream or body of water drawn from location of the point of division; and quantity of water so disposed of, and the acreage to be irrigated thereby, if any; also dates of the instruments of conveyance or agreement.

Advertisements of sale *per* tenders respecting public lands or water rights now pending.

I trust that it will not seriously inconvenience your office to furnish the information desired.

Yours, respectfully,

JOHN C. BAIRD,
United States Attorney for Hawaii.

COMMISSION OF PUBLIC LANDS,
TERRITORY OF HAWAII,
Honolulu, November 9, 1900.

JOHN C. BAIRD, Esq.,
United States Attorney for Hawaii.

DEAR SIR: Inclosed please find copies of official correspondence in reference to the land matters as follows:

Letter of Governor Dole to the Secretary of Interior, Washington, in reference to

homestead and right of purchase leases, and reply of Thomas Ryan, esq., Acting Secretary thereto.

Letter of F. L. Campbell, Acting Secretary of Interior Department, to Governor Dole, inclosing opinion of Willis Van Devanter, Assistant Attorney-General for Interior Department, in re the issuance of land patents in the Territory of Hawaii.

I take the liberty to inclose also a statement of the view held in this office of the laws applying to the public lands of the Territory, and under which all recent transactions have been made. A detailed statement of these is well advanced and will be presented to you shortly.

Yours, respectfully,

JACOB F. BROWN,

Commissioner of Public Lands, Territory of Hawaii.

EXECUTIVE CHAMBER, TERRITORY OF HAWAII,

Honolulu, July 10, 1900.

Hon. E. A. HITCHCOCK,
Secretary of the Interior, Washington.

SIR: Section 74 of an act to provide a government for the Territory of Hawaii enacts that no "lease of agricultural land shall be granted, sold or renewed by the government of the Territory of Hawaii for a longer period than five years, until Congress shall otherwise direct."

I desire instructions whether this provision applied to homestead leases and right of purchase leases. The law for homestead leases, which will be found in the civil laws of the Hawaiian Islands, sections 212 to 238 inclusive, provides special proceedings for settling persons on small homesteads. Although the holding is called a lease it is hardly so in a legal sense, inasmuch as no rent is reserved, and the term of the occupation is nine hundred and ninety-nine years; in other words, permanent. It is really a fee to the holder and his heirs, without the right of alienation. To apply the above-quoted provision to the homestead lease, legislation would render wholly nugatory a most valuable enactment for the settlement of persons on small holdings which is of particular importance to native Hawaiian and other persons who must have little capital and not a large endowment of thrift.

The law for right of purchase leases is from section 239 to section 248, of the civil law, both inclusive.

The legislation providing for right of purchase leases, establishes a system of land settlement in small holdings, which has been more successful and popular than any of the other methods devised by the Hawaiian land act of 1895. The successful applicant receives a lease for twenty-one years, which fixes the value of the land for the term of the lease, as between the government and the lessee, and the performance of certain reasonable conditions of residence and improvement allows the lessee to acquire a fee-simple title by purchase at any time before the last year of the lease. This allows the settler to use his capital at the outset for improvements and cultivation, and to put off the day of purchase until he is well established.

If the provision of the Territorial act above quoted applies to right of purchase leases, it renders this system substantially impracticable.

In both of the cases referred to, such a result would seriously interfere with the policy of land settlement in small holdings.

I submit that a reasonable construction of the Territorial act excludes the application of the provision in question from homestead leases and right of purchase leases for these reasons:

First. The fact that Congress has for the most part continued the Hawaiian land laws in force (sections 73 and 99) which laws are based largely upon a policy of land settlement in small holdings, militates against a construction that would interfere with such a policy.

Second. The Congressional discussions of Hawaiian matters showed that the prevailing sentiment of both Houses was in favor of such a land policy, and radically opposed to any legislation that would give corporations an opportunity to acquire lands in fee to any great extent. This being so, Congress could not have intended to interrupt the legislation already in existence for land settlement in small holdings.

Third. The word "lease" used in the provisions referred to, not being connected with the words extending its meaning, must be taken in its ordinary sense, which is a simple lease for a term conditioned upon payment of rent and under which a right of occupation terminates at the expiration of the term.

Yours, very respectfully,

SANFORD B. DOLE.

DEPARTMENT OF THE INTERIOR,
Washington, July 27, 1900.

SANFORD B. DOLE,
Governor of Hawaii, Honolulu, Hawaii.

SIR: The Department is in receipt of your communication of the 10th instant desiring instructions as to whether the provision in section 73 of an act of Congress entitled "An act to provide a government for the Territory of Hawaii," approved April 30, 1900, "and no lease of agricultural land shall be granted, sold, or renewed by the government of the Territory of Hawaii for a longer period than five years until Congress shall otherwise direct," applies to homestead leases and right of purchase leases.

Said section 73 provides: "That the laws of Hawaii relating to public lands, the settlement of boundaries, and the issuance of patents on land-commission awards except as changed by this act, shall continue in force until Congress shall otherwise provide."

An examination of the laws of Hawaii in connection with the provision of the Territorial act referred to by you leads to the conclusion that your opinion that it was not intended that said provision should apply to homestead leases or right of purchase leases is justified. The homestead being for nine hundred and ninety-nine years and reserving no rent is, as you say, in effect the conveyance of the fee and is similar after compliance with certain requirements as to residence upon and improvement and cultivation of the land very similar to the requirements of the homestead law in force in other parts of the United States.

The so-called right of purchase lease is a part of the proceedings in another method of the acquisition of public lands. It was evidently not intended to change the existing provisions of the Hawaiian law by which title the public lands may be acquired, but it was the intention to continue those provisions in force for the present, at least.

You are therefore instructed that the provisions of the Territorial act referred to does not apply to homestead leases or right of purchase leases.

Very respectfully,

THOS. RYAN,
Acting Secretary.

EXECUTIVE CHAMBER,
Territory of Hawaii, August 21, 1900.

HON. E. A. HITCHCOCK,
Secretary of the Interior, Washington.

SIR: Some doubt exists in my mind as to the execution of land patents and other instruments for the disposition of public lands.

Our land laws as amended by the Territorial act, provide that land patents shall be signed by the governor and countersigned by the commissioner of public lands and that the said commissioner may make leases.

These provisions of law are supposedly in force under section 73 of the Territorial act. Section 458 of the Revised Statutes of the United States, second edition 1878, provides that patents issuing from the General Land Office shall be issued in the name of the United States and be signed by the President and countersigned by the comptroller of the General Land Office. Sections 450 and 451 of the Revised Statutes, same edition, authorize the President with the advice and consent of the Senate, to appoint a secretary and assistant secretary, "whose duty it shall be under the direction of the President to sign in his name and for him patents for land sold or granted under the authority of the United States."

Does this provision bear upon the execution of land patents under the laws of the Territory of Hawaii; or shall I proceed in such matters under the provisions of our laws, regardless of these provisions of the Revised Statutes?

Very respectfully,

SANFORD B. DOLE.

DEPARTMENT OF THE INTERIOR,
Washington, October 24, 1900.

THE GOVERNOR OF HAWAII, Honolulu, Hawaii.

SIR: Your letter has been received, in which, after referring to the provisions of sections 450, 451, and 458 of the Revised Statutes of the United States relative to the issuing of land patents, you inquire as to whether these provisions govern in the executions of land patents under the laws of the Territory of Hawaii.

In response thereto I transmit herewith for your information a copy of an opinion of the Assistant Attorney-General for the Interior Department to whom the matter was referred, in whose conclusion that, for the present, the existing laws of the Territory of Hawaii govern the execution of land patents, I concur.

Very respectfully,

F. L. CAMPBELL, Acting Secretary.

DEPARTMENT OF THE INTERIOR,
OFFICE OF THE ASSISTANT ATTORNEY-GENERAL,
Washington, October 16, 1900.

The SECRETARY OF THE INTERIOR.

SIR: I am in receipt by your reference with request for an opinion upon the question presented therein, of a letter from the Governor of Hawaii in which, after referring to the provisions of the Revised Statutes (sections 450, 451, and 458), relating to the issuing of land patents, he says:

Does this provision bear upon the execution of land patents under the laws of the Territory of Hawaii; or shall I proceed in such matter under the provisions of our laws regardless of these provisions of the Revised Statutes?

Said sections provide in substance that the President may appoint a secretary to sign his name to patents for land sold or granted under authority of the United States and that all patents issuing from the General Land Office shall be issued in the name of the United States and be signed by the President and countersigned by the recorder of the General Land Office.

The joint resolution of July 7, 1898 (30 Stat., 750), accepting the cession of the Hawaiian Islands provides as to the public lands as follows:

"The existing laws of the United States relative to public lands shall not apply to such lands in the Hawaiian Islands; but the Congress of the United States shall enact special laws for their management and disposition."

Provision was made for the government of the Territory of Hawaii by the act of April 30, 1900 (31 Stat., 141). By section 73 of that act it is provided:

"That the laws of Hawaii relating to public lands, a settlement of boundaries, and the issuance of patents on land-commission awards, except as changed by this act shall continue in force until Congress shall otherwise provide. * * * In said law 'land patent' shall be substituted for 'royal patent'; 'commissioner of public lands' for 'minister of the interior,' 'agent of public lands,' and 'commissioners of public lands,' or their equivalents."

Section 9 of said act provides:

"That wherever the words president of the republic of Hawaii or republic of Hawaii, or government of the republic of Hawaii, or their equivalents, occur in the laws of Hawaii, not repealed by this act, they are hereby amended to read 'governor of the Territory of Hawaii,' or 'Territory of Hawaii,' or 'government of the Territory of Hawaii,' or their equivalents, as the context requires."

Provisions as to the preparation, execution and issuance "royal patents" and "land patents" are found in sections 171, 172, and 200 of the laws of Hawaii (1897) none of which sections is found in the list of acts, chapters, and sections of the law of Hawaii, specifically repealed by said act of Congress of April 30, 1900, *supra*.

These sections are changed by the substitution and amendments made by the act of Congress are in force and are to remain in force until Congress shall otherwise provide. Thus a system differing from that provided by the Revised Statutes is for the present provided for the Territory of Hawaii. The provisions thus made applicable to this Territory must control.

The paper submitted is herewith returned.

Very respectfully,

WILLIS VAN DEVANTER,
Assistant Attorney-General.

DEPARTMENT OF THE INTERIOR, *October 16, 1900.*

Approved:

F. L. CAMPBELL,
Acting Secretary.

COMMISSION OF PUBLIC LANDS, ———, ———, ———.

The joint resolution of annexation approved July 7, 1898, provided that "the existing laws of the United States relative to public lands shall not apply to such lands in the Hawaiian Islands, but the Congress of the United States shall enact special laws for their management and disposition."

Until Congress should enact such laws, no power existed in their local government to alienate or change the status of the public lands in Hawaii, and although, under a misunderstanding of the purport of this clause of the resolution, certain transactions in public lands were made before Congress had enacted these special laws, such transactions were annulled by President McKinley under date of September 11, 1898, upon the opinion of the Attorney-General of the United States that such transactions were without warrant of law.

Congress has since, however, enacted the special laws required by the resolution annexation, and by "An act to provide a government for the Territory of Hawaii," approved April 3, 1900, has specifically enacted by section 73 of said act "that the laws of Hawaii relating to public lands, the settlements of boundaries and the issue of patents on land commission awards, except as changed by this act, shall continue in force until Congress shall otherwise provide," and such intended continuance is emphasized by the changes made to adapt such laws to the new conditions after the taking effect of the act.

The continuance of the land laws of Hawaii by the organic act of April 3, 1900, did not, however, affect those transactions that had been annulled as aforesaid, and an additional clause therefore appears in the said section 73 ratifying and confirming, subject to the approval of the President, all sales, grants, leases, and other dispositions of the public domain and agreements concerning the same, and all franchises granted by the Hawaiian government in conformity with the laws of Hawaii between the 7th day of July, 1898, and the 28th day of September, 1899.

It has been suggested that the continuance of the laws of Hawaii as enacted in section 73 has reference only to those transactions between July 7, 1898, and September 28, 1899, but this appears to this office wholly untenable, for the following reasons:

If any such limitation of the law was intended, such intention would certainly and easily have been stated, rather than the clear and unmodified statement that the existing laws should remain in force until Congress should otherwise provide.

The changes made in the laws of Hawaii by section 73 are meaningless and useless as limited to those transactions between July 7, 1898, and September 28, 1899.

The provision that no lease of agricultural land shall be made for longer period than five years is useless in reference to the transactions between those dates. Those transactions are fully ratified and confirmed by Congress subject only to the President's approval. The amendment as to the five-year lease has value only as applied to new transactions.

Of still greater significance, however, is the change in the laws made by section 73 in substituting the words "I am a citizen of the United States" or "that I have declared my intention to become a citizen of the United States, as required by law" for the words "that I am a citizen by birth (or naturalization) of the Republic of Hawaii," etc.

This change is absolutely unnecessary as applying to any old transactions, for these lands are used only in the original applications for lands under the various systems. What is the meaning of this change in connection with lands not only applied for months before, but sold, granted, and leased already, and which sales, grants, and leases Congress ratifies and confirms, subject only to approval of the President? This change evidently is made with reference to the transactions that should ensue after the passage of the Territorial Act. In brief, the changes in the laws provided by section 73 are necessary only in case the land laws of Hawaii were continued in force for the disposition of new lands.

They are superfluous, meaningless, and misleading as limited to the transactions between July 7, 1898, to September 28, 1899.

No one questions that the title to the public lands of this Territory is in the United States, and probably no one questions that Congress may make such disposition of these lands as it sees fit. It has, by section 99, definitely asserted the title to the lands known as Crown Lands, and makes the same "subject to alienation and other uses as provided by law."

Such law has been provided by section 73, which, making certain changes to adapt existing laws to new conditions, thereupon continues the existing laws until Congress shall otherwise provide. These laws are full and explicit. They cover the case of each and every transaction since the passage of the act, and are understood by this office to be the clear statement of the methods by which Congress has for the present chosen to dispose of public lands in Hawaii.

It is claimed that as the title to these lands is in the United States, and no formal session has been made back to the Territory of Hawaii, that the local authorities are powerless to dispose of any portion of the same. Without assuming to discuss the technical points that might be raised in this connection, I would submit that it is not held by this office that these lands are the property of the Territory to be disposed of under local laws. It is held that they are lands of the United States to be disposed of as Congress has directed and shall direct; in other words, that the existing laws are not the local laws of the Territory of Hawaii, but special laws of the United States Congress applying to the public lands in said Territory, and that Congress in explicitly continuing these laws practically reenacted them and all their provisions as laws of the United States, subject to the modifications and changes that had been deemed necessary.

Section 91 of the organic act commits to the possession, use, and control of the government of the Territory of Hawaii, to be maintained, managed, and cared for at the expense of the Territory until otherwise provided by Congress, "the public property ceded and transferred to the United States by the republic of Hawaii under the joint resolution of annexation approved July 7, 1898."

The above is a general enactment covering numerous classes of property ceded under the joint resolution, and is subject to special enactment in regard to any particular class or portion of the property. Congress has "otherwise provided" for the disposition of the public lands of the Territory by section 73, by the same section reserving to itself the right of any further provisions.

The inclosed correspondence from the Department of the Interior, Washington, appears in strong confirmation of the views stated above.

The opinion of Mr. Vandevanter, Assistant Attorney-General for the Department of the Interior, is, in effect, that section 73 of the organic act continues to the authorities the power to issue land patents for the public lands of this Territory.

If this important authority is so continued it appears reasonable to suppose that all the provisions of the laws of Hawaii relating to public lands are continued, with the modifications and changes made by Congress, in full force and effect until Congress shall otherwise provide.

In indorsing the view of Governor Dole in the matter of homestead and right of purchase leases Mr. Ryan, acting Secretary, very directly states: "It was evidently not intended to change the existing provisions of the Hawaiian laws by which title to the public lands may be acquired, but it was the intention to continue those provisions in force for the present at least."

Consideration of the original report of the commission appointed to formulate a plan for the government of the Territory of Hawaii, of Senate and House discussion and the evidence of parties present at the hearing in committee pending the passage of the organic act, leaves, in the opinion of the undersigned, no doubt of the intention of Congress in this matter, which intention, it is believed, is clearly expressed in the act approved April 3, 1900, and to which it has been the purpose of this office to conform.

I have the honor to be yours, very respectfully,

JACOB F. BROWN,

Commissioner of Public Lands, Territory of Hawaii.

November 9, 1900.

JOHN C. BAIRD, Esq.,

United States Attorney for Hawaii.

COMMISSION OF PUBLIC LANDS,
Honolulu, Hawaii, November 12, 1900.

JOHN C. BAIRD, Esq.,

United States Attorney for Hawaii.

DEAR SIR: In reply to the request for information contained in your communication of November 5, I beg to submit the following statements:

You will note that after the date of September 28, 1899, no transactions are recorded until after June 14, 1900, the date of the taking effect of the act to provide a government for the Territory of Hawaii, as approved April 30, 1900.

Understanding your request to apply only to transactions originating on or after September 28, 1899, I have not included transactions in continuance or completion of any contracts, agreements, or dispositions of public lands originating before such date.

For your further information in this matter, I beg to call your attention to the fact that there is a class of public land not within the control or management of this office.

This class of lands is referred to in section 186 of Civil Laws, as follows:

"Provided, however, That this act shall not apply to the following classes and descriptions of land, the property of the government, all of which shall remain under the control and management of the minister of the interior:

"Town lots, sites of public buildings, land used for public purposes, roads, streets, landings, nurseries, tracts reserved for forest growth and conservation of water supply, parks, and all lands which may hereafter be used for public purposes. All lands hereafter reserved by the commissioners for public purposes shall thereupon at once pass under the control and management of the minister of the interior."

By the act to organize the government of the Territory of Hawaii, the duties of the "minister of the interior," in this connection, devolve upon the superintendent of public works, and information as to transactions on the class of lands referred to should be obtained from the office of public works, this office not having official knowledge of such transactions.

PUBLIC LANDS NOTICE—OLAA TRACT, PUNA, HAWAII.

On Thursday, September 20, at the office of E. D. Baldwin, Hilo, Hawaii, will be a public auction about 200 lots, of 50 acres each, at upset prices of from \$1 to \$2 per acre, on following terms and conditions:

Purchaser may not acquire more than one lot.

The purchase price of the land to be paid within ten years, either in full at any time within said period of ten years, or in installments of one or more tenths of the purchase price on any interest date.

Interest at rate of 6 per cent per annum from date of agreement on unpaid balance of purchase price, payable semiannually, in advance.

Purchaser shall substantially improve his holding within one year from date of agreement, and shall from the end of second year have under cultivation at all times not less than 10 per cent of the premises. To entitle him to patent right giving fee simple title, he shall continuously maintain his home upon the premises for a term of ten years and have at the end of such term 25 per cent of the premises under bona fide cultivation, or shall have maintained his home continuously upon the premises for four years and have under cultivation, at end of such period, 50 per cent of the premises, such maintaining of a home to begin at any time before the end of fourth year from date of agreement.

He shall plant, if not already growing, and maintain in good growing condition at the end of second year until termination of agreement an average of not less than ten trees, timber, shade, or fruit trees per acre.

He shall allow the agents of the government at all times to enter and examine the premises, and shall pay any taxes that may become due on the same.

At the end of the tenth year or earlier if all conditions necessary thereto have been substantially complied with, the purchaser shall be entitled to a land patent conveying in fee simple title to the land described in agreement of sale.

In case of default or failure to perform the required conditions the Commissioner may take possession of the premises and may sell the same at auction, either as a whole or in parcels, for cash or terms of time payments; and if such sale results in advance on the original price, the original purchaser to receive therefrom the amount of his payments to the government on account of purchase, without interest.

If a pro rata share in such advance in proportion to the amounts of his payments. If such sale shall result, however, in a less price than the original the amount returned to him shall be charged with a pro rata amount of such decrease proportioned to the amounts of his payments.

An agreement of sale covering such conditions shall be made with the government and no assignment of interest under such agreement shall be made without the written consent of the commissioner of public lands.

J. F. BROWN, '

Commissioner of Public Lands.

The foregoing sales in Olaa, Puna, Hawaii, were made in accordance with section 201 of "Civil Laws," at public auction in Hilo, Hawaii, September 20, 1900, on the terms and conditions set forth in printed notice inclosed.

The land was sold in lots of about 50 acres each and is covered with heavy forest and jungle growth characteristic of the wet districts of Hawaii, being suitable after clearing to cultivation of coffee, sugar cane, citrus fruits, and general products.

The amount thus sold, about 4,000 acres, is portion of a large tract having the same general qualities and a total area of about 20,000 acres, which has already been carefully surveyed and upon which an expenditure for surveys and the building of roads has been made by the local authorities to the amount of \$30,000 or \$40,000.

These lands are connected by good roads with the town of Hilo, and lie from 10 to 20 miles from same.

The accompanying list of purchasers was prepared immediately after the sale and is presumably complete.

The agreements of sale to be made with purchasers for these lots have not yet been executed, but are in process of execution in the subagent's office in Hilo, to be presented at this office for signature.

Special agreement: Date of agreement, August 1, 1900; purchaser, James D. Dole; area, 61 acres; location, lot 10, Wahiawa Waialua, Oahu; purchase price, \$4,000.

The above agreement of sale was made under section 201 of "Civil Laws," the land concerned having been sold at public auction in Honolulu, July 28, 1900, for the purchase above.

This lot is agricultural land about 20 miles from Honolulu, at an elevation of about 1,200 feet. It is open land suited to general farming purposes and was sold under conditions as follows:

One-fifth of the purchase price cash, the remainder in four equal installments. Purchaser to maintain his home continuously on the premises from the end of first year of fourth year of agreement.

Twenty-five per cent of the land to be put under bona-fide cultivation by end of fourth year.

The above conditions are embodied in the agreement of sale duly issued and noted above.

Cash sale: Date of sale, October 22, 1900; purchaser, Mrs. S. C. Allen; area, 50 acres; location, Ewa, Oahu; purchase price, \$315.

The land concerned above is a small lot of swampy land, portion of old fish pond on the line of Oahu railway about 10 miles from Honolulu.

No land patent or deed for above lot has yet been issued.

General leases: Date of lease, September 1, 1900; No. 528; lessee, A. Enos & Co.; area, five years; area, 25,000 acres; location, Kahikinui, Maui; annual rental, \$3,010.

The above lease was made upon sale at auction, September 1, 1900, after 30 days' public notice. The lease is for term of five years from February 1, 1901, expiring February 1, 1906.

This tract of land, estimated at 25,000 acres, covers the arid and almost waterless ends of the Kahikinui district, Maui. A large portion of this land is represented by absolutely barren lava flows. It has, however, a reasonable amount of pasture in favorable seasons, and brackish water is obtained at the coast. This Kahikinui district appears practically devoid of agricultural possibilities, but the lease provides for taking up of any land without reduction in rent, if the same is desired for settlement.

Lease further requires an annual expenditure of \$200 in eradicating lantana from the land.

The rental obtained is considered by this office a good one.

Grant of right of way: Date, November 1, 1900; grantee, Theo. F. Lansing; location, Waiahole, Oahu; annual fee, \$10.

The above is a grant of right of way for a pipe line for conveyance of water across public land at Waiahole, Koolau, Oahu, and between certain lands owned by the grantee. This right of way is granted for thirty years at an annual fee of \$10, in accord with intent and purpose of "An act to regulate the acquisition of right of way over the lands of others," approved August 13, 1895 (see Civil Laws, chap. 114), and is for right of way only, not conferring any water rights.

WATER RIGHTS.

No leases, sales, or contracts have been completed with reference to any water rights since the date of September 28, 1899.

A lengthy consideration has been given, however, to the joint application of the Waialua Agricultural Company and the Hawaiian Fruit and Plant Company to enter upon certain public land in Waialua district for the purpose of constructing dams, reservoirs, flumes, etc., for the utilization of lands of those companies lying below. The matter is somewhat complicated and difficult of clear explanation, but is substantially as follows:

The Waialua Agricultural Company is the undoubted owner of large water rights in the stream known as the Kaukonohua stream; the north branch of this stream flows on public land known as the mountain portion of Wahiawa. No one lives on the mountain portion and no use of the water has ever been made on that tract. The stream continues its flow through this mountain tract and through private lands below to Waialua plantation, some 9 or 10 miles away, where it has been used for many years for irrigation and plantation purposes, and previous to that for the cultivation of the original Kuleanas or native holdings, now almost wholly acquired by the Waialua Agricultural Company.

Near to this stream, but not adjoining the same except at the lower end, is a tract about 1,300 acres which was subdivided and taken up by a "settlement associa-

tion" under the terms of the Hawaiian land laws. The north and south branches of the Kaukonohua stream unite at the lower end of this tract, passing in deep ravine through lots 1 and 2. The holders of these lots, therefore, have certain limited riparian rights, but more particularly are possessed of valuable dam sites of great capacity, which the Waialua Agricultural Company desires to use. The holders of lots 1 and 2, however, with other members of the settlement association, constitute the Hawaiian Fruit and Plant Company, which company desires to obtain water for the whole of the 1,300 acres of public land taken up by settlers. To this end, therefore, it is proposed that a new water company shall be formed comprising the Waialua Agricultural Company and the Hawaiian Fruit and Plant Company, which company, if their application to the government is granted, erect dams and reservoirs on the mountain portion of Wahiawa, and thereby be able to deliver water by gravity near the upper end of the settlement tract, and enable all the lands of that tract to receive a due supply. Surplus water will be directed to and stored in the lower reservoirs on lots 1 and 2 for further use on lower lands of the Waialua Agricultural Company.

In view of the fact of the large control of the water rights of this stream by the Waialua Agricultural Company, estimated by them at practically the whole of the usual flow, and certainly known to be large, and of the desire of the government to obtain water for the settlers on public lands, very earnest consideration has been given to this question. The following proposition embodies the view of the territorial officials, and is fully in accord with the view held in this office:

That for the privilege of entering upon this upper tract of public land for the purpose named, the proposed new company shall pay to the government an annual sum of 10 per cent of the net profits, with a minimum of \$3,000 per year.

This arrangement to be subject to readjustment at the end of twenty years, or upon such readjustment to continue to the end of the life of the company, at least twenty-seven years longer.

This proposition has been presented to the applicants, but no acceptance of it has been received.

It is, I believe, in every way a proposition favorable to the government. The sketch herewith will perhaps assist in the understanding of the points in issue.

I am not able to state with certainty the flow of the north branch of the Kaukonohua stream concerned in this application.

It is a valuable perennial stream, but varies greatly in its flow.

The parties applying for permission to enter on this upper tract of public land propose to construct a ditch (shown in plan as "proposed ditch") of a capacity of 50,000,000 gallons daily, this, however, having in view the carrying of storm water as well as usual flow.

It is proposed by applicants to expend on this work and on the lower large tract on lots 1 and 2 an amount up to \$250,000.

The foregoing is a full statement of the transactions of this office September 1899, to date other than the usual routine work of the office and such transactions as applied to matters originating before that date.

I remain, very respectfully,

J. F. BROWN,

Commissioner of Public Lands Territory of Hawaii

DEPARTMENT OF JUSTICE,
OFFICE OF UNITED STATES ATTORNEY, DISTRICT OF HAWAII,
Honolulu, November 12, 1904

J. F. BROWN, Esq.,

Commissioner of Public Lands, Honolulu, Hawaii.

DEAR SIR: I beg to acknowledge receipt of your letter of this date inclosing statement requested by my letter of the 5th instant and covering "the transactions of this (your) office from September 28, 1899, to date other than the usual routine work of the office and such transactions as applied to matters originating before that date."

Thanking you very kindly for your courtesy in the premises, I remain,
Yours, very respectfully,

JOHN C. BAIRD

^a The sketch above referred to is on file in this office.

SCHEDULE B.

EXECUTIVE CHAMBER,
Honolulu, November 9, 1900.

H. E. A. HITCHCOCK,
Secretary of the Interior, Washington, D. C.

SIR: Mr. J. F. Brown, commissioner of public lands, informs me that Mr. Baird, district attorney at the Federal court of the Territory of Hawaii, has recently told me that he has been instructed to inquire into the legality of Hawaiian land transactions since September, 1899, with authority to contest their validity, and that he is of the opinion that there is no authority in the Territorial government to sell public lands.

Upon the going into effect of the "Act to provide a government for the Territory of Hawaii," on the 14th of June last, with the provisions contained in sections 73 and 91 of the same relating to the Hawaiian public lands, I supposed that authority was thereby conferred upon the Territorial government to dispose of public lands in the Territory under the provisions of the Laws of Hawaii Relating to Public Lands.

The limitations of leases of agricultural lands to terms of five years, as provided in said section 73, raised a doubt in my mind as to homestead leases and rights of purchase leases, whether such limitation applied to them, and I wrote you for instructions in the matter July 10. Your letter, dated July 27, was duly received by me. This letter stated that such limitation does not apply to homestead leases and rights of purchase leases, and explains that "it was evidently not intended to change the existing provisions of the Hawaiian law by which title to the public lands may be acquired, but it was the intention to continue those provisions for the present at least."

With this letter, together with the provisions of the organic act referred to, my mind was clear as to the authority of this government to act under the Hawaiian laws and the Territorial act in the matter of land transactions, and the commissioner of public lands was instructed to proceed with the work of his department.

Mr. Brown has taken up the work of furnishing land to settlers in several directions, and has in Oloa, Hawaii, disposed of a considerable number of holdings upon conditions of time payment, residence, and improvement. These intending settlers would be much prejudiced if their interests already acquired in these holdings should be set aside as invalid, or even if doubt and uncertainty should be thrown upon them by litigation.

There is a considerable demand for lands for settlement purposes from Hawaiians, Portuguese, and Americans, and probably from persons of other nationalities, and it seems important, from a public standpoint, that the work of furnishing such persons with homesteads should not again be brought to a standstill.

I need hardly call your attention to the embarrassment which such action would cause the Territorial government by making it appear either that it does not understand its duties or is not anxious to keep within its authority.

I have the honor to be, sir, very respectfully,

SANFORD B. DOLE.

DEPARTMENT OF THE INTERIOR,
Washington, December 10, 1900.

THE GOVERNOR OF HAWAII.

SIR: Referring to your letter of this 13th ultimo, inclosing a statement by the commissioner of public lands of his views respecting the authority of the Hawaiian officers over the public lands in Hawaii, I transmit herewith a copy of a letter of the 4th instant, to the Attorney-General, from the Assistant Attorney-General assigned to this Department, which expresses the views of the Assistant Attorney-General upon the question discussed by the commissioner of public lands in the statement above named. The views of the Assistant Attorney-General were reached after a consideration of the statement prepared by the commissioner of public lands and of the statement, but reaching a different conclusion, prepared by the United States attorney for the district of Hawaii.

The views of the Assistant Attorney-General, as expressed in his letter of the 4th instant, have my approval.

Very respectfully,

E. A. HITCHCOCK, *Secretary.*

DEPARTMENT OF THE INTERIOR,
OFFICE OF THE ATTORNEY-GENERAL,
Washington, December 4, 1900.

The ATTORNEY-GENERAL.

SIR: Answering your letter of the 3d instant, inclosing a letter of the ——— ultimatum from the United States attorney for the district of Hawaii, together with a brief prepared by him and copies of correspondence, all relative to the authority of the public officers of the Territory of Hawaii to sell, lease, or otherwise dispose of public lands in the Hawaiian Islands, I have read the inclosures named, but I do not agree with the United States attorney in his conclusion that the public officers of the Territory of Hawaii are not authorized to sell, lease, or otherwise dispose of public lands in the Hawaiian Islands. While the grant of authority could have been more plainly stated, it seems to me that the question is free from difficulty, and that subject to certain specified changes and amendments the act of April 30, 1900 (31 Stat. 141), continues in force "the laws of Hawaii relating to public lands, and there provides a system whereby the public lands in those islands may be disposed of until Congress shall otherwise provide." These public lands are not granted to the Territory, but Congress in the exercise of its power and discretion has made them Hawaiian officers and Hawaiian laws, subject to the changes and amendments specified, its instruments for the time being for the disposal of these lands.

In your letter to me it is said "he (United States attorney) seems to have come to a conclusion opposed to that in your report of July 10, 1900, to the Secretary of the Interior."

There was no report, letter, or opinion from me upon this subject at or about the time named, but I find a letter from Acting Secretary Ryan to the governor of Hawaii, dated July 27 last, and an opinion from myself to the Secretary of the Interior, dated October 16 last, both of which may be said to be opposed to the general views expressed by the United States attorney for Hawaii.

If this communication does not answer the purpose intended to be effected by your letter to me, I will be glad to await your further direction in the premises.

Herewith are the papers accompanying your letter.

Very respectfully,

WILLIS VAN DEVANTER,
Assistant Attorney-General.

EDWARD S. BOYD,
Secretary of the Commission of Public Lands.

LAND TRANSACTIONS, REPUBLIC OF HAWAII, JULY 7, 1898, TO SEPTEMBER 30, 1899.

[Approved by the President of the United States November 30, 1900.]

COMMISSION OF PUBLIC LANDS, HONOLULU, HAWAII.

I hereby certify that the foregoing pages contain a full and correct statement of all grants, sales, and leases of the public domain, and all agreements concerning the same, made by or through the office of public lands of the republic of Hawaii, between the 7th day of July, 1898, and the 28th day of September, 1899, and that all of said grants, sales, leases and agreements were made in good faith and in compliance with all the requirements of the then existing laws of the republic of Hawaii.

J. F. BROWN, *Commissioner of Public Lands.*

Dated at Honolulu this 1st day of August, A. D. 1900.

I, Henry E. Cooper, secretary of the Territory of Hawaii, hereby certify that J. F. Brown, esq., was on the 1st day of August, A. D. 1900, the duly appointed and commissioned commissioner of public lands of the Territory of Hawaii, and that his signature attached hereto is genuine.

HENRY E. COOPER.

Dated at Honolulu this 1st day of August, A. D. 1900.

I hereby certify that the dispositions of land referred to in the foregoing lists were made by the Hawaiian government between the 7th day of July, A. D. 1898, and the 28th day of September, A. D. 1899, in strict conformity with the laws of Hawaii.

SANFORD B. DOLE.

Dated at Honolulu this 1st day of August, A. D. 1900.

EXECUTIVE MANSION,
Washington, D. C., November 30, 1900.

Approved under the provisions of section 73 of the act of Congress approved April 30, 1900.

WILLIAM MCKINLEY.

List of land exchanges made by the Interior Department, from July 7, 1898, to September 30, 1899, etc.—Continued.

Date of exchange.	To whom.	Location and area of land given in exchange.	Other consideration.	Location and area of land received in exchange.	Other consideration.	Purpose of exchange.	Remarks.
1898. July 30	Bishop of Panopolis (Catholic Mission).	Land in Kamakela, 24,485 square feet, Honolulu, Oahu. (This area takes in the lots received in exchange from Mr. von Holt and Mr. Gartenberg.)	Land at Kamakela, 30,625 square feet, Honolulu, Oahu.	Land required to change the course of Nuuanu stream, and for road purposes. This improvement was found necessary to improve the sanitary condition of that portion of the city by a committee appointed to investigate during cholera epidemic in 1895.	This exchange was made in pursuance with an agreement entered into between the government of the Republic of Hawaii and the bishop of Panopolis, July 29, 1896, and only completed July 30, 1898.
Aug. 11	Nanle E. Rice	Abandoned part of the old Pall road at Koolaupoko, Oahu.	Nuuanu Pall road, 50 by 11,450 feet, through Kaulakela, Keonole; and Kaeleuli, Koolaupoko, Oahu. New branch road 50 by 3,210 feet through Kaeleuli, Koolaupoko, Oahu.	Changing the line of the Nuuanu Pall road so as to reduce the grade from a 40 per cent to 8 per cent.	
Sept. 22	Marie Brossier (Superior, Sister Sacred Heart). Geo. J. Auger.	Two lots on Union street, 774 square feet, Honolulu, Oahu. Land on Beretania street, 172 square feet, Honolulu, Oahu.	2 lots on Union street, 830 square feet, Honolulu, Oahu. Land on Beretania street, 223 square feet, Honolulu, Oahu.	Widening and grading Union street, Honolulu, Oahu. Widening and straightening Beretania street.	
Oct. 12	Sam Kamakau	Government remnant in Kaunakapili, 400 square feet, Honolulu, Oahu.	Land in Kaunakapili, 710 square feet, Honolulu, Oahu.	Road at Kaunakapili.	
Dec. 19	S. B. Dole	30-foot roadway between his lot and lot owned by Mr. W. L. Wilcox at Aquia Marine, Diamond Head.	30-foot roadway running above Mr. Dole's lot, Aquia Marine, Diamond Head.	Changing the line of the road.	The 30 feet of roadway given to Mr. Dole in exchange was donated by him to the government in 1890.
1899. Feb. 1	J. S. McGrew	Lot on Alakea street, 1,360 square feet, Honolulu, Oahu.	Lot corner Beretania and Alakea streets, 1,385 square feet, Honolulu, Oahu.	Widening Beretania street.	
Feb. 24	Pepeekeo Sugar Co.	Land at Kaupakua, old government road, Hilo, Hawaii.	Land at Kaupakua, 24 acres, Hilo, Hawaii.	Changing line of road to improve grade.	

June 29	John D. Holt	(1) Lot on corner of street, 3,403 square feet, 1/2 block, corner Queen and Richey streets, 0.133 square feet.	Lot adjoining Fort street school, Honolulu, Oahu.	3,000	For school purposes
July 8	Estate of Bernice P. Bishop.	Land in Anawailimu, 3.78 acres, Honolulu, Oahu.	Kawa pond, near Oahu Prison, 6.6 acres, Honolulu, Oahu.	To be filled in and make land for storage room and warehouses.

This land at Anawailimu is under lease to the Kapolei Land Co., and it has an unexpired term of thirteen years from Aug. 15, 1898. The exchange is also conditioned that the Government will at its own cost and expense, provided and so far as possession thereof can be obtained, fill in with suitable material and level the said piece of land conveyed in exchange, and all land belonging to the said estate immediately prior to the date of the conveyance lying between the land conveyed or any part thereof and the line of Punchbowl street, to the grade of 3 feet above city datum within the space of five years from the date hereof or forthwith after any public authority authorized in the premises has declared the condition of any part of the land so to be filled in as aforesaid to be insubstantial or a nuisance, and will protect said estate against the consequence of allowing the said land as to be filled in to become or remain in an insanitary condition or a nuisance, and will indemnify said estate against all claims, actions, suits, and demands by any person or authority arising out of the said lands so to be filled in becoming or remaining in an insanitary condition or a nuisance.

List of land exchanges made by the Interior Department, from July 7, 1898, to September 30, 1899, etc.—Continued.

Date of exchange.	To whom.	Location and area of land given in exchange.	Other consideration.	Location and area of land received in exchange.	Other consideration.	Purpose of exchange.	Remarks.
1899. Aug. 31	Bishop of Pānopolis (Catholic mission).	2 lots on Punchbowl Hill, 47,083 square feet, Honolulu, Oahu.	Land on Beretania street, 2,080 square feet, Honolulu, Oahu.	Widening Beretania street.	The Kapiolani estate has a lease on the lots exchanged of thirteen years' unexpired term.
Sept. 15	W. R. Castle	Land Forest Ridge, Tanaisius, 2.82 acres, Honolulu, Oahu.	A portion of his undivided interest in the land of Poloke, Makiki amounting to fully 6 acres there- of Honolulu, Oahu.
Sept. 28	Dr. C. B. Wood	Land Punchbowl, 18,000 square feet, Honolulu, Oahu.	Land Beretania street, 950 square feet, Honolulu, Oahu.	Widening Beretania street.

List of Government leases made by the Interior Department from July 7, 1898, to September 30, 1899. (Chapter 15, section 169, and chapter 16 of the civil laws; also part 1 of land act 1896, third paragraph from the end.

No. of lease.	Lessee.	Location.	Date of lease.	Annual rental.	Term.	Conditions.
535	C. Brewer & Co., Limited	Lot on Queen street, with building, Honolulu, Oahu.	1898. Sept. 1	\$1,200	Years. 20	To make \$10,000 worth of repairs on the building.
536	J. G. Serrao	Lot 19, block 13, Hilo, Hawaii	Dec. 12	635	21	To erect a \$2,000 fireproof fish market.
537	E. O. Hall & Son, Limited	Lot 18, Esplanade, Honolulu	Dec. 19	360	30	To erect a \$6,000 fireproof building.
538	H. Hackfeld & Co., Limited	Lot 15, Esplanade, Honolulu	1899. Jan. 28	600	30	To erect a \$7,000 fireproof building.
539	Electric Light Co	Lot 64, Esplanade, Honolulu	Feb. 6	625	30	To erect an \$8,000 fireproof building.
540	J. G. Serrao	Lot 21, block 13, Hilo, Hawaii	Feb. 20	660	30	To erect a \$2,000 fireproof building.
541	H. N. Pratt	Lot 23, Esplanade, Honoluludo.....	310	30	Do.
542	C. H. Brown	Lot at Makaoaka beach, Hilo, Hawaiido.....	25	(a)	To terminate upon thirty days' notice.
543	T. H. Davies & Co., Limited	Lot 14, Esplanade, Honolulu	June 6	400	30	To erect a \$5,000 fireproof building.
544	B. L. Jones	Lot 23, block 13, Hilo, Hawaii	July 10	300	30	To erect a \$3,000 fireproof building.
545	W. W. Adams	Lots 1, 2, 3, and 4, River street, Honolulu, Oahu.	Aug. 14	960	21	To fill land to street grade before erecting any structure.
546	W. W. Ahana	Lot, River street, Honoluludo.....	175	20	To commit no act that would become a nuisance to the Japanese Methodist Church.
547	See Yee Tong	Lot 5, River street, Honoluludo.....	310	21	To fill land to street grade before erecting any structure.

a Tenancy at will.

One would suppose that no one in Hilo has read the Cullom bill. The report of the Cullom commission has been in print more than a year, and it has not been criticised by the people and only tenderly by the press. Under such circumstances any public measure is considered to be satisfactory. There are many in Hilo who laughed at the idea of the Olaa settlers trying to prevent the sale of the public lands by the Hawaiian Government. However, it was accomplished for the asking. Good government can be had for all the people for the asking, and if the island of Hawaii is willing to take the chances without pointing out the defects in the Cullom bill we should be prepared to suffer the consequences. If the dispatch in the Bulletin as to Hartwell and W. O. Smith is correct, we may be thankful that some Congressmen can see Hawaiian affairs "through a ladder" better than we can at home. It is not difficult to see why W. O. Smith is not rated very high as a statesman at Washington. Any man who would give utterance to such sentiments as he did for publication (in the San Francisco Call, September 2) might expect to be regarded with suspicion. Among a list of questions asked by the Call on Hawaiian affairs was the following:

No. 8. What is your opinion in regard to the franchise? Should universal suffrage or a restricted one be granted? How would you deal in this respect with native-born Hawaiians, whether of the native or Asiatic races?

In reply W. O. Smith said:

I believe that under conditions that now exist in these islands the plan of requiring property and educational qualifications is very desirable. Under present conditions the acquisition of property represents, in a large measure, intelligence. Sharing in government is not a right, but a privilege, and in my opinion only those who have sufficient intelligence should enjoy such privilege.

Such utterances are too rank for comment. He states openly that a man's intelligence should be measured by his wealth, and if his theory was correct and a man was given the "privilege" of voting because he owned \$1,000 worth of property, the man who owned \$10,000 should be given ten votes. According to Mr. Smith, the latter would be ten times more intelligent than the former. It is quite likely that Mr. Smith never had any use for the Declaration of Independence and perhaps never read it. He will find, however, it is written there that "all governments derive their just power from the consent of the governed." Upon reflection he will find that sharing in government is an inalienable right and not a privilege. No doubt he has already found that a great many Congressmen think so. A property qualification to vote is a relic of barbarism, and anyone who expresses opinions to the contrary at this stage of the world's progress will certainly be regarded as a knave or a fool, especially by Americans.

How different and patriotic is the answer of Hon. Paul Neuman to the same question. He says:

I do not favor a franchise restricted except by reason of illiteracy. I can not understand why any native-born Hawaiian should be deprived of his rights in that respect for any reason whatever which does not in like manner affect any other citizen. We have taken their country and their flag, abrogated their monarchical institutions, sold the relics of their kings at public auction instead of donating them to the Bishop Museum. Let us be satisfied and leave them at least the inestimable privilege of freemen to vote for incompetent legislation.

Mr. P. Wundenberg's reply contains about the whole truth. He says:

It is my opinion that if Hawaiians are compelled to become Americans against their will the very least that can be done is to give them the rights of Americans.

The property qualification imposed since the promulgation of the Constitution of 1887, and also recommended by the commission appointed by the United States to draft the proposed laws for Hawaii, is a clear injustice to the Hawaiians, and was intended, in the first place, for no other reason than to practically disfranchise the natives.

The Herald is quite right. Local government is only a dream if the Cullom bill is allowed to pass in the present form. But who is to blame? Mainly the people of Hilo. Even the fool settlers shook up the land question till the racket was heard to the farthestmost part of the Union. By the way, Squatterville presents a lively appearance. Clearing and planting can be seen in every direction. Substantial houses are taking the places of the settlers' first cabins. New settlers are rapidly coming in from the States. There are more than 100 members in the Settlers' Association, and even the birds are singing. "We are here to stay."

Truly, yours,

A SQUATTER.

CHANGES IN HAWAIIAN BILL.

WASHINGTON, *February 16*.—Comparatively few changes will be made in the Cullom Hawaiian bill which is now under consideration in the Senate. This measure, which will be the organic act of the new Territory of Hawaii, was framed by the Hawaiian Commission, consisting of Senators Cullom, Morgan, and Representative Hitt, which visited the islands in the summer of 1898. In one respect, however, the Senate has already shown a disposition to amend the bill. As it now stands the acts of the legislature, except by the veto of the governor and a review by the courts, are final. This gives to the Territory of Hawaii a much larger measure of self-government than the Territories of New Mexico, Arizona, and Oklahoma and the Territories which have been admitted to statehood in recent years have ever enjoyed, for in all of those Territories the acts of the legislature were subject to ratification by Congress.

The feeling of many Senators is against granting to the new Territory in the Pacific so much greater control of its affairs than New Mexico, for example (which has been a Territory for half a century), enjoys and it was intimated this afternoon by Senator Platt, of Connecticut, that when the proper time arrived he would move for the insertion in the Cullom bill of a provision similar to that which obtains in the organic acts of the existing Territories.

One other amendment has been suggested by Senator Warren, but there is reason to believe that it will be the subject of some debate. The Cullom bill provides for a property qualification for voters, but Senator Warren proposes that the legislature of Hawaii, after January 1, 1903, may submit to the lawfully qualified voters of that Territory such changes and modifications in the qualifications for electors as it may see fit, and upon the adoption by a majority vote of such modifications they shall become valid and binding.

There is also a disposition to shorten the terms of the judges of the supreme court of Hawaii, which the bill fixes at nine years. These judges are to be appointed by the governor, who in turn is appointed by the President. In the Territories now existing the chief justice and associate justices of the Territorial supreme court are all appointed by the President.

The judicial system in Hawaii will consist of a supreme court of the Territory and a separate and distinct United States district court, presided over by a judge appointed by the President. Some Senators believe the judicial system of Hawaii should conform more closely with the present Territorial system, although members of the Hawaiian commission are of the opinion that it is best to leave conditions in the islands as nearly as possible like those that prevailed before annexation.

It has become known in the last few days that the beet-sugar interests represented by the Oxnards, of Nebraska and California, will try to secure the imposition of a 25 per cent duty on Hawaiian sugar as a protective measure for the benefit of the beet-sugar growers of the United States. They have taken their cue in this matter probably from the reports of the House and Senate committees on the Porto Rican bill providing for a levying of 25 per cent duty both ways on imports and exports between Porto Rico and the United States. Hawaiian sugar has had free access to the markets of the United States for the last fifteen years under the reciprocity treaty, and such a step as the beet-sugar men propose would be a radical departure.

The question also arises whether the United States, having acquired the Hawaiian Islands under the treaty, and the Cullom bill expressly extending the Constitution of the United States to the islands, it will be possible to impose any customs duties upon trade between the islands and the mainland. Nevertheless it is known that Senator Burrows, of Michigan, is prepared to offer such an amendment when the proper time arrives.

EXHIBIT 12.

Evening Bulletin. (From the Progressive Bulletin.) Honolulu, Hawaii, Thursday, August 9, 1900.]

JUDGE ESTEE'S COURT TAKES POSSESSION—HIGHLY INTERESTING SESSION THIS MORNING—OBJECTS TO ATTITUDE OF TERRITORIAL OFFICERS—COURT MUST DO ITS BUSINESS AND ROOM MUST BE PROVIDED—NO TEMPORARY QUARTERS—IN CIRCUIT COURT ROOMS.

Mr. CLERK. It is ordered that the United States marshal be and he is hereby directed to take possession of this court room, and keep the keys, and hold possession of it for the purpose of public business of the United States district court, until the further order of this court.

It is further ordered that the marshal proceed immediately under the laws of the United States and get such bids as may be necessary in getting at least six chairs, not expensive; two plain tables, not expensive tables, for the chambers of the judge of this court now, situated in the Waikiki end of this building.

And that said marshal shall proceed to put up such shelving—plain shelving—as may be necessary for the accommodation of the books belonging to the judge of this court in the chambers, as above specified, for the examination of both members of the bar and the judge of this court.

Judge M. M. Estee opened this morning's session in the United States district court in the second court room upstairs of the Judiciary Building. After dispatching some business over from yesterday,

he stated that the court wished to say something before making order that it was about to make.

This was in regard to a home for the court. The judge read correspondence that had taken place between himself and the superintendent of public works on the subject.

It had been commonly understood that the department of public works was going to complete the outfitting of the old legislative hall with adjacent rooms, for a United States district court room, chambers for the judge, and offices for officers of the court. The correspondence read by Judge Estee showed that the department only meant to complete the bare repairs of walls and floors of the apartments, leaving the Federal authorities to fit and furnish it for the Federal court's uses at United States expense, and withal to have it understood that the Federal court should have only temporary occupancy of the place at a rental to be mutually arranged.

The following letter of Judge Estee covers the substance of letter from Mr. McCandless, to which it is an answer:

JUDGE ESTEE'S LETTER.

HONOLULU, HAWAII, August 8, 1900.

J. A. McCANDLESS, Esq.,

Superintendent of Public Works, Honolulu, Hawaii.

SIR: Your two letters of August 7, 1900, one in relation to the preparation of a court room and offices of the United States district court, notifying me that the board of public works can not prepare said court room and judge's chambers, the offices of the district attorney, district clerk, marshal, for use, the other asking for temporary use for myself and the officers of my court offices on the West side of the main hallway on the lower floor of the government building known as the Judiciary Building, and adding in regard to the rental of these offices that the same can be satisfactorily arranged at some future date, have been duly received by me.

In reply thereto, I wish to state that it was expected as I have been informed

1. That your department would prepare the court room of the United States district court and the judge's chambers and the respective offices of the respective government officers for use.

2. I am not authorized to accept any place for a court room temporarily. I confess I do not understand what your letter means by saying temporary use of a place in the building referred to.

3. I do not admit that any rental of these offices is either due or ever will be to the Territory of Hawaii or its Territorial government for the use of any part of the building by the United States district court or its officers.

I had supposed that this building was the property of the United States; but that as it may, I have no authority to put off to a future date or to agree to any matter of the rental of any of these rooms or any one of them.

Very truly, yours,

M. M. ESTEE.

P. S.—I decline to enter into any arrangement for the temporary rental of the building referred to in your letter as a court room.

Judge Estee, in commenting on the correspondence, stated that officers of the Hawaiian judiciary had informed him that the main room downstairs had not been used as a legislative hall for several years. Recently, that is, last night, the court remarked, he had received the following letter:

LATEST FROM M'CANDLESS.

DEPARTMENT OF PUBLIC WORKS,
Honolulu, Hawaii, August 8, 1900.

HON. MORRIS M. ESTEE,
United States District Judge.

SIR: I have the honor to acknowledge receipt of your favor of this day's date in reply to our letters of the 7th instant, in regard to the matter of fitting up your

and offices connected with the same, and to say in reply that the court room assigned to your temporary use is the legislative hall of the Territory, and during the occupancy of the same by your court this government will have to make temporary arrangements for the meeting of the Territorial legislature elsewhere. You can see by this explanation why the offices assigned to you and your court will be only temporary.

In regard the ownership of the Judiciary Building, I beg to call your attention to section 91 of "An act to provide a government for the Territory of Hawaii," which provides "that the public property ceded and transferred to the United States by the Republic of Hawaii under the joint resolution of annexation approved July 7, 1898, shall be and remain in the possession, use, and control of the government of the Territory of Hawaii, and shall be maintained and cared for by it at its own expense," etc.

This government, fully recognizing the necessity for more room for public offices, has communicated with the Secretary of the Interior at Washington, pointing out the necessity of the United States Government erecting a building for the uses and purposes of the United States Federal officers, and it is to be hoped that a favorable reply will be received.

In conclusion, I beg to assure you that there has never been any attempt on the part of this government to embarrass any Department of the United States of America, but to the contrary it has always been willing to render all assistance in its power.

Yours, very respectfully,

J. A. McCANDLESS,
Superintendent of Public Works.

Judge Estee said he had been surprised at the amount of floor room for the courts of Hawaii. It was greater than that possessed by the courts of the State of California at Sacramento. "There is no reason for us to run against each other," said the judge.

He quoted from an opinion given the Secretary of the Interior by the Attorney-General in volume 22, pages 627, 628, Opinions of the Attorney-General of the United States, to show that all the public lands and buildings of Hawaii, "even this building," belong to the United States.

In making the order that appears at the head of this report, Judge Estee said it was not taking anything from anybody. You all belong to the United States, and it is a glorious privilege. We are distant thousands of miles from the capital of the United States. There are matters coming up before this court—a habeas corpus case and other business—and we have to have a home.

The judge here proceeded to dictate the order, which was taken down by C. F. Reynolds, official stenographer of the court.

In conclusion, Judge Estee said that the circuit court judges had kindly consented to this order being made. It was not an act to disturb the public mind, but to promote the public business. He then called for any matters that it might be desired to bring before the court.

Mr. Brooks presented a writ of habeas corpus on behalf of Chinese addressed to J. K. Brown, inspector of immigrants. The court appointed Monday morning for return of the writ, and proceeded to finish business of admitting attorneys and naturalizing aliens.

EXHIBIT 14.

UNITED STATES SUPREME COURT DECISION—EXCLUSIVE POWER OF CONGRESS TO LEGISLATE AS TO PUBLIC LANDS.

[Gibson v. Choteau (U. S., 13 Wall., p. 92). Opinion by Justice Field.]

With respect to the public domain, the Constitution vests in Congress the power of disposition and of making all needful rules and

regulations. That power is subject to no limitations. Congress has the absolute right to prescribe the times, the conditions, and the mode of transferring this property, or any part of it, and to designate the persons to whom the transfer shall be made. No State legislation can interfere with this right or embarrass its exercise; and to prevent the possibility of any attempted interference with it, a provision has usually been inserted in the compacts by which new States have been admitted into the Union that such interference with the primary disposal of the soil of the United States shall never be made. * * * The same principle which forbidding State legislation interfering with the power of Congress to dispose of the public property of the United States also forbids any legislation depriving the grantees of the United States of the possession and enjoyment of the property granted by reason of any delay in the transfer of title after the initiation of proceedings for its acquisition. The consummation of the title is not a matter which the grantees control, but one which rests entirely with the Government. With the legal title, when transferred, goes the right to possess and to enjoy the land, and it would amount to a denial of the power of disposal in Congress if these benefits which should follow upon the acquisition of that title could be forfeited because they were not asserted before the title was issued. It is said (*Boggs v. Broderick*) Congress has the sole power to declare the dignity and effect of titles emanating from the United States, and the whole legislation of the Federal Government in reference to the public land dictates the patent, the superior and conclusive evidence of legal title. Until its issuance the fee is in the Government, which by the patent passes to the grantee, and he is entitled to recover the possession in ejectment.

LAW OFFICE OF LEBLOND & GALBRAITH,

Hilo, Hawaii, September 12, 1899.

AMERICAN SETTLERS' ASSOCIATION,

Olaa, Hawaii.

In order that your association may be thoroughly advised as to the status of the "squatters" or settlers on the new Olaa lands, we have thought it advisable to address you this letter.

You clearly understand that the title to all public lands on the Hawaiian Islands is in the Government of the United States of America, and there the title must remain until such time as the Congress of the United States shall enact "special laws for their management and disposition." In the absence of such "special laws" no legal rights

can be acquired. By legal rights, we mean rights that are enforceable in the courts or tribunals that now exist or that may hereafter be established on the islands. While all this is true, still you have violated no law in going upon these lands, for the reason that there is no law either permitting or forbidding such an act.

What, then, is your status? You have taken possession of public lands that are not subject to entry, sale, or disposition in any manner whatever, for the reason that the Congress of the United States has not enacted the "special laws for their management and disposition," as provided in the Newlands resolution it shall do.

As citizens of the United States, qualified homesteaders under the land laws of the United States, you have entered upon and taken possession of unoccupied lands of the Government that ought in justice and right to be now subject to settlement and entry, you have acted in a quiet and peaceable manner, showing that you are law-abiding citizens. You have shown your good faith by making substantial improvements, and in all things you have shown your earnest desire to acquire homes on the public domain and to develop the country.

It is undisputed that by your acts and influence you have prevented the present officials of the Hawaiian government from consummating an illegal sale and disposition of these lands.

If you have no legal standing, your exemplary conduct and the results accomplished by you most certainly give you a strong moral standing, one that ought to appeal strongly to the sense of fairness and justice in the minds of the members of the United States Congress when the time comes for the "enactment of the special laws for their management and disposition."

Following the well-known and long-practiced principle of the American land laws, that whoever causes the cancellation of an illegal entry of public lands shall be given a preference right for a period of thirty days over all comers to file on said tract, the law that shall be enacted by Congress governing the disposition of these Olaa lands ought to contain a provision giving to each settler on these lands a preference right of at least thirty days to file on the tract settled upon, after the establishment of a United States land-office, and said land is subject to entry.

You understand that your rights, if any, in these lands must be defined and protected by the special laws enacted by Congress for the "management and disposition of these lands."

With the vast and imposing interests pressing upon the American Congress for attention, it will be readily seen that the interests of a few settlers on the Olaa lands in Hawaii, however righteous their cause or just their claims, might be overlooked without any intention so to do.

If you get anything from Congress, permit us to suggest it will be necessary for you to ask for it, and to ask for it earnestly and persistently. When you have determined what you want to ask of Congress, the next thing to demand your careful and thoughtful attention is the method or means you will employ in "the asking."

At any time we can be of service to you, of course you will feel at liberty to command us.

Yours, very truly,

LEBLOND & GALBRAITH.

NOTE.—Mr. Galbraith, who wrote the opinion of which the above is a copy, is now associate justice of the supreme court of Hawaii, appointed by President McKinley.

EXHIBIT 16.

LETTERS FROM THE COMMISSIONER OF THE GENERAL LAND OFFICE.

DEPARTMENT OF THE INTERIOR,
GENERAL LAND OFFICE,
Washington, D. C., August 29, 1900.

Mr. J. E. HIME,
Secretary American Settlers' Association, Olaa, Hawaii.

SIR: Your communication of the 27th ultimo, inclosing to this office a protest against the approval of sales, grants, leases, etc., of Hawaii lands, addressed to the President, has been received at this office, and your protest has been forwarded to the honorable Secretary of the Interior for his consideration and appropriate action.

Very respectfully,

W. A. RICHARDS,
Acting Commissioner.

DEPARTMENT OF THE INTERIOR,
GENERAL LAND OFFICE,
Washington, D. C., November 6, 1900.

AMERICAN SETTLERS' ASSOCIATION,
Olaa, Hawaii.

GENTLEMEN: I am in receipt of your letter of the 4th ultimo inclosing newspaper clippings and other printed data relative to public lands in the Hawaiian Islands and the desirability of extending the homestead law to said islands; also asking that the Department cause early investigation to be made relative to the character and extent of the lands ceded to the United States.

In reply you are advised that there is at present no appropriation available for the purpose of making the desired investigation. However, your letter, with accompanying data, will be filed for future consideration in connection with the subjects mentioned. Meanwhile I should be pleased to have your association furnish any further data available relative to these questions.

Very respectfully,

BINGER HERMANN,
Commissioner.

DEPARTMENT OF THE INTERIOR,
GENERAL LAND OFFICE,
Washington, D. C., September 17, 1900.

MESSRS. COPP & LUCKETT,
Attorneys at Law, Washington, D. C.

SIR: I am in receipt of your letter of September 4, 1900, stating that—

As attorneys for Fred R. Giddings et al., we file protest of a large number of American citizens in Hawaii who have settled on small tracts of vacant public lands in the tract known as the Olaa tract, on the island of Hawaii. Their protest is directed against J. F. Brown, commissioner of public lands for the Territory of Hawaii, who seems to have advertised a public sale of these lands without any order, either from the General Land Office or the Interior Department.

We desire to call your close personal attention to this matter, and to ask that Mr. Brown's proposed sale be indefinitely suspended.

In reply, I will state that no statute has been enacted by Congress giving this office jurisdiction over the public lands of Hawaii, and for that reason your letter has this day been referred to the honorable Secretary of the Interior for his consideration.

Very respectfully,

W. A. RICHARDS,
Acting Commissioner.

DEPARTMENT OF THE INTERIOR,
GENERAL LAND OFFICE,
Washington, D. C., July 3, 1901.

AMERICAN SETTLERS' ASSOCIATION,
Mountain View, Olaa, Hawaii.

SIRS: I am in receipt of your letter of June 5, 1901, inquiring if the statement published in the papers that the lands in the Kiowa, Comanche, and Apache Reservation are to be opened by drawing is correct and stating that you believe the plan could be made to work well in the distribution of homesteads in Hawaii.

In reply you are advised that the regulations in regard to opening the reservation mentioned have not yet been issued. When the President's proclamation is ready for distribution, a copy will be mailed to your address.

Very respectfully,

BINGER HERMANN,
Commissioner.

See page 4, proclamation. Also, in same connection, see lines 9 to 15, page 7, section 7, of Senate bill No. 1344, in the Fifty-seventh Congress, now under consideration by the Committee on Pacific Islands and Porto Rico.

DEPARTMENT OF THE INTERIOR,
GENERAL LAND OFFICE,
Washington, D. C., September 27, 1901.

Hon. R. W. WILCOX,
House of Representatives, United States.

SIR: I have the honor to acknowledge the receipt, by your reference, of a letter from Mr. T. J. Ryan, Mountain View, Hawaii, dated July 15, 1901, protesting against the disposition of certain lands by the commissioner of public lands of Hawaii.

In reply, I will state that as no statute has been enacted giving this office jurisdiction over lands in Hawaii, I have this day forwarded Mr. Ryan's letter to the honorable Secretary of the Interior for his consideration.

Very respectfully,

BINGER HERMANN,
Commissioner.

EXHIBIT 17.

LAND LAW BILL INTRODUCED BY SENATOR SULLIVAN.

DEPARTMENT OF THE INTERIOR,

GENERAL LAND OFFICE,

Washington, D. C., February 13, 1901.

THE SECRETARY OF THE INTERIOR.

SIR: I have by your reference, for report in duplicate, S. 5882, entitled "A bill to extend the general land laws of the United States to the Territory of Hawaii, with rules and regulations for homestead entries by the Secretary of the Interior."

The absolute fee and ownership of all public, Government, or crown lands situated in Hawaii were absolutely ceded to and became the property of the United States upon the annexation of the Hawaiian Islands. The act of July 7, 1898 (30 Stats., 790), provided that—

The existing laws of the United States relative to public lands shall not apply to such lands in Hawaii, but the Congress of the United States shall enact special laws for their management and disposition, provided that all revenues from the proceeds of the same, except as regards that part which may be used or occupied for civil, military, or naval purposes of the United States, or may be assigned to the use of the local government, shall be used solely for the benefit of the inhabitants of the Hawaiian Islands for educational and other public purposes.

Section 73 of the act approved April 30, 1900 (31 Stats., 154), provides that—

The laws of Hawaii relating to public lands; the settlement of boundaries, and the issuance of patents on land commission awards, except as changed by this act, shall continue in force until Congress shall otherwise provide; that, subject to the approval of the President, all sales, grants, leases, and other dispositions of the public domain, and agreements concerning the same, and all franchises granted by the Hawaiian Government in conformity with the laws of Hawaii between the 7th day of July, 1898, and the 28th day of September, 1899, are hereby ratified and confirmed.

Since the laws of Hawaii have thus continued in force, it may be of interest to refer briefly to the enactments on this subject in those islands prior to their annexation to the United States.

Prior to the year 1846 the lands in Hawaii belonged in legal contemplation to the King and the chiefs, and the people as tenants, by a system closely resembling the former feudal system of England. In that year, however, the King granted to his chiefs and people certain portions of the land, to Government purposes certain other portions, and retained for himself the remainder, and this act was ratified by his legislature on June 7, 1848. The lands thus passed to the King and his heirs were thence known as crown lands.

In 1850 one-twentieth of all public lands were set apart for the support of schools, which the school board was empowered to sell and lease. Under the homestead act of 1884 landless applicants were permitted to acquire title to 2 acres of taro, or wet lands, and not more than 20 acres of dry land.

In 1891 a part of the crown lands was divided into small tracts and the method of leasing them to homestead applicants on easy terms was instituted.

In the year 1895, after the Republic of Hawaii had been established as the "land act, 1895," which now remains in force and which provides a comprehensive system for the care and disposition of the public domain. By this act crown lands are treated as having vested in

the Republic, and they, together with the public lands before mentioned, now constitute the public lands of the Territory, of which, according to the estimate given in your last annual report, there were approximately 1,773,713 acres, valued at \$3,569,800.

Under the land act of 1895 the lands of the island were classed and divided into (1) agricultural lands, (2) pastoral lands, (3) pastoral agricultural lands, (4) forest lands, (5) waste lands.

Agricultural lands were classified: (1) Lands suitable for cultivation of fruit, coffee, sugar, or other perennial crops, with or without irrigation; (2) lands suitable for cultivation of annual crops only; (3) wet lands, such as kale or rice lands.

The pastoral lands were classified as (1) lands not in the description of agricultural lands, but capable of carrying live stock only a part of the year, or otherwise inferior to first-class pastoral lands.

Pastoral agricultural lands were classed as lands adapted in part to pasturage and in part to cultivation. Forest lands were lands producing forest trees, but unsuitable for cultivation, and waste lands were lands not included in either of the other classes.

This act provided the following methods for the disposition of the public lands of the republic:

(1) At public auction, for cash, in parcels of not over 1,000 acres, the consent of the executive council being required before any lands could be disposed of in this manner.

(2) At public auction, upon part credit, in parcels not exceeding 600 acres, with like consent required.

(3) Without auction sale, in exchange for private lands or by way of compromise.

(4) By lease at public auction for not more than twenty-one years.

(5) By homestead leases, under which each applicant might occupy 5 acres of first-class agricultural land, 16 acres of second-class agricultural land, 1 acre of taro land, 30 acres of first-class pastoral land, 60 acres of second-class pastoral land, or 45 acres of pastoral agricultural land. Certain qualifications were prescribed for these homesteaders.

(6) Right of purchase leases, under which a qualified applicant could occupy with the privilege of purchasing, and at the end of three years and upon the fulfillment of special conditions, either 100 acres of first-class agricultural land, 200 acres of second-class agricultural land, 20 acres of taro land, 600 acres of first-class pastoral land, 1,200 acres of second-class pastoral land, or 400 acres of agricultural pastoral land.

(7) Cash freeholds, under which qualified applicants could purchase at public auction the same areas which could be acquired under the right of purchase lease system above described.

From the foregoing it will be observed that the widely differing qualities and character of the lands existing in the Hawaiian Islands and their productive capacity have been recognized by the laws of the islands, but this Department is not in possession of any information which would enable it to determine even approximately the amount of each class of land remaining yet unappropriated, and while it is believed that a less complicated system, and one which will result in permitting the citizens of Hawaii to acquire title in fee to these lands under laws similar to those in force in the United States is most desirable, no intelligent recommendations can be made on the subject until

sufficient data has been collected through a commission authorized by Congress to enable this Department to determine the amount of the respective classes of land which should be awarded to each entryman, and in the absence of such information it is not believed that the passage of the present bill would be justified.

Attention is called to the fact that section 2 of this act provides that—

The Secretary of the Interior is hereby empowered to make rules and regulations for the entry of lands to be used for homestead purposes, which said rules and regulations shall, however, provide the acreage of each homestead according to the classes of lands, which shall not include over 100 acres nor less than 1 acre per homestead.

Admitting that Congress may delegate to your Department power “to provide the acreage of each homestead according to the classes of lands” to be entered under the homestead laws, yet it must be observed that this act does not extend to these lands the homestead laws only, but does extend the “general land laws of the United States,” which may be held to include other methods of appropriation than the homestead system under which each applicant might be permitted to appropriate 160 acres, or more than Congress now intends, if the limitation of 100 acres made in this bill is to be taken as indicating such an intention.

For the reasons apparent from the foregoing this office does not feel justified at this time in recommending the passage of the proposed bill, and in the absence of further and more definite information as to the exact conditions existing in Hawaii it is not deemed wise at this time to recommend any amendments or substitutes in lieu thereof. It is my opinion, however, that when such information is obtained it will be found wise and expedient to subject all lands in Hawaii to entry under the public land laws now in force in the United States, with such restrictions and modifications thereof as local exigencies may demand. And it is further believed that these laws should be administered and enforced as to the Hawaiian lands through a register and receiver, and that office, under the immediate supervision of your Department, and not through Territorial officers, who are not in touch with and from lack of information on the subject are likely to be out of harmony with the general spirit which controls the Government in the distribution of its public domain among its citizens.

Very respectfully,

BINGER HERMANN,
Commissioner.

[S. 5882, Fifty-sixth Congress, second session.]

A BILL to extend the general land laws of the United States to the Territory of Hawaii, with rules and regulations for homestead entries by the Secretary of the Interior.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the general land laws of the United States be extended to the Territory of Hawaii.

SEC. 2. That the Secretary of the Interior is hereby empowered to make rules and regulations for the entry of lands to be used for homestead purposes, which said rules and regulations shall, however, provide the acreage of each homestead according to the classes of lands, which shall not include over one hundred acres nor less than one acre per homestead.

SEC. 3. That this act shall take effect ninety days after its enactment.

EXHIBIT 18.

TWO LETTERS FROM SENATOR HANSBROUGH, CHAIRMAN COMMITTEE ON PUBLIC LANDS, AND BILL INTRODUCED BY HIM.

UNITED STATES SENATE,
COMMITTEE ON PUBLIC LANDS,
Washington, D. C., December 20, 1900.

AMERICAN SETTLERS' ASSOCIATION,
Olaa, Hawaii.

DEAR SIR: I shall be glad to receive any information you may have and any facts concerning the public-land question in the Hawaiian Islands. The great difficulty here is to ascertain what are public lands and what are not public lands. Anything you may have on this point will be gladly received.

Very truly,

H. C. HANSBROUGH.

UNITED STATES SENATE,
COMMITTEE ON PUBLIC LANDS,
Washington, D. C., November 21, 1901.

AMERICAN SETTLERS' ASSOCIATION,
Mountain View, Hawaii.

DEAR SIR: I am in receipt of your very voluminous statements in regard to the public-land situation in Hawaiian Islands, and while I am very glad to receive all information you may have on this subject, I must say that, in view of the fact that my duties extend over other parts of the United States and pertain to many other questions of great importance, I shall be obliged to request that hereafter you put your communications in as brief and concise a form as possible.

Permit me to suggest that along with the bill you are preparing and which you are to send to me you make a brief of the argument in support thereof. Newspaper clippings are of but little value. Generally speaking they merely set forth one side of the question. If the circuit court has rendered a decision in the land cases which will shed light on the situation, I shall be glad to have the full text of the same. A good lawyer can make a brief of your case, and put every essential argument in three or four pages of typewritten matter. With your assistance along the lines above indicated, I shall be glad to cooperate in any way to bring order out of chaos with respect to the public-land system on your islands.

Very truly,

H. C. HANSBROUGH.

[S. 5334, Fifty-sixth Congress, second session.]

A BILL to extend the general land laws of the United States to the Territory of Hawaii.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the general land laws of the United States shall, from and after the passage of this act, be in full force and effect in the Territory of Hawaii.

EXHIBIT 19.

DUPLICATE OF S. 1344, INTRODUCED BY SENATOR MASON AND REFERRED TO THE COMMITTEE ON PACIFIC ISLANDS, ETC.

[H. R. 3090, Fifty-seventh Congress, first session.]

A Bill To provide special land laws for the Territory of Hawaii.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the public lands ceded to the United States by joint resolution approved July seventh, eighteen hundred and ninety-eight, within the Territory of Hawaii are hereby divided into four classes, namely:

Lands of the first class shall embrace all city and town lots, streets, alleys, parks, wharves, landings, and suburban lands within a distance of two miles from the incorporated limits of any city or town of five hundred inhabitants or upward. In cases where such incorporated limits are not established and defined, the Secretary of the Interior is hereby empowered, authorized, and directed to select and set apart, within one year from and after the approval of this act, such public lands as he may consider and deem to be of a suburban nature, and the President is authorized to reserve from the public lands, whether surveyed or unsurveyed, town sites on the shores of harbors or any natural or prospective centers of population. When so selected, set apart, or reserved, they shall thereafter be embraced in lands of the first class, subject to further legislation by Congress. Lands of the second class shall embrace all public lands which have been cultivated or partly cultivated, while under lease or otherwise, and not exceeding one thousand feet above sea level; also all wet lands, known as kalo or taro lands, and rice lands not exceeding one thousand feet elevation above sea level. Lands of the third class shall embrace all other public lands, at any elevation above sea level, agricultural, pastoral, forest, and waste land on all the principal islands which may in any manner be adapted to domestic use and habitation. Lands of the fourth class shall embrace all public lands on all the small outlying islands, reefs, and shoals which are not capable of domestic use and habitation.

SEC. 2. That the Secretary of the Interior is charged with the supervision of public business relating to all public lands ceded to the United States within the Territory of Hawaii, and shall exercise all the powers and duties conferred upon him by the laws of the United States relating to the public domain in the Territory of Hawaii, as elsewhere in the United States, not contrary to the provisions of this act.

SEC. 3. That the Commissioner of the General Land Office shall perform, under direction of the Secretary of the Interior, all executive duties appertaining to the surveying and disposition of the public lands of the United States in the Territory of Hawaii, or in any wise respecting such public lands, and also such as relate to private claims of land, and the issuing of patents for all grants of land by the Government within the Territory of Hawaii, and shall exercise all the powers and duties conferred upon him by the laws of the United States relating to the public domain in the Territory of Hawaii, as

where in the United States, not contrary to the provisions of this act. Jurisdiction over the public lands in the Territory of Hawaii is hereby expressly conferred upon the Land Department of the United States.

SEC. 4. That the Territory of Hawaii shall constitute one surveyor-general's district, the surveyor-general's office to be located at the city of Hilo, on the island of Hawaii. There shall be appointed by the President, by and with the advice and consent of the Senate, one surveyor-general for the district of Hawaii, whose salary shall be four thousand five hundred dollars per annum, payable quarterly by the United States, and whose powers and duties shall be the same as provided by the laws of the United States in other districts, subject to the supervision of the Secretary of the Interior and under direction of the Commissioner of the General Land Office, in conformity with the provisions of this act.

SEC. 5. That the President is hereby authorized to establish two public land districts and two public land offices within the Territory of Hawaii, as follows:

First. A United States land office shall be established at Hilo, on the island of Hawaii.

Second. A United States land office shall be established at Honolulu, on the island of Oahu.

The Hilo land district shall embrace the island of Hawaii only. The Honolulu land district shall embrace all the other islands in the Territory of Hawaii.

The President shall appoint, by and with the advice and consent of the Senate, registers and receivers for each of the land districts hereby established, whose salary shall each be three thousand dollars per annum, payable quarterly by the United States, and whose powers and duties shall be the same as registers and receivers in other land districts of the United States as by law provided, including such additional duties provided by this act, and which shall include the completion of all unfinished business relating to the public lands within their respective districts at the date of the approval of this act, and subject to the supervision of the Secretary of the Interior and under the direction of the Commissioner of the General Land Office.

All fees and public moneys collected by such registers and receivers shall be paid monthly to the Secretary of the Treasury, pursuant to his instructions, and duplicate accounts thereof shall be transmitted to the Commissioner of the General Land Office.

The President may, whenever he deems it advisable, consolidate such land districts and land offices as may best subserve the public interests.

SEC. 6. That lands of the first class shall be selected, located, described, listed, and reported to the President, under direction of the Secretary of the Interior, for further action by Congress. Until so settled upon, the receiver of each land district shall, within his district, collect and transmit monthly to the Secretary of the Treasury, pursuant to his instructions, all rents and profits arising under any existing lease or legal occupation of such public property, buildings, and grounds used for public purposes excepted, and shall transmit duplicate accounts thereof to the Commissioner of the General Land Office.

No person shall be permitted to settle upon, occupy, or enter any of

said lands of the first class until further action shall be taken by Congress in which the manner of disposition thereof shall be defined.

SEC. 7. That lands of the second class, whether under lease or otherwise occupied, shall be surveyed according to the township system whenever the same is practicable, and two rods in width along each side of all section and quarter-section lines in lands of the second class upon approval of such survey by the Commissioner of the General Land Office, shall become public roads.

Whenever survey according to the township system is not practicable such lands may be surveyed into lots containing as nearly forty acres as may be, which shall be properly numbered and described, with convenient roads not exceeding four rods wide nor less than two rods wide and upon grade not exceeding twelve per cent, and in such manner that each lot shall have a reasonable frontage on such road. Upon approval of such survey by the Commissioner of the General Land Office, all such roads, together with all roads heretofore established, shall become the public property of the Territory of Hawaii without further action, for use as public highways only, and subject to the laws of the Territory of Hawaii relating to public highways. The locating and establishing of such roads, however, shall not estop the Territory of Hawaii or any municipal corporation thereof from locating and establishing other public highways by due process of law and on payment to any entryman or owner of any lands acquired under the provisions of this act as provided by law.

Public lands of the second class shall not be subject to settlement and entry except in the manner hereinafter prescribed in this section. Whenever twenty thousand acres or more of the second-class lands shall have been surveyed and such survey approved as provided by law, and all leases thereon shall have expired, it shall be disposed of in the following manner:

The President shall issue a proclamation, giving at least three months' notice of such opening and specifically describing by township, section, lot, block, or tract, as the case may be, all lands so opened by such proclamation, and to avoid the contests and conflicting claims which have heretofore resulted from opening similar public lands to settlement and entry the President's proclamation shall prescribe the manner in which these lands may be settled upon, occupied, and entered by persons entitled thereto who possess the qualifications provided in this act.

Prior to the date of opening, as set in the President's proclamation, any person intending to apply for any of the lands of the second class to be so opened shall appear personally at the local land office in the district in which he intends to enter and submit proof of his qualifications to enter such lands. He shall not have another application pending in any other land district; his application shall be in his true name and the rights thereunder shall not be transferable.

No person shall be permitted to settle upon, occupy, or enter any of the said lands of the second class, except as prescribed in said proclamation, until after the expiration of sixty days from the time when the same are opened to settlement and entry, and then only upon such lands of the second class as shall have been described and included in such proclamation. Any person qualified, who shall be unsuccessful in obtaining a homestead at such opening, may again make application when other lands are duly opened to settlement and entry.

The President shall thereafter, from time to time, in his discretion and in the same manner, open to settlement and entry such other lands of the second class as shall have been surveyed and prepared for such disposal.

For all lands of the second class the filing fee to be required of and paid by the entryman shall be at the rate of one dollar per acre or any fraction of an acre. Upon making final proof there shall be paid by the entryman, in addition to said filing fee, the further sum of five dollars per acre.

No person shall be permitted to enter more than forty acres of land of the second class, which shall be in contiguous form, conforming to the lines of survey: *Provided, however,* That if any lot or subdivision shall contain more than forty and less than fifty acres the applicant shall be permitted to enter the whole of such lot or subdivision, or if two or more lots or subdivisions lying in contiguous form and in one body shall altogether contain less than fifty acres, then all such lots may be embraced in one entry upon the entryman paying at the time of entry one dollar per acre or fraction of an acre and at the time of making final proof the further sum of five dollars per acre for such excess.

Any entry made for forty acres, more or less, of lands of the second class shall exhaust the homestead right of the applicant, who shall thereafter be prohibited from making any entry for lands of the second or third class.

SEC. 8. That all lands of the third class upon which leases shall have expired shall, from and after the date of the approval of this act, be subject to settlement, and entry thereof may be made when the same shall have been surveyed and such survey approved by the Commissioner of the General Land Office, and when the land offices herein provided for shall have been established and opened for business.

Such lands shall be surveyed as speedily as possible, whether under lease or otherwise occupied, according to the township system, whenever practicable, and such townships shall be subdivided into sections containing six hundred and forty acres, as nearly as may be; such sections shall be further subdivided until forty acres, as nearly as may be, which shall constitute the smallest legal subdivision.

Whenever survey according to the township system is not practicable, then such lands may be surveyed into lots containing forty acres, as nearly as may be, and as nearly square as the nature of the ground will permit. Such lots shall be properly numbered and described in such manner as the Commissioner of the General Land Office may direct.

When survey is made in irregular form, roads not exceeding four rods and not less than three rods in width shall be located, approximately, one mile apart each way, conforming as nearly as practicable to section lines and upon a grade, if possible, not exceeding twelve per cent. Such roads, together with two rods in width on and along each side of all section lines in regular survey, shall, upon the approval of such survey by the Commissioner of the General Land Office, become the public property of the Territory of Hawaii in the same manner and for the same purposes as provided in section seven of this act.

For all lands of the third class the filing fee to be required of and paid by the entryman shall be at the rate of twenty-five cents per acre or fraction of an acre. In addition thereto, at the time of making

final proof, the entryman shall pay for the land embraced in his entry at the rate of one dollar and twenty-five cents per acre. No person shall be permitted to enter more than one hundred and sixty acres of lands of the third class, which shall be in contiguous form and located in one body, conforming to the lines of survey: *Provided, however*, That if any number of such lots or subdivisions shall contain an area not exceeding one hundred and seventy acres, all such lots or subdivisions may be embraced in one entry upon payment by the entryman at the time of filing of twenty-five cents per acre or fraction thereof and at the time of making final proof the additional sum of one dollar and twenty-five cents per acre for such excess. Any entry made for one hundred and sixty acres, more or less, of lands of the third class shall exhaust the homestead right of the applicant, who shall thereafter be prohibited from making any entry for lands of the second or third class.

The settlers who located and settled upon public lands herein designated as third-class lands prior to April thirtieth, nineteen hundred and who have made substantial improvements thereon, shall have a preference right of ninety days after the land offices herein provided for shall have been established and duly opened for business in which to perfect entry for the lands on which they settled, not exceeding one hundred and sixty acres, conforming to the lines of such survey, as shall be made or approved by the Commissioner of the General Land Office. Such entries shall in all respects conform to the requirement of this act as to lands of the third class, and such settlers shall be allowed to contest all entries in conflict herewith; and settlers upon any of the public lands herein designated as lands of the third class who have entered such lands through the commissioner of public land for the territory of Hawaii, and who are residing upon the land so entered at the date of the approval of this act, which fact as to residence shall be proven to the satisfaction of the register and receive by not less than two credible and disinterested witnesses and in the absence of any adverse rights, may transmute such entries to homestead entries under the provisions of this act: *Provided, however*, That in cases where such entry was made by a married woman the transmuted entry shall be made in the name of her husband, as the head of the family, and in cases where both husband and wife made such entry only the land embraced in the entry made by the husband may be transmuted. Such transmutation shall be made in accordance with such rules as the Secretary of the Interior may direct, and the applicant shall possess all the qualifications required by this act to enter lands of the third class: *Provided*, That applicants who have declared their intentions to become citizens of the United States as by law provided, shall be allowed to transmute and perfect title when they become citizens. In cases of transmutation credit shall be allowed for all payments made to the Territory of Hawaii to be deducted from the amount due at the time of making final proof and upon return of the vouchers for said payments. All entries may be contested, for any cause, to clear the record.

SEC. 9. That any applicant for public lands of either the second or third class shall not be the owner, holder, or lessee of any of the other lands, either public or private, in the Territory of Hawaii or in any State or Territory of the United States, either in his own or his wife's name, except one lot in any city or town not exceeding one acre, but

having entered any public land or having acquired title thereto in the Hawaiian Islands or in any State or Territory of the United States prior to July seventh, eighteen hundred and ninety-eight, shall not disqualify such applicant to enter any public land in the Territory of Hawaii under the provisions of this act if the land so entered or title acquired previous to July seventh, eighteen hundred and ninety-eight, is not owned or held by the applicant in his own or in his wife's name at the time of making application for public land under this act.

Any person having entered public land in the Territory of Hawaii under any provision of law, in his own or in his wife's name, subsequent to July seventh, eighteen hundred and ninety-eight, shall be deemed to have exhausted his homestead right and he shall be prohibited from making a homestead entry under this act, except in case of transmutation of entry as provided in section eight or upon restoration of such right.

For good cause shown, and upon satisfactory proof, the Land Department may restore such homestead right, but each application for such restoration shall be made separately at the local land office. No person shall enter into any partnership, contract, or agreement concerning any application, entry, or title sought to be acquired from the United States, and any such partnership, contract, or agreement shall be void; neither shall entryman lease, assign, or transfer to any other person or corporation, nor incorporate as any part of the assets of any stock company, corporation, or partnership, any land entered under the provisions of this act. Any or all of such acts shall be void, and upon satisfactory proof of any violation of this section, which related only to lands of the second and third classes, such entry shall be cancelled, and all money paid thereof shall be forfeited to the United States for the benefit of the inhabitants of the Hawaiian Islands, in the same manner as money arising from the disposal of public lands in the Territory of Hawaii, as provided by law, and the offending parties shall be liable to punishment under the laws of the United States concerning fraudulent entry of public lands.

SEC. 10. That every person who is the head of a family, or a single person who has arrived at the age of twenty-one years, and is a citizen of the United States shall be entitled to enter forty acres or less quantity of second-class lands, or shall be entitled to enter one hundred and sixty acres or less quantity of third-class lands, not otherwise appropriated in the Territory of Hawaii, to be contiguous in form and located in one body, in conformity to the legal subdivisions and approved survey of the public lands as provided in this act, after the same have been surveyed and approved. But at the time of entry he or she shall not be the owner, holder, or lessee of any other land in the Territory of Hawaii or in any other State or Territory of the United States except one lot, in any city or town, not exceeding one acre, and the owning or holding of such land in the wife's name of an entryman shall operate as if held in his own name.

SEC. 11. That the person applying for the benefit of the preceding section shall, upon application to the register and receiver of the land office in which he is about to make such entry, make affidavit before the register and receiver, or either of them, that he is the head of a family, or that he or she is a single person twenty-one years or more of age, or has performed service in the Army or Navy of the United States; that he or she is a citizen of the United States, and if a natu-

ralized citizen, he or she shall produce documentary evidence of such naturalization, but in case of loss as to such record evidence supplementary evidence may be produced, by affidavit, to the satisfaction of the register and receiver; that such application is made for his or her exclusive use and benefit, and that his or her entry is made for the purpose of actual settlement, cultivation, and residence, to the exclusion of a home elsewhere, and that he or she does not intend to reside at any other place than on the land applied for; that he or she will not lease, assign, or transfer such land to any other person or corporation, nor incorporate the same as any part of the assets of any stock company, corporation, or partnership. Upon filing such affidavit with the register and receiver and on payment of the filing fee he or she shall thereupon be permitted to enter the amount of land specified in either the second or third class, including excess, if any, and in the manner provided for in this act.

SEC. 12. That no certificate, however, shall be given or patent issued therefor until the expiration of five years from the date of such entry, and if at the expiration of such time, or within two years thereafter, the person making such entry, or if he be dead his widow, or in case of her death his heirs or devisee, or in the case of a widow making such entry her heirs or devisee, in case of her death, proves, by two credible disinterested witnesses, that he, she, or they have resided upon the land embraced in the entry and cultivated the same for the term of five years immediately succeeding the time of filing the affidavit of entry, and that at least one-fourth of the land embraced therein has been reduced to cultivation, and makes affidavit that no part of such land has been alienated, except as provided in section twenty-two hundred and eighty-eight of the Revised Statutes, and that he, she, or they will bear true allegiance to the Government of the United States; then in such case he, she, or they, if at the time of making said entry were, and at the time of making final proof are, citizens of the United States, shall be entitled to a patent as in other cases provided by law. But in no case shall a commutation of such entry be allowed otherwise than is provided in section twenty-two hundred and ninety-two of the Revised Statutes, providing for the sale of such land in case of the death of both father and mother leaving an infant child or children, and section twenty-three hundred and seventeen of the Revised Statutes, relating to the planting and cultivation of timber upon homesteads. Neither shall the rights of honorably discharged soldiers or sailors of the late civil war, as defined or described in sections twenty-three hundred and four and twenty-three hundred and five of the Revised Statutes, be abridged; but section twenty-three hundred and one of the Revised Statutes shall not apply to public lands in the Territory of Hawaii under the provisions of this act. Neither shall any of such public lands of the second and third classes be disposed of in any other manner than according to the terms and stipulations contained in this act.

SEC. 13. Every person having made an entry of public land of the second or third class under this act must within three months after such entry establish his actual residence in a house upon the land so entered and by removing thereunto all his household goods and other personal property, and he must thereafter, together with his family, if any, actually and continuously reside upon and cultivate the land for the term of five years. Any change of residence therefrom for more

than sixty days after such residence has been established shall forfeit his right to such entry, and when upon due notice to the entryman it is proven to the satisfaction of the register and receiver of the land office that the person having made such entry has failed to establish his residence thereon within three months from the date of entry, or has failed to maintain his residence thereon after three months from the date of such entry, or has abandoned his residence thereon for more than sixty days, or that he has established and maintains a residence at any place other than on the land embraced in his entry, then and in any such event the land so entered shall revert to the Government of the United States, and such entry may be canceled in the same manner as under the general homestead laws of the United States: *Provided, however,* That the act of Congress approved March third, eighteen hundred and eighty-one, relating to "climatic reasons," shall not apply to the entry of any public lands in the Territory of Hawaii.

All the laws of the United States governing homesteads and generally known as the United States homestead laws, except as in this act specifically provided, are hereby extended to and cover all public lands of the second and third classes of lands under this act in the Territory of Hawaii, together with all rules, regulations, and decisions thereunder, when not inapplicable, as are in force at the date of the approval of this act.

SEC. 14. That the term "residence" under any entry of public land herein designated as second or third class in the Territory of Hawaii, existing at the date of the approval of this act, shall be construed the same as in the preceding section, except as to the time of establishing such residence after entry; but when established, a change of residence for more than sixty days from the tract, or failure to establish residence within the time required under such entry, or maintenance of a residence at any other place than on the tract entered, shall forfeit the right of the entryman thereunto, and the entry may be canceled in the same manner and under the same rules as provided in the preceding section.

SEC. 15. That any survey of public lands in the Territory of Hawaii heretofore made, although not ordered or directed by the United States Government, and which may not be in conformity to the plan of survey as in this act provided, shall be examined by the surveyor-general for the district of Hawaii, and a complete report thereof shall be made to the Commissioner of the General Land Office, who may, upon examination, approve or reject the same or any part of such survey. Any such survey, upon approval of the Commissioner of the General Land Office, shall thereupon be an official survey of the United States; but in case all or any surveys are rejected by the Commissioner new surveys shall be made without reference to such rejected survey.

SEC. 16. That all patents for public land in the Territory of Hawaii heretofore issued subsequent to July seventh, eighteen hundred and ninety-eight, shall be reported by the registers and receivers in their respective land districts to the Commissioner of the General Land Office for examination and issuance by the United States. In such examination by the Land Department the patents issued by the Territorial officers, or officers of the existing Government of Hawaii, shall be construed as receivers' final receipts, conferring the same rights and subject to the same limitations as receivers' final receipts as in other cases of the disposal of the public domain of the United States. Upon

examination and approval by the Land Department, in each case, patent shall issue from the Government of the United States to the person or persons entitled thereto.

SEC. 17. That all leasing of public lands of any class in the Territory of Hawaii shall cease and be discontinued from and after the approval of this act: *Provided*, That all existing leases in conformity with law shall not be impaired until the expiration thereof, but no tenancy at will shall exist.

SEC. 18. That the registers and receivers, in their respective districts, shall collect all rents, profits, and royalties arising from the existing leases of public lands in the Territory of Hawaii, and shall transmit the same monthly to the Secretary of the Treasury pursuant to his instructions, and transmit a duplicate account thereof to the Commissioner of the General Land Office.

SEC. 19. That from all funds arising from sale, lease, forfeiture, or other disposal of the public lands in the Territory of Hawaii the Government of the United States shall be reimbursed for all money advanced by such part of any appropriation as shall have been expended for survey and local administration of such public lands, including salaries of local officers, and all surplus moneys arising from such disposition shall be semiannually turned over to the treasurer of the Territory of Hawaii by the Secretary of the Treasury, upon direction by the Secretary of the Interior, which funds shall be appropriated by the laws of the government of the Territory of Hawaii and applied to such uses and purposes for the benefit of the inhabitants of the Territory of Hawaii as are consistent with the joint resolution of annexation, approved July seventh, eighteen hundred and ninety-eight: *Provided*, That there shall be excepted from the provisions of this section all lands heretofore or which may hereafter be set apart or reserved by Executive order or orders by the President of the United States.

SEC. 20. That sections seventy-three, seventy-eight, and such part or parts of section eighty as relate to appointment of commissioner of public lands and surveyor, of the act of Congress approved April thirtieth, nineteen hundred, entitled "An act to provide a government for the Territory of Hawaii," are hereby repealed, and the offices of commissioner of public lands and surveyor are hereby abolished.

SEC. 21. That from and after the date of the approval of this act all field notes, maps, records, and other papers appertaining to land entries and titles, in any manner connected with the administration of the public lands or survey thereof, in the hands of the commissioner of public lands or surveyor in the Territory of Hawaii, shall be subject to the order of the Secretary of the Interior.

SEC. 22. That the Secretary of the Interior may direct the location of sites for storage reservoirs upon any public land, in contemplation of the future needs of irrigation or other public purposes, and when so directed the Commissioner of the General Land Office shall direct the surveyor-general for the district of Hawaii to survey and locate such site or sites. When so ordered by the Secretary of the Interior, such sites or proposed sites shall not be subject to settlement or entry unless afterwards abandoned by order of the Secretary of the Interior. When surveyed and definitely located, such sites shall be set apart and reserved for public use by Executive order of the Presi-

ent, and such public use shall be defined and controlled by further action of Congress.

No private franchise for the use or conveyance of water upon or over the public lands in the Territory of Hawaii shall be granted to any person or corporation except by act of Congress.

SEC. 23. That transfers and assignments of any entry of public lands shall be prohibited, and any attempted transfer or assignment thereof, if executed in writing, shall be construed as a relinquishment of the land entered to the Government of the United States, and upon proof thereof to the register and receiver the entry shall be canceled and the transferee shall acquire no rights by reason of such transfer or assignment.

SEC. 24. That the Secretary of the Interior shall cause complete information to be obtained as to public lands of the fourth class, which shall be by him reported to the President for further action by Congress, pending which no private rights shall attach to such lands until the manner of disposition or management shall be further defined by act of Congress.

SEC. 25. That the Secretary of the Interior is hereby authorized and empowered to promulgate such rules and regulations as may be necessary to carry this act into effect, and may change existing rules relating to time of service of notices and appeals as he may deem necessary to comport with distance, modes of travel, and transmission of documents.

SEC. 26. That the Secretary of the Interior is hereby directed to cause twenty-five thousand copies of this act to be printed for distribution by the Public Land Department.

SEC. 27. That the sum of two hundred and fifty thousand dollars, or as much thereof as may be necessary, is hereby appropriated, out of any money in the Treasury not otherwise appropriated, to be immediately available, for the purpose of carrying this act into effect.

SEC. 28. That this act shall take effect upon its approval by the President.

EXHIBIT 20.

[Bulletin, August 8, 1901.]

BOYD ON LAND LEASES—LAND COMMISSIONER SAYS HOMESTEADS HAVE THE LEAD—SEVERAL THOUSAND ACRES OF LAND USELESS FOR SMALL FARMS WILL NOW BECOME SOURCE OF REVENUE.

Land Commissioner E. S. Boyd, who conceives his first official duty to be that of guarding the public domain of Hawaii in the interest of the poor man who may wish to support a family upon a small homestead and lay aside a competence for his old age by tilling the soil, says that the confirmation of Attorney-General E. P. Dole's opinion with reference to five-year land leases to corporations of more than 1,000 acres will not interfere with his policy.

The confirmation by the Attorney-General of the United States of Mr. Dole's position does not mean that an era of discrimination against the small farmer in Hawaii will be begun. Good homesteading propositions in our public domain will still be utilized. In fact all leases to be made by the government under this construction of the organic act will, I think, contain a clause providing that at any time the government sees fit to take the land up for homesteading purposes the lease shall become null and void.

On the other hand, the construction of the law as announced will be very advantageous to the Territory in its present financial straits. We will be enabled to put up at auction for lease to sugar corporations large tracts of waste lands not suitable for small farming. I think we have now in the office applications for at least 20,000 acres, which will command a rental at the minimum of \$5 or \$6 per acre. Within the course of a month or so these leases will be put up at auction and a very net sum in revenue derived. The term of five years is short, and in some instances where the land might be available for subdivision into homesteads, we may make the term even shorter.

When it is considered that it takes five or six years to properly open up a large tract for homestead purposes, it will be seen how the leasing of large tracts will not interfere with homesteading, but will, at the same time, afford a source of revenue. The lands which would otherwise remain idle, while surveys, preliminary roads, and trails were being made, will now be yielding a public benefit.

Later on, when large tracts, now under lease and cultivation by the large plantations, revert to the government, many considerations will enter into the matter how they shall be disposed of.

The leasing of lands under this ruling calls for the exercise of careful and honest official administration of the right. If this is done, the right will prove a valuable one to the government here and will in no way interfere with the policy of homesteading.

[Republican, May 7, 1901.]

Some pertinent questions regarding some peculiar land transaction are presented in this morning's news columns. This is not a matter for inquiry by the legislature of the acting commissioner of public lands. The facts are there, plain, as they were transmitted to Congress by the retired commissioner. It is an explanation from Governor Dole that will be wanted, as all the land transactions were passed through the alembics of the executive council. Should the memoranda of both houses of the legislature receive the attention from President McKinley which it assuredly will, the probability is, however, that the Territorial legislature will not require to demand the explanation for itself. The public document from which the data are derived will undoubtedly be among the references utilized in an investigation of Hawaiian land matters.

[Republican, June 1, 1901.]

DENSITY OF POPULATION AS SHOWN BY CENSUS—RHODE ISLAND HEADS LIST OF THICKLY SETTLED STATES—MASSACHUSETTS SECOND ON THE LIST—HAWAII HAS 23 PERSONS TO THE SQUARE MILE—FIRST HALF OF FINAL STATISTICS ISSUED.

WASHINGTON, *May 31.*

The Director of the Census to-day issued the first half of the final census report on population, showing the aggregate population of the United States by States and Territories, the density of Alaska and of the Hawaiian Islands, the number of Representatives apportioned under the recent act of Congress, and also the population of the States and Territories by minor civil divisions, the population of cities having 25,000 inhabitants or more in 1900, the increase of population in the same, and the populations of incorporated cities, towns, villages, and boroughs in the year 1900.

This report is issued in the form of a monograph and comprises about 500 pages. The other portion of the final report on population

will be issued during the early fall, putting the entire volume in the hands of the public at least four years in advance of any previous census.

Most of the features of the volumes have received attention from the press heretofore. It shows that—excluding the District of Columbia, which is in effect a municipality—Rhode Island, with 407 inhabitants to the square mile in 1900, is the most densely settled State in the United States, while Massachusetts comes next, with not quite 349 inhabitants to the square mile. New Jersey, with little more than 250 inhabitants to the square mile, is the third State in point of density of population, while Connecticut, with somewhat more than 187 inhabitants to the square mile, takes fourth place. Four other States had more than 100 inhabitants to the square mile in 1900, namely: New York, with 152.6 inhabitants; Pennsylvania, with 140.1 inhabitants; Maryland, with 120.5 inhabitants, and Ohio, with 102 inhabitants to the square mile.

Alaska has on the average but one-tenth of 1 person to the square mile. Wyoming has not quite 1 inhabitant to the square mile, Nevada only four-tenths of 1 person to the square mile, while Arizona, New Mexico, Montana, and Idaho have less than 2 persons to the square mile.

The newly acquired Territory of Hawaii shows an average density of population of not quite 24 persons, ranking in this respect between Maine, with 23.2 persons, and Arkansas, with 24.7 persons to the square mile.

EXHIBIT 21.

LEASES OF PUBLIC LANDS IN THE TERRITORY OF HAWAII WHICH HAVE EXPIRED SINCE ANNEXATION, ALSO LEASES WHICH CAN BE CANCELED BY THE GOVERNMENT AT ANY TIME, AS THE TENANTS ARE HOLDING AS TENANTS AT WILL, TOGETHER WITH LEASES WHICH WILL EXPIRE IN 1902.

	Acrea.
1898	925
1899	4, 107
1900	6, 210
1901	92, 575
To which add tenants at will, which may be canceled any time	248, 233
Total	352, 060
1902. Leases will expire	19, 295
Total	371, 345

What has become of these lands? Are they available for settlement? If not, why not? Who is responsible?

Yours, respectfully,

AMERICAN SETTLERS' ASSOCIATION.

MOUNTAIN VIEW, HAWAII, *September 20, 1902.*

The SUBCOMMITTEE OF THE SENATE

ON PACIFIC ISLANDS AND PORTO RICO.

"That no corporation, domestic or foreign, shall acquire and hold real estate in Hawaii in excess of 1,000 acres, and all real estate acquired and held by such corporation or association contrary hereto shall be forfeited and escheat to the United States, but existing vested rights in real estate shall not be impaired;" and

Whereas E. P. Dole, attorney-general of this Territory, has recently rendered an opinion that leases of public land by corporations in excess of 1,000 acres, or addition to the land held in fee by such corporation by the above mentioned laws; and

Whereas there is an evident desire on the part of public officials of this Territory to remove all obstacles and allow corporations to increase their already too large holdings, and thereby monopolize all the agricultural lands to the great loss and detriment of the citizens of this Territory; and

Whereas the governor has, without authority of law, held regular and secret conferences with the heads of the (Territorial) departments under him since the creation of this Territory, and has denied to the house of representatives access to, or copies of the records of the proceedings thereof; and

Whereas it is a matter of common report that such reports will show that the governor in such council or conference has favorably considered propositions yielding valuable concessions and exchanging of lands and privileges in the Territory monopolies, corporations, and private landed interests, to the manifest detriment of "the homestead settlement system," long recognized as fundamental to the stability of a state, and which, if adapted to our local conditions of soil, etc., would create in the near future an increasing proportion of small landholders, who would naturally become the main spring of the progress and proper development of this Territory.

Senator Kalaukalani moved the adoption of the resolution.

Seconded by Senator Kahilina, and carried.

For the above resolution, as originally introduced, see house journal, page 326. As amended, see page 354. As passed, see page 49. The House journal may be found in the office of the Secretary of the Interior at Washington, D. C., as required by law.

For other action as to appropriations concerning public lands, see house journal, pages 40, 719, 721, 749, legislature of Hawaii, 1901.

EXHIBIT 24.

[The Hilo Tribune, published every Saturday, W. H. Smith, editor, Saturday, August 18, 1900.]

THE SQUATTERS GO AT IT—ATTORNEYS IN WASHINGTON WILL BLOCK SALE OF LAND—PROPERTY OF THE UNITED STATES—COMMISSIONER EXCEEDS HIS AUTHORITY—REASONS GIVEN—CAN NOT BE GRANTED FOR GOVERNMENT NOR GRANTOR TO OTHERS.

The squatters of Olan, known as the American Settlers' Union, have not been sleeping so far as the question of their rights to their claim in Olan are concerned, and Mr. Ryan, the president of the association, went down to Honolulu by yesterday's Kinau to present to Commissioner J. F. Brown a notice of application for hearing in the Federal courts as to questions of law and fact for the sale or otherwise final disposition of any portion of the public domain of the United States in the Territory of Hawaii subsequent to June 14, 1900, and up to the present date. The contestants are Fred R. Giddings, M. Porter, I. Peyser, O. T. Shipman, H. A. Gerlach, W. A. Carpenter, H. M. Giddings, R. D. Junkin, J. N. Brown, E. P. Geaney, T. J. William, F. E. Hime, G. J. Giddings, E. L. Radcliffe, N. Russel, T. J. Ryan, J. E. Staples, Louis Horner, J. L. McComber, E. A. Horan, and A. J. McKenzie. The papers are drawn by Copp & Luckett, attorneys.

nos. 624 F street, Washington, D. C., who are among the best known legal authorities on Government land matters in the United States.

The papers are dated at the Department of the Interior, Washington, D. C., before the honorable Commissioner of the General Land Office, and directed to J. F. Brown, as follows:

You are hereby notified that on or before the 20th day of September, A. D. 1900, there will be filed in the Interior Department of the United States, before the Commissioner of the General Land Office, in the city of Washington, D. C., an application and motion for hearing as to questions of law and fact touching upon your legal authority as commissioner of public lands for the Territory of Hawaii, as provided by the organic act, approved April 30, 1900, and questioning your authority as such commissioner to offer for sale, or make other final disposition, under any agreement or conditions whatever, of any portion of the public domain of the United States in the Territory of Hawaii. And that on said 20th day of September, A. D. 1900, or as soon thereafter as counsel may be heard, the protestants herein named, by their attorneys, will submit to the honorable Commissioner of the General Land Office, at Washington, D. C., such evidence and argument as may be admissible on all matters herein referred to. That at such time and place of hearing as may be designated by the Commissioner of the General Land Office, the following specified errors on your part, as commissioner of public lands for the Territory of Hawaii, will be presented and to him submitted.

Here follow ten counts of error in the execution of the duties of his office by the said commissioner, comprising errors as follows: In unauthorized publication of sale (inasmuch as such publication was without proclamation by the President of the United States as required by law); in actual exposure for sale without act of Congress therefor; in fixing prices per acre, in some cases more, in others less, than the price fixed by law; in offering such lands for sale on less than three months' notice; in restricting the purchaser to only 50 acres instead of the 160 acres as allowed by law; in offering to sell the public lands of Hawaii at all, for the reason that they have been transferred to the United States, and their title is in the United States, and that they are, therefore, in contemplation of law unsurveyed lands and can not be disposed of; that any attempt to dispose of said lands is in violation of the Executive order of President McKinley of the 11th day of September, 1899, which is now in full force and effect; that conditions of payment and residence, concerning the disposition of said lands, made by the commissioner, are without the authority of United States law; that the said commissioner of public lands, J. F. Brown, erred in advertising these lands for sale, on the ground that no Territory of the United States possesses the sovereign power to receive as grantee, and to grant and transfer as grantor, any portion of the public domain of the United States within the boundary of such Territory until such Territory is fully admitted into the United States as a State; and that the commissioner erred in exceeding his authority, for the reason that it is against public policy and not conducive to the public welfare to proceed with such agreements and dispositions without the authority of the United States and complete instruction.

A similar notice is issued by the same parties, through the same attorneys, relative to the sale of leases of public lands within the domain of the United States, the eighth count of which is—

That the said J. F. Brown, commissioner, erred in offering to lease at one time, in one body, and to any one person, such a vast area of public domain of the United States, to wit, 25,000 acres (on the island of Maui), the same being against public policy, not conducive to the public welfare, subversive to the rights of citizens, and detrimental to the best interests of the Territory of Hawaii and of the United States.

"We are going to bring this matter to an issue right here and now said Mr. Ryan, "and find out whether any coterie or compact cause the public lands of the United States to be disposed of for the particular benefit, without any reference to constitutional and statutory law upon the matter. We have no kick against legitimate plantation enterprise and progress, but when plantation interests try to control all the forest lands that they don't own and can't use as a reservation to insure them water heads and water supply, we do kick, and we demand that when these lands are disposed of it shall be under the straight and legitimate land laws of the United States."

J. F. Brown, commissioner of public lands, returned from this island to Honolulu without coming to Hilo, although there were a good many land matters upon which Land Agent Baldwin wished to consult him. The fact that there is but one commissioner now instead of three, formerly, prevents Mr. Brown from being away from Honolulu for any great length of time.

The question of the coming or not coming of the commissioner will, however, have nothing to do with the sale of the Olaa lands, as advertised in September, and Mr. Baldwin has no doubt that the "squatters" will have to pack up their household goods and get, unless they are willing to buy in at the auction, which will probably give them the land at a lower price than they can ever get it afterwards. He says:
